AI ACADEMY · LEVEL 3 · GRADE 8 · WEEK 29 · STUDENT LESSON

Copyright and Provenance

Learn to understand, design, build, test and explain AI systems responsibly.

Project: Verified Study Buddy

THE CONNECTED WEEK

Trace the origin. Match the use. Preserve the conditions.

Build a provenance ledger without treating credit or generated origin as automatic permission.

Keep one habit: Ledger fields → Fern/Moss crop trace → six mixed assets → missing terms → independent quotation check.

MAIN LESSON · SECTION 1

Can this source be used in this exact output?

> Trace origin, edits, attribution and the supplied permission conditions separately.

Your learning goals

I can explain the **mechanism** and terminology of **copyright** and permitted sources.

I can apply the stated procedure to a new case with a traceable result.

I can identify an assumption or limitation and design a revealing follow-up.

Recall sources and copied locations

- Close your notes first. A rough first answer helps us choose the right starting point; it is not a score for your ability.

- Recall Privacy by Design: know where material came from, why it is used and where copies go. Provenance records explain a work's origin and changes; permitted reuse must be checked separately.

Your end goal

By the end, I can explain **copyright** and **provenance** using a traced example and a stated limitation.

▼ Earlier wording, alternatives and picture transcripts

Your learning target

Remember before reading

Without opening the old lesson, explain one key idea from Privacy by Design. Give an example and a mistake that the idea helps you avoid.

Without opening the old lesson, explain one key idea from Evaluation Sets. Give an example and a mistake that the idea helps you avoid.

Without opening the old lesson, explain one key idea from Block to Python Bridge. Give an example and a mistake that the idea helps you avoid.

After trying, check the relevant lesson or ask your teacher. Change the part of your explanation that the **evidence** shows was wrong.

Week 29: **Copyright** and **Provenance**

Responsible creation distinguishes source material, transformation, **attribution**, and generated content.

CREATOR MISSION

Create a **provenance** record for a mixed-media **output**.

Creator name and date:

> **Write or draw your reasoning and evidence.**

Readiness for the connected explanation

This week’s end goal

MAIN LESSON · SECTION 2

Give origin and permission different fields

> A clear credit line does not change an explicit fictional restriction.

Understand provenance and permitted use

Provenance is the record of where material came from and how it changed. Attribution identifies a source or creator; permission describes an allowed use. Seeing an image online does not itself tell you whether public redistribution or editing is allowed. This lesson matches complete fictional terms to a proposed use. Its invented labels and word limits are not real licence names, legal exceptions or universal rules.

Permission to access a work and permission to redistribute or modify it are separate. Use a classroom **licence** ledger instead of assuming all online material is reusable.

Use only supplied classroom records

Begin by writing the question the procedure is intended to answer. Identify the information already supplied, the information it will produce and the information still missing.

These are constructed classroom examples; they do not require live accounts, private records or an external service. Do not treat a plausible explanation as a measured outcome.

▼ **Earlier wording, alternatives and picture transcripts**

PICTURE STORY

Notice → Predict → Explain

Begin with visible **evidence**. Do not explain more than the picture and information support.

MYSTERY

The learners must use **copyright** and **provenance** to solve a problem. What information do they have? What decision or calculation do they make? What would count as **evidence** that it worked?

Three **observation**s (what you can point to):

> **Write or draw your reasoning and evidence.**

My **prediction** and the clue supporting it:

> **Write or draw your reasoning and evidence.**

A closer explanation

MAIN LESSON · SECTION 3

Match the actual use to the exact conditions

> A permission record is scoped to the proposed operation and audience.

Read the L/M fictional rules

For this fictional policy, **licence** L permits classroom display with **attribution** but forbids public redistribution. **Licence** M permits adaptation and redistribution with **attribution**.

Unknown permission means seek approval or choose a permitted alternative; this exercise is not a legal ruling.

Keep a complete provenance ledger

Ledger field	What to preserve
Asset identity	Stable ID, source location and supplied creator

Ledger field	What to preserve
Terms	Exact fictional permission text and version
Proposed use	Classroom/private/public; unchanged/quoted/adapted
Transformations	Crop, paraphrase, combine or generated contribution
Required credit	Creator/source/terms notice required by this card
Decision and gap	Matches supplied terms, needs revision, or unknown permission
Output provenance	Where used, edits made and fictional/generated labels; no invented authenticity claim

Explain the deciding check

- Point to the **input**, the deciding step and the result in this week's visual. Explain the same step in ordinary words. A picture helps when you can say what each part represents.

▼ Earlier wording, alternatives and picture transcripts

VISUAL **MECHANISM**

Input → **Process** → **Output**

Trace the information. At each stage, ask what changed and how you could test it.

IN
INPUT
Create a provenance record for a mixed-media output.
↓
↻
SYSTEM
Responsible creation distinguishes source material, transformation, attribution, and generated content.

↓

Which stage could fail even when the other two are correct? Explain:

Write or draw your reasoning and evidence.

A closer explanation

Copyright and permitted sources — evidence trace

INPUT AND SCOPE	CHECK OR CALCULATION	CONCLUSION AND LIMIT
Image A has L; image B has M. The project is a publicly downloadable adapted poster.	For this fictional policy, licence L permits classroom display with attribution but forbids public redistribution. Licence M permits adaptation and redistribution with attribution. Unknown permission means seek approval or choose a permitted alternative; this exercise is not a legal ruling.	A is not permitted for this use under L. B is permitted under the supplied M terms with attribution. Keep licence version and provenance.

The figure connects this chapter's worked input, declared procedure and result. Read the complete worked reasoning for qualifiers and intermediate steps; the abbreviated labels do not replace that reasoning.

Before applying the procedure, write its units, denominator or decision boundary where relevant. A partner should be able to repeat each step using the same **input**s.

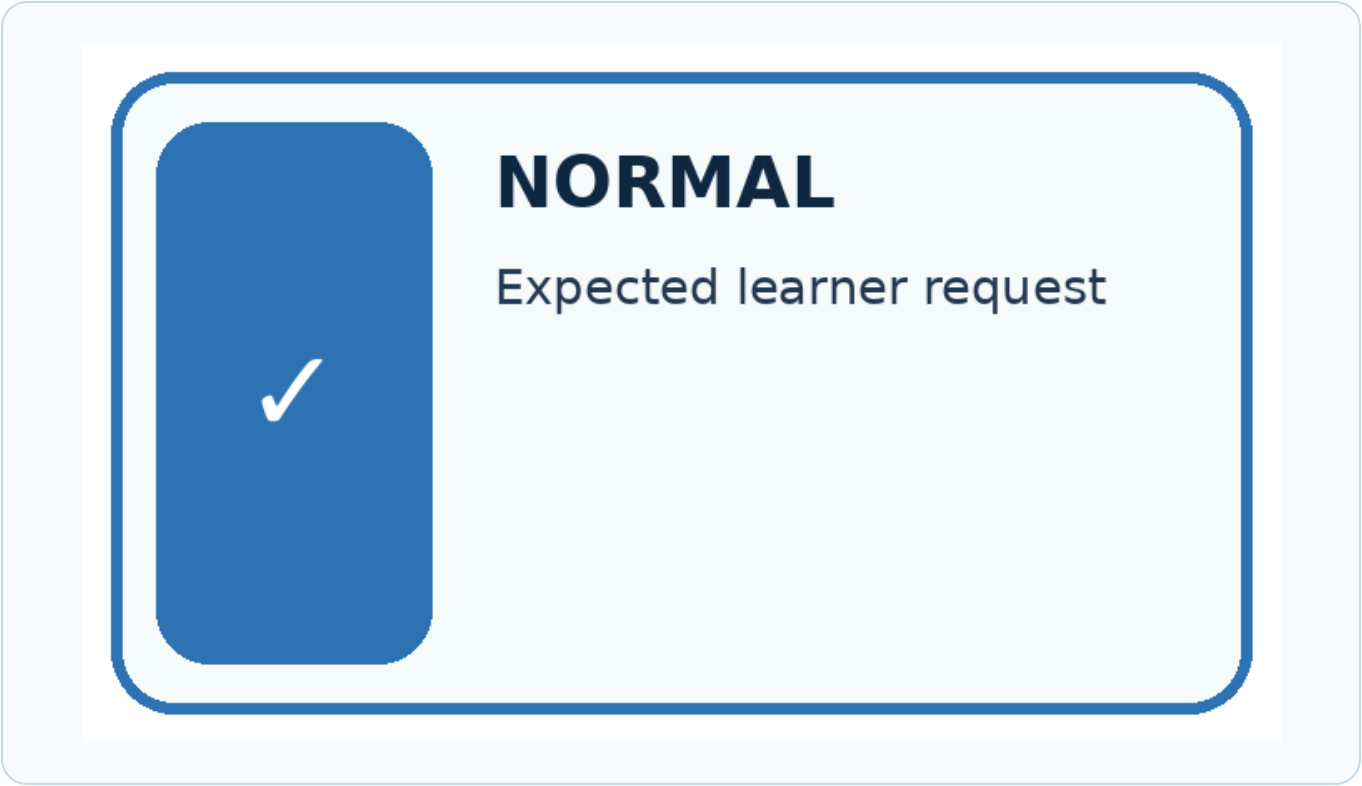

If a required **input** is absent or violates the stated contract, record that condition explicitly instead of quietly replacing it with a convenient value.

Connect the picture and the explanation

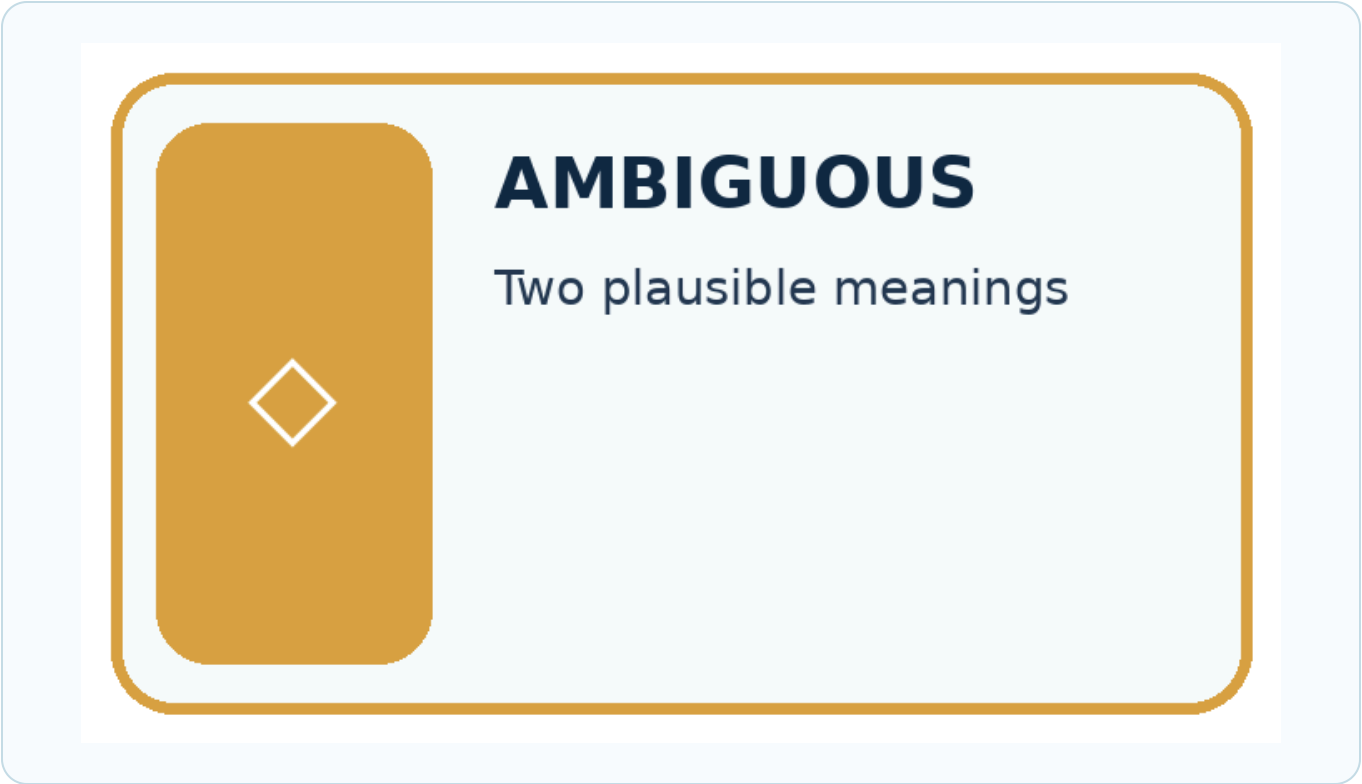

Compare access, acknowledgement and permitted alteration

> A source can allow unchanged distribution while excluding cropping under its own toy terms.

Four pictures with a purpose

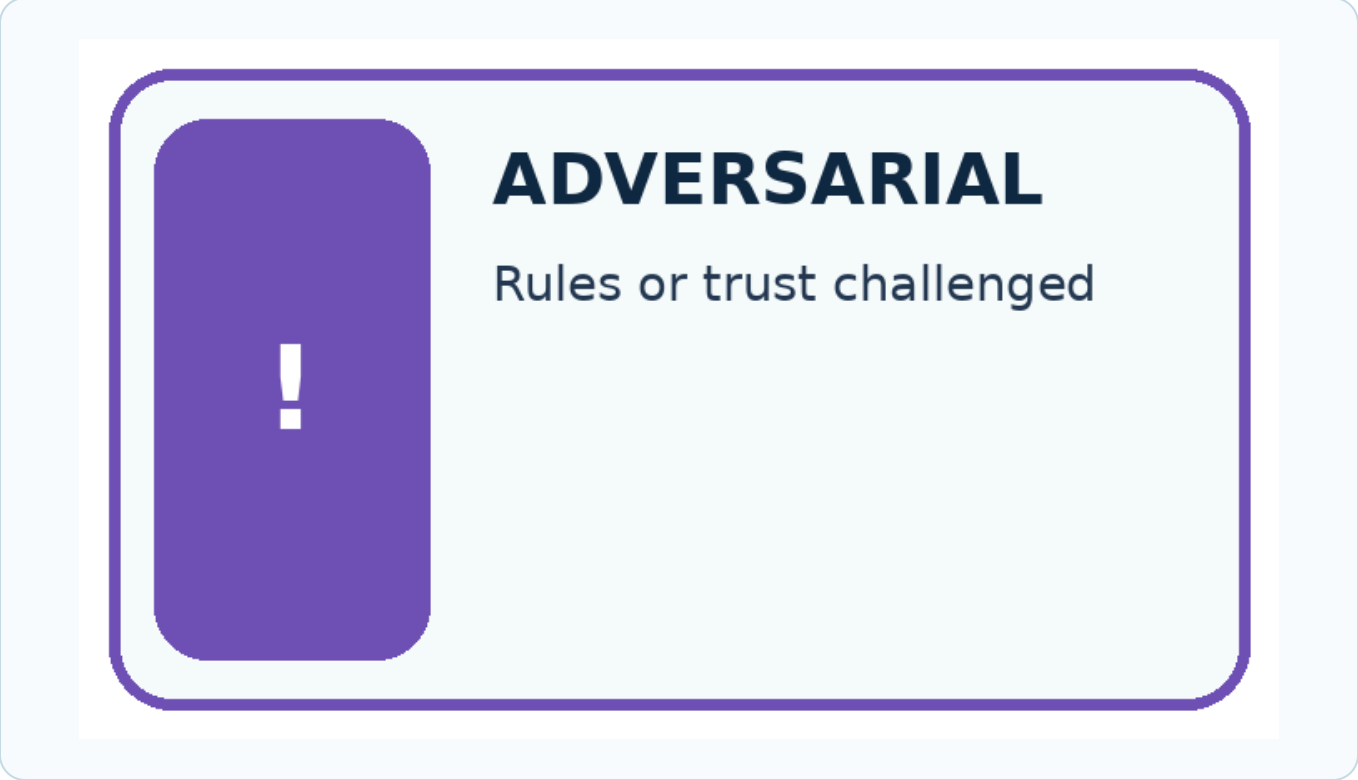

Normal case: predict the result and deciding evidence.

Boundary case: identify the exact limit.

Missing information: name what must be clarified.

Transfer case: explain which procedure still applies.

Choose a revealing case

- Which case is most likely to reveal a hidden assumption? Why?

> **Write or draw your reasoning and evidence.**

Predict the supplied changed case

- Change: Use Fern unchanged and include the required **attribution**.

▼ Check after predicting

Prediction: That use satisfies the stated fictional permission conditions.

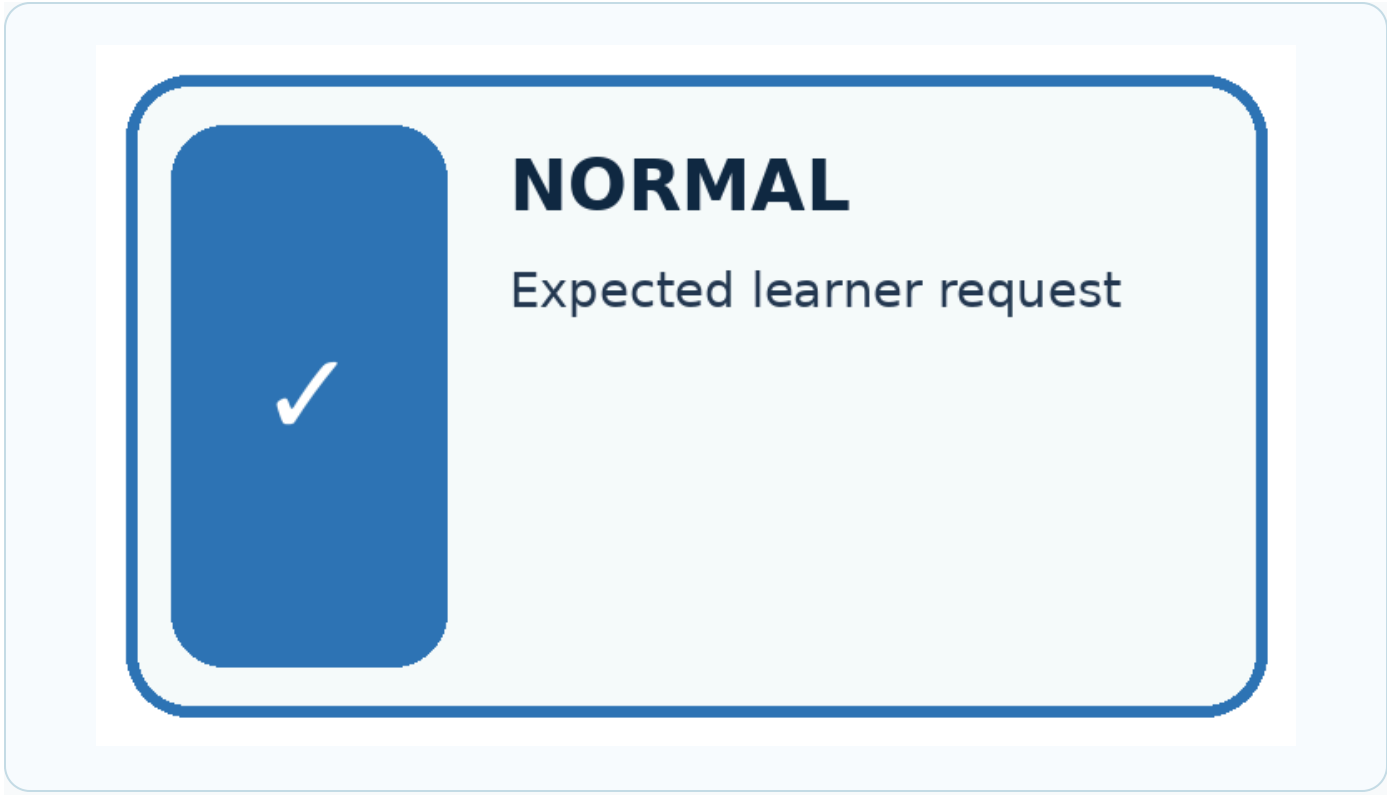

Reason: Its public redistribution is permitted when there is no alteration and **attribution** is included.

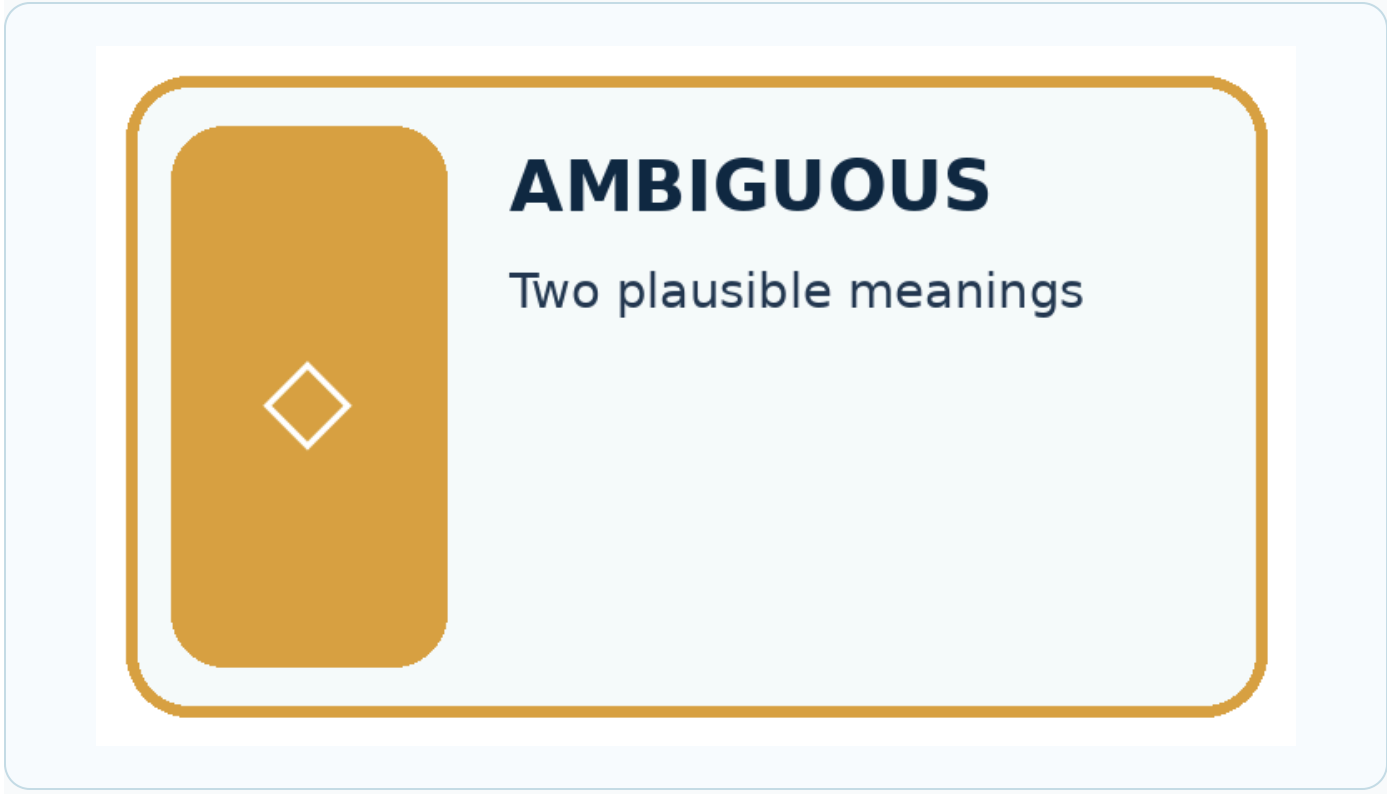

▼ Earlier wording, alternatives and picture transcripts

CASE GALLERY

Four Tests, Four Kinds of **Evidence**

A system is not understood until it survives more than one comfortable example.

NORMAL CASE: predict and name **evidence**. BOUNDARY CASE: predict and name **evidence**.

MISSING INFORMATION: predict and name **evidence**. TRANSFER CASE: predict and name **evidence**.

Change one thing in the pictured case

MAIN LESSON · SECTION 6

Trace Fern and Moss against the crop plan

> Changing the planned use can change the match without changing the source.

Read the complete asset terms and use

Read fictional reuse terms before decorating a public study guide.

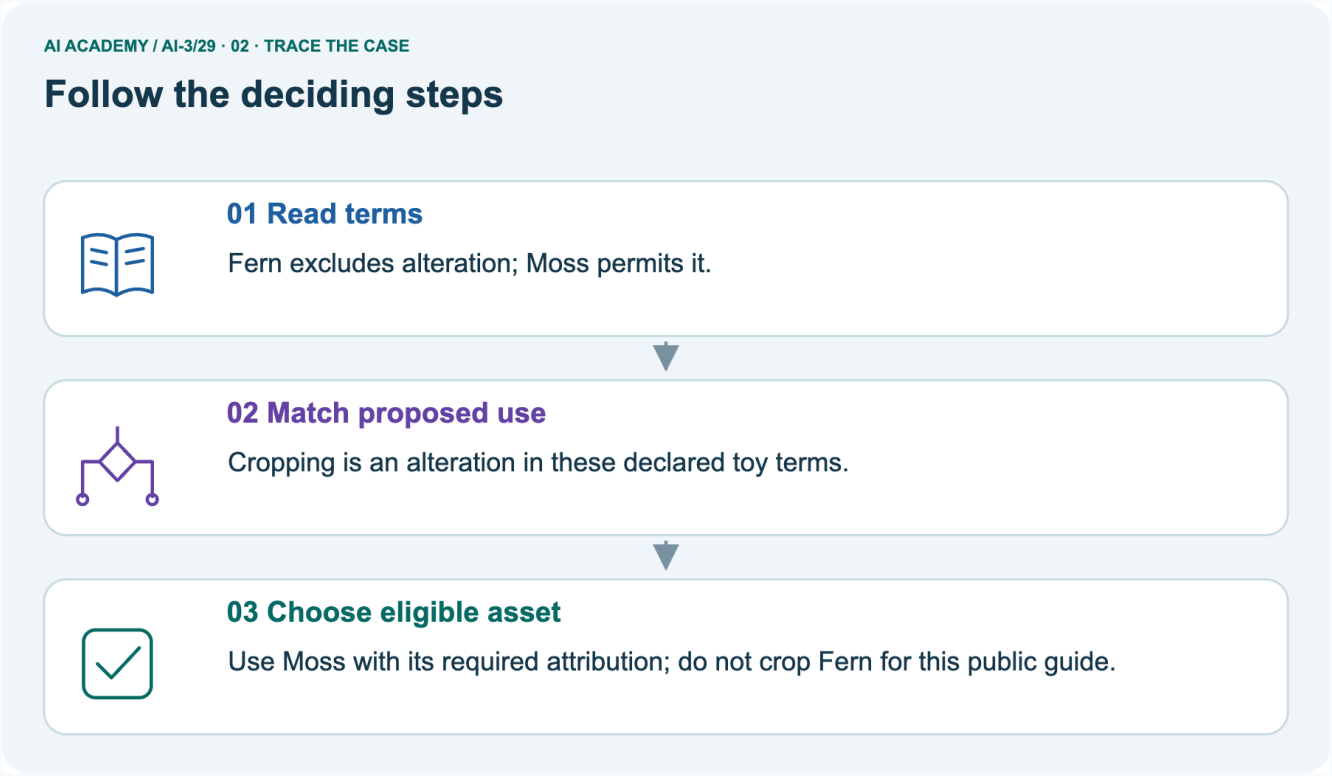

Image Fern allows public redistribution with **attribution** but no alteration. Image Moss allows alteration and public redistribution with **attribution**. The plan crops an image.

All **input**s and outcomes in this worked example are invented classroom data; no real model run is claimed.

Fictional terms version F1: Fern permits public redistribution with attribution but no alteration. Version M1: Moss permits alteration and public redistribution with attribution. In these declared terms cropping counts as alteration. Thus a cropped public guide can use Moss with credit; an unchanged credited Fern is separately allowed.

This is a condition-matching exercise, not a ruling about an actual image or legal exception.

Trace alteration and attribution conditions

Follow the labelled picture with the matching explanation. Open the vector diagram

Read the picture one step at a time

STEP	WHAT HAPPENS AND WHY
1. Read terms	Fern excludes alteration; Moss permits it.
2. Match proposed use	Cropping is an alteration in these declared toy terms.
3. Choose eligible asset	Use Moss with its required attribution; do not crop Fern for this public guide.

Match each pictured step to the supplied facts. This is a worked teaching case, not an independent assessment.

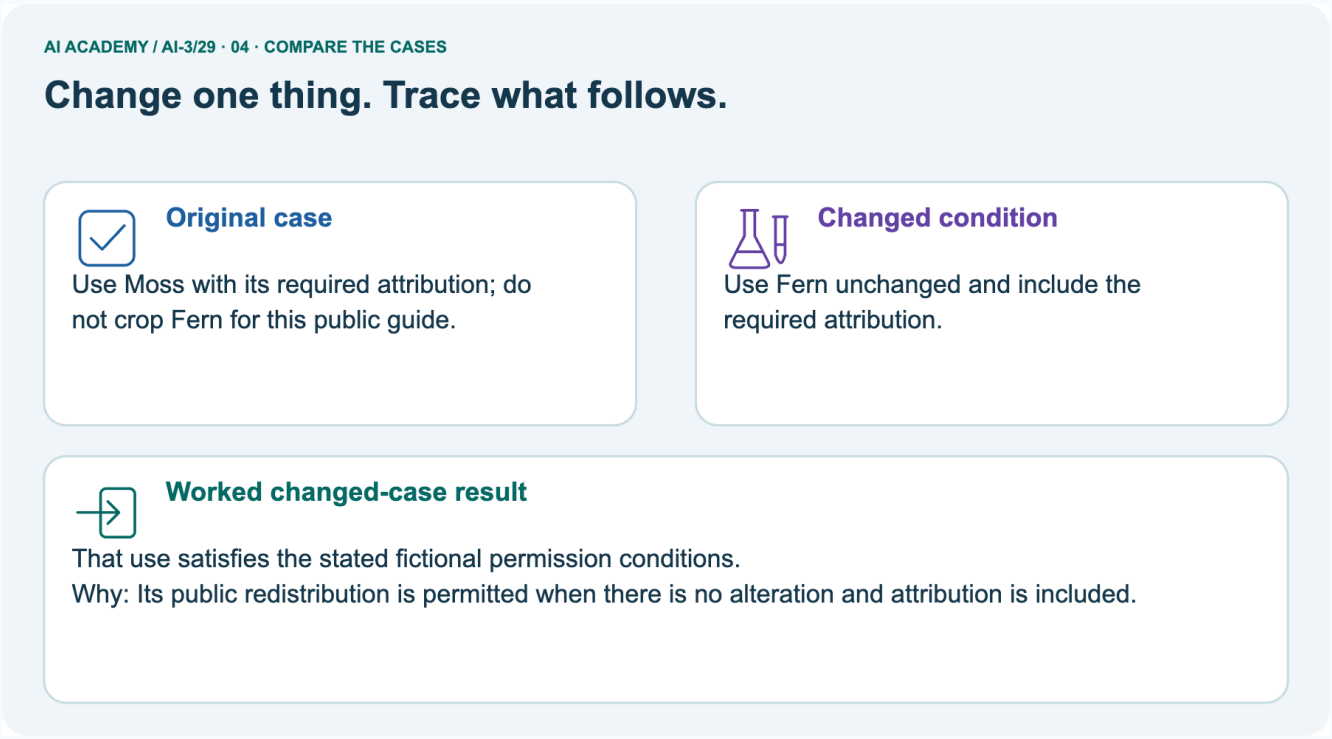

Read the picture in order. Use Moss with its required **attribution**; do not crop Fern for this public guide. The arrows show which recorded **input** or intermediate result each decision uses.

Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows.

Predict unchanged credited Fern

- Change one thing: Use Fern unchanged and include the required **attribution**. Predict the result before checking the explanation. What remains the same?

▼ Check after predicting

Follow the labelled picture with the matching explanation. Open the vector diagram

State the fictional-terms limit

- Real permission decisions require the actual **licence** and use context. These invented terms teach condition matching, not legal advice.

- Read the labelled picture: Does acknowledging Fern make a cropped version permitted? Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.

▼ Separate practice · Images A/B under L/M

Image A has L; image B has M. The project is a publicly downloadable adapted poster.

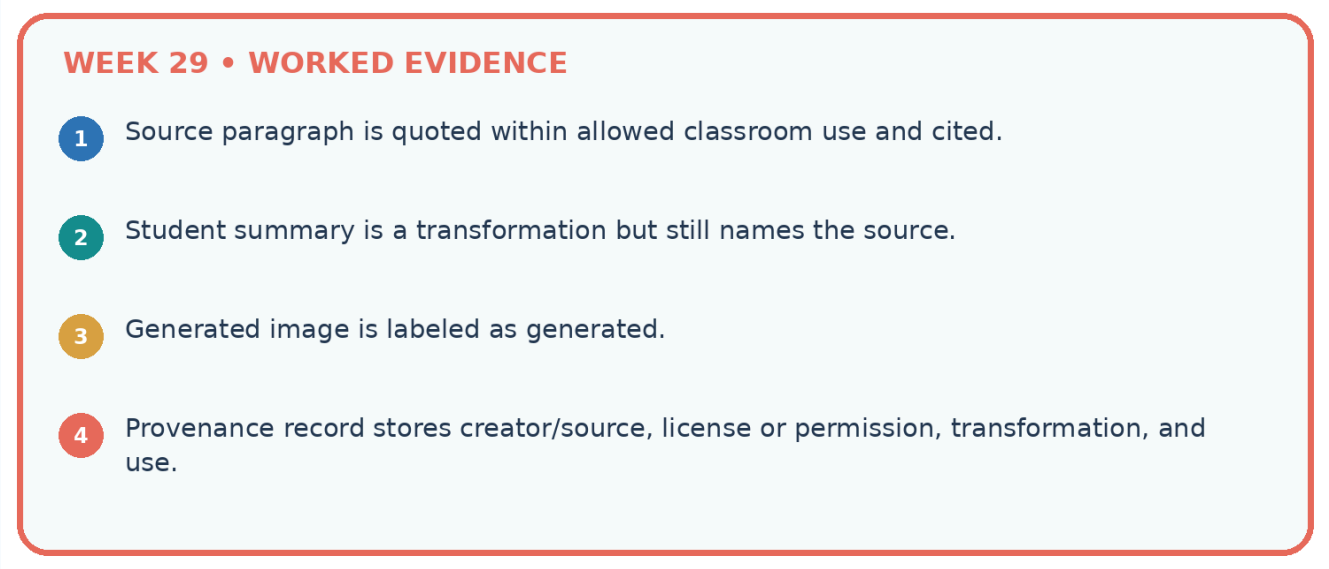

A is not permitted for this use under L. B is permitted under the supplied M terms with **attribution**. Keep **licence** version and **provenance**.

▼ Earlier wording, alternatives and picture transcripts

WORKED **EVIDENCE**

Reason Step by Step

Predict first. Then check each step. A correct answer without visible reasoning is incomplete **evidence**.

1. Source paragraph is quoted within allowed classroom use and cited.

2. Student summary is a transformation but still names the source.

3. Generated image is labeled as generated.

4. **Provenance** record stores creator/source, **license** or permission, transformation, and use.

Recalculate, retrace, or restate the reasoning in your own representation:

Write or draw your reasoning and evidence.

CHECK Did the **evidence** answer the exact question? Did the total, path, or source record stay consistent?

A closer explanation

Compare the intermediate **evidence** with the final statement. Explain why each number or decision follows from the stated **input**s.

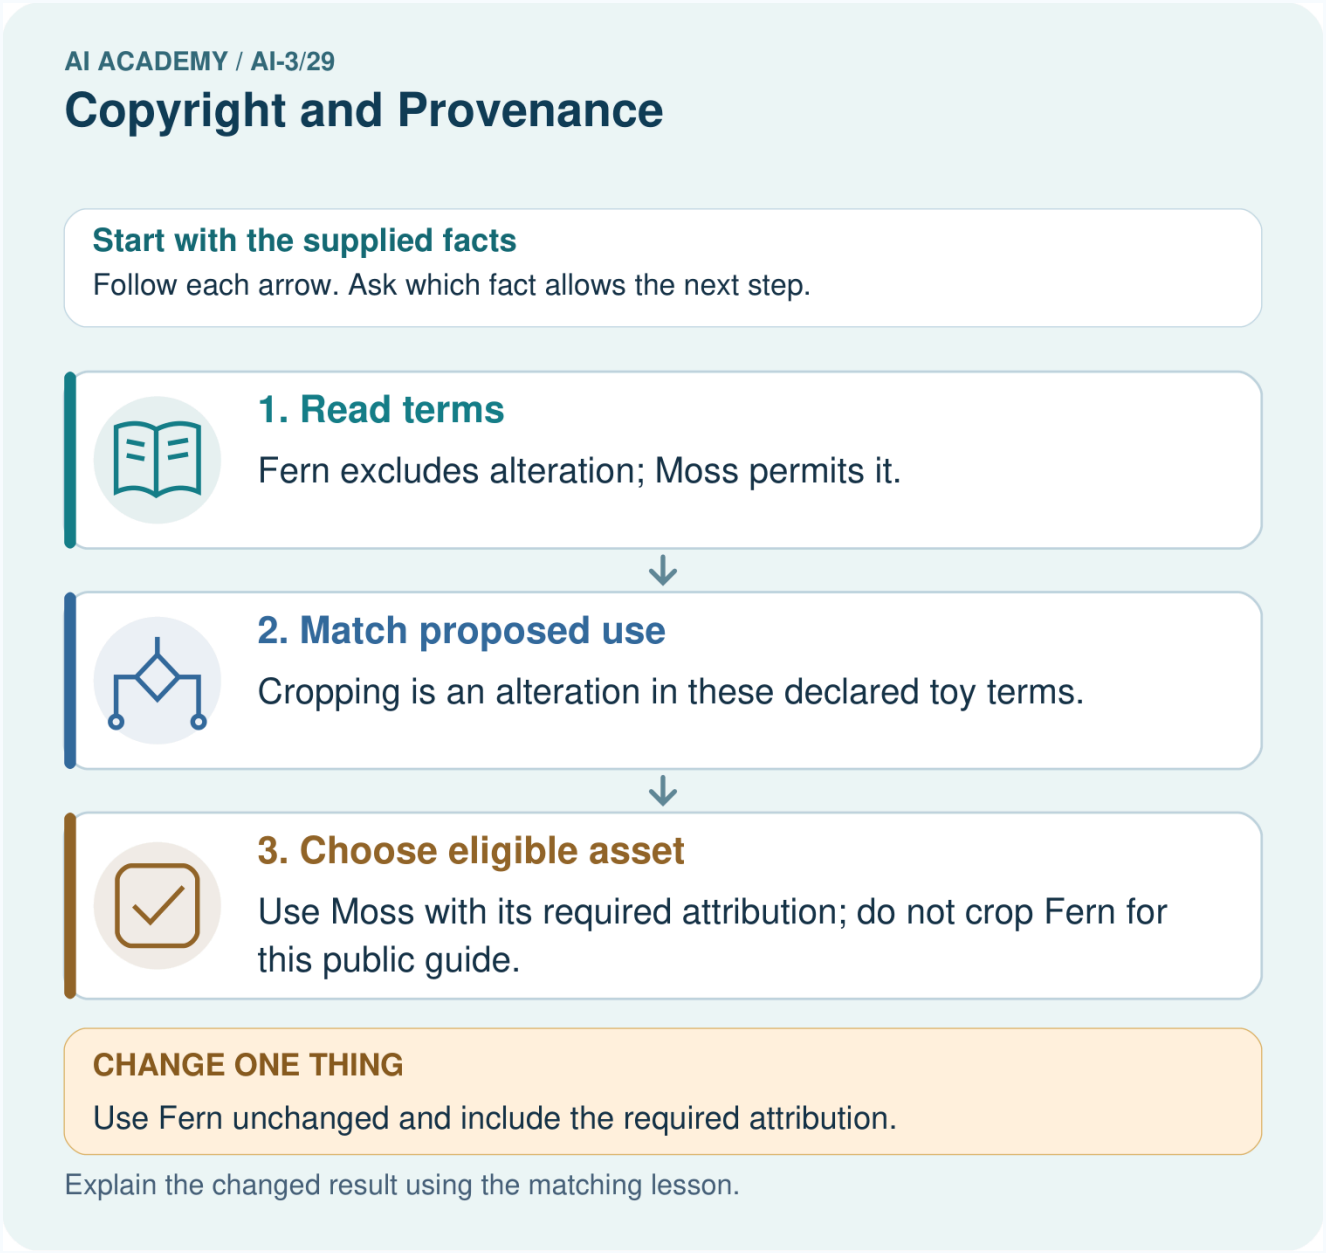

The conclusion belongs to this scenario and procedure; changing the **input**s, evaluation population or authority can change what it establishes. Retain the raw record so a later revision can be compared honestly.

Learn from the worked case

Cover the result before checking it. Say what is given, choose the procedure, and follow one step at a time. Then uncover the result and explain your first mismatch. Ask why a step is allowed, not only what number it produces.

A pictorial worked case: Copyright and Provenance

The facts we will use

Follow the labelled picture with the matching explanation. Open the vector diagram

Why this result follows

What this example does not establish

MAIN LESSON · SECTION 7

Find credit used as a replacement for permission

> Keep every declared condition in the decision.

Repair the credit-only shortcut

Claim to repair: Credit Fern’s creator and the crop becomes allowed. Under F1, attribution and no alteration are separate required conditions; satisfying one cannot erase the other. Another shortcut is calling a generated background automatically free to reuse: a generated label records its origin but does not supply missing tool terms or resolve other rights.

Preserve the unknown and choose a supplied permitted alternative for the exercise.

Design a reveal follow-up

Exit: propose one revealing change to the worked scenario. State the expected outcome and the evidence that would make you revise your explanation.

▼ **Earlier wording, alternatives and picture transcripts**

ERROR DETECTIVE

Compare → Diagnose → Repair

Do not patch the answer. Find the earliest unsupported assumption, wrong step, or weak **evidence**.

!

COMPARE • DIAGNOSE

Weak idea: Changing a few words removes the need to credit a source. Strong move: inspect the claim, source, stage, schema, or test evidence; repair one cause; rerun.

Evidence record	Expected	Actual	Likely cause / next test
normal case	works		
boundary case	stated rule		
missing input	safe response		
fresh transfer	generalizes		

Repair one cause. Why is this repair better than changing several things?

Write or draw your reasoning and evidence.

A closer explanation

Complete the supported workbook tasks before attempting W4 independently. Record any hints or help used. After feedback, use the teacher's fresh retry rather than copying the earlier answer.

For a project, select a relevant new case, predict the outcome from the declared rule and preserve the result alongside any revision.

MAIN LESSON · SECTION 8

Practise the L/M public-poster decision with less help

> Keep its invented licence labels separate from Fern/Moss.

The scope and legal-exception limit

Real legal outcomes depend on jurisdiction and facts; supplied **licence** terms define this classroom exercise, not universal **copyright** law.

Complete image A/B W2

Practise with less help: Trace the worked case

Use workbook W2 for the connected example "**Copyright** and permitted sources". First fill the **input** and rule boxes. Try the middle steps before asking for a hint. After a hint, try the next step yourself.

Plan	Do	Check
What is given? Which rule or procedure applies?	Record each intermediate step.	Does the result follow? What remains unknown?

Audit an all-future-cases claim

- Use the worked case for **Copyright** and permitted sources. Proposed explanation: "The worked result establishes every future case". Decide whether this explanation is supported.

  Point to the step or supplied fact that decides; explain your repair if needed.

- Answer on your own before discussion. If you are unsure, say which step you need help with.

Check your reasoning

Explain the pictured alteration condition

- Does acknowledging Fern make a cropped version permitted? Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.

Explain the picture

> **My explanation using a pictured step and the given facts**
>
> | |
> |---|
> | |
> | |
> | |
> | |

Keep independent quotation work separate

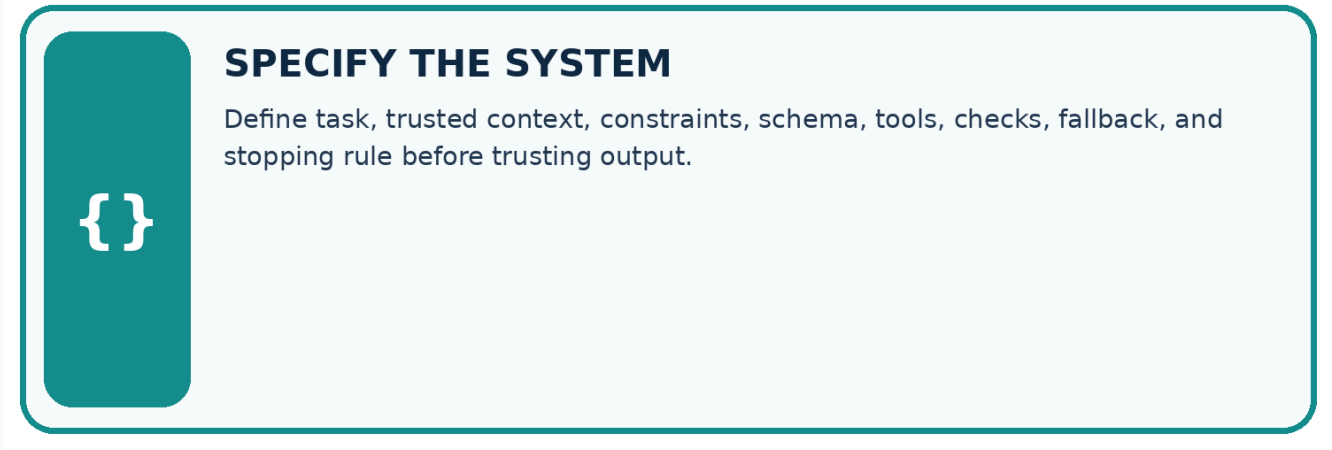

This is supported practice. Keep the separately named independent case for an attempt before feedback.

▼ **Earlier wording, alternatives and picture transcripts**

LOGIC STUDIO

Specify Before You Run

Prompts, schemas, retrieval, tool calls, and code are inspectable parts of one AI product.

SET task, audience, constraints, **output**_schema LOAD approved_context or retrieval_result CALL model or allowed_tool VALIDATE fields, claims, citations, and safety IF **evidence** missing: ask, retrieve, or abstain RETURN useful **output** + source trail + limitations

Trace one **input**. Which line changes the state or chooses a path?

> **Write or draw your reasoning and evidence.**

A closer explanation

A useful check asks what would make the reasoning fail. Distinguish a failure to execute the declared procedure from a weakness in the procedure itself.

The first may require a correction; the second requires an explicitly revised method and new **evidence**. Preserve unsuccessful cases so an improved result cannot hide the original problem.

Guided: restate the worked result, then name the assumption or limitation that prevents a broader conclusion.

Explain your trace to a partner. Your partner points to one step to check. Swap roles on the next case. Each person writes their own explanation.

MAIN LESSON · SECTION 9

Audit six complete components of a mixed public poster

> Provenance labels reveal origin without automatically granting reuse.

All supplied asset and use cards

Complete fictional mixed-poster asset	Proposed use and ledger decision
Fern/F1 · creator Demo Studio F; permits public redistribution with credit, no alteration.	Crop for poster: revise to unchanged credited use or choose permitted alternative.
Moss/M1 · creator Demo Studio M; permits adaptation/public redistribution with credit.	Crop for public poster: matches supplied terms if credit retained; record crop.
Text D/D1 · creator Demo Writer; permits public quotation up to 30 words with attribution.	Use supplied 11-word quotation A root anchors a plant in soil and helps support it. Credit required; matches toy limit.
Own diagram O/O1 · declared original fictional classroom drawing by Demo Learner.	Record supplied origin and edits; do not claim an actual student created it here.
Generated background G/G1 · fictional tool output; prompt/date/version supplied as demo metadata, reuse terms absent.	Record generated origin and missing terms; permission unresolved, no automatic public-use conclusion.

Complete fictional mixed-poster asset	Proposed use and ledger decision
Online image U/U1 · no supplied creator or permission record.	Public-poster use unresolved; request records or choose a supplied permitted substitute.

Classify, check conditions and build the ledger

1. Build a mixed-poster provenance ledger for all six complete cards. Classify quoted, transformed, declared-original and generated components, while keeping permissions as a separate check. Record asset/version, fictional creator, planned audience, changes, credit and decision. For the D quotation count whitespace-separated words; the supplied text has 11. Do not invent a missing creator, permission or tool licence.

   Unknown does not mean proved unlawful; it means this exercise lacks the evidence needed to mark the proposed use as permitted. Choose Moss or unchanged credited Fern for the visible plan. No real media is copied, published or legally assessed. Keep independent C/D 40-word assessment withheld.

Keep the source and transformation record

Test / input · Prediction · Actual · Evidence / calculation · Change or keep?

What did the hardest test teach you that the normal test did not?

> **Write or draw your reasoning and evidence.**

Before trying: what do I expect, and why? While trying: which step could first go wrong? Afterwards: what did I actually observe, and what should change? Keep “not run” if you only traced the procedure.

▼ **Earlier wording, alternatives and picture transcripts**

EVIDENCE LAB

Predict → Test → Record → Explain

Keep expected and actual results separate. Surprises are useful data when recorded honestly.

PREDICT → RUN → VERIFY → EXPLAIN

Inspect a mixed project, classify original/quoted/transformed/generated parts, check permission, and build a complete provenance record.

Use the six fictional mixed-poster asset cards. Record **provenance**, proposed use, transformations, supplied terms and attribution; keep generated-origin labels separate from reuse permission. Preserve missing rights information as unresolved and apply only the declared classroom terms.

Plan → try → check

MAIN LESSON · SECTION 14

Try alone: check the fresh public-quotation plan

> Do not generalise the invented word limit beyond the task.

Independent terms and scope

Text C permits internal reading only; D permits public quotation up to 30 words with **attribution**. Proposed public handout reproduces 40 words. Apply the fictional terms.

Apply only the supplied fictional C and D terms and the stated 40-word proposed quotation. No legal exception or actual source passage is supplied. Explain which condition is unmet and what revision or additional permission would satisfy this classroom policy.

Your first attempt and help record

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

Your teacher has the independent answer and scoring criteria. Complete the matching workbook week to keep your practice **evidence** together.

Use feedback afterwards

Attempt the independent case before hints. Record whether you worked alone, used a hint or followed a model. After feedback, fix the first unsupported step and explain why it changed.

A later check uses a changed case, not a copied answer.

▼ **Earlier wording, alternatives and picture transcripts**

Independent case: Apply a new case independently

Week 29 Independent application

Close the worked explanation. Apply the idea to this different question without copying.

You find an attractive illustration online with no **license** information. What should you record and check before reusing it in a public project?

My answer, with a trace, calculation or supporting **evidence**

Write or draw your reasoning and evidence.

Create and test

Change one relevant detail. Predict the result before testing. Include a boundary or missing-information case when it helps reveal a limit.

My changed **input** and expected result

> **Write or draw your reasoning and evidence.**

Connect to your project

Attach citations and **provenance** metadata to every Study Buddy learning asset.

The **evidence** I will keep

> **Write or draw your reasoning and evidence.**

Transfer practice from the original programme

A project uses an image found through search. Its author is known but its **licence** is missing. Is naming the author enough to establish reuse permission? Describe a **provenance** record and next action.

> **Explain the mechanism, evidence and one limit.**

Use feedback to improve

MAIN LESSON · SECTION 11

Keep the project's sources and transformations visible

> A final credit list should follow a checked asset ledger.

This week's contribution

For the Verified Study Buddy, attach source/version, creator where known, permission basis, required credit and transformations to each included asset or passage. Label constructed or generated content as such. Match the intended output audience and edits to the actual supplied terms.

If terms are absent, keep that unresolved in the ledger and choose a documented alternative; do not fill the field with a guessed licence.

For your Verified Study Buddy, save the **input**, procedure, observed result and limitation of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

Retain the checkpoint and human choice

THIS WEEK'S CHECKPOINT Attach citations and **provenance** metadata to every Study Buddy learning asset.

SYSTEM MAP Learner need → prompt/schema → approved sources/retrieval → model/tool → structured answer → verification → **human decision**

What will you add, change, or verify in the project this week?

> **Write or draw your reasoning and evidence.**

What should remain under **human control**?

Write or draw your reasoning and evidence.

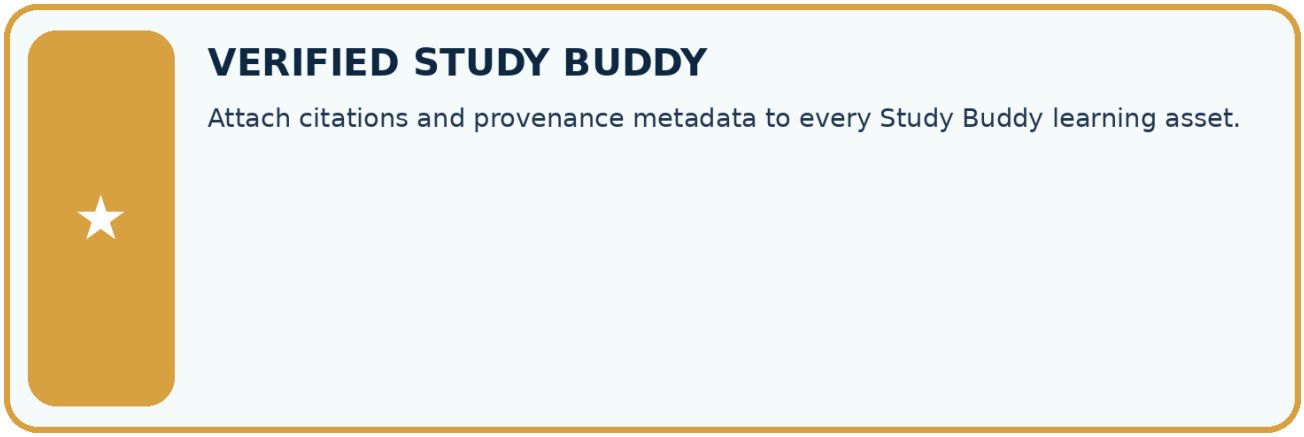

RESPONSIBLE DESIGN Collect only necessary information. Show uncertainty and limits.
Never confuse fluent **output** with verified truth.

▼ Earlier wording, alternatives and picture transcripts

CUMULATIVE PROJECT

Verified Study Buddy

Every week adds one inspectable piece. The system must show how it reached a result.

Evidence for your project

Finish: name the source, change, condition and gap

> Attribution, provenance and permission answer different questions.

Explain without notes

- Close your notes. Explain this goal in your own words: Explain the **mechanism** and terminology of **copyright** and permitted sources

> **My deciding step, evidence and one remaining question**

Plan a changed-case return

If you are unsure, return to the worked picture and explain one arrow. If you are ready, change an **input** or assumption and justify your **prediction**.

Save your workbook **evidence**. At the next review, try a different case before opening your old answer.

Reference bank and extra practice

Choose the reference that helps your next step.

▼ **Your quick word guide**

REFERENCE · SECTION 5

Your quick word guide

> Use the words to explain a particular step, record or limit.

Core vocabulary

Word	My own example	Not this / boundary
copyright	Legal rights concerning original creative expression; the permitted uses depend on the applicable rules and permissions.	
provenance	A record of where information or material came from and how it was changed.	
attribution	Identifying the source or creator of material; this alone does not establish permission to use it.	
license	Terms granting specified permissions to use material or software.	

Terms for the connected explanation

Word	Meaning
Licence	Terms specifying permitted uses

Word	Meaning
Permission ledger	A record linking each asset to its authorised use

<details>
<summary>Earlier wording, alternatives and picture transcripts</summary>

VOCABULARY LAB

Words You Can Use to Reason

A definition matters when you can recognize the idea, use it, and contrast it with a near-miss.

</details>

2

PROVENANCE

record of where material came from

3

ATTRIBUTION

credit given to a source

MASTERY

From Knowing the Word to Owning the Idea

Move upward only when you can produce **evidence** without copying the worked example.

▼ Reference: check your explanation

Reference: check your explanation

> Use after practice. Check the new public-quotation plan independently is the selected independent case.

Check the evidence and its limit

- 1. My fresh example, trace, calculation, or design:
- 2. My **evidence** that it works (include a boundary or missing-data case):
- 3. One limitation, fairness concern, or situation needing human review:

> **Write or draw your reasoning and evidence.**

> **Write or draw your reasoning and evidence.**

Self-check and record

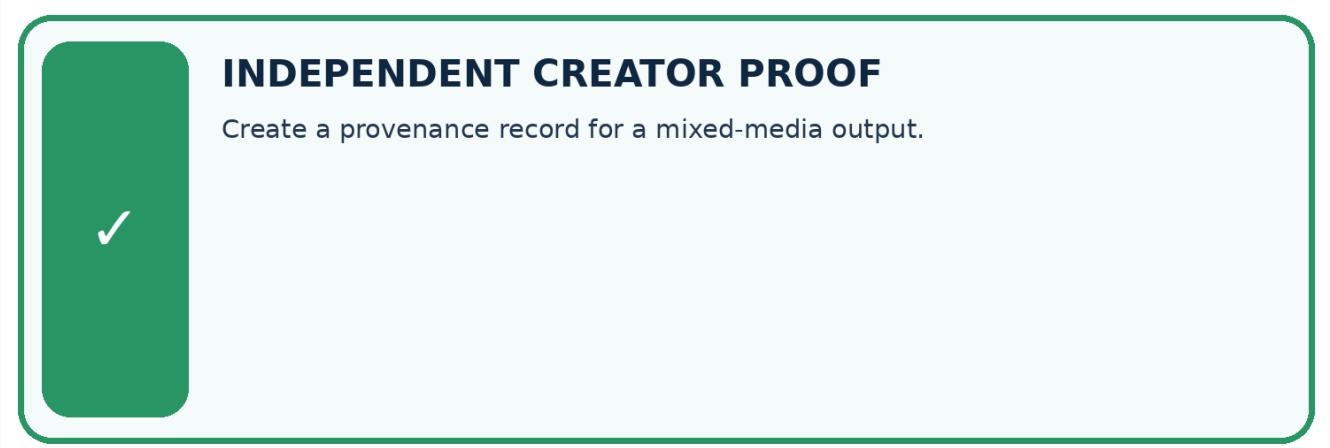

SELF-CHECK ☐ I explained the **mechanism** ☐ I used **evidence** ☐ I tested a fresh case ☐ I named a limitation ☐ I can answer 'why?'

▼ **Earlier wording, alternatives and picture transcripts**

INDEPENDENT MASTERY PROOF

Checklist for explaining this week's idea

Use after practice. Check the new public-quotation plan independently is the selected independent case.

EXPLANATION CHECK Require matching audience, modification/length conditions, credit and explicit unresolved permission.

Write or draw your reasoning and evidence.

▼ **Extra practice: Provenance makes reuse conditions visible**

REFERENCE · SECTION 13

Extra practice: Provenance makes reuse conditions visible

> Try the question before opening its worked explanation.

Read the supplied case and question

A slide reuses an online photograph and textbook paragraph.

What **provenance** and reuse checks are needed?

Your explanation

- Which detail supports the answer, and why does it matter?

Write or draw your reasoning and evidence.

▼ Check after trying

Record creator, source, **licence** or permission, **attribution** requirements and modifications. **Attribution** alone is not permission; classroom context is not a universal exemption.

Evidence or stage	Value or result
Origin	Creator and source
Permission	Licence or explicit permission
Conditions	Attribution and other limits
Modifications	Record what changed

▼ Earlier wording, alternatives and picture transcripts

Week 29 Worked case

Use the supplied details to practise the weekly concept before attempting the independent question. This case extends the illustrated lesson.

The situation

The question

Worked explanation

Explain it in your own words

Trace the supplied case visually

Provenance makes reuse conditions visible

A slide reuses an online photograph and textbook paragraph.

What **provenance** and reuse checks are needed?

Record creator, source, **licence** or permission, **attribution** requirements and modifications. **Attribution** alone is not permission; classroom context is not a universal exemption.

> Use an additional checklist when it helps inspect your explanation.

Targets and evidence

By the end, I can	How I will show it
Explain the mechanism and terminology of copyright and permitted sources	Explain the deciding step, show a trace or test, and state one limit.
Apply the stated procedure to a new case with a traceable result	Explain the deciding step, show a trace or test, and state one limit.
Identify an assumption or limitation and design a revealing follow-up	Explain the deciding step, show a trace or test, and state one limit.

Keep your route and first prediction

Remember → watch and explain → try with help → investigate → try independently → keep project **evidence**. Your teacher may spread this lesson across several classes.

Keep your first **prediction**. Compare it with what the **evidence** shows and explain any change.

▼ Earlier wording, alternatives and picture transcripts

Start with this question: Read fictional reuse terms before decorating a public study guide.

▼ Extra practice: pictures, repair and feedback

REFERENCE · SECTION 17

Extra practice: pictures, repair and feedback

> Attempt each question before opening its explanation. Use one browser or paper copy.

First supported question

- Read fictional reuse terms before decorating a public study guide.
- Which labelled step matches this detail? Use Moss with its required **attribution**; do not crop Fern for this public guide.
- 1. Choose eligible asset
- 2. Read terms
- 3. Match proposed use
- Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.
- After your attempt, compare with the supported explanation: Choose eligible asset Use Moss with its required **attribution**; do not crop Fern for this public guide. Read the picture in order.

  Use Moss with its required **attribution**; do not crop Fern for this public guide. The arrows show which recorded **input** or intermediate result each decision uses.

  Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows.

Practice 1: explain the deciding evidence

> **My selected conclusion, deciding fact and explanation**

▼ Check the first explanation

Practice 2: explain the deciding evidence

Changed-case question

- Changed-case practice: Use Fern unchanged and include the required **attribution**. Which conclusion is supported by the supplied facts?
- 1. That use satisfies the stated fictional permission conditions.
- 2. This one example guarantees correct results for every future **input**.
- 3. We can decide the result without examining the changed **input** or the procedure.
- Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.
- After your attempt, compare with the supported explanation: That use satisfies the stated fictional permission conditions. Its public redistribution is permitted when there is no alteration and **attribution** is included.

My selected conclusion, deciding fact and explanation

▼ Check the changed case

Repair a missing building block

Repair and save your work

Review Privacy by Design (ai-3/28). Goal: Explain the **mechanism** and terminology of data retention and deletion. Short practice: Which IDs and locations must appear in the deletion **evidence**?

Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.. Return to this week and explain what you changed.

Review Evaluation Sets (ai-3/26). Goal: Explain the **mechanism** and terminology of system evaluation sets. Short practice: Did the added cases demonstrate better answering?

Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.. Return to this week and explain what you changed.

Review Block to Python Bridge (ai-3/23). Goal: Translate a short paper calculation into a Python script. Short practice: Trace the changed list and identify where the result differs.

Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.. Return to this week and explain what you changed.

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run **evidence**. Open the HTML copy to read or print it.

Drafts stay in this browser when storage is available; clear drafts on a shared device.

▼ Earlier wording, alternatives and picture transcripts

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

Keep your completed work

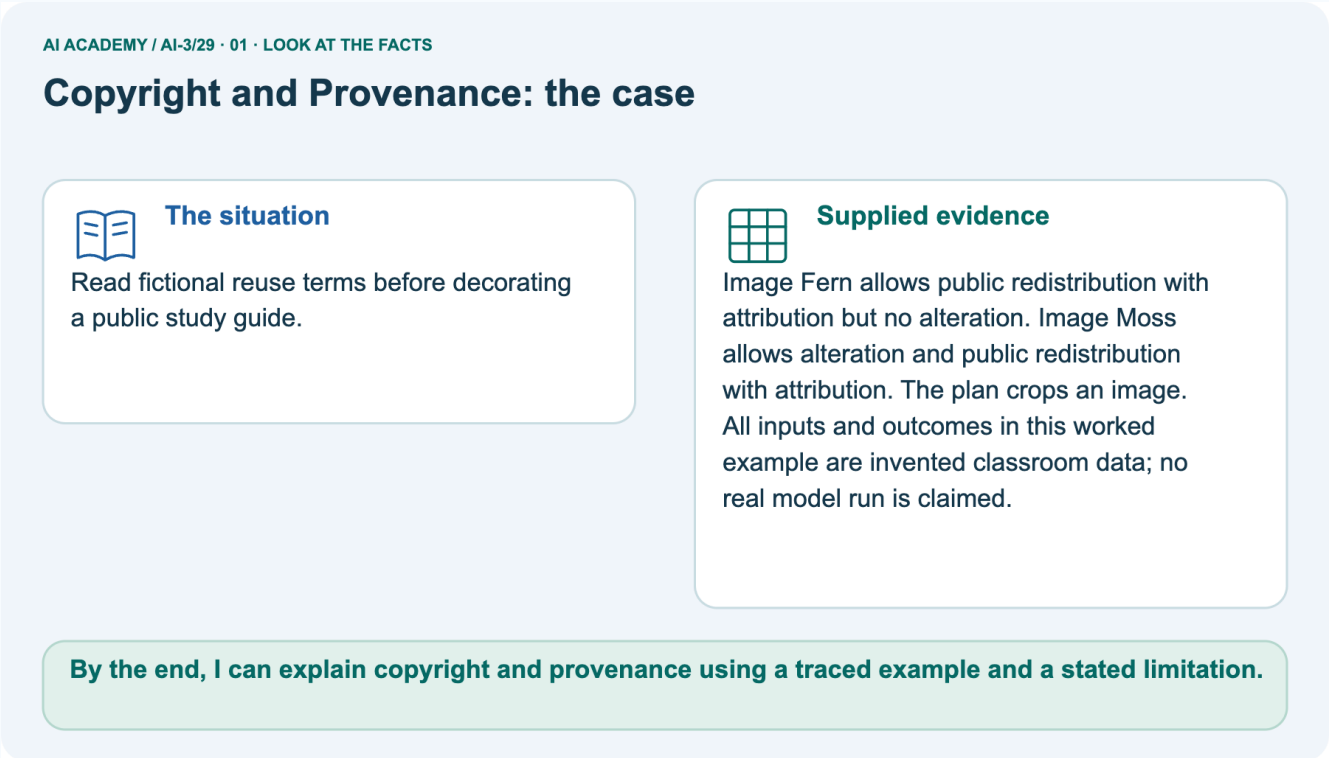

▼ Reference: the six-picture journey

REFERENCE · SECTION 18

Reference: the six-picture journey

> Revisit the picture that serves the current question; key diagrams already sit beside the main explanation.

01. Copyright and Provenance: the case

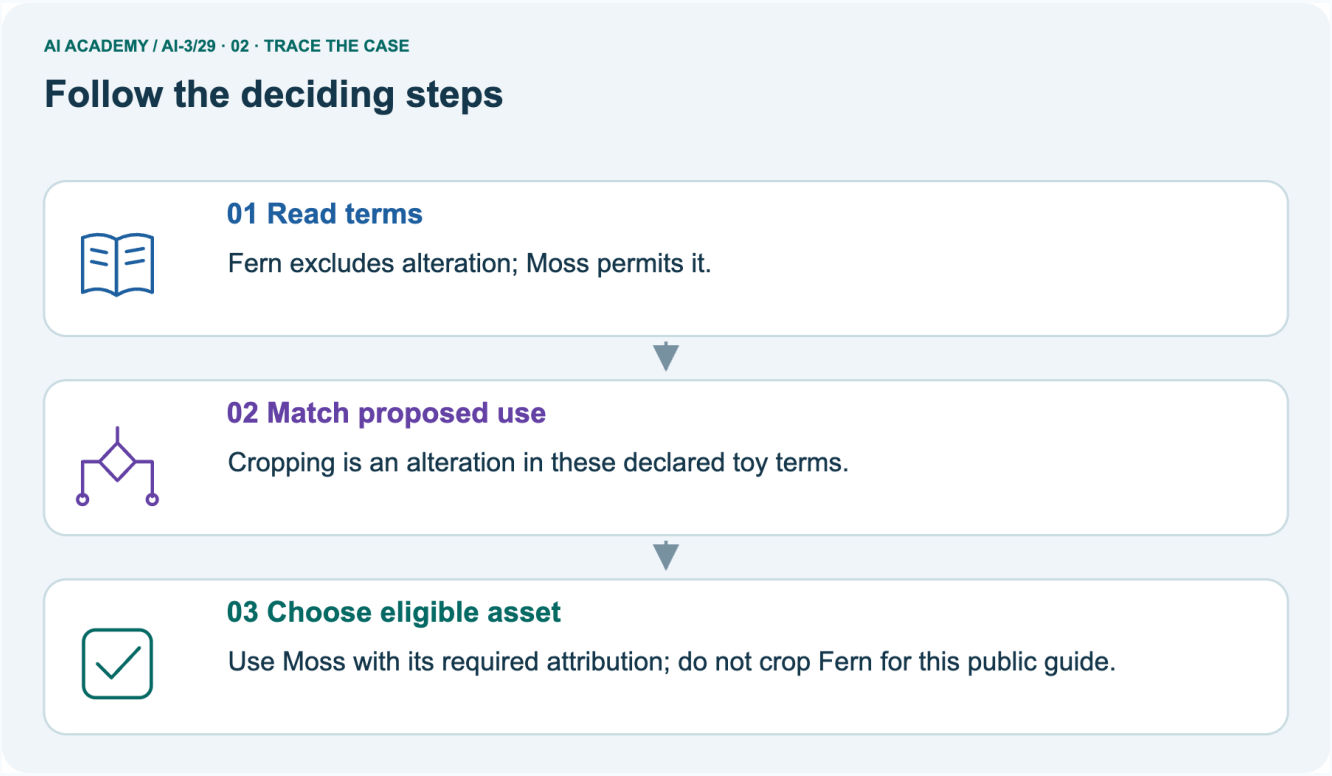

Follow the labelled picture with the matching explanation. Open the vector diagram

Read fictional reuse terms before decorating a public study guide. Supplied facts: Image Fern allows public redistribution with **attribution** but no alteration.

Image Moss allows alteration and public redistribution with **attribution**. The plan crops an image. All **input**s and outcomes in this worked example are invented classroom data; no real model run is claimed.

Point to the given fact that matters most. Explain why it matters.

02. Follow the deciding steps

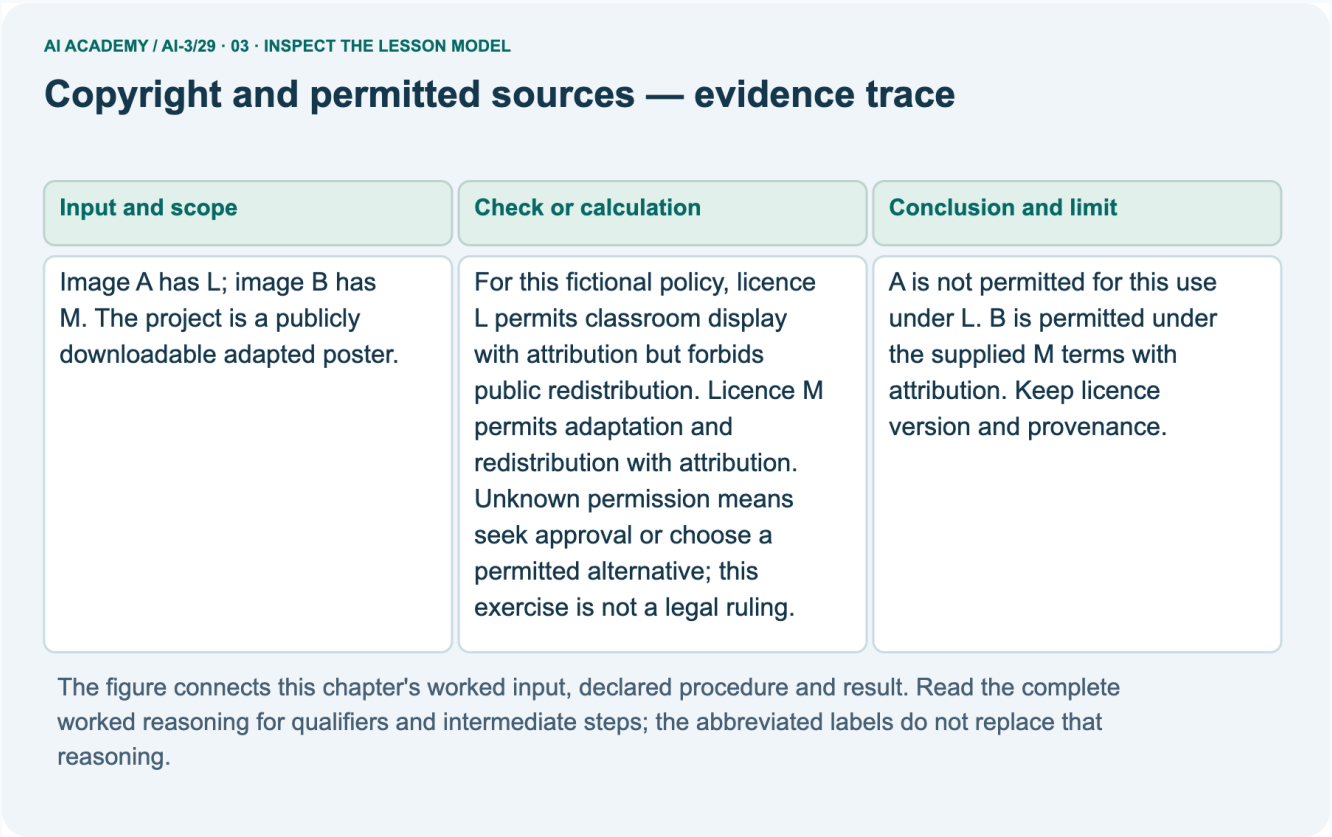

Follow the labelled picture with the matching explanation. Open the vector diagram

Read terms: Fern excludes alteration; Moss permits it. → Match proposed use: Cropping is an alteration in these declared toy terms. → Choose eligible asset: Use Moss with its required **attribution**; do not crop Fern for this public guide.

Point to each numbered stage and explain which recorded **input** it uses.

03. Copyright and permitted sources — evidence trace

Follow the labelled picture with the matching explanation. Open the vector diagram

Copyright and permitted sources — **evidence** trace. Image A has L; image B has M.

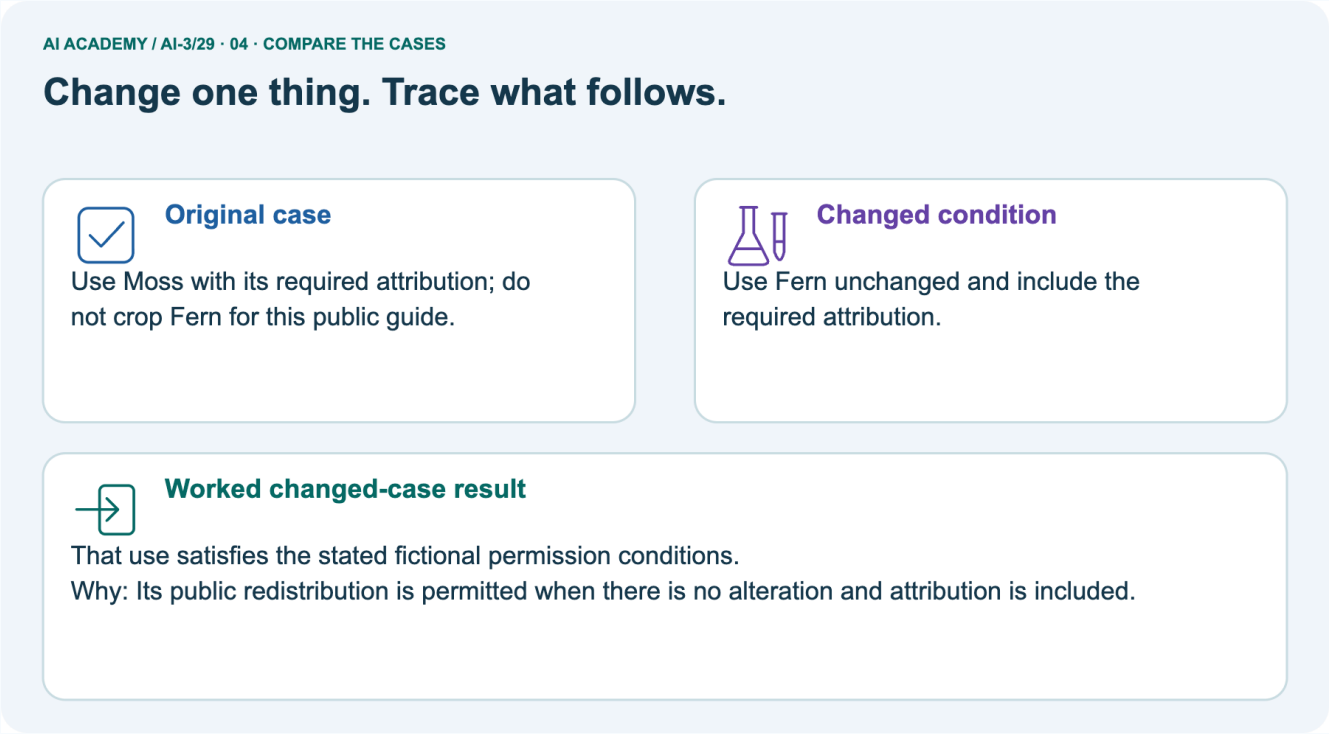

The project is a publicly downloadable adapted poster. | For this fictional policy, **licence** L permits classroom display with **attribution** but forbids public redistribution.

Licence M permits adaptation and redistribution with **attribution**. Unknown permission means seek approval or choose a permitted alternative; this exercise is not a legal ruling. | A is not permitted for this use under L.

B is permitted under the supplied M terms with **attribution**. Keep **licence** version and **provenance**.

Read the labels and values. Explain the relationship the model shows.

04. Change one thing. Trace what follows.

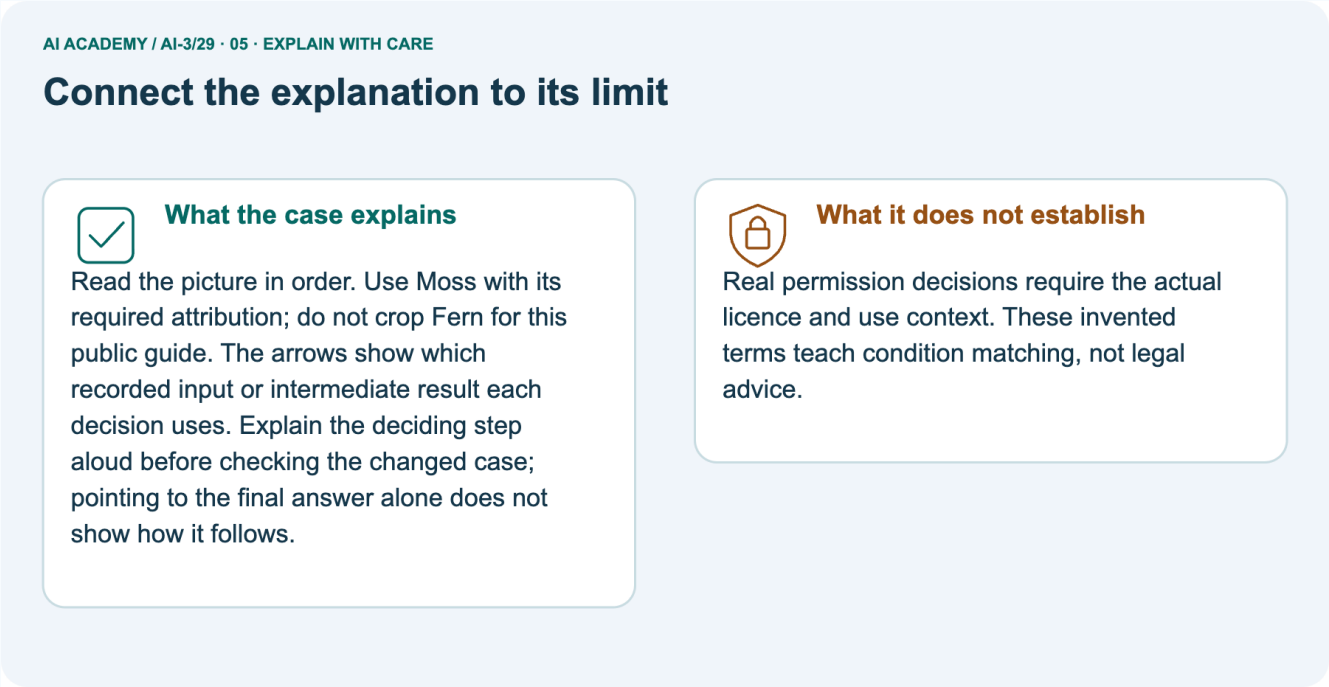

Follow the labelled picture with the matching explanation. Open the vector diagram

Original case: Use Moss with its required **attribution**; do not crop Fern for this public guide.
Changed condition: Use Fern unchanged and include the required **attribution**.

Expected result: That use satisfies the stated fictional permission conditions. Reason: Its public redistribution is permitted when there is no alteration and **attribution** is included.

Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude.

05. Connect the explanation to its limit

Follow the labelled picture with the matching explanation. Open the vector diagram

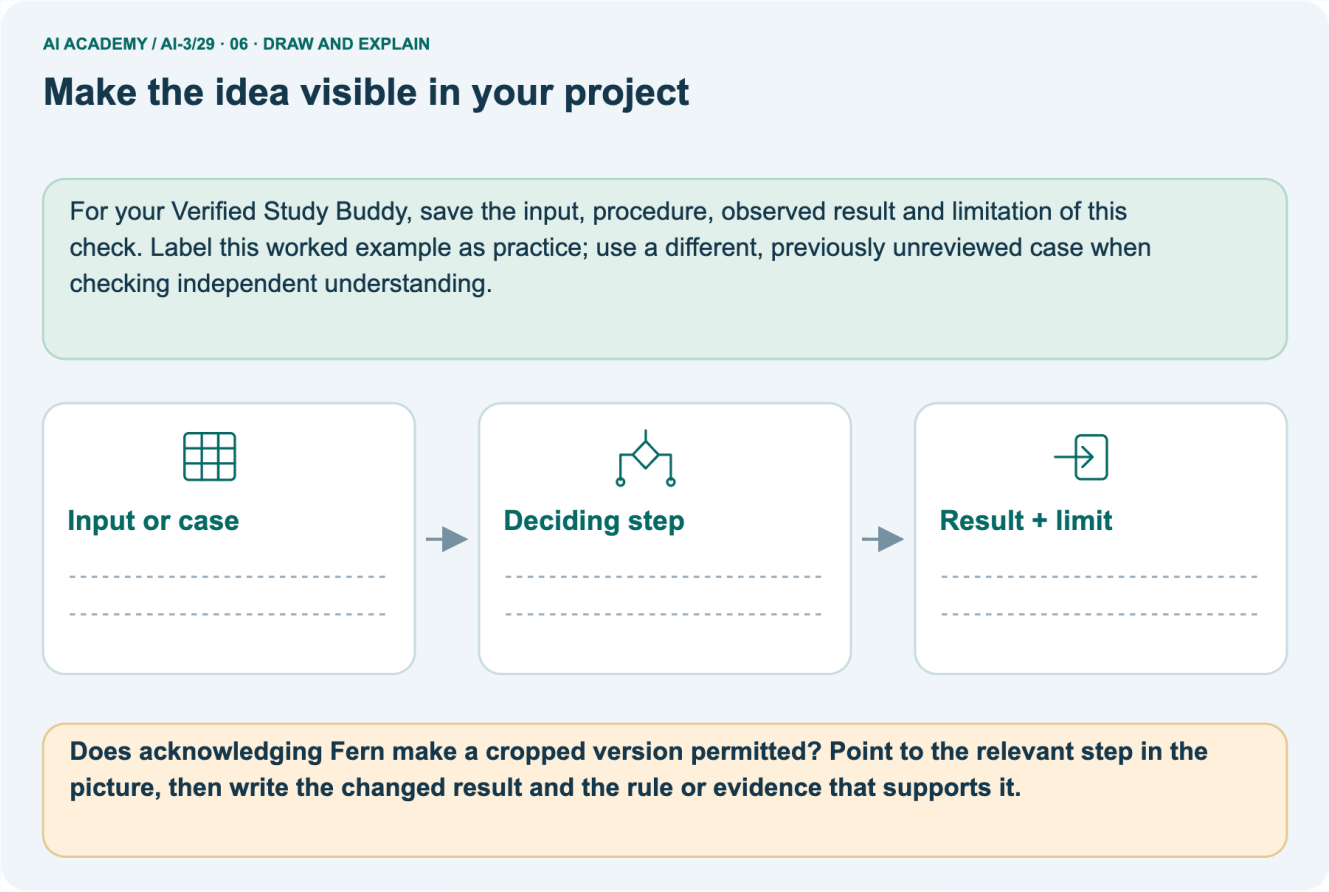

Read the picture in order. Use Moss with its required **attribution**; do not crop Fern for this public guide. The arrows show which recorded **input** or intermediate result each decision uses.

Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows. Limit: Real permission decisions require the actual **licence** and use context.

These invented terms teach condition matching, not legal advice.

Explain the case, then point to a limit on the claim.

06. Make the idea visible in your project

Follow the labelled picture with the matching explanation. Open the vector diagram

For your Verified Study Buddy, save the **input**, procedure, observed result and limitation of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding. Draw your **input**, deciding step, result and limit.

Supported question: Does acknowledging Fern make a cropped version permitted? Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.

Draw your project trace and justify the deciding step using **evidence**.
