AI ACADEMY · LEVEL 3 · GRADE 8 · WEEK 18 · WORKBOOK

Retrieval Augmented Generation

Learn to understand, design, build, test and explain AI systems responsibly.

Project: Verified Study Buddy

THE CONNECTED WEEK

One main grounding record with two retained retrieval extensions.

Map claims, trace support, audit limits and design a missing-answer check.

Keep one habit: Keep source versions, conditions, response support and unresolved fields together.

MAIN LESSON · SECTION 1

Recall · Retrieve earlier ideas

> Try before opening notes.

Your evidence record

- Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

- Without opening the old lesson, explain one key idea from Model Memory vs Retrieval. Give an example and a mistake that the idea helps you avoid.

- Without opening the old lesson, explain one key idea from Source Quality. Give an example and a mistake that the idea helps you avoid.

- Without opening the old lesson, explain one key idea from Speech and Audio Systems. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

My remembered idea, example and correction

My remembered idea, example and correction

▼ **Earlier wording, alternatives and picture transcripts**

Model Memory vs Retrieval

Source Quality

Speech and Audio Systems

W1 · Explain grounding

> Connect each claim to evidence actually retrieved.

Your evidence record

- Room C supported practice: current source P approves room C; Q lists its capacity10. Draft adds lunch without evidence. Approval and capacity are supported; lunch is not. Separate pictured note S4: ice is solid water; warming can melt it into liquid water; no duration or temperature supplied.

- Reference for this exercise: open this week's student lesson, "Retrieval Augmented Generation", at "See how it works" and "Follow a worked example". Use the original worked values or code named in the question; the later pictorial case is a separate example. Keep this reference beside your workbook while practising.

- Explain the weekly **mechanism** in your own words. Use the worked scenario to name its **input**, decision rule and **output**.

> **My reasoning and evidence**

MAIN LESSON · SECTION 13

W2 · Trace room C support

> Separate supported approval/capacity from unsupported lunch.

Your evidence record

- Room C supported practice: current source P approves room C; Q lists its capacity10. Draft adds lunch without evidence. Approval and capacity are supported; lunch is not. Separate pictured note S4: ice is solid water; warming can melt it into liquid water; no duration or temperature supplied.

- Current source P approves room C; Q lists C capacity 10. Draft says room C is approved, seats 10 and offers lunch. Show the intermediate steps and give the conclusion with its scope.

My reasoning and evidence

MAIN LESSON · SECTION 14

W3 · Audit a source-name shortcut

> A citation must support the exact claim and its conditions.

Your evidence record

- Room C supported practice: current source P approves room C; Q lists its capacity10. Draft adds lunch without evidence. Approval and capacity are supported; lunch is not. Separate pictured note S4: ice is solid water; warming can melt it into liquid water; no duration or temperature supplied.

- A report omits this qualification: Grounding requires support for the exact claim, including conditions; attaching a source name is insufficient.

  Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

> **My reasoning and evidence**

MAIN LESSON · SECTION 16

W5 · Design a missing-answer check

> Supply complete passages, expected supported claims and the unresolved gap.

Your evidence record

- Room C supported practice: current source P approves room C; Q lists its capacity10. Draft adds lunch without evidence. Approval and capacity are supported; lunch is not. Separate pictured note S4: ice is solid water; warming can melt it into liquid water; no duration or temperature supplied.

- Reference for this exercise: open this week’s student lesson, “Retrieval Augmented Generation”, at “See how it works” and “Follow a worked example”. Use the original worked values or code named in the question; the later pictorial case is a separate example. Keep this reference beside your workbook while practising.

- For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison.

  Do not reuse W4 as a new final test after receiving feedback.

> **My reasoning and evidence**

MAIN LESSON · SECTION 4

W4 · Ground the new room H response independently

> Keep the first attempt before hints.

Your evidence record

- Use only the stated approval and conditional capacity sources. No maintenance-status record is provided. State what is supported and what remains unresolved without adding a new room inspection or source.

- Source A approves room H; B lists H capacity 7, except maintenance limit 4. Maintenance status is unknown. Write a grounded response.

- Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

My independent explanation, trace and limits

▼ **Earlier wording, alternatives and picture transcripts**

Independent case: Apply a new case independently

MAIN LESSON · SECTION 9

Project · Keep the decision and evidence

> Extend the existing project record.

Your evidence record

- Implement question → retrieve → inspect → answer → cite → verify as the core architecture.
- The project change and **evidence** I will keep

Write or draw your reasoning and evidence.

MAIN LESSON · SECTION 27

Feedback · Repair and return

> Keep first attempt, repair and a changed-case check.

Your evidence record

- Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

Evidence	My record
Worked alone / hint / model	
First step I repaired and why	
New case checked later; date and result	
What I can now explain without notes	
One remaining question	

MAIN LESSON · SECTION 10

Finish · Judge your evidence

> Point to work that supports your judgement.

Your evidence record

-
  - I can explain the mechanism.
  - I can show evidence.
  - I can handle a changed case.

- I can name a limit.

  Mark each as not yet, with help or independently, and attach supporting work.

- Teacher review _____ Next step _____

Reference bank and extra practice

Choose the reference that helps your next step.

▼ **Reference · Supported W2 record**

REFERENCE · SECTION 2

Reference · Supported W2 record

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

Use W2: Trace the worked case for Building a **grounded answer**. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs	Procedure I chose	Middle steps	Result and check

The step I completed without help, and the hint I needed

▼ Extra practice · Repair a claim

REFERENCE · SECTION 3

Extra practice · Repair a claim

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

Use the worked case for Building a **grounded answer**. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported.

Point to the step or supplied fact that decides; explain your repair if needed.

> **My explanation before partner discussion**

▼ Reference · Earlier target

REFERENCE · SECTION 5

Reference · Earlier target

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

Sources: A='Library opens 9'; B='Cafe opens 8'; C='Library closes 5'. A question asks when the library opens. The **retriever** returns only B and C. What should the generator do?

▼ **Extra practice · Earlier worked case**

REFERENCE · SECTION 6

Extra practice · Earlier worked case

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

Note A says library opens at 9. Note B says returns go in the blue box.

Answer opening time with **evidence**.

Show your trace, calculation or **evidence**

> **Write or draw your reasoning and evidence.**

▼ **Extra practice · Changed case**

REFERENCE · SECTION 7

Extra practice · Changed case

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

A retrieved passage says the club meets Tuesday; it says nothing about cost. The assistant answers Tuesday, free entry. Which part is grounded and what should replace the unsupported part?

My practice reasoning

> **Write or draw your reasoning and evidence.**

Week 18 Test and reflect

▼ **Extra practice · A revealing test**

REFERENCE · SECTION 8

Extra practice · A revealing test

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

Create a changed **input**, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record	My evidence
Changed input or condition	
Expected answer or fallback	
Observed result	
Why the result occurred	

▼ Extra practice · Earlier transfer

REFERENCE · SECTION 11

Extra practice · Earlier transfer

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

Sources: A='Library opens 9'; B='Cafe opens 8'; C='Library closes 5'. A question asks when the library opens. The **retriever** returns only B and C. What should the generator do?

My explanation after practice

Record support used: none, hint or teacher explanation.

▼ Reference · Selected W4 response copy

REFERENCE · SECTION 15

Reference · Selected W4 response copy

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

Source A approves room H; B lists H capacity 7, except maintenance limit 4. Maintenance status is unknown. Write a grounded response.

My reasoning and evidence

▼ Extension · Chunking and document structure — W1 Explain the mechanism

REFERENCE · SECTION 17

Extension · Chunking and document structure — W1 Explain the mechanism

> Keep this extension's procedure and values separate from the main RAG assessment.

Reference procedure

Chunking practice: one notice says capacity20, then during maintenance capacity8. Retrieval returned only the first sentence; maintenance status is unknown. Preserve both clauses and source/version links. Separate extension independent task supplies its own Friday exception; use its stated facts, not these capacity values.

Extension task and response

- Explain the weekly **mechanism** in your own words. Use the worked scenario to name its **input**, decision rule and **output**.

> **My reasoning and evidence**

▼ **Extension · Chunking and document structure — W2 Trace the worked case**

REFERENCE · SECTION 18

Extension · Chunking and document structure — W2 Trace the worked case

> Keep this extension's procedure and values separate from the main RAG assessment.

Reference procedure

Chunking practice: one notice says capacity20, then during maintenance capacity8. Retrieval returned only the first sentence; maintenance status is unknown. Preserve both clauses and source/version links. Separate extension independent task supplies its own Friday exception; use its stated facts, not these capacity values.

Extension task and response

- A notice says capacity 20, followed by during maintenance capacity 8. Separate **chunk**s contain each sentence but retrieval returns only the first. Show the intermediate steps and give the conclusion with its scope.

> **My reasoning and evidence**

▼ Extension · Chunking and document structure — W3 Audit the limit

REFERENCE · SECTION 19

Extension · Chunking and document structure — W3 Audit the limit

> Keep this extension's procedure and values separate from the main RAG assessment.

Reference procedure

Chunking practice: one notice says capacity20, then during maintenance capacity8. Retrieval returned only the first sentence; maintenance status is unknown. Preserve both clauses and source/version links. Separate extension independent task supplies its own Friday exception; use its stated facts, not these capacity values.

Extension task and response

- A report omits this qualification: Smaller **chunk**s can improve selectivity while losing necessary **qualifier**s; **chunk** size alone is not retrieval quality.

  Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

> **My reasoning and evidence**

▼ **Extension · Chunking and document structure — W4 Apply a new case independently**

REFERENCE · SECTION 20

Extension · Chunking and document structure — W4 Apply a new case independently

> Keep this extension’s procedure and values separate from the main RAG assessment.

Reference procedure

Chunking practice: one notice says capacity20, then during maintenance capacity8. Retrieval returned only the first sentence; maintenance status is unknown. Preserve both clauses and source/version links. Separate extension independent task supplies its own Friday exception; use its stated facts, not these capacity values.

Extension task and response

- A rule section says rooms close at 17:00; an exception paragraph says Friday closes at 16:00. The question is Friday closing. Design a complete **chunk** reference.

> **My reasoning and evidence**

▼ **Extension · Chunking and document structure — W5 Design a revealing follow-up**

REFERENCE · SECTION 21

Extension · Chunking and document structure — W5 Design a revealing follow-up

> Keep this extension's procedure and values separate from the main RAG assessment.

Reference procedure

Chunking practice: one notice says capacity20, then during maintenance capacity8. Retrieval returned only the first sentence; maintenance status is unknown. Preserve both clauses and source/version links. Separate extension independent task supplies its own Friday exception; use its stated facts, not these capacity values.

Extension task and response

- For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison.

  Do not reuse W4 as a new final test after receiving feedback.

> **My reasoning and evidence**

▼ **Extension · Lexical and vector retrieval — W1 Explain the mechanism**

REFERENCE · SECTION 22

Extension · Lexical and vector retrieval — W1 Explain the mechanism

> Keep this extension's procedure and values separate from the main RAG assessment.

Reference procedure

Toy ranking practice: lowercase exact-word matching counts distinct query terms. Query red sensor; D1 red sensor manual, D2 red paint gives lexical2 and1. Query vector[1,0], D1[.4,.9], D2[.8,.1] gives dot products.4 and.8. Supplied relevance favours the sensor manual. No normalisation or real embedding model is assumed. Independent battery task uses its own vectors.

Extension task and response

- Explain the weekly **mechanism** in your own words. Use the worked scenario to name its **input**, decision rule and **output**.

> **My reasoning and evidence**

▼ **Extension · Lexical and vector retrieval — W2 Trace the worked case**

REFERENCE · SECTION 23

Extension · Lexical and vector retrieval — W2 Trace the worked case

> Keep this extension’s procedure and values separate from the main RAG assessment.

Reference procedure

Toy ranking practice: lowercase exact-word matching counts distinct query terms. Query red sensor; D1 red sensor manual, D2 red paint gives lexical2 and1. Query vector[1,0], D1[.4,.9], D2[.8,.1] gives dot products.4 and.8. Supplied relevance favours the sensor manual. No normalisation or real embedding model is assumed. Independent battery task uses its own vectors.

Extension task and response

- **Query** terms red sensor. D1 text red sensor manual; D2 text red paint. Their lexical scores are 2 and 1. Vector **query** [1, 0], D1=[.4, .9], D2=[.8, .1]. Show the intermediate steps and give the conclusion with its scope.

My reasoning and evidence

▼ **Extension · Lexical and vector retrieval — W3 Audit the limit**

REFERENCE · SECTION 24

Extension · Lexical and vector retrieval — W3 Audit the limit

> Keep this extension's procedure and values separate from the main RAG assessment.

Reference procedure

Toy ranking practice: lowercase exact-word matching counts distinct query terms. Query red sensor; D1 red sensor manual, D2 red paint gives lexical2 and1. Query vector[1,0], D1[.4,.9], D2[.8,.1] gives dot products.4 and.8. Supplied relevance favours the sensor manual. No normalisation or real embedding model is assumed. Independent battery task uses its own vectors.

Extension task and response

- A report omits this qualification: Similarity and **relevance** are different quantities; exact terminology, metadata and permissions may be necessary.

  Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

My reasoning and evidence

▼ Extension · Lexical and vector retrieval — W4 Apply a new case independently

REFERENCE · SECTION 25

Extension · Lexical and vector retrieval — W4 Apply a new case independently

> Keep this extension’s procedure and values separate from the main RAG assessment.

Reference procedure

Toy ranking practice: lowercase exact-word matching counts distinct query terms. Query red sensor; D1 red sensor manual, D2 red paint gives lexical2 and1. Query vector[1,0], D1[.4,.9], D2[.8,.1] gives dot products.4 and.8. Supplied relevance favours the sensor manual. No normalisation or real embedding model is assumed. Independent battery task uses its own vectors.

Extension task and response

- **Query** terms blue battery. E1 text blue battery guide, vector [.2, .8]; E2 text blue ribbon, vector [.9, .1]. **Query** vector [1, 0]. Compute both rankings.

My reasoning and evidence

▼ **Extension · Lexical and vector retrieval — W5 Design a revealing follow-up**

REFERENCE · SECTION 26

Extension · Lexical and vector retrieval — W5 Design a revealing follow-up

> Keep this extension's procedure and values separate from the main RAG assessment.

Reference procedure

Toy ranking practice: lowercase exact-word matching counts distinct query terms. Query red sensor; D1 red sensor manual, D2 red paint gives lexical2 and1. Query vector[1,0], D1[.4,.9], D2[.8,.1] gives dot products.4 and.8. Supplied relevance favours the sensor manual. No normalisation or real embedding model is assumed. Independent battery task uses its own vectors.

Extension task and response

- For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison.

  Do not reuse W4 as a new final test after receiving feedback.

> **My reasoning and evidence**

▼ **Extra practice · Pictured case**

REFERENCE · SECTION 28

Extra practice · Pictured case

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

Turn a short science source into an answer with a visible claim-to-source map.

Approved note S4 says: ice is solid water; warming can melt ice into liquid water. No temperature or speed is supplied.

All **input**s and outcomes in this worked example are invented classroom data; no real model run is claimed.

AI ACADEMY / AI-3/18

Retrieval Augmented Generation

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Read source

S4 supports the material identity and the solid-to-liquid change.

2. Draft two claims

Draft: ice is solid water; warming can turn it into liquid water.

3. Check each claim

Both claims match S4. A claim that melting takes exactly two minutes would not match.

CHANGE ONE THING

The question asks exactly how long this ice takes to melt.

Explain the changed result using the matching lesson.

Follow the labelled picture with the matching explanation. Open the vector diagram

Which part of the source supports a two-minute melting claim? Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice **evidence**.

Project connection: For your Verified Study Buddy, save the **input**, procedure, observed result and limitation of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

▼ **Reference · Project milestone**

REFERENCE · SECTION 29

Reference · Project milestone

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

Project: Verified Study Buddy

Current milestone: Test changed cases. Keep normal, boundary and failure cases; compare expected and observed results.

For your Verified Study Buddy, save the **input**, procedure, observed result and limitation of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

Evidence to keep	My record
This week's input and deciding step	
Prediction and actual result (or labelled paper trace)	
One change since the previous checkpoint and why	

Evidence to keep	My record
One error or limit and the next test	

Explain what this week adds to your project. Reuse last week's record rather than starting again.

▼ **Extra practice · Pictures, feedback and repair**

REFERENCE · SECTION 30

Extra practice · Pictures, feedback and repair

> Try before opening feedback; keep the selected independent task separate.

First supported question

- Turn a short science source into an answer with a visible claim-to-source map.
- Which labelled step matches this detail? Both claims match S4. A claim that melting takes exactly two minutes would not match.
- 1. Check each claim
- 2. Draft two claims
- 3. Read source

- Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

- After your attempt, compare with the supported explanation: Check each claim Both claims match S4. A claim that melting takes exactly two minutes would not match. Read the picture in order. Both claims match S4.

  A claim that melting takes exactly two minutes would not match. The arrows show which recorded **input** or intermediate result each decision uses.

  Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows.

Practice 1: explain the deciding evidence

> **My selected conclusion, deciding fact and explanation**
>
> | |
> |---|
> | |
> | |
> | |
> | |

▼ **Check after trying**

Practice 2: explain the deciding evidence

Changed-case question

- Changed-case practice: The question asks exactly how long this ice takes to melt. Which conclusion is supported by the supplied facts?

- 1. We can decide the result without examining the changed **input** or the procedure.

- 2. This one example guarantees correct results for every future **input**.

- 3. Say that S4 does not provide a time.

- Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

- After your attempt, compare with the supported explanation: Say that S4 does not provide a time. A general change of state does not determine a duration for an unspecified sample.

> **My selected conclusion, deciding fact and explanation**

▼ **Check changed case**

Repair a missing building block

Repair and keep evidence

Review Model Memory vs Retrieval (ai-3/17). Goal: Explain the **mechanism** and terminology of retrieval and indexing. Short practice: Why can the assistant not certify 15: 00 when the notice is missing?

Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.. Return to this week and explain what you changed.

Review Source Quality (ai-3/15). Goal: Explain the **mechanism** and terminology of conflicting and time-sensitive sources. Short practice: Which source fields must be checked before answering day 9?.

Return to this week and explain what you changed.

Review Speech and Audio Systems (ai-3/12). Goal: Explain the **mechanism** and terminology of speech pipelines and multimodal **evidence**.

Short practice: Which stage was initially wrong, and which stage was correctly operating on a wrong **input**?. Return to this week and explain what you changed.

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run **evidence**. Open the HTML copy to read or print it.

Drafts stay in this browser when storage is available; clear drafts on a shared device.

▼ **Earlier wording, alternatives and picture transcripts**

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

Keep your completed work

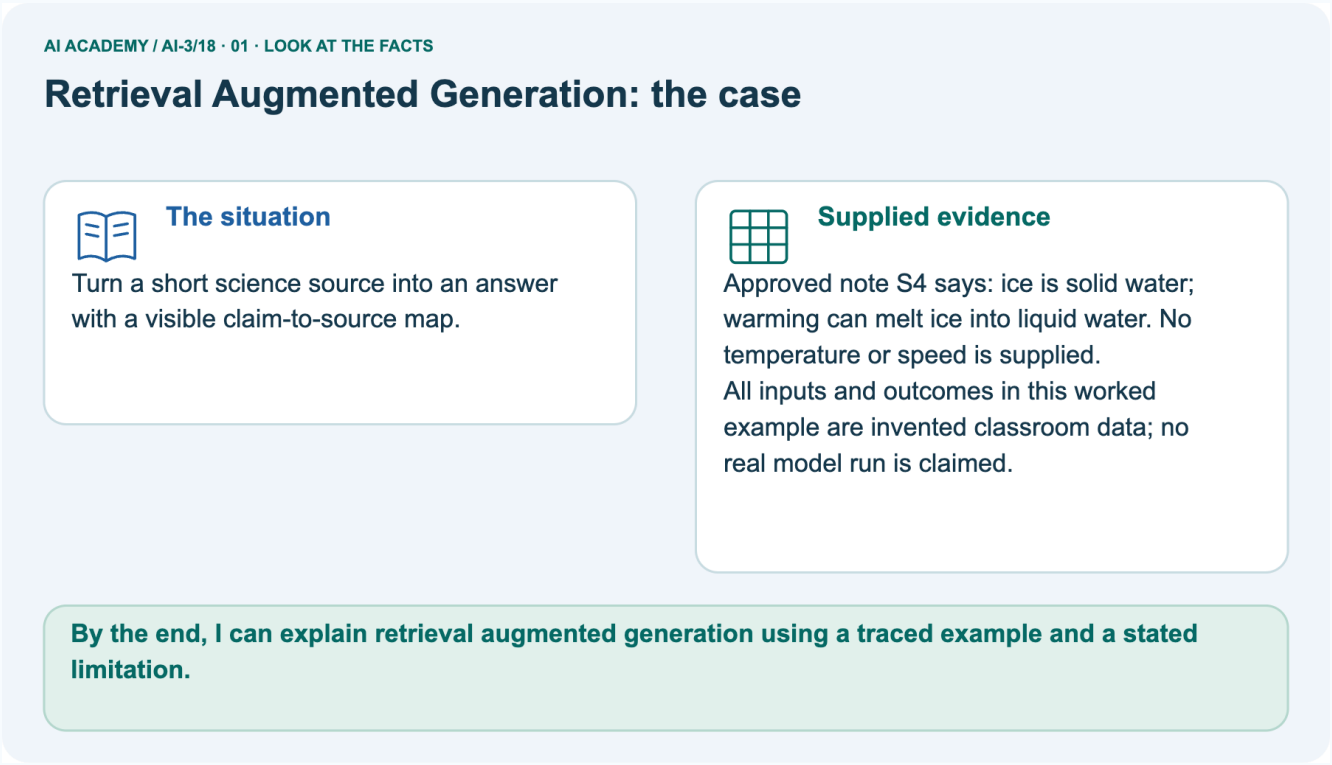

▼ **Reference · Six-picture response sheets**

REFERENCE · SECTION 31

Reference · Six-picture response sheets

> Choose the relevant picture rather than repeating every task.

01. Retrieval Augmented Generation: the case

Follow the labelled picture with the matching explanation. Open the vector diagram

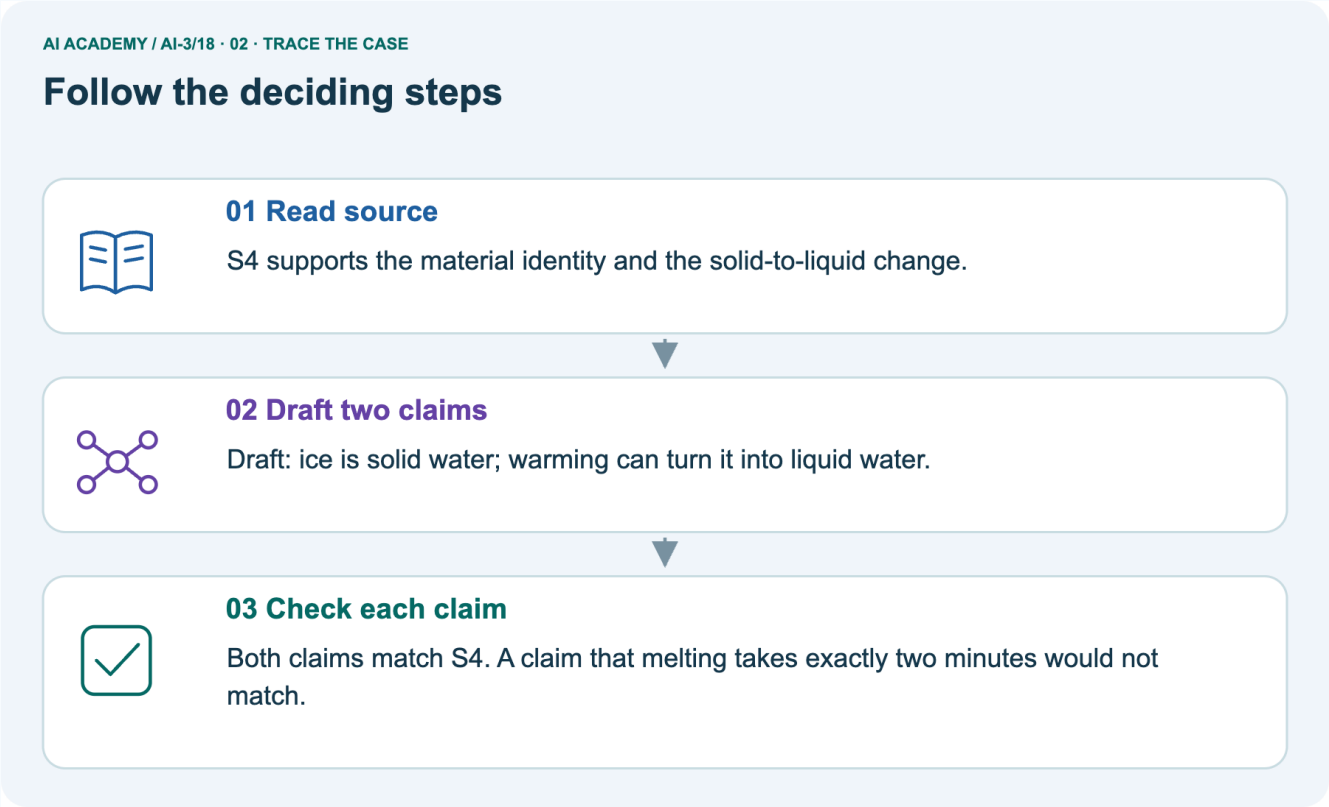

Turn a short science source into an answer with a visible claim-to-source map. Supplied facts: Approved note S4 says: ice is solid water; warming can melt ice into liquid water. No temperature or speed is supplied.

All **input**s and outcomes in this worked example are invented classroom data; no real model run is claimed.

Point to the given fact that matters most. Explain why it matters.

My picture explanation, deciding evidence and one limit

02. Follow the deciding steps

Follow the labelled picture with the matching explanation. Open the vector diagram

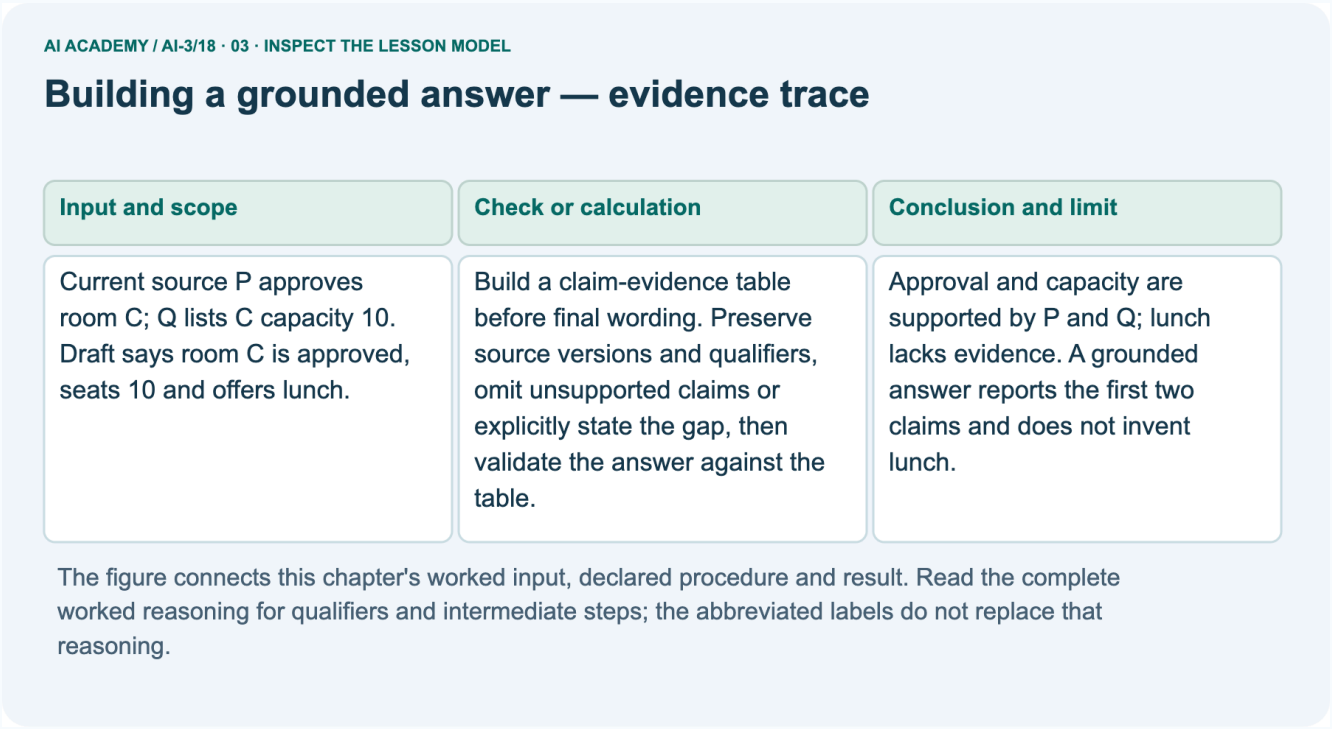

Read source: S4 supports the material identity and the solid-to-liquid change. → Draft two claims: Draft: ice is solid water; warming can turn it into liquid water. → Check each claim: Both claims match S4.

A claim that melting takes exactly two minutes would not match.

Point to each numbered stage and explain which recorded **input** it uses.

My picture explanation, deciding evidence and one limit

03. Building a grounded answer — evidence trace

AI ACADEMY / AI-3/18 · 03 · INSPECT THE LESSON MODEL

Building a grounded answer — evidence trace

Input and scope	Check or calculation	Conclusion and limit
Current source P approves room C; Q lists C capacity 10. Draft says room C is approved, seats 10 and offers lunch.	Build a claim-evidence table before final wording. Preserve source versions and qualifiers, omit unsupported claims or explicitly state the gap, then validate the answer against the table.	Approval and capacity are supported by P and Q; lunch lacks evidence. A grounded answer reports the first two claims and does not invent lunch.

The figure connects this chapter's worked input, declared procedure and result. Read the complete worked reasoning for qualifiers and intermediate steps; the abbreviated labels do not replace that reasoning.

Follow the labelled picture with the matching explanation. Open the vector diagram

Building a **grounded answer** — **evidence** trace. Current source P approves room C; Q lists C capacity 10. Draft says room C is approved, seats 10 and offers lunch. | Build a claim-**evidence table** before final wording.

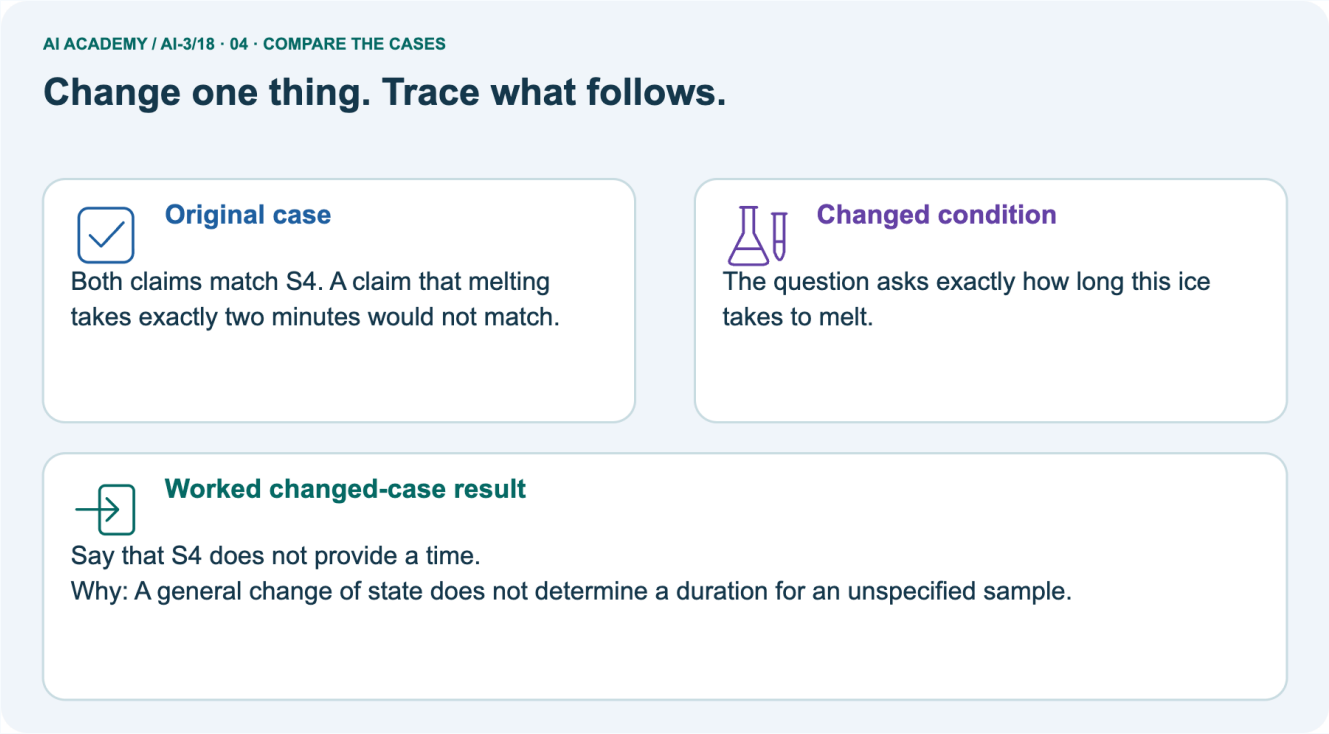

Preserve source versions and **qualifier**s, omit unsupported claims or explicitly state the gap, then validate the answer against the table. | Approval and capacity are supported by P and Q; lunch lacks **evidence**.

A **grounded answer** reports the first two claims and does not invent lunch.

Read the labels and values. Explain the relationship the model shows.

> **My picture explanation, deciding evidence and one limit**

04. Change one thing. Trace what follows.

Follow the labelled picture with the matching explanation. Open the vector diagram

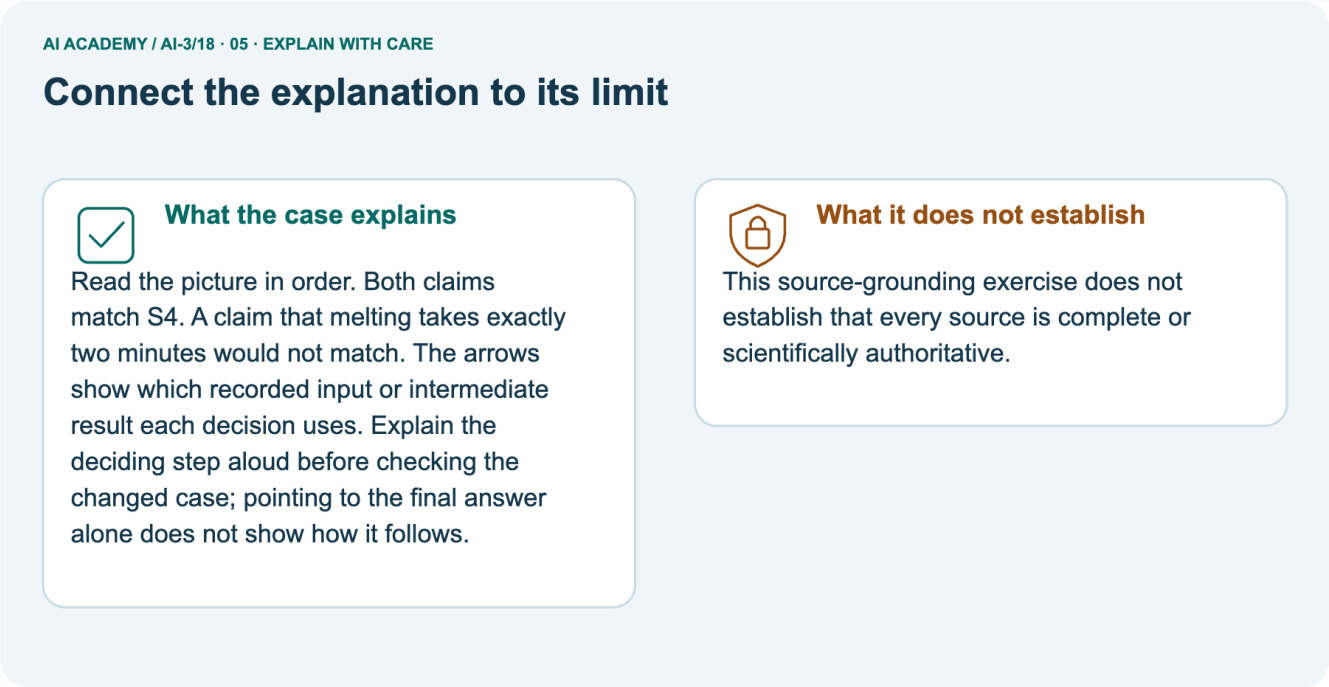

Original case: Both claims match S4. A claim that melting takes exactly two minutes would not match. Changed condition: The question asks exactly how long this ice takes to melt.

Expected result: Say that S4 does not provide a time. Reason: A general change of state does not determine a duration for an unspecified sample.

Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude.

My picture explanation, deciding evidence and one limit

05. Connect the explanation to its limit

Follow the labelled picture with the matching explanation. Open the vector diagram

Read the picture in order. Both claims match S4. A claim that melting takes exactly two minutes would not match. The arrows show which recorded **input** or intermediate result each decision uses.

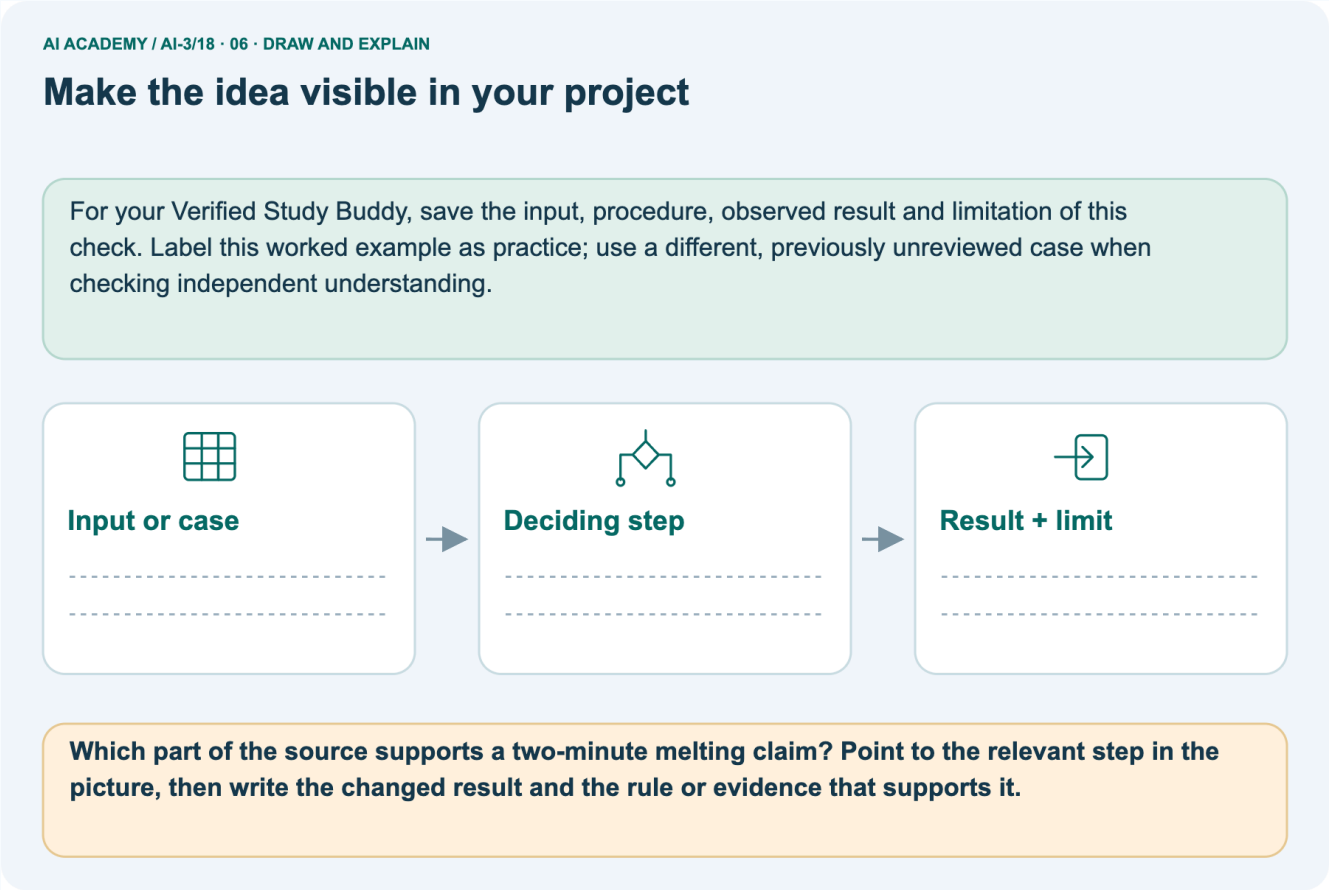

Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows.

Limit: This source-grounding exercise does not establish that every source is complete or scientifically authoritative.

Explain the case, then point to a limit on the claim.

My picture explanation, deciding evidence and one limit

06. Make the idea visible in your project

Follow the labelled picture with the matching explanation. Open the vector diagram

For your Verified Study Buddy, save the **input**, procedure, observed result and limitation of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding. Draw your **input**, deciding step, result and limit.

Supported question: Which part of the source supports a two-minute melting claim? Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.

Draw your project trace and justify the deciding step using **evidence**.

My picture explanation, deciding evidence and one limit

▼ Earlier wording, alternatives and picture transcripts

01. Retrieval Augmented Generation: the case

02. Follow the deciding steps

03. Building a grounded answer — evidence trace

04. Change one thing. Trace what follows.

05. Connect the explanation to its limit

06. Make the idea visible in your project
