

Creator Defense

Project: Verified Study Buddy

1. Recall and choose your starting point

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Capstone Evaluate and Improve

Without opening the old lesson, explain one key idea from Capstone Evaluate and Improve. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Capstone Design

Without opening the old lesson, explain one key idea from Capstone Design. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Bias and Representation

Without opening the old lesson, explain one key idea from Bias and Representation. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

2. Practise with fading help

Use W2: Trace the worked case for Generative systems defense. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs · Procedure I chose · Middle steps · Result and check

Given inputs: _____

Procedure I chose: _____

Middle steps: _____

Result and check: _____

The step I completed without help, and the hint I needed

3. Individual reasoning check

Use the worked case for Generative systems defense. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported. Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

4. Independent transfer case

Independent case: Apply a new case independently

A defense has retrieval 8/10, support 6/10, fallback 3/4 and no measured latency. State the three rates and reject one unsupported claim.

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

5. Your learning target

Your assistant passes 9/12 final questions, including all six direct facts but only 3/6 ambiguous or absent-evidence cases. Report results and argue for a focused next step.

6. Solve the given case

Ten successful demos lead to a never hallucinates claim.

Write a defensible conclusion.

Show your trace, calculation or evidence

Write or draw your reasoning and evidence.

7. Check a changed case

An audience asks whether your assistant is always correct. Give an evidence-based defense using results and a limit.

My independent answer and reason

Write or draw your reasoning and evidence.

Week 36 Test and reflect

8. Design a revealing test

Create a changed input, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record · My evidence

Test record: Changed input or condition

My evidence: _____

Test record: Expected answer or fallback

My evidence: _____

Test record: Observed result

My evidence: _____

Test record: Why the result occurred

My evidence: _____

9. Project checkpoint

Final product card documents purpose, system map, sources, evals, limits, risks, and human oversight.

The project change and evidence I will keep

Write or draw your reasoning and evidence.

10. Self check

I can explain the mechanism. I can show evidence. I can handle a changed case. I can name a limit. Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

11. Transfer practice from the original programme

Your assistant passes 9/12 final questions, including all six direct facts but only 3/6 ambiguous or absent-evidence cases. Report results and argue for a focused next step.

My independently reasoned answer

Record support used: none, hint or teacher explanation.

12. W1 Explain the mechanism

Explain the weekly mechanism in your own words. Use the worked scenario to name its input, decision rule and output.

My reasoning and evidence

13. W2 Trace the worked case

System reports 9/10 retrieved relevant records, 7/10 supported answers and zero actions in a read-only run. Presenter claims 90% fully correct and faster than baseline. Show the intermediate steps and give the conclusion with its scope.

My reasoning and evidence

14. W3 Audit the limit

A report omits this qualification: A defense should preserve negative evidence and uncertainty rather than treating polished presentation as proof. Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

My reasoning and evidence

15. W4 Apply a new case independently

A defense has retrieval 8/10, support 6/10, fallback 3/4 and no measured latency. State the three rates and reject one unsupported claim.

My reasoning and evidence

16. W5 Design a revealing follow-up

For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison. Do not reuse W4 as a new final test after receiving feedback.

My reasoning and evidence

17. Feedback, return check and learning record

Evidence · My record

Evidence: Worked alone / hint / model

My record: _____

Evidence: First step I repaired and why

My record: _____

Evidence: New case checked later; date and result

My record: _____

Evidence: What I can now explain without notes

My record: _____

Evidence: One remaining question

My record: _____

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

18. Pictorial case practice: Creator Defense

Defend a study-buddy project using separate claims and matching evidence.

Set A: 15 answerable questions, with 12 relevant retrievals and 9 supported answers. Separate set B: 5 missing-source questions, with 4 appropriate fallbacks. No speed measurements exist.

All inputs and outcomes in this worked example are invented classroom data; no real model run is claimed.

Creator Defense

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Retrieval claim

Relevant retrieval rate is $12/15=80\%$.

2. Answer claim

Supported-answer rate is $9/15=60\%$; retrieval success is not answer success.

3. Fallback claim

Appropriate fallback is $4/5=80\%$. Make no measured speed claim.

CHANGE ONE THING

Only the retrieval rate is put on the presentation poster.

Explain the changed result using the matching lesson.

Which numbers would you display to make the defense honest? Point to the relevant step in the picture, then write the changed result and the rule or evidence that supports it.

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice evidence.

Project connection: For your Verified Study Buddy, save the input, procedure, observed result and limitation of this check. Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

19. Project portfolio milestone

Project: Verified Study Buddy

Current milestone: Present and defend. Demonstrate the system, explain one failure and justify the next improvement with evidence.

For your Verified Study Buddy, save the input, procedure, observed result and limitation of this check. Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

Evidence to keep · My record

Evidence to keep: This week's input and deciding step

My record: _____

Evidence to keep: Prediction and actual result (or labelled paper trace)

My record: _____

Evidence to keep: One change since the previous checkpoint and why

My record: _____

Evidence to keep: One error or limit and the next test

My record: _____

Explain what this week adds to your project. Reuse last week's record rather than starting again.

20. Supported practice and learning evidence

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

Defend a study-buddy project using separate claims and matching evidence.

Practice 1: explain the deciding evidence

Which labelled step matches this detail? Appropriate fallback is $4/5=80\%$. Make no measured speed claim.

1. Fallback claim
2. Answer claim
3. Retrieval claim

My selected conclusion, deciding fact and explanation

Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

After your attempt, compare with the supported explanation: Fallback claim Appropriate fallback is $4/5=80\%$. Make no measured speed claim. Read the picture in order. Appropriate fallback is $4/5=80\%$. Make no measured speed claim. The arrows show which recorded input or intermediate result each decision uses. Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows.

Practice 2: explain the deciding evidence

Changed-case practice: Only the retrieval rate is put on the presentation poster. Which conclusion is supported by the supplied facts?

1. This one example guarantees correct results for every future input.
2. The poster omits the lower supported-answer rate and cannot imply 80% fully correct answers.
3. We can decide the result without examining the changed input or the procedure.

My selected conclusion, deciding fact and explanation

Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

After your attempt, compare with the supported explanation: The poster omits the lower supported-answer rate and cannot imply 80% fully correct answers. Retrieving useful evidence is an intermediate step, not proof that the final answer uses it correctly.

Repair a missing building block

Review Capstone Evaluate and Improve (ai-3/35). Goal: Explain the mechanism and terminology of capstone evaluation and revision. Short practice: May the team call the repaired validation cases an untouched final test? Point to the relevant step in the picture, then write the changed result and the rule or evidence that supports it.. Return to this week and explain what you changed.

Review Capstone Design (ai-3/33). Goal: Explain the mechanism and terminology of capstone requirements and corpus. Short practice: What should the project plan record before the new flower test? Point to the relevant step in the picture, then write the changed result and the rule or evidence that supports it.. Return to this week and explain what you changed.

Review Bias and Representation (ai-3/30). Goal: Explain the mechanism and terminology of representation and bias evaluation. Short practice: Explain why comparing six correct answers in each group would mislead. Point to the relevant step in the picture, then write the changed result and the rule or evidence that supports it.. Return to this week and explain what you changed.

Keep your completed work

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run evidence. Open the HTML copy to read or print it. Drafts stay in this browser when storage is available; clear drafts on a shared device.

What I repaired, the evidence I kept and the next test
