

Copyright and Provenance

Project: Verified Study Buddy

1. Recall and choose your starting point

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Privacy by Design

Without opening the old lesson, explain one key idea from Privacy by Design. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Evaluation Sets

Without opening the old lesson, explain one key idea from Evaluation Sets. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Block to Python Bridge

Without opening the old lesson, explain one key idea from Block to Python Bridge. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

2. Practise with fading help

Use W2: Trace the worked case for Copyright and permitted sources. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs · Procedure I chose · Middle steps · Result and check

Given inputs: _____

Procedure I chose: _____

Middle steps: _____

Result and check: _____

The step I completed without help, and the hint I needed

3. Individual reasoning check

Use the worked case for Copyright and permitted sources. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported. Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

4. Independent transfer case

Independent case: Apply a new case independently

Text C permits internal reading only; D permits public quotation up to 30 words with attribution. Proposed public handout reproduces 40 words. Apply the fictional terms.

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

5. Your learning target

A project uses an image found through search. Its author is known but its licence is missing. Is naming the author enough to establish reuse permission? Describe a provenance record and next action.

6. Solve the given case

A slide reuses an online photograph and textbook paragraph.

What provenance and reuse checks are needed?

Show your trace, calculation or evidence

Write or draw your reasoning and evidence.

7. Check a changed case

You find an attractive illustration online with no license information. What should you record and check before reusing it in a public project?

My independent answer and reason

Write or draw your reasoning and evidence.

Week 29 Test and reflect

8. Design a revealing test

Create a changed input, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record · My evidence

Test record: Changed input or condition

My evidence: _____

Test record: Expected answer or fallback

My evidence: _____

Test record: Observed result

My evidence: _____

Test record: Why the result occurred

My evidence: _____

9. Project checkpoint

Attach citations and provenance metadata to every Study Buddy learning asset.

The project change and evidence I will keep

Write or draw your reasoning and evidence.

10. Self check

I can explain the mechanism. I can show evidence. I can handle a changed case. I can name a limit. Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

11. Transfer practice from the original programme

A project uses an image found through search. Its author is known but its licence is missing. Is naming the author enough to establish reuse permission? Describe a provenance record and next action.

My independently reasoned answer

Record support used: none, hint or teacher explanation.

12. W1 Explain the mechanism

Explain the weekly mechanism in your own words. Use the worked scenario to name its input, decision rule and output.

My reasoning and evidence

13. W2 Trace the worked case

Image A has L; image B has M. The project is a publicly downloadable adapted poster. Show the intermediate steps and give the conclusion with its scope.

My reasoning and evidence

14. W3 Audit the limit

A report omits this qualification: Real legal outcomes depend on jurisdiction and facts; supplied licence terms define this classroom exercise, not universal copyright law. Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

My reasoning and evidence

15. W4 Apply a new case independently

Text C permits internal reading only; D permits public quotation up to 30 words with attribution. Proposed public handout reproduces 40 words. Apply the fictional terms.

My reasoning and evidence

16. W5 Design a revealing follow-up

For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison. Do not reuse W4 as a new final test after receiving feedback.

My reasoning and evidence

17. Feedback, return check and learning record

Evidence · My record

Evidence: Worked alone / hint / model

My record: _____

Evidence: First step I repaired and why

My record: _____

Evidence: New case checked later; date and result

My record: _____

Evidence: What I can now explain without notes

My record: _____

Evidence: One remaining question

My record: _____

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

18. Pictorial case practice: Copyright and Provenance

Read fictional reuse terms before decorating a public study guide.

Image Fern allows public redistribution with attribution but no alteration. Image Moss allows alteration and public redistribution with attribution. The plan crops an image.

All inputs and outcomes in this worked example are invented classroom data; no real model run is claimed.

Copyright and Provenance

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Read terms

Fern excludes alteration; Moss permits it.

2. Match proposed use

Cropping is an alteration in these declared toy terms.

3. Choose eligible asset

Use Moss with its required attribution; do not crop Fern for this public guide.

CHANGE ONE THING

Use Fern unchanged and include the required attribution.

Explain the changed result using the matching lesson.

Does acknowledging Fern make a cropped version permitted? Point to the relevant step in the picture, then write the changed result and the rule or evidence that supports it.

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice evidence.

Project connection: For your Verified Study Buddy, save the input, procedure, observed result and limitation of this check. Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

19. Project portfolio milestone

Project: Verified Study Buddy

Current milestone: Prepare the demonstration. Gather reproducible instructions, evidence, access checks and remaining limitations.

For your Verified Study Buddy, save the input, procedure, observed result and limitation of this check. Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

Evidence to keep · My record

Evidence to keep: This week's input and deciding step

My record: _____

Evidence to keep: Prediction and actual result (or labelled paper trace)

My record: _____

Evidence to keep: One change since the previous checkpoint and why

My record: _____

Evidence to keep: One error or limit and the next test

My record: _____

Explain what this week adds to your project. Reuse last week's record rather than starting again.

20. Supported practice and learning evidence

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

Read fictional reuse terms before decorating a public study guide.

Practice 1: explain the deciding evidence

Which labelled step matches this detail? Use Moss with its required attribution; do not crop Fern for this public guide.

1. Choose eligible asset
2. Read terms
3. Match proposed use

My selected conclusion, deciding fact and explanation

Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

After your attempt, compare with the supported explanation: Choose eligible asset Use Moss with its required attribution; do not crop Fern for this public guide. Read the picture in order. Use Moss with its required attribution; do not crop Fern for this public guide. The arrows show which recorded input or intermediate result each decision uses. Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows.

Practice 2: explain the deciding evidence

Changed-case practice: Use Fern unchanged and include the required attribution. Which conclusion is supported by the supplied facts?

1. That use satisfies the stated fictional permission conditions.
2. This one example guarantees correct results for every future input.
3. We can decide the result without examining the changed input or the procedure.

My selected conclusion, deciding fact and explanation

Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

After your attempt, compare with the supported explanation: That use satisfies the stated fictional permission conditions. Its public redistribution is permitted when there is no alteration and attribution is included.

Repair a missing building block

Review Privacy by Design (ai-3/28). Goal: Explain the mechanism and terminology of data retention and deletion. Short practice: Which IDs and locations must appear in the deletion evidence? Point to the relevant step in the picture, then write the changed result and the rule or evidence that supports it.. Return to this week and explain what you changed.

Review Evaluation Sets (ai-3/26). Goal: Explain the mechanism and terminology of system evaluation sets. Short practice: Did the added cases demonstrate better answering? Point to the relevant step in the picture, then write the changed result and the rule or evidence that supports it.. Return to this week and explain what you changed.

Review Block to Python Bridge (ai-3/23). Goal: Translate a short paper calculation into a Python script. Short practice: Trace the changed list and identify where the result differs. Point to the relevant step in the picture, then write the changed result and the rule or evidence that supports it.. Return to this week and explain what you changed.

Keep your completed work

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run evidence. Open the HTML copy to read or print it. Drafts stay in this browser when storage is available; clear drafts on a shared device.

What I repaired, the evidence I kept and the next test
