AI ACADEMY · LEVEL 3 · GRADE 8 · WEEK 32 · WORKBOOK

Human AI Workflow

Learn to understand, design, build, test and explain AI systems responsibly.

Project: Verified Study Buddy

THE CONNECTED WEEK

One connected responsibility and review record.

Explain the handoff, trace approval changes, audit a checkbox claim and design a stop case.

Keep one habit: Keep actor, evidence, version, action, destination and unresolved issue together.

MAIN LESSON · SECTION 1

Recall: reconnect earlier ideas

> Retrieve before opening notes.

Retrieve and explain

- Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

- Without opening the old lesson, explain one key idea from Safety Boundaries. Give an example and a mistake that the idea helps you avoid.

- Without opening the old lesson, explain one key idea from Copyright and Provenance. Give an example and a mistake that the idea helps you avoid.

- Without opening the old lesson, explain one key idea from Evaluation Sets. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

My remembered idea, example and correction

My remembered idea, example and correction

▼ **Earlier wording, alternatives and picture transcripts**

Safety Boundaries

Copyright and Provenance

Evaluation Sets

W1 · Explain effective human review

> Name responsible actor, evidence packet and authority.

Your evidence record

- Toy room workflow: assistant drafts; application checks; coordinator alone approves and submits exact content/version/action. v1 B approval does not cover v2 C. Full review packet includes sources, uncertainty, changes and destination. Separate handout fixture: teacher approved H1 classroom printing, not H2 with fictional email placeholder/public posting.

  No actual action is performed or inferred; changed scope returns to review.

- Reference for this exercise: open this week's student lesson, "Human AI Workflow", at "See how it works" and "Follow a worked example". Use the original worked values or code named in the question; the later pictorial case is a separate example. Keep this reference beside your workbook while practising.

- Explain the weekly **mechanism** in your own words. Use the worked scenario to name its **input**, decision rule and **output**.

> **My reasoning and evidence**

MAIN LESSON · SECTION 13

W2 · Trace the changed room version

> Old approval cannot cover the materially changed v2.

Your evidence record

- Toy room workflow: assistant drafts; application checks; coordinator alone approves and submits exact content/version/action. v1 B approval does not cover v2 C. Full review packet includes sources, uncertainty, changes and destination. Separate handout fixture: teacher approved H1 classroom printing, not H2 with fictional email placeholder/public posting.

  No actual action is performed or inferred; changed scope returns to review.

- Coordinator approves draft v1 for room B. Assistant changes room to C in v2 and submits using the old approval. Show the intermediate steps and give the conclusion with its scope.

> **My reasoning and evidence**

MAIN LESSON · SECTION 14

W3 · Audit a checkbox guarantee

> A checked box does not show informed oversight.

Your evidence record

- Toy room workflow: assistant drafts; application checks; coordinator alone approves and submits exact content/version/action. v1 B approval does not cover v2 C. Full review packet includes sources, uncertainty, changes and destination. Separate handout fixture: teacher approved H1 classroom printing, not H2 with fictional email placeholder/public posting.

  No actual action is performed or inferred; changed scope returns to review.

- A report omits this qualification: Review effectiveness depends on usable **evidence**, time and authority; a checkbox is not **evidence** of informed review.

  Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

> **My reasoning and evidence**

MAIN LESSON · SECTION 16

W5 · Design a revealing handoff case

> Supply exact versions, actors, actions and expected stop.

Your evidence record

- Toy room workflow: assistant drafts; application checks; coordinator alone approves and submits exact content/version/action. v1 B approval does not cover v2 C. Full review packet includes sources, uncertainty, changes and destination. Separate handout fixture: teacher approved H1 classroom printing, not H2 with fictional email placeholder/public posting.

  No actual action is performed or inferred; changed scope returns to review.

- Reference for this exercise: open this week’s student lesson, “Human AI Workflow”, at “See how it works” and “Follow a worked example”. Use the original worked values or code named in the question; the later pictorial case is a separate example. Keep this reference beside your workbook while practising.

- For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison.

  Do not reuse W4 as a new final test after receiving feedback.

My reasoning and evidence

MAIN LESSON · SECTION 4

W4 · Inspect the new report-distribution scope independently

> Keep one first attempt before hints or feedback.

Read and explain independently

Use the stated R1 approval and R2 change only. No recipient list, distribution approval or actual email transmission is supplied. Explain the missing authority and the evidence a reviewer would need, without inventing a send result.

Teacher approves read-only report R1. System adds email distribution in R2. What permission is missing and what should the reviewer see?

My independent explanation, trace and limits

Keep a fair record

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

▼ **Earlier wording, alternatives and picture transcripts**

Independent case: Apply a new case independently

MAIN LESSON · SECTION 9

Project · Keep the decision and its evidence

> Add this week's change to your existing project record.

Your evidence record

AI drafts; sources ground; validators check; learner chooses; teacher governs classroom use.

The project change and **evidence** I will keep

Write or draw your reasoning and evidence.

MAIN LESSON · SECTION 17

Feedback · Repair and return

> Keep the first attempt, the repair and a changed-case return.

Your evidence record

Evidence	My record
Worked alone / hint / model	
First step I repaired and why	
New case checked later; date and result	
What I can now explain without notes	
One remaining question	

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

MAIN LESSON · SECTION 10

Finish · Judge the evidence in your work

> Point to work that supports your confidence level.

Your evidence record

- I can explain the mechanism.
- I can show evidence.
- I can handle a changed case.
- I can name a limit.

Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

Reference bank and extra practice

Choose the reference that helps your next step.

▼ **Reference · Supported W2 record**

REFERENCE · SECTION 2

Reference · Supported W2 record

> This is the same W2 attempt. Keep one response record.

Use this when helpful

Use W2: Trace the worked case for Human review and consequential use. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs	Procedure I chose	Middle steps	Result and check

The step I completed without help, and the hint I needed

▼ Extra practice · Repair the explanation

REFERENCE · SECTION 3

Extra practice · Repair the explanation

> Explain the deciding fact before discussing the answer.

Use this when helpful

Use the worked case for Human review and consequential use. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported.

Point to the step or supplied fact that decides; explain your repair if needed.

> **My explanation before partner discussion**

▼ Reference · Original learning target

REFERENCE · SECTION 5

Reference · Original learning target

> Use this target to inspect an explanation.

Use this when helpful

A student asks a helper to submit an unchecked generated essay under their name. Design a **workflow** that preserves student reasoning and follows classroom rules.

▼ **Extra practice · A complete case**

REFERENCE · SECTION 6

Extra practice · A complete case

> Try the question before checking the worked explanation.

Use this when helpful

An AI drafts, verifies and submits a student's assessment without review.

Where should responsibility remain?

Show your trace, calculation or **evidence**

> **Write or draw your reasoning and evidence.**

▼ **Extra practice · A changed case**

REFERENCE · SECTION 7

Extra practice · A changed case

> Keep this practice separate from the reserved independent attempt.

Use this when helpful

A **workflow** drafts a class email, checks its claims and then sends it. Where should approval occur, and what should the approver see?

My practice answer and reason

> **Write or draw your reasoning and evidence.**

Week 32 Test and reflect

▼ **Extra practice · Design a revealing test**

REFERENCE · SECTION 8

Extra practice · Design a revealing test

> Predict before tracing or testing.

Use this when helpful

Create a changed **input**, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record	My evidence
Changed input or condition	
Expected answer or fallback	
Observed result	
Why the result occurred	

▼ **Reference · Original target response space**

REFERENCE · SECTION 11

Reference · Original target response space

> This teaching case is practice rather than a fresh assessment.

Use this when helpful

A student asks a helper to submit an unchecked generated essay under their name. Design a **workflow** that preserves student reasoning and follows classroom rules.

My explanation after practice

Record support used: none, hint or teacher explanation.

▼ Reference · Independent-case response copy

REFERENCE · SECTION 15

Reference · Independent-case response copy

> This duplicates W4. Reuse the same first-attempt record.

Use this when helpful

Teacher approves read-only report R1. System adds email distribution in R2. What permission is missing and what should the reviewer see?

My reasoning and evidence

▼ Extra practice · Use the worked picture

REFERENCE · SECTION 18

Extra practice · Use the worked picture

> Keep the explanation and the support you used.

Use this when helpful

A human approval belongs to the exact draft and action reviewed.

A teacher approves study handout H1 for classroom printing. H2 adds a pupil email address and proposes public posting. No H2 approval exists.

All **input**s and outcomes in this worked example are invented classroom data; no real model run is claimed.

Follow the labelled picture with the matching explanation. Open the vector diagram

Why can H1's approval not automatically approve H2? Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice **evidence**.

Project connection: For your Verified Study Buddy, save the **input**, procedure, observed result and limitation of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

▼ **Reference · Project portfolio record**

REFERENCE · SECTION 19

Reference · Project portfolio record

> Extend your main project response when helpful.

Use this when helpful

Project: Verified Study Buddy

Current milestone: Present and defend. Demonstrate the system, explain one failure and justify the next improvement with **evidence**.

For your Verified Study Buddy, save the **input**, procedure, observed result and limitation of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

Evidence to keep	My record
This week's input and deciding step	
Prediction and actual result (or labelled paper trace)	
One change since the previous checkpoint and why	
One error or limit and the next test	

> **Explain what this week adds to your project. Reuse last week's record rather than starting again.**

▼ **Extra practice: pictures, repair and feedback**

REFERENCE · SECTION 20

Extra practice: pictures, repair and feedback

> Attempt each question before opening its explanation. Use one browser or paper copy.

First supported question

- A human approval belongs to the exact draft and action reviewed.
- Which labelled step matches this detail? Stop public posting and show H2's changed content and intended audience to the reviewer.
- 1. Identify approval

- 2. Require review
- 3. Inspect change
- Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.
- After your attempt, compare with the supported explanation: Require review Stop public posting and show H2′s changed content and intended audience to the reviewer. Read the picture in order.

  Stop public posting and show H2′s changed content and intended audience to the reviewer. The arrows show which recorded **input** or intermediate result each decision uses.

  Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows.

Practice 1: explain the deciding evidence

> **My selected conclusion, deciding fact and explanation**
>
> | |
> |---|
> | |
> | |
> | |

▼ **Check the first explanation**

Practice 2: explain the deciding evidence

Changed-case question

- Changed-case practice: H2 is replaced with unchanged H1 for classroom printing. Which conclusion is supported by the supplied facts?
- 1. This one example guarantees correct results for every future **input**.

- 2. The original approval covers that declared action.
- 3. We can decide the result without examining the changed **input** or the procedure.
- Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.
- After your attempt, compare with the supported explanation: The original approval covers that declared action. Both the approved content and its distribution scope now match.

> **My selected conclusion, deciding fact and explanation**

▼ **Check the changed case**

Repair a missing building block

Repair and save your work

Review Safety Boundaries (ai-3/31). Goal: Explain the **mechanism** and terminology of untrusted **input** boundaries. Short practice: If AB7 passes the pattern, may it access teacher-only material?

Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.. Return to this week and explain what you changed.

Review Copyright and Provenance (ai-3/29). Goal: Explain the **mechanism** and terminology of copyright and permitted sources. Short practice: Does acknowledging Fern make a cropped version permitted?

Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.. Return to this week and explain what you changed.

Review Evaluation Sets (ai-3/26). Goal: Explain the **mechanism** and terminology of system evaluation sets. Short practice: Did the added cases demonstrate better answering?

Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.. Return to this week and explain what you changed.

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run **evidence**. Open the HTML copy to read or print it.

Drafts stay in this browser when storage is available; clear drafts on a shared device.

> **What I repaired, the evidence I kept and the next test**
>

> | | |
> | | |
> | | |

▼ **Earlier wording, alternatives and picture transcripts**

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

Keep your completed work

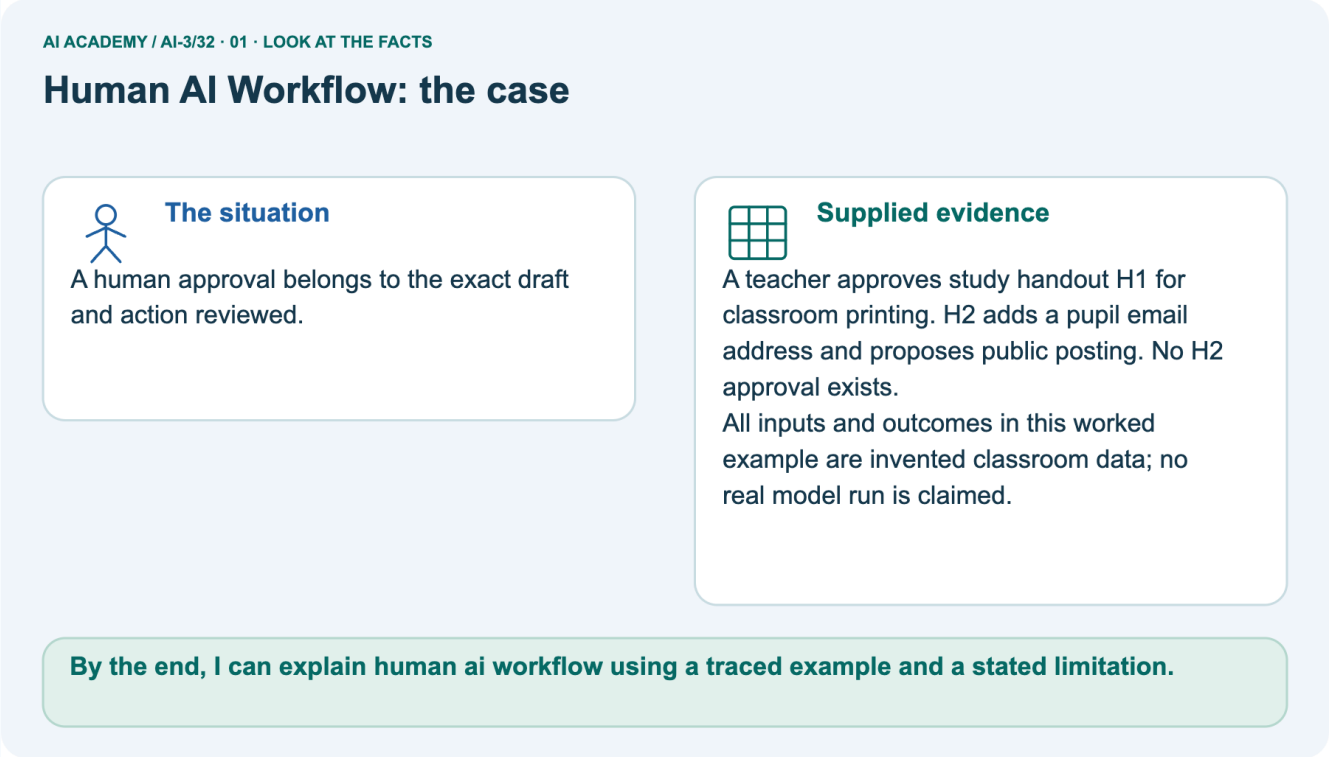

▼ **Reference · Six-picture response sheets**

REFERENCE · SECTION 21

Reference · Six-picture response sheets

> Choose the image that helps rather than repeating all six.

01. Human AI Workflow: the case

Follow the labelled picture with the matching explanation. Open the vector diagram

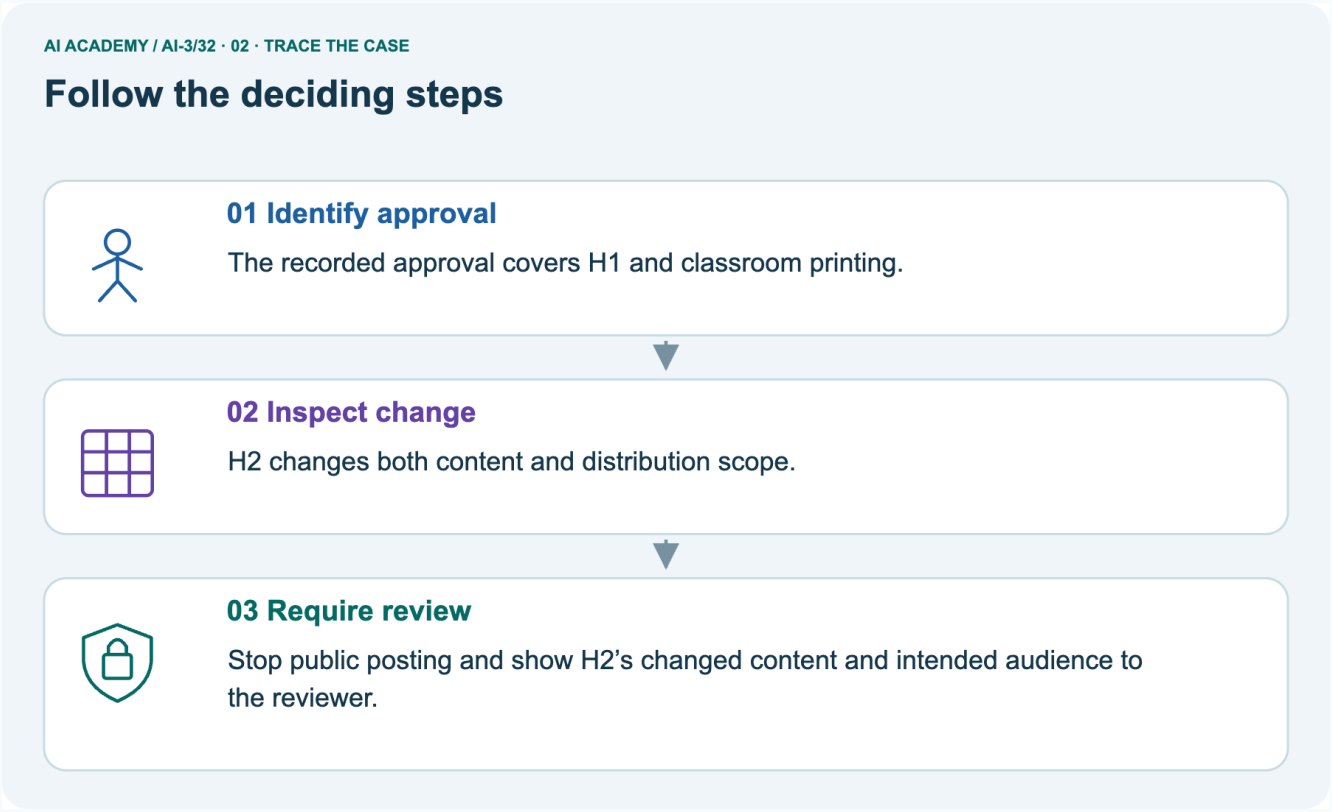

A human approval belongs to the exact draft and action reviewed. Supplied facts: A teacher approves study handout H1 for classroom printing. H2 adds a pupil email address and proposes public posting. No H2 approval exists.

All **input**s and outcomes in this worked example are invented classroom data; no real model run is claimed.

Point to the given fact that matters most. Explain why it matters.

My picture explanation, deciding evidence and one limit

02. Follow the deciding steps

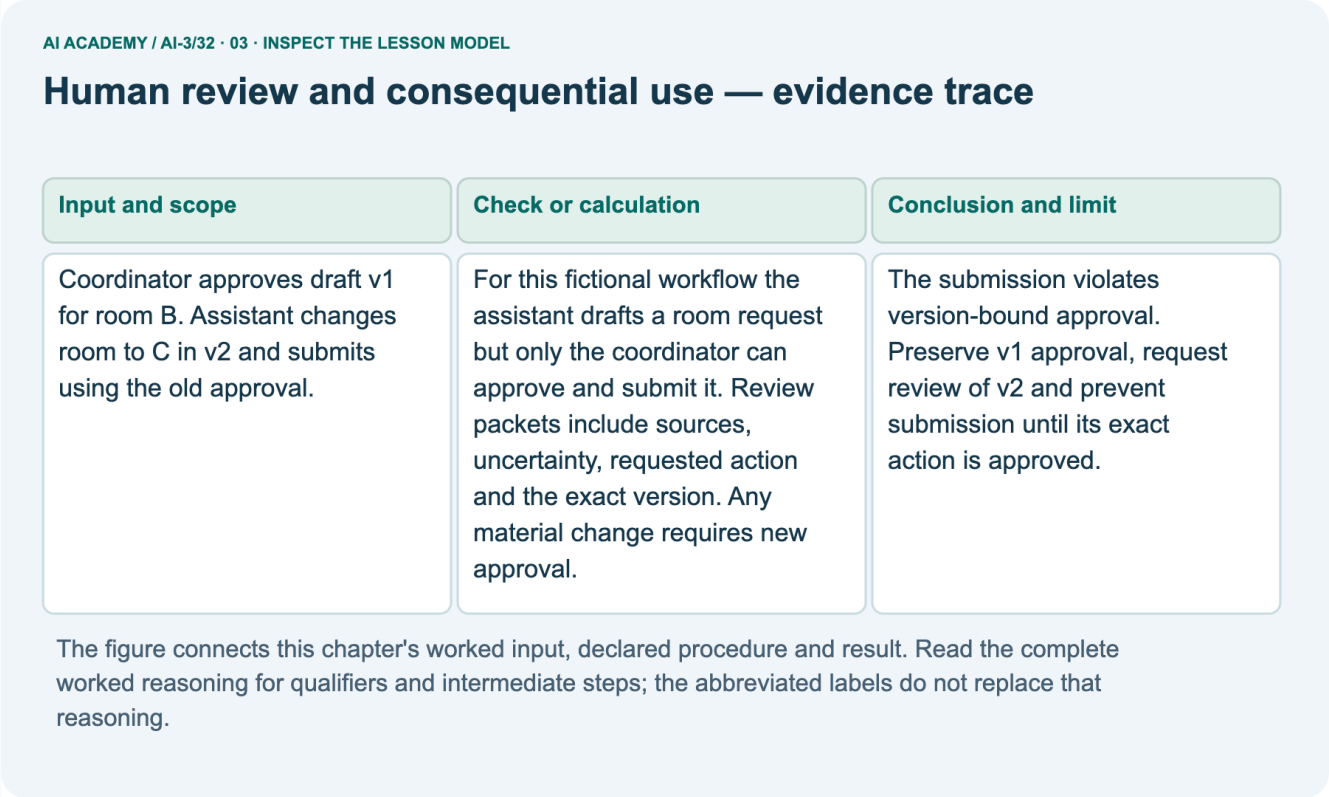

Follow the labelled picture with the matching explanation. Open the vector diagram

Identify approval: The recorded approval covers H1 and classroom printing. → Inspect change: H2 changes both content and distribution scope. → Require review: Stop public posting and show H2′s changed content and intended audience to the reviewer.

Point to each numbered stage and explain which recorded **input** it uses.

My picture explanation, deciding evidence and one limit

03. Human review and consequential use — evidence trace

Follow the labelled picture with the matching explanation. Open the vector diagram

Human review and consequential use — **evidence** trace. Coordinator approves draft v1 for room B.

Assistant changes room to C in v2 and submits using the old approval. | For this fictional **workflow** the assistant drafts a room request but only the coordinator can approve and submit it.

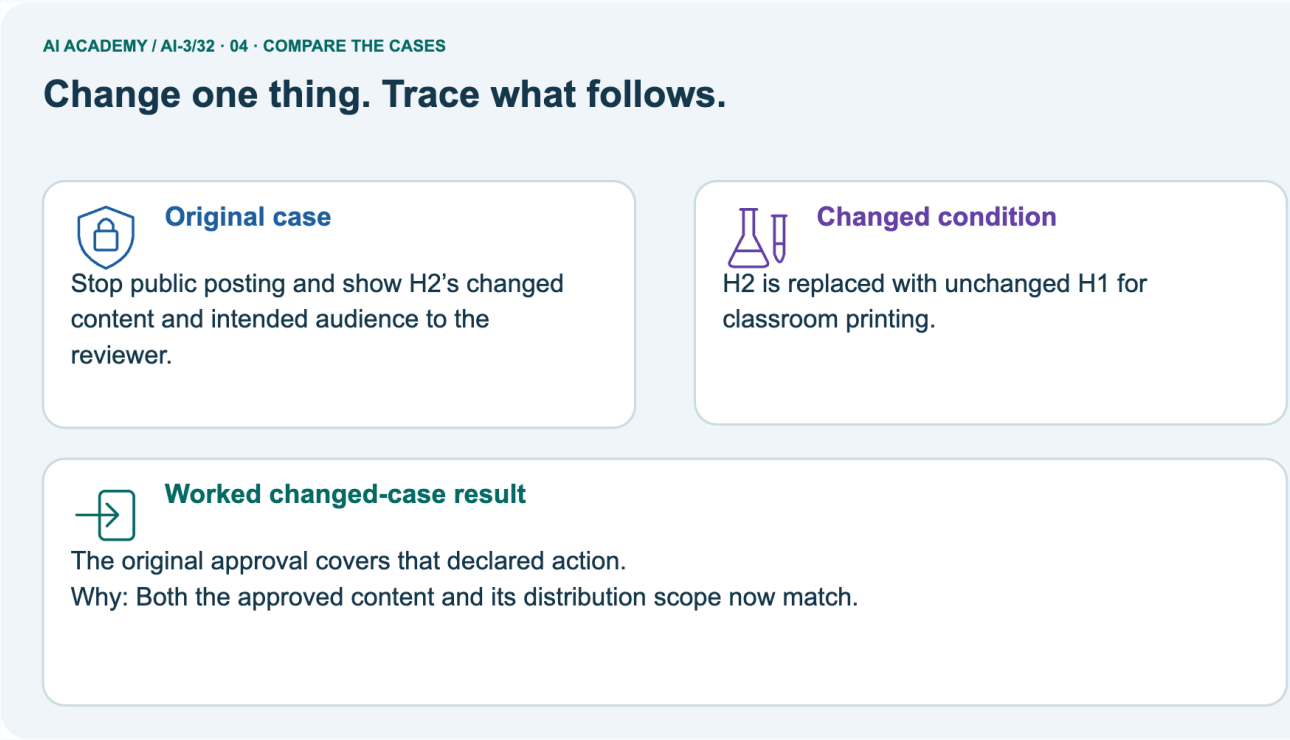

Review packets include sources, uncertainty, requested action and the exact version. Any material change requires new approval. | The submission violates **version-bound approval**.

Preserve v1 approval, request review of v2 and prevent submission until its exact action is approved.

Read the labels and values. Explain the relationship the model shows.

My picture explanation, deciding evidence and one limit

04. Change one thing. Trace what follows.

Follow the labelled picture with the matching explanation. Open the vector diagram

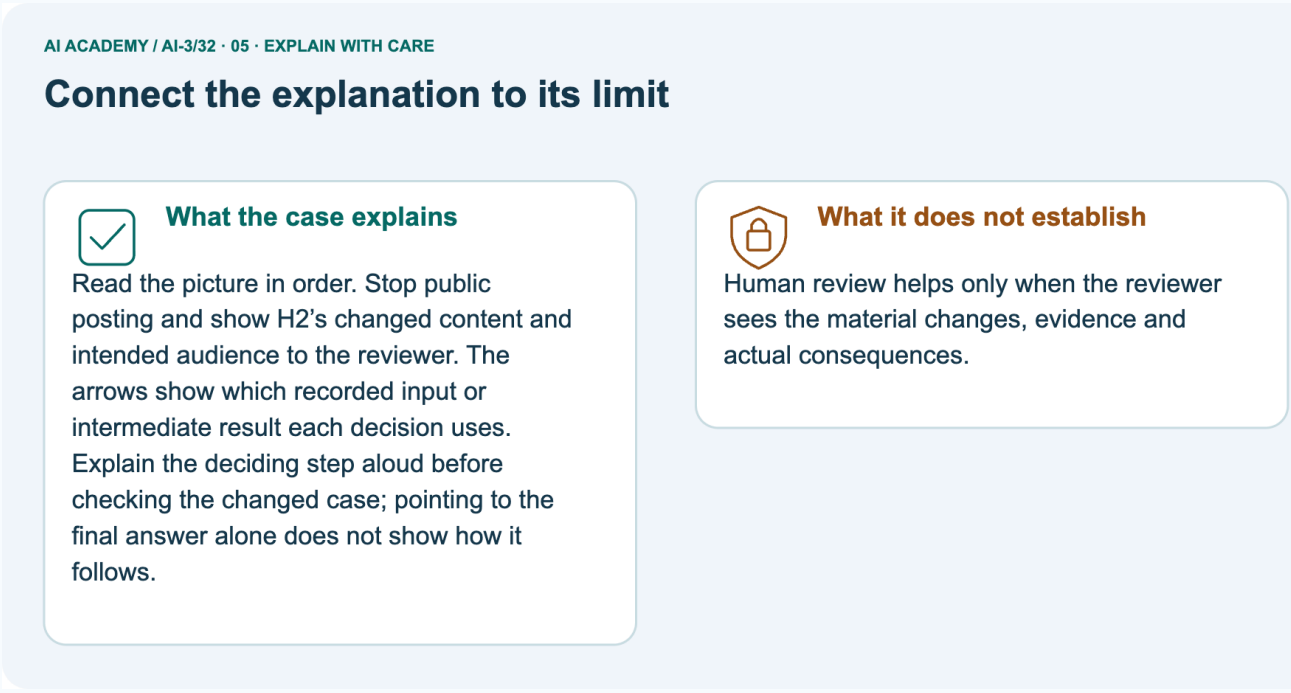

Original case: Stop public posting and show H2′s changed content and intended audience to the reviewer. Changed condition: H2 is replaced with unchanged H1 for classroom printing.

Expected result: The original approval covers that declared action. Reason: Both the approved content and its distribution scope now match.

Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude.

My picture explanation, deciding evidence and one limit

05. Connect the explanation to its limit

Follow the labelled picture with the matching explanation. Open the vector diagram

Read the picture in order. Stop public posting and show H2's changed content and intended audience to the reviewer. The arrows show which recorded **input** or intermediate result each decision uses.

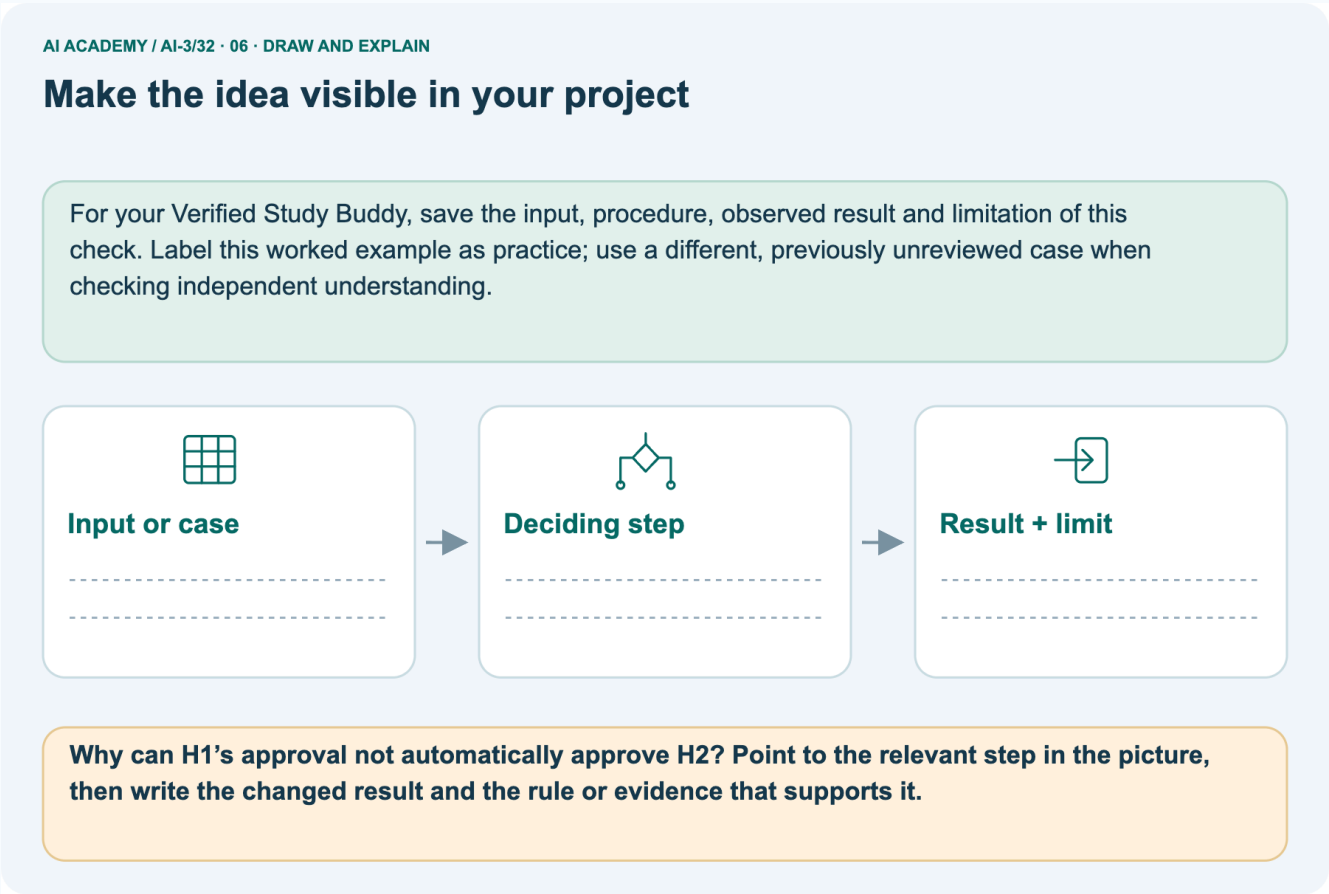

Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows.

Limit: Human review helps only when the reviewer sees the material changes, **evidence** and actual consequences.

Explain the case, then point to a limit on the claim.

My picture explanation, deciding evidence and one limit

06. Make the idea visible in your project

Follow the labelled picture with the matching explanation. Open the vector diagram

For your Verified Study Buddy, save the **input**, procedure, observed result and limitation of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding. Draw your **input**, deciding step, result and limit.

Supported question: Why can H1's approval not automatically approve H2? Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.

Draw your project trace and justify the deciding step using **evidence**.

> **My picture explanation, deciding evidence and one limit**

▼ **Earlier wording, alternatives and picture transcripts**

01. Human AI Workflow: the case

02. Follow the deciding steps

03. Human review and consequential use — evidence trace

04. Change one thing. Trace what follows.

05. Connect the explanation to its limit

06. Make the idea visible in your project

▼ **Optional interactive practice and completed work**

Save or print your responses for your portfolio. Progress and drafts on the hosted website stay in the current browser. Use only fictional or teacher-approved data.
