

Human AI Workflow

Project: Verified Study Buddy

1. Recall and choose your starting point

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Safety Boundaries

Without opening the old lesson, explain one key idea from Safety Boundaries. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Copyright and Provenance

Without opening the old lesson, explain one key idea from Copyright and Provenance. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Evaluation Sets

Without opening the old lesson, explain one key idea from Evaluation Sets. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

2. Practise with fading help

Use W2: Trace the worked case for Human review and consequential use. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs · Procedure I chose · Middle steps · Result and check

Given inputs: _____

Procedure I chose: _____

Middle steps: _____

Result and check: _____

The step I completed without help, and the hint I needed

3. Individual reasoning check

Use the worked case for Human review and consequential use. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported. Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

4. Independent transfer case

Independent case: Apply a new case independently

Teacher approves read-only report R1. System adds email distribution in R2. What permission is missing and what should the reviewer see?

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

5. Your learning target

A student asks a helper to submit an unchecked generated essay under their name. Design a workflow that preserves student reasoning and follows classroom rules.

6. Solve the given case

An AI drafts, verifies and submits a student's assessment without review.

Where should responsibility remain?

Show your trace, calculation or evidence

Write or draw your reasoning and evidence.

7. Check a changed case

A workflow drafts a class email, checks its claims and then sends it. Where should approval occur, and what should the approver see?

My independent answer and reason

Write or draw your reasoning and evidence.

Week 32 Test and reflect

8. Design a revealing test

Create a changed input, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record · My evidence

Test record: Changed input or condition

My evidence: _____

Test record: Expected answer or fallback

My evidence: _____

Test record: Observed result

My evidence: _____

Test record: Why the result occurred

My evidence: _____

9. Project checkpoint

AI drafts; sources ground; validators check; learner chooses; teacher governs classroom use.

The project change and evidence I will keep

Write or draw your reasoning and evidence.

10. Self check

I can explain the mechanism. I can show evidence. I can handle a changed case. I can name a limit. Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

11. Transfer practice from the original programme

A student asks a helper to submit an unchecked generated essay under their name. Design a workflow that preserves student reasoning and follows classroom rules.

My independently reasoned answer

Record support used: none, hint or teacher explanation.

12. W1 Explain the mechanism

Explain the weekly mechanism in your own words. Use the worked scenario to name its input, decision rule and output.

My reasoning and evidence

13. W2 Trace the worked case

Coordinator approves draft v1 for room B. Assistant changes room to C in v2 and submits using the old approval. Show the intermediate steps and give the conclusion with its scope.

My reasoning and evidence

14. W3 Audit the limit

A report omits this qualification: Review effectiveness depends on usable evidence, time and authority; a checkbox is not evidence of informed review. Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

My reasoning and evidence

15. W4 Apply a new case independently

Teacher approves read-only report R1. System adds email distribution in R2. What permission is missing and what should the reviewer see?

My reasoning and evidence

16. W5 Design a revealing follow-up

For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison. Do not reuse W4 as a new final test after receiving feedback.

My reasoning and evidence

17. Feedback, return check and learning record

Evidence · My record

Evidence: Worked alone / hint / model

My record: _____

Evidence: First step I repaired and why

My record: _____

Evidence: New case checked later; date and result

My record: _____

Evidence: What I can now explain without notes

My record: _____

Evidence: One remaining question

My record: _____

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

18. Pictorial case practice: Human AI Workflow

A human approval belongs to the exact draft and action reviewed.

A teacher approves study handout H1 for classroom printing. H2 adds a pupil email address and proposes public posting. No H2 approval exists.

All inputs and outcomes in this worked example are invented classroom data; no real model run is claimed.

Human AI Workflow

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Identify approval

The recorded approval covers H1 and classroom printing.

2. Inspect change

H2 changes both content and distribution scope.

3. Require review

Stop public posting and show H2's changed content and intended audience to the reviewer.

CHANGE ONE THING

H2 is replaced with unchanged H1 for classroom printing.

Explain the changed result using the matching lesson.

Why can H1's approval not automatically approve H2? Point to the relevant step in the picture, then write the changed result and the rule or evidence that supports it.

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice evidence.

Project connection: For your Verified Study Buddy, save the input, procedure, observed result and limitation of this check. Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

19. Project portfolio milestone

Project: Verified Study Buddy

Current milestone: Present and defend. Demonstrate the system, explain one failure and justify the next improvement with evidence.

For your Verified Study Buddy, save the input, procedure, observed result and limitation of this check. Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

Evidence to keep · My record

Evidence to keep: This week's input and deciding step

My record: _____

Evidence to keep: Prediction and actual result (or labelled paper trace)

My record: _____

Evidence to keep: One change since the previous checkpoint and why

My record: _____

Evidence to keep: One error or limit and the next test

My record: _____

Explain what this week adds to your project. Reuse last week's record rather than starting again.

20. Supported practice and learning evidence

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

A human approval belongs to the exact draft and action reviewed.

Practice 1: explain the deciding evidence

Which labelled step matches this detail? Stop public posting and show H2's changed content and intended audience to the reviewer.

1. Identify approval
2. Require review
3. Inspect change

My selected conclusion, deciding fact and explanation

Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

After your attempt, compare with the supported explanation: Require review Stop public posting and show H2's changed content and intended audience to the reviewer. Read the picture in order. Stop public posting and show H2's changed content and intended audience to the reviewer. The arrows show which recorded input or intermediate result each decision uses. Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows.

Practice 2: explain the deciding evidence

Changed-case practice: H2 is replaced with unchanged H1 for classroom printing. Which conclusion is supported by the supplied facts?

1. This one example guarantees correct results for every future input.
2. The original approval covers that declared action.
3. We can decide the result without examining the changed input or the procedure.

My selected conclusion, deciding fact and explanation

Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

After your attempt, compare with the supported explanation: The original approval covers that declared action. Both the approved content and its distribution scope now match.

Repair a missing building block

Review Safety Boundaries (ai-3/31). Goal: Explain the mechanism and terminology of untrusted input boundaries. Short practice: If AB7 passes the pattern, may it access teacher-only material? Point to the relevant step in the picture, then write the changed result and the rule or evidence that supports it.. Return to this week and explain what you changed.

Review Copyright and Provenance (ai-3/29). Goal: Explain the mechanism and terminology of copyright and permitted sources. Short practice: Does acknowledging Fern make a cropped version permitted? Point to the relevant step in the picture, then write the changed result and the rule or evidence that supports it.. Return to this week and explain what you changed.

Review Evaluation Sets (ai-3/26). Goal: Explain the mechanism and terminology of system evaluation sets. Short practice: Did the added cases demonstrate better answering? Point to the relevant step in the picture, then write the changed result and the rule or evidence that supports it.. Return to this week and explain what you changed.

Keep your completed work

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run evidence. Open the HTML copy to read or print it. Drafts stay in this browser when storage is available; clear drafts on a shared device.

What I repaired, the evidence I kept and the next test
