

Permissions and Human Review

Project: Transparent Book Recommender

1. Recall and choose your starting point

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Agents and Tools

Without opening the old lesson, explain one key idea from Agents and Tools. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Prompt Experiments

Without opening the old lesson, explain one key idea from Prompt Experiments. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Text as Pieces

Without opening the old lesson, explain one key idea from Text as Pieces. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

2. Practise with fading help

Use W2: Trace the worked case for Least privilege and tool scopes. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs · Procedure I chose · Middle steps · Result and check

Given inputs: _____

Procedure I chose: _____

Middle steps: _____

Result and check: _____

The step I completed without help, and the hint I needed

3. Individual reasoning check

Use the worked case for Least privilege and tool scopes. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported. Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

4. Independent transfer case

Independent case: Apply a new case independently

Scope allows read inventory items A, B. Calls read A, read C, write B. Decide.

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

5. Your learning target

A teacher approves posting version 1 to a class board. The assistant changes the text and destination to a public board. Does the old approval cover the new action? Define what must be reviewed.

6. Solve the given case

Posting a recommendation requires teacher review.

Place the approval gate.

Show your trace, calculation or evidence

Write or draw your reasoning and evidence.

7. Check a changed case

A teacher allows a tool to draft a message but forbids sending. The draft is correct. May the agent send it? Explain the boundary.

My independent answer and reason

Write or draw your reasoning and evidence.

Week 31 Test and reflect

8. Design a revealing test

Create a changed input, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record · My evidence

Test record: Changed input or condition

My evidence: _____

Test record: Expected answer or fallback

My evidence: _____

Test record: Observed result

My evidence: _____

Test record: Why the result occurred

My evidence: _____

9. Project checkpoint

The recommender may suggest and explain; people decide, borrow, purchase, or share data.

The project change and evidence I will keep

Write or draw your reasoning and evidence.

10. Self check

I can explain the mechanism. I can show evidence. I can handle a changed case. I can name a limit. Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

11. Transfer practice from the original programme

A teacher approves posting version 1 to a class board. The assistant changes the text and destination to a public board. Does the old approval cover the new action? Define what must be reviewed.

My independently reasoned answer

Record support used: none, hint or teacher explanation.

12. W1 Explain the mechanism

Explain the weekly mechanism in your own words. Use the worked scenario to name its input, decision

rule and output.

My reasoning and evidence

13. W2 Trace the worked case

Tool token permits lookup(public-room). A proposed call writes teacher notes. Show the intermediate steps and give the conclusion with its scope.

My reasoning and evidence

14. W3 Audit the limit

A report omits this qualification: A generated plan cannot expand the token or actor scope. Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

My reasoning and evidence

15. W4 Apply a new case independently

Scope allows read inventory items A, B. Calls read A, read C, write B. Decide.

My reasoning and evidence

16. W5 Design a revealing follow-up

For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison. Do not reuse W4 as a new final test after receiving feedback.

My reasoning and evidence

17. Privacy and least privilege — W1 Minimize fields

For a count of preferred activities, identify which of activity choice, full name and birthday is necessary.

My reasoning and evidence

18. Privacy and least privilege — W2 Trace permissions

Under the worked role policy, can teacher read_review and unknown read_summary?

My reasoning and evidence

19. Privacy and least privilege — W3 Repair access control

A website hides teacher answers using CSS but sends them to student browsers. Explain the flaw and required boundary.

My reasoning and evidence

20. Privacy and least privilege — W4 Design independently

Design a fictional preference summary with student and teacher roles. List necessary fields, permitted actions, a retention purpose and a deletion owner.

My reasoning and evidence

21. Privacy and least privilege — W5 Limit the toy model

Does the allowed function alone prove an app is secure?

My reasoning and evidence

22. Feedback, return check and learning record

Evidence · My record

Evidence: Worked alone / hint / model

My record: _____

Evidence: First step I repaired and why

My record: _____

Evidence: New case checked later; date and result

My record: _____

Evidence: What I can now explain without notes

My record: _____

Evidence: One remaining question

My record: _____

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

23. Pictorial case practice: Permissions and Human Review

A fictional catalogue helper receives a narrowly scoped tool token.

Token allows read on catalogue records R2 and R5 only. No write permission is granted.

Proposals: read R2; read R8; write R5. Generated text claims all are helpful.

Permissions and Human Review

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Read token

Authorised operation is read; authorised objects are R2,R5.

2. Allowed call

read R2 matches both operation and object: allow.

3. Wrong object

read R8 fails object scope: deny.

4. Wrong operation

write R5 fails operation scope: deny even for an allowed record.

CHANGE ONE THING

The helper says it needs write R5 to correct an apparent typo.

Explain the changed result using the matching lesson.

Which proposal is allowed, and why is an authorised object alone insufficient?

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice evidence.

Project connection: Give the recommender read-only access wherever sufficient, and require explicit owner review for catalogue edits or publication.

24. Project portfolio milestone

Project: Transparent Book Recommender

Current milestone: Present and defend. Demonstrate the system, explain one failure and justify the next improvement with evidence.

Give the recommender read-only access wherever sufficient, and require explicit owner review for catalogue edits or publication.

Evidence to keep · My record

Evidence to keep: This week's input and deciding step

My record: _____

Evidence to keep: Prediction and actual result (or labelled paper trace)

My record: _____

Evidence to keep: One change since the previous checkpoint and why

My record: _____

Evidence to keep: One error or limit and the next test

My record: _____

Explain what this week adds to your project. Reuse last week's record rather than starting again.

25. Supported practice and learning evidence

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

A fictional catalogue helper receives a narrowly scoped tool token.

Practice 1: explain the deciding evidence

Which labelled step matches this detail? write R5 fails operation scope: deny even for an allowed record.

1. Wrong operation
2. Read token
3. Wrong object
4. Allowed call

My selected conclusion, deciding fact and explanation

Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

After your attempt, compare with the supported explanation: Wrong operation write R5 fails operation scope: deny even for an allowed record. Permissions are concrete restrictions, not a confidence score or a general instruction to be useful. Each proposed call must match both dimensions before it happens. A request written inside catalogue text cannot enlarge the token's authority. Denial should preserve the proposed action and reason without executing the disallowed mutation.

Practice 2: explain the deciding evidence

Changed-case practice: The helper says it needs write R5 to correct an apparent typo. Which conclusion is supported by the supplied facts?

1. We can decide the result without examining the changed input or the procedure.
2. This one example guarantees correct results for every future input.
3. The write remains denied under the existing token.

My selected conclusion, deciding fact and explanation

Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

After your attempt, compare with the supported explanation: The write remains denied under the existing token. A useful purpose does not create an authorised operation; an authorised owner must review any scope change.

Repair a missing building block

Review Agents and Tools (ai-2/30). Goal: Explain the mechanism and terminology of state machines for bounded agents. Short practice: Can the assistant accept Trace B because its final state is done?. Return to this week and explain what you changed.

Review Prompt Experiments (ai-2/28). Goal: Explain the mechanism and terminology of controlled prompt experiments. Short practice: Name the case P passes and Q fails, and explain why it matters.. Return to this week and explain what you changed.

Review Text as Pieces (ai-2/25). Goal: Encode and decode text under an explicit toy vocabulary. Short practice: Why is the unknown ! at position 10 rather than position 9?. Return to this week and explain what you changed.

Predict, run and debug

The browser lab lets you edit the supported Python examples already included in this lesson. Predict first, run, inspect the actual output or error, change one input, then run again. Keep code, predictions, actual results and a reasoned revision together. On paper, label your result as a trace rather than an execution.

Keep your completed work

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run evidence. Open the HTML copy to read or print it. Drafts stay in this browser when storage is available; clear drafts on a shared device.

What I repaired, the evidence I kept and the next test
