Research ethics and consent

Learn to understand, design, build, test and explain AI systems responsibly.

Project: Reproducible AI Research Study

THE CONNECTED WEEK

Name the purpose. Check permission. Respect the exclusions.

Audit fictional research proposals without confusing grading access, requests and actual authorization.

Keep one habit: Policy contract → essay reuse ledger → native purpose map → voluntary-choice probes → paper audit → independent policy case.

MAIN LESSON · SECTION 1

Check purpose and voluntary permission before using records

> This lesson audits fictional proposals under a supplied classroom policy.

Learning goals

I can explain the **mechanism** and terminology of research ethics and **consent**.

I can apply the stated procedure to a new case with a traceable result.

I can identify an assumption or limitation and design a revealing follow-up.

Retrieve evidence boundaries and research roles

Close your notes first. A rough first answer helps us choose the right starting point; it is not a score for your ability.

Without opening the old lesson, explain one key idea from Dataset and benchmark limitations. Give an example and a mistake that the idea helps you avoid.

Without opening the old lesson, explain one key idea from Ablation studies. Give an example and a mistake that the idea helps you avoid.

Without opening the old lesson, explain one key idea from Effect size and practical importance. Give an example and a mistake that the idea helps you avoid.

After trying, check the relevant lesson or ask your teacher. Change the part of your explanation that the **evidence** shows was wrong.

Starting response

- Recall Dataset and benchmark limitations. Explain why a recorded result needs its **input** conditions and **evidence** source before it can support a claim.

My starting explanation

End goal

Explain research ethics and **consent** using the records and boundaries of this fictional investigation.

▼ Earlier wording, alternatives and picture transcripts

Your learning target

Remember before reading

This week you will practise:

Explain the **mechanism** and terminology of research ethics and **consent**

Apply the stated procedure to a new case with a traceable result

Identify an assumption or limitation and design a revealing follow-up

Retrieve what you already know

This week's end goal

MAIN LESSON · SECTION 2

Distinguish access to an essay from permission to study it

> Keep purpose, review, voluntary choice and handling visible.

Begin with the grading-versus-research question

Handing in work for grading answers a classroom requirement. It does not, under the supplied policy, grant permission to copy that work into a research study. Ask what people were told, what they could decline, what use was authorized and who reviewed the plan. Our activity uses fictional proposals only.

A well-written consent form is not by itself evidence that review, voluntariness, appropriate handling and the rest of the stated conditions have actually been satisfied.

Original ethics explanation

Research ethics considers purpose, burden, voluntary participation and consequences. Approval to teach does not automatically authorise a research data collection.

Complete fictional-policy contract

Supplied classroom-policy item	What the paper audit requires
Activity materials	Fictional records only; no actual recruitment or collection
Real collection proposed under this policy	Responsible review before collection; no claim it has occurred
Purpose	Plain-language explanation of the named investigation and intended uses
Participation	Affirmative opt-in and ability to decline without penalty
Withdrawal	Explain the declared procedure and its limits before participation
Existing grading submission	Does not establish permission for research reuse
New purpose	Outside existing permission requires its own required review and authorization
Scope of this lesson	Fictional-policy reasoning, not a determination of real institutional or legal requirements

Supplied and missing facts

List the given facts and one fact that is not supplied.

▼ **Earlier wording, alternatives and picture transcripts**

Begin by writing the question the procedure is intended to answer. Identify the information already supplied, the information it will produce and the information still missing.

These are constructed classroom examples; they do not require live accounts, private records or an external service. Do not treat a plausible explanation as a measured outcome.

MAIN LESSON · SECTION 3

Trace the first unsupported permission inference

> The problem occurs before collection, not after a polished report.

Original policy procedure

Use fictional records for this course. For the supplied classroom policy, a real study needs responsible review, plain-language purpose, opt-in **consent** and withdrawal handling before collection.

Do not implement real recruitment in this exercise.

Complete proposal-to-permission ledger

Main proposal step	Evidence supplied	Audit result under this policy
Student submits essay	Submission is for grading	Supports the grading purpose only
Team proposes automatic study copy	No separate research opt-in or review supplied	Research permission is not established
Assume submission implies agreement	Purpose changes without its required process	Unsupported inference
Repair for this course	Use fictional essay substitutes	No real records need to be copied
Any actual future study	Required review and voluntary permission before collection	Not performed or approved by this exercise

State assumptions and explain the visual

Before applying the procedure, write its units, denominator or decision boundary where relevant. A partner should be able to repeat each step using the same **input**s.

If a required **input** is absent or violates the stated contract, record that condition explicitly instead of quietly replacing it with a convenient value.

Point to the **input**, the deciding step and the result in this week's visual. Explain the same step in ordinary words. A picture helps when you can say what each part represents.

▼ Earlier wording, alternatives and picture transcripts

Research ethics and consent — evidence trace

INPUT AND SCOPE	CHECK OR CALCULATION	CONCLUSION AND LIMIT
Proposal automatically copies student essays into a study because they were submitted for grading.	Use fictional records for this course. For the supplied classroom policy, a real study needs responsible review, plain-language purpose, opt-in consent and withdrawal handling before collection. Do not implement real recruitment in this exercise.	The grading purpose does not establish research permission under the policy. Redesign around fictional data or obtain required review and voluntary permission before collection.

The figure connects this chapter's worked input, declared procedure and result. Read the complete worked reasoning for qualifiers and intermediate steps; the abbreviated labels do not replace that reasoning.

Connect the picture and the explanation

MAIN LESSON · SECTION 4

Predict a request to reuse drawings for an excluded purpose

> A new request does not expand the existing agreement.

Main task and response

- Proposal automatically copies student essays into a study because they were submitted for grading. Show the intermediate steps and give the conclusion with its scope.

> **Keep the procedure fixed. Explain what changed in the inputs and result.**

Predict changed drawing purpose

- Change: A new project requests the same drawings for an excluded purpose.

▼ **Check after predicting**

Prediction: Do not reuse them under the existing **consent**; seek the required new authorisation.

Reason: The new purpose falls outside the stated agreement.

▼ Earlier wording, alternatives and picture transcripts

Compare a familiar case with a changed case

Change one thing in the pictured case

MAIN LESSON · SECTION 6

Read permitted purpose and exclusions before interpreting a request

> A contribution does not grant unlimited reuse.

Main essay proposal and checked policy conclusion

Proposal automatically copies student essays into a study because they were submitted for grading.

The grading purpose does not establish research permission under the policy. Redesign around fictional data or obtain required review and voluntary permission before collection.

Compare the intermediate **evidence** with the final statement. Explain why each number or decision follows from the stated **input**s.

The conclusion belongs to this scenario and procedure; changing the **input**s, evaluation population or authority can change what it establishes. Retain the raw record so a later revision can be compared honestly.

Separate drawing agreement and limits

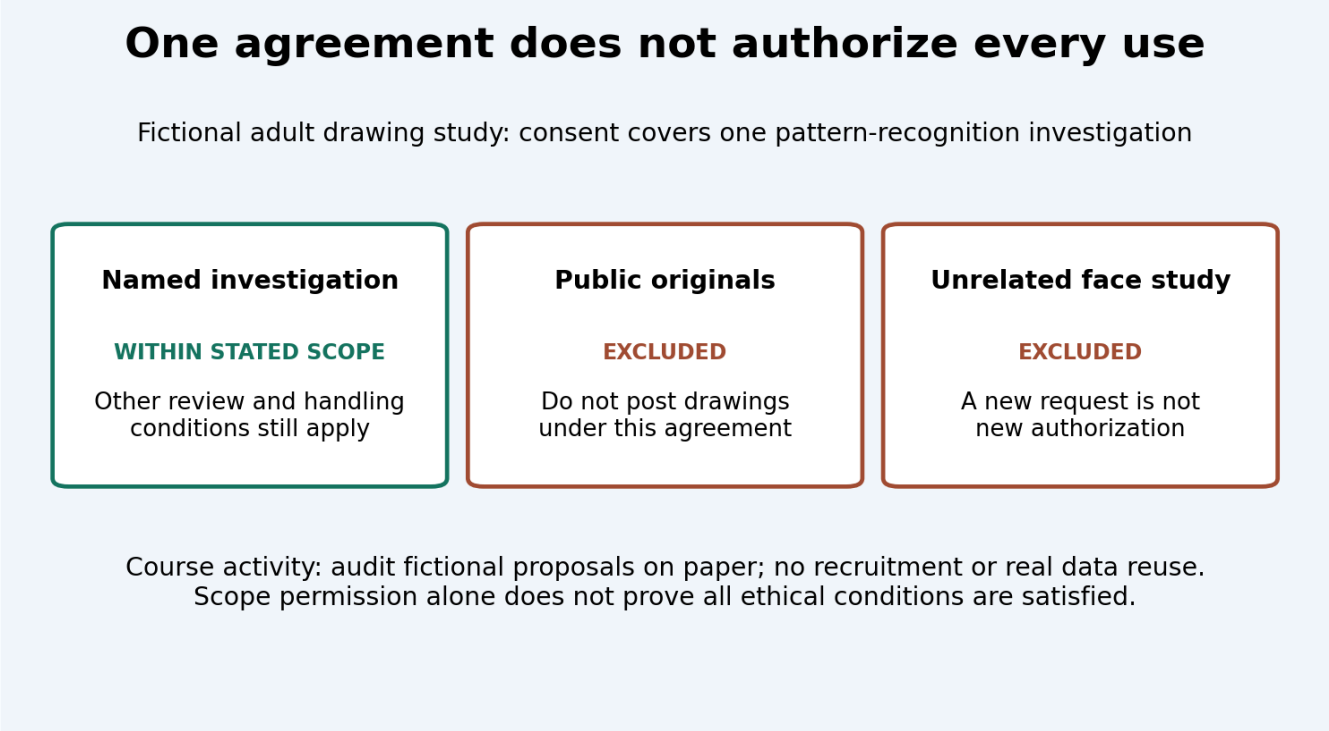

Consent is specific, not universal. A fictional study asks adults to submit anonymous drawings for one pattern-recognition investigation.

Consent covers this study only. It excludes public posting of originals and unrelated face-recognition research.

The separate picture concerns fictional adult contributors and one named drawing investigation. The stated agreement excludes public posting of originals and unrelated face-recognition research. Neither excluded use becomes permitted merely because someone asks for the drawings. Even the named use still depends on the other stated review and handling conditions.

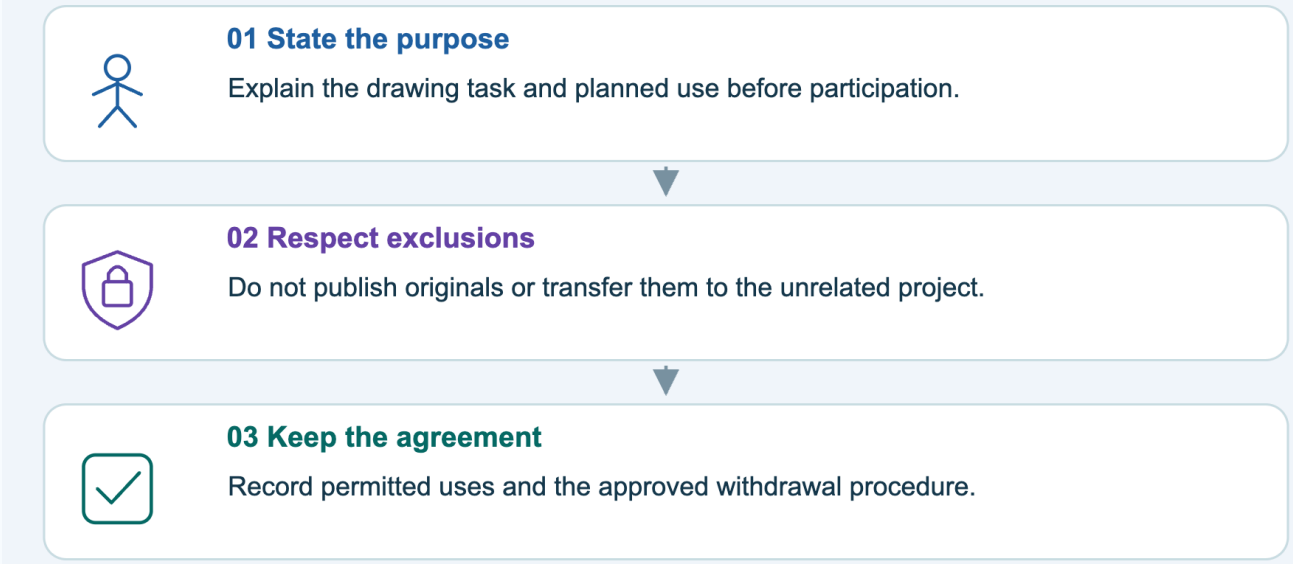

The picture calls the drawings anonymous but supplies no identification or withdrawal mechanism. Do not promise that an already unlinked contribution can always be found and deleted; explain the actual declared withdrawal process and its limits. None of these adult-scenario facts authorizes research with children.

See purpose and exclusions in the native map

AI ACADEMY / AI-7/19 · 02 · TRACE THE CASE

Follow the deciding steps

Follow the labelled picture with the matching explanation. Open the vector diagram

Read the picture one step at a time

STEP	WHAT HAPPENS AND WHY
1. State the purpose	Explain the drawing task and planned use before participation.
2. Respect exclusions	Do not publish originals or transfer them to the unrelated project.
3. Keep the agreement	Record permitted uses and the approved withdrawal procedure.

Match each pictured step to the supplied facts. This is a worked teaching case, not an independent assessment.

Research ethics includes what people agree to, how they can decline and how risks are addressed. A contribution does not grant unlimited reuse.

Complete requested-use audit

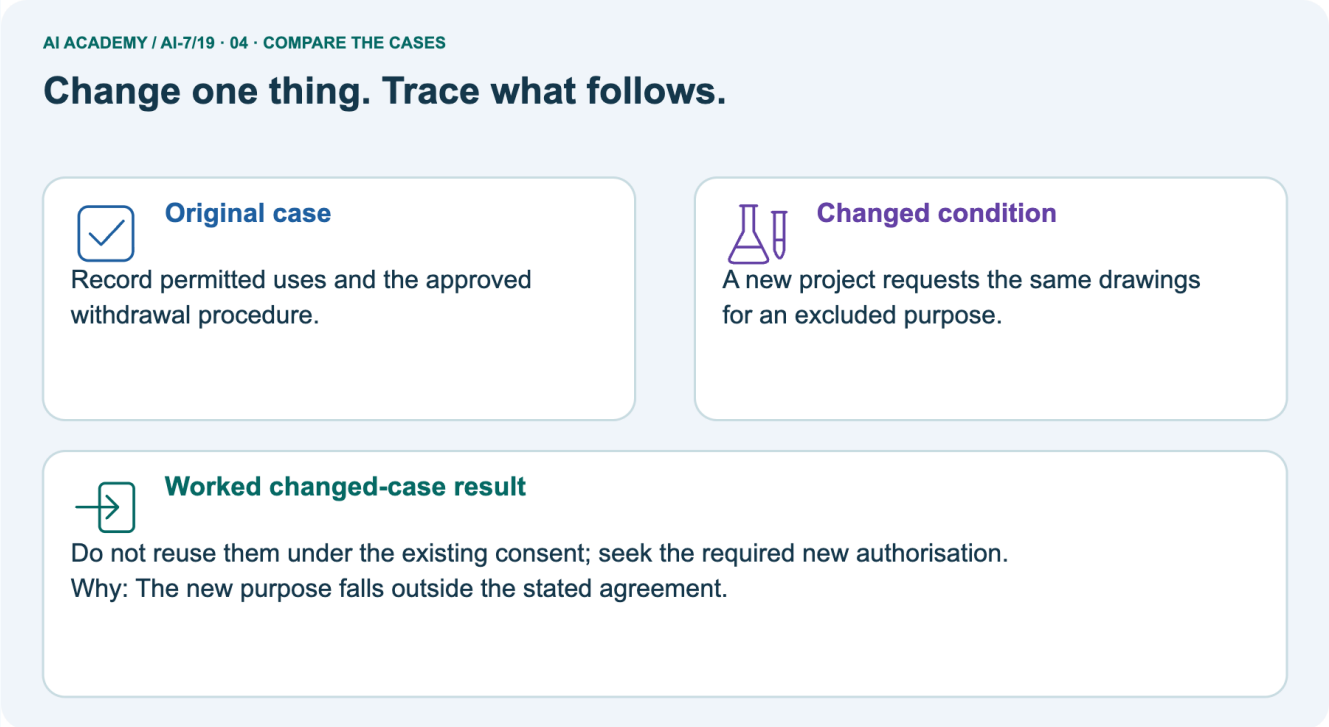

Requested drawing use	Within this agreement?	Paper-audit action
Named pattern-recognition investigation	Within stated purpose	Check remaining review and handling conditions
Public posting of originals	Explicitly excluded	Do not post under this agreement
Unrelated face-recognition project	Explicitly excluded	Existing agreement does not authorize reuse
New project asks for originals	Request only; no new authorization supplied	Keep exclusion; identify required new process

Requested drawing use	Within this agreement?	Paper-audit action
Find an anonymous contribution for withdrawal	Mechanism not supplied	Do not invent traceability or unlimited deletion promises

Predict an excluded new request

- Change one thing: A new project requests the same drawings for an excluded purpose. Predict the result before checking the explanation. What remains the same?

▼ Check after predicting

Follow the labelled picture with the matching explanation. Open the vector diagram

Explain remaining authorization limits

- This fictional adult scenario is not approval for research with children; real oversight and applicable rules are separate requirements.

- Read the labelled picture: Identify which uses the drawing **consent** permits and excludes. Can the unrelated project reuse the drawings under this agreement, and what new authorisation would be needed?

▼ **Earlier wording, alternatives and picture transcripts**

Learn from the worked case

Cover the result before checking it. Say what is given, choose the procedure, and follow one step at a time. Then uncover the result and explain your first mismatch. Ask why a step is allowed, not only what number it produces.

A pictorial worked case: Research ethics and consent

The facts we will use

Follow the labelled picture with the matching explanation. Open the vector diagram

Why this result follows

What this example does not establish

MAIN LESSON · SECTION 7

Repair implied permission and unsupported approval claims

> State the missing process without pretending it has happened.

Original qualification and repair setup

This classroom policy exercise does not determine real legal or institutional requirements.

A useful check asks what would make the reasoning fail. Distinguish a failure to execute the declared procedure from a weakness in the procedure itself.

The first may require a correction; the second requires an explicitly revised method and new **evidence**. Preserve unsuccessful cases so an improved result cannot hide the original problem.

Purpose, voluntariness and handling probes

Ethics/policy probe	Checked interpretation
Teacher can access work for grading	Access does not establish study permission
No reply from a person	Not affirmative opt-in under the supplied policy
Participation affects grades	Conflicts with a voluntary, penalty-free choice
A new project has an interesting purpose	Interest does not override existing exclusions
A form has been drafted	Not evidence of consent obtained or review completed
Contributions described as anonymous	Do not assume a reversible identity link for later deletion
Purpose is within scope	Other review, burden and handling conditions still need checking
A classroom answer is correct	Does not approve an actual human study

Write a policy-grounded repair

- A report omits this qualification: This classroom policy exercise does not determine real legal or institutional requirements. Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

Guided: restate the worked result, then name the assumption or limitation that prevents a broader conclusion.

State one repair and the checks you would rerun.

▼ Earlier wording, alternatives and picture transcripts

Locate the earliest unsupported step

MAIN LESSON · SECTION 8

Practise auditing a fictional proposal without collecting records

> Reserve the silence-and-grades scenario for a first individual attempt.

Shared explanation

- Explain the weekly **mechanism** in your own words. Use the worked scenario to name its **input**, decision rule and **output**.

Guided: restate the worked result, then name the assumption or limitation that prevents a broader conclusion.

Explain your prediction to a partner before comparing results.

Supported workbook trace

Use workbook W2 for the connected example “Research ethics and **consent**”. First fill the **input** and rule boxes. Try the middle steps before asking for a hint. After a hint, try the next step yourself.

Plan	Do	Check
What is given? Which rule or procedure applies?	Record each intermediate step.	Does the result follow? What remains unknown?

Explain your trace to a partner. Your partner points to one step to check. Swap roles on the next case. Each person writes their own explanation.

Individual check

- Use the worked case for Research ethics and **consent**. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported.

  Point to the step or supplied fact that decides; explain your repair if needed.

- Answer on your own before discussion. If you are unsure, say which step you need help with.

Picture response

- Identify which uses the drawing **consent** permits and excludes. Can the unrelated project reuse the drawings under this agreement, and what new authorisation would be needed?

> **My explanation using a pictured step and the given facts**

Reserve selected policy scenario

This is supported practice. Keep the separately named independent case for an attempt before feedback.

▼ **Earlier wording, alternatives and picture transcripts**

Practise with less help: Trace the worked case

Check your reasoning

Explain the picture

Investigate the proposal through a complete paper permission audit

> Mark real review, collection and consent as not performed.

Current fictional proposal

Proposal automatically copies student essays into a study because they were submitted for grading. Show the intermediate steps and give the conclusion with its scope.

Complete paper-audit instructions

1. Use a paper audit, not recruitment or software that copies records. Write the proposed use, existing purpose, required policy conditions, supplied evidence and first unsupported inference. The expected main finding is that submitting an essay for grading does not establish research permission. Choose fictional substitutes for this course. A proposed repair is a plan, not a completed review or actual consent.

   For the drawing case, keep explicit exclusions and avoid inventing an anonymous-data withdrawal mechanism.

Evidence record and reflection

Record	Your evidence
Given input and fixed rule	
Prediction before checking	
Actual result, or “not run”	
First mismatch and one explanation	
Boundary or missing input and expected response	

On paper, trace the supplied procedure. If code is provided, predict before running it in a local practice file. Never write an expected answer as though it were an observed run.

Before trying: what do I expect, and why? While trying: which step could first go wrong? Afterwards: what did I actually observe, and what should change? Keep “not run” if you only traced the procedure.

▼ **Earlier wording, alternatives and picture transcripts**

Predict, investigate and preserve the evidence

Plan → try → check

MAIN LESSON · SECTION 14

Try alone: audit silence as agreement and graded participation

> Apply the supplied opt-in policy before opening feedback.

Independent proposal

A fictional policy requires opt-in; proposal treats silence as agreement and grades participation. Audit.

First attempt and support record

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

Feedback after trying

Attempt the independent case before hints. Record whether you worked alone, used a hint or followed a model. After feedback, fix the first unsupported step and explain why it changed.

A later check uses a changed case, not a copied answer.

▼ **Earlier wording, alternatives and picture transcripts**

Independent case: Apply a new case independently

Attempt this without hints

A fictional policy requires opt-in; proposal treats silence as agreement and grades participation. Audit.

> **My independent procedure, result and limitation**
>
> | |
> |---|
> | |
> | |
> | |
> | |

Record support used: none, hint or teacher explanation. After feedback, a different case is needed to demonstrate independence.

Use feedback to improve

MAIN LESSON · SECTION 11

Save purpose, policy conditions and unresolved questions

> Keep proposed remedies separate from completed authorization.

Project and artifact

Add a labelled research ethics and **consent evidence** sheet to Reproducible AI Research Study. Show how you can explain the **mechanism** and terminology of research ethics and **consent**.

Use the supplied fictional case and keep its **input**s, intermediate steps, calculation or **prediction**, and limitation. Connect this record to last week's record; a matching answer without a trace is insufficient.

Project evidence	Record
Component and version	
Inputs permitted at prediction time	
Trace and comparison with earlier work	
Failure, limit and human review	

Actual fictional-policy trace and limits

For the Reproducible AI Research Study, retain an annotated worked trace and the changed-case reasoning. Connect the claim to its records, units and assumptions so another investigator can challenge or reproduce it.

▼ **Earlier wording, alternatives and picture transcripts**

Evidence for your project

MAIN LESSON · SECTION 16

Explain how purpose, choice and review constrain research use

> A correct fictional audit is not evidence of actual authorization.

Retrieve and explain

- Close your notes. Explain this goal in your own words: Explain the **mechanism** and terminology of research ethics and **consent**

My deciding step, evidence and one remaining question

Plan a changed-case return

If you are unsure, return to the worked picture and explain one arrow. If you are ready, change an **input** or assumption and justify your **prediction**.

Save your workbook **evidence**. At the next review, try a different case before opening your old answer.

Reference bank and extra practice

Choose the reference that helps your next step.

▼ **Reference · Use research vocabulary precisely**

REFERENCE · SECTION 5

Reference · Use research vocabulary precisely

> Connect each term to the question, comparison, measurement or evidence.

Vocabulary and your explanation

Word	Meaning
Consent	A declared voluntary permission process
Purpose limitation	Restricting use to the authorised purpose
Research burden	The cost or risk imposed on participants

Use two terms to explain a step in this week's example.

▼ Extra challenge · Explain a stronger case

REFERENCE · SECTION 10

Extra challenge · Explain a stronger case

> Choose the next challenge after the main route.

Explain,repair and extend

- Explain the weekly **mechanism** in your own words. Use the worked scenario to name its **input**, decision rule and **output**.

- A report omits this qualification: This classroom policy exercise does not determine real legal or institutional requirements. Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

- For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison.

  Do not reuse W4 as a new final test after receiving feedback.

Explain → apply → challenge

> **Explain which evidence supports your conclusion and which claim remains unproved.**

▼ Reference · Check the research reasoning and its limits

REFERENCE · SECTION 12

Reference · Check the research reasoning and its limits

> Use after practice; reserve the selected independent case for its first attempt.

Current explanation and response

- Complete the supported workbook tasks before attempting W4 independently. Record any hints or help used. After feedback, use the teacher's fresh retry rather than copying the earlier answer.

  For a project, select a relevant new case, predict the outcome from the declared rule and preserve the result alongside any revision.

- For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison.

  Do not reuse W4 as a new final test after receiving feedback.

Exit: propose one revealing change to the worked scenario. State the expected outcome and the evidence that would make you revise your explanation.

My limited claim and a useful next check

▼ **Extra practice · Revisit the complete trace**

REFERENCE · SECTION 13

Extra practice · Revisit the complete trace

> Predict before reading the supplied steps.

Complete trace and evidence

Complete evidence record

Research ethics and consent — evidence trace

INPUT AND SCOPE	CHECK OR CALCULATION	CONCLUSION AND LIMIT
Proposal automatically copies student essays into a study because they were submitted for grading.	Use fictional records for this course. For the supplied classroom policy, a real study needs responsible review, plain-language purpose, opt-in consent and withdrawal handling before collection. Do not implement real recruitment in this exercise.	The grading purpose does not establish research permission under the policy. Redesign around fictional data or obtain required review and voluntary permission before collection.

The figure connects this chapter's worked input, declared procedure and result. Read the complete worked reasoning for qualifiers and intermediate steps; the abbreviated labels do not replace that reasoning.

Follow the **input** through the stated procedure to its result. Cover the result first, predict it, then explain every intermediate step. The text/table accompanies the figure so the example can be read without colour.

My complete trace of the worked case

▼ **Reference · The earlier route checklist**

REFERENCE · SECTION 15

Reference · The earlier route checklist

> Use one main route rather than repeating the lesson.

Targets,route and first prediction

Start with this question: **Consent** is specific, not universal. A fictional study asks adults to submit anonymous drawings for one pattern-recognition investigation.

By the end, I can	How I will show it
Explain the mechanism and terminology of research ethics and consent	Explain the deciding step, show a trace or test, and state one limit.
Apply the stated procedure to a new case with a traceable result	Explain the deciding step, show a trace or test, and state one limit.
Identify an assumption or limitation and design a revealing follow-up	Explain the deciding step, show a trace or test, and state one limit.

Remember → watch and explain → try with help → investigate → try independently → keep project **evidence**. Your teacher may spread this lesson across several classes.

Keep your first **prediction**. Compare it with what the **evidence** shows and explain any change.

▼ **Extra practice · Predict,check and repair**

REFERENCE · SECTION 17

Extra practice · Predict,check and repair

> Keep supported feedback separate from the independent case.

First supported question and optional hint

- **Consent** is specific, not universal. A fictional study asks adults to submit anonymous drawings for one pattern-recognition investigation.
- Which labelled step matches this detail? Record permitted uses and the approved withdrawal procedure.
- 1. State the purpose
- 2. Keep the agreement
- 3. Respect exclusions
- Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

Practice 1: explain the deciding evidence

My selected conclusion, deciding fact and explanation

▼ **Check after the first attempt**

After your attempt, compare with the supported explanation: Keep the agreement Record permitted uses and the approved withdrawal procedure.

Research ethics includes what people agree to, how they can decline and how risks are addressed. A contribution does not grant unlimited reuse.

Changed-case question and optional hint

- Changed-case practice: A new project requests the same drawings for an excluded purpose. Which conclusion is supported by the supplied facts?
- 1. This one example guarantees correct results for every future **input**.
- 2. Do not reuse them under the existing **consent**; seek the required new authorisation.
- 3. We can decide the result without examining the changed **input** or the procedure.
- Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

Practice 2: explain the deciding evidence

My selected conclusion, deciding fact and explanation

▼ Check after the changed attempt

After your attempt, compare with the supported explanation: Do not reuse them under the existing **consent**; seek the required new authorisation. The new purpose falls outside the stated agreement.

Repair and retain the record

Review Dataset and benchmark limitations (ai-7/18). Goal: Explain the **mechanism** and terminology of dataset and benchmark limitations. Short practice: Report the indoor benchmark with its denominator and missing condition.

After two correct outdoor cases out of four are added, what slice rate is supported and what remains uncertain?. Return to this week and explain what you changed.

Review Ablation studies (ai-7/16). Goal: Explain the **mechanism** and terminology of ablation studies. Short practice: Calculate the filter ablation's two rates and count change.

Which single component is altered, and why does also changing the model prevent isolating the filter?. Return to this week and explain what you changed.

Review Effect size and practical importance (ai-7/13). Goal: Explain the **mechanism** and terminology of effect size and practical importance. Short practice: Calculate the absolute error-rate reduction from 20/1000 to 15/1000.

Does it meet the ten-fewer-errors threshold, and what changes when B has eight errors?. Return to this week and explain what you changed.

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run **evidence**. Open the HTML copy to read or print it.

Drafts stay in this browser when storage is available; clear drafts on a shared device.

▼ Earlier wording, alternatives and picture transcripts

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

Repair a missing building block

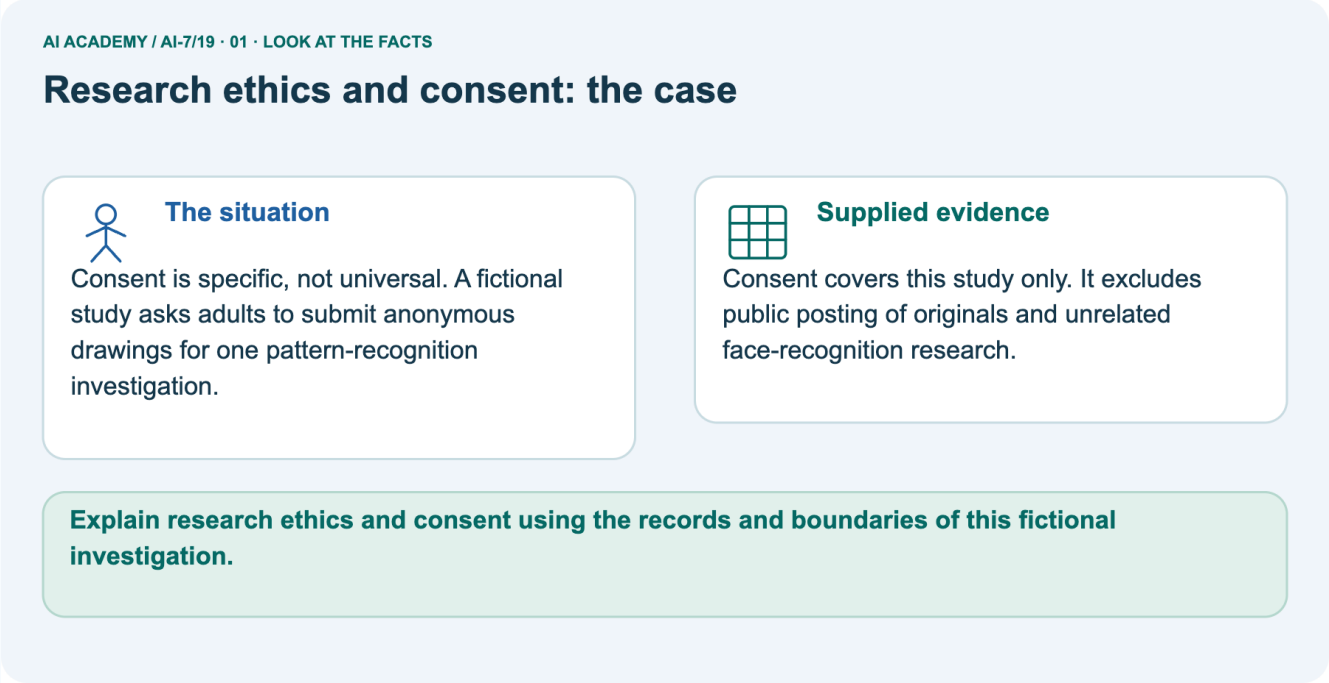

Keep your completed work

REFERENCE · SECTION 18

Reference · Six-picture concept journey

> Choose the picture that supports the current explanation.

01. Research ethics and consent: the case

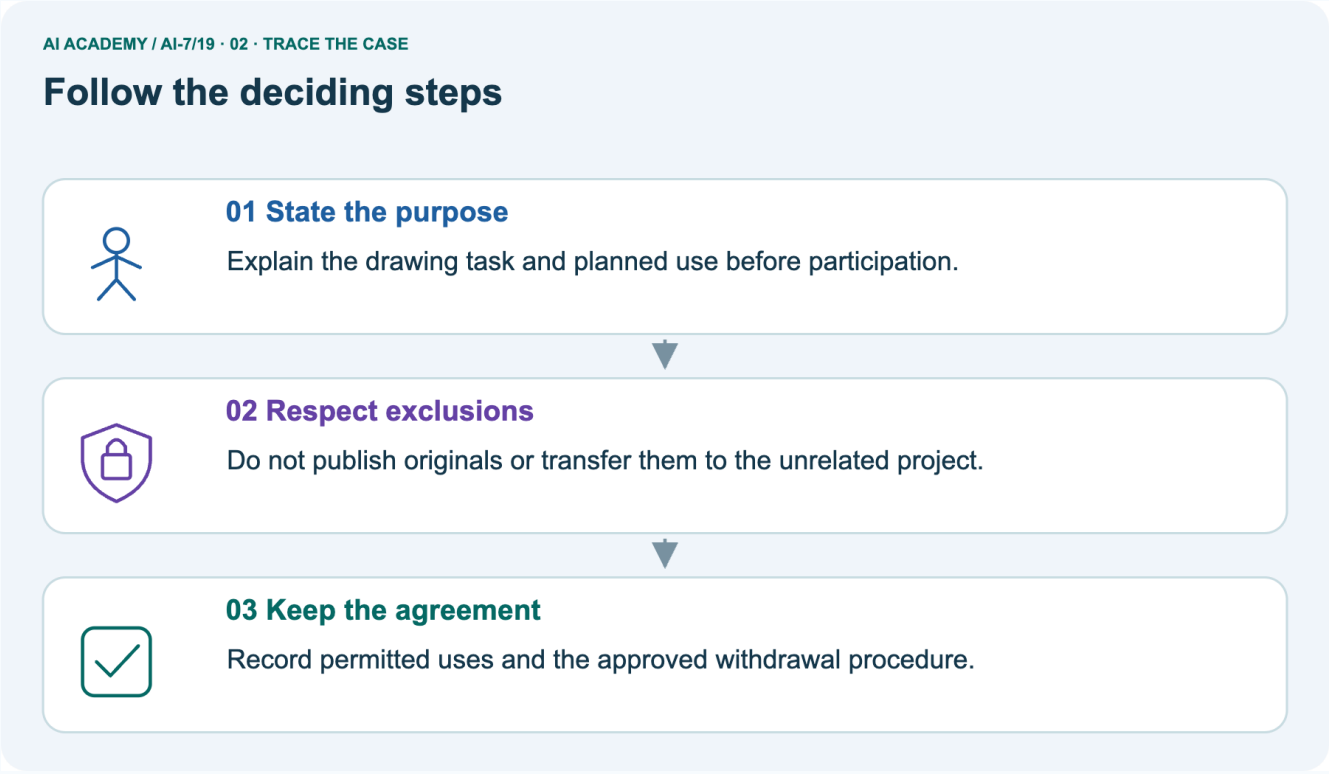

Follow the labelled picture with the matching explanation. Open the vector diagram

Consent is specific, not universal. A fictional study asks adults to submit anonymous drawings for one pattern-recognition investigation. Supplied facts: **Consent** covers this study only.

It excludes public posting of originals and unrelated face-recognition research.

Point to the given fact that matters most. Explain why it matters.

02. Follow the deciding steps

Follow the labelled picture with the matching explanation. Open the vector diagram

State the purpose: Explain the drawing task and planned use before participation. → Respect exclusions: Do not publish originals or transfer them to the unrelated project. → Keep the agreement: Record permitted uses and the approved withdrawal procedure.

Point to each numbered stage and explain which recorded **input** it uses.

03. Research ethics and consent — evidence trace

Follow the labelled picture with the matching explanation. Open the vector diagram

Research ethics and **consent** — **evidence** trace. Proposal automatically copies student essays into a study because they were submitted for grading. | Use fictional records for this course.

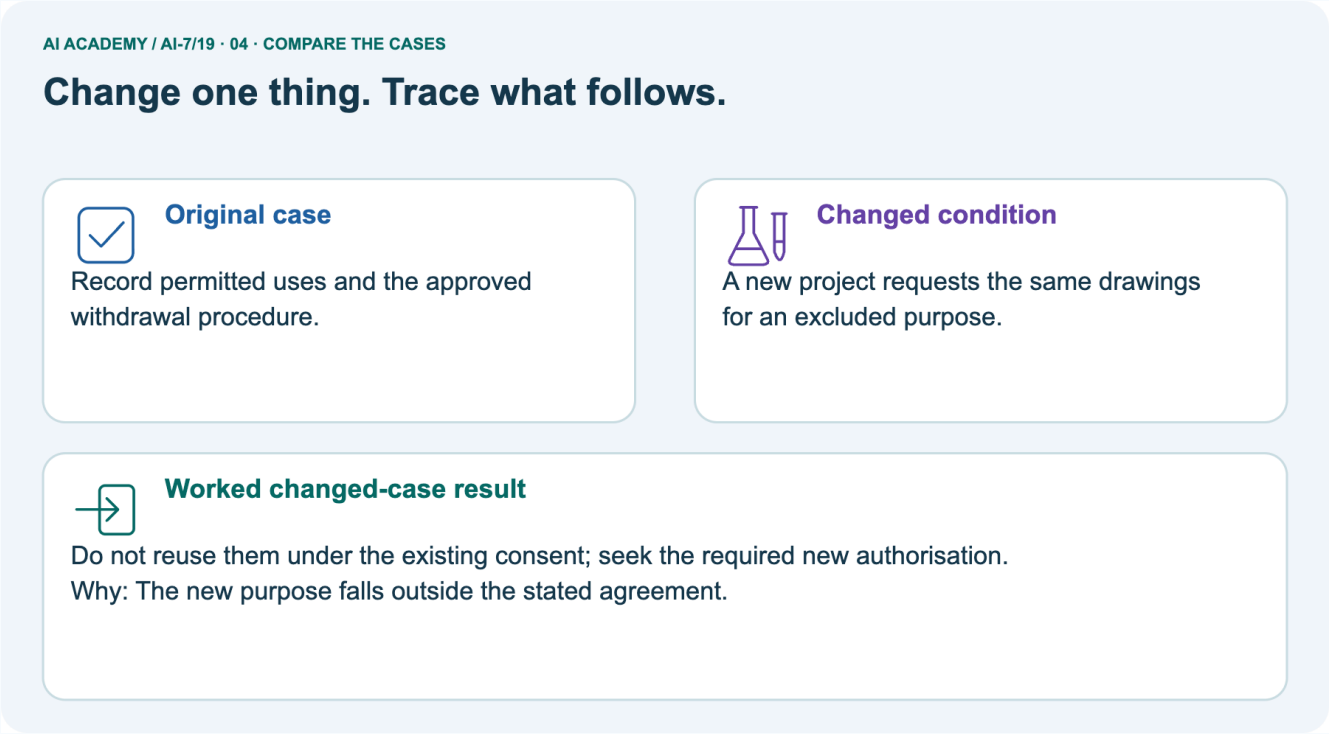

For the supplied classroom policy, a real study needs responsible review, plain-language purpose, opt-in **consent** and withdrawal handling before collection.

Do not implement real recruitment in this exercise. | The grading purpose does not establish research permission under the policy.

Redesign around fictional data or obtain required review and voluntary permission before collection.

Read the labels and values. Explain the relationship the model shows.

04. Change one thing. Trace what follows.

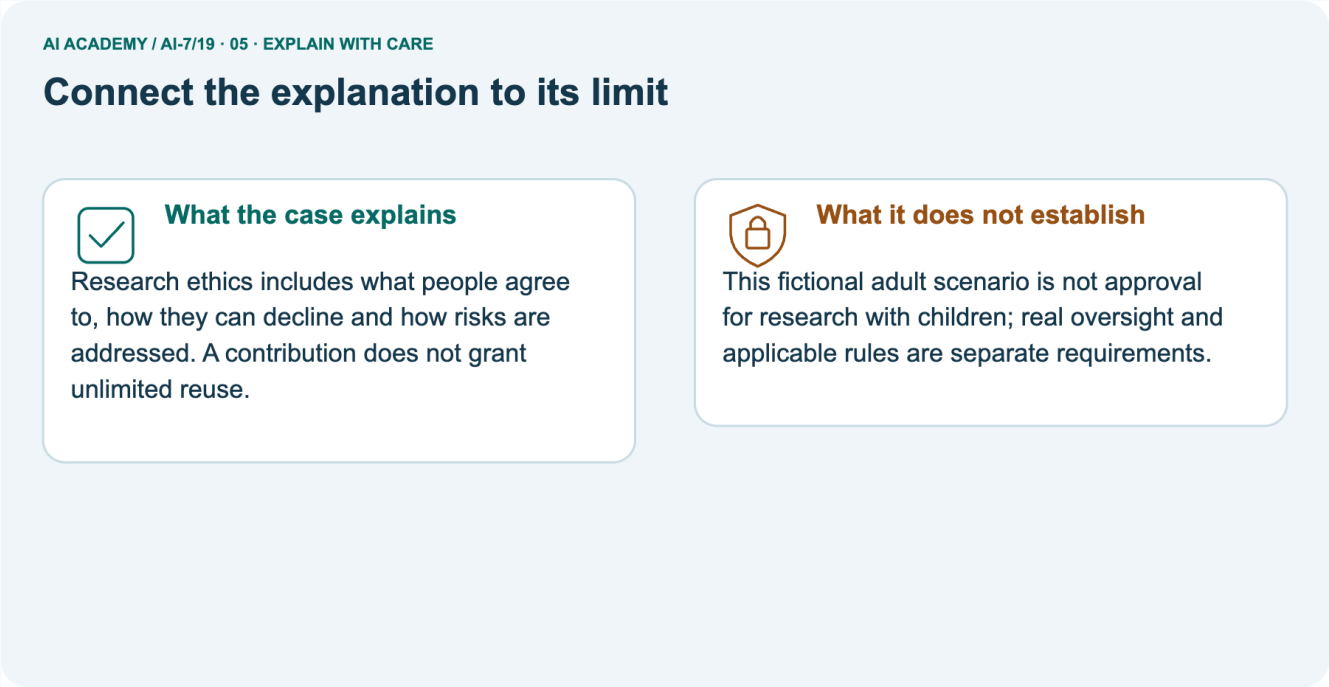

Follow the labelled picture with the matching explanation. Open the vector diagram

Original case: Record permitted uses and the approved withdrawal procedure. Changed condition: A new project requests the same drawings for an excluded purpose.

Expected result: Do not reuse them under the existing **consent**; seek the required new authorisation. Reason: The new purpose falls outside the stated agreement.

Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude.

05. Connect the explanation to its limit

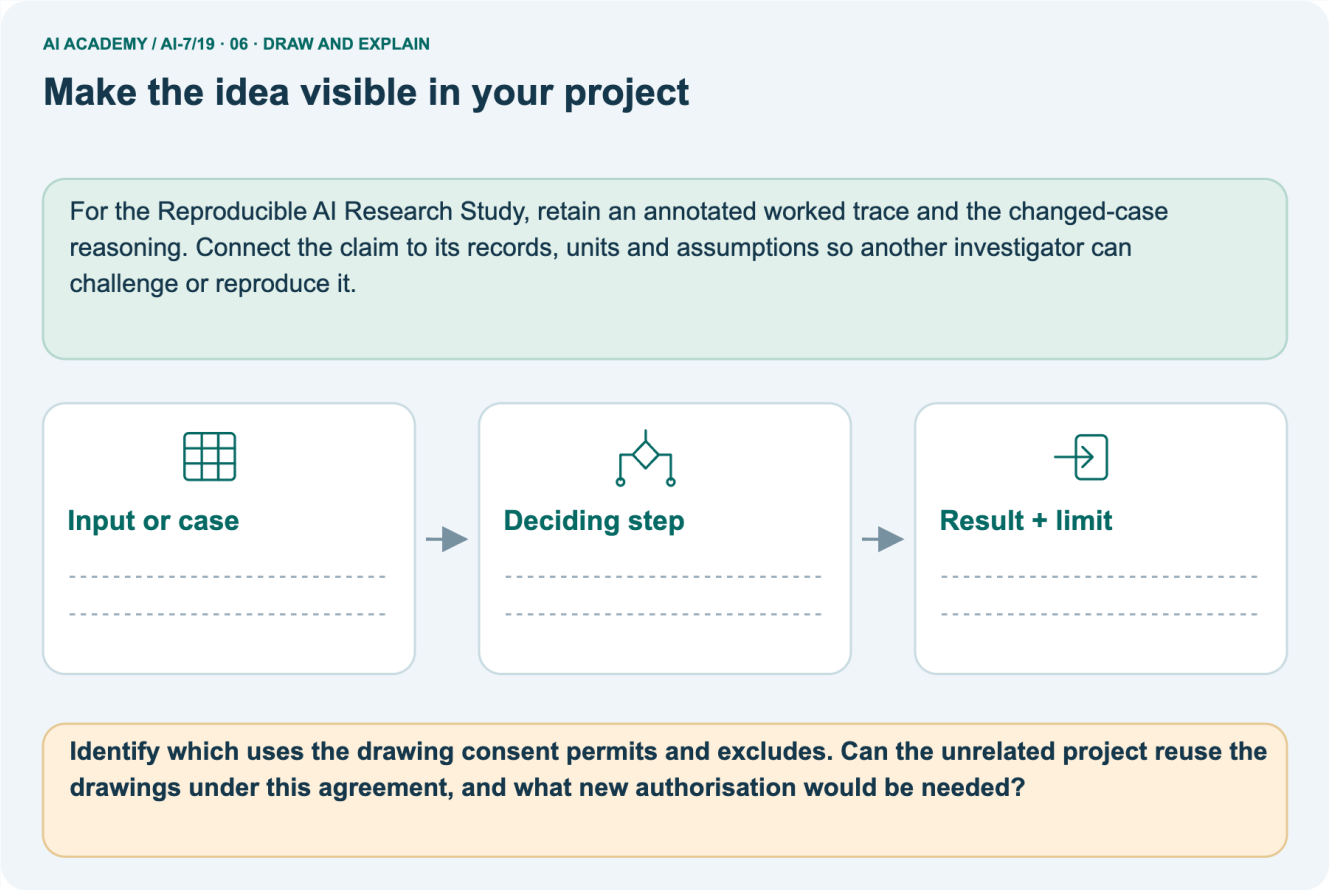

Follow the labelled picture with the matching explanation. Open the vector diagram

Research ethics includes what people agree to, how they can decline and how risks are addressed. A contribution does not grant unlimited reuse.

Limit: This fictional adult scenario is not approval for research with children; real oversight and applicable rules are separate requirements.

Explain the case, then point to a limit on the claim.

06. Make the idea visible in your project

Follow the labelled picture with the matching explanation. Open the vector diagram

For the Reproducible AI Research Study, retain an annotated worked trace and the changed-case reasoning. Connect the claim to its records, units and assumptions so another investigator can challenge or reproduce it.

Draw your **input**, deciding step, result and limit. Supported question: Identify which uses the drawing **consent** permits and excludes.

Can the unrelated project reuse the drawings under this agreement, and what new authorisation would be needed?

Draw your project trace and justify the deciding step using **evidence**.

▼ Earlier wording, alternatives and picture transcripts

01. Research ethics and consent: the case

02. Follow the deciding steps

03. Research ethics and consent — evidence trace

04. Change one thing. Trace what follows.

05. Connect the explanation to its limit

06. Make the idea visible in your project

▼ Optional interactive practice and completed work

Save or print your responses for your portfolio. Progress and drafts on the hosted website stay in the current browser. Use only fictional or teacher-approved data.
