

Methods results and limitations

Project: Reproducible AI Research Study

1. Recall and choose your starting point

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Finding primary research

Without opening the old lesson, explain one key idea from Finding primary research. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

A question that evidence can answer

Without opening the old lesson, explain one key idea from A question that evidence can answer. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

2. Practise with fading help

Use W2: Trace the worked case for Methods results and limitations. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs · Procedure I chose · Middle steps · Result and check

Given inputs: _____

Procedure I chose: _____

Middle steps: _____

Result and check: _____

The step I completed without help, and the hint I needed

3. Individual reasoning check

Use the worked case for Methods results and limitations. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported. Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

4. Independent transfer case

Independent case: Apply a new case independently

Statements:fixed cutoff5; 12/15 relevant returned items; judgments came from one reviewer. Classify.

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

5. W1 Explain the mechanism

Explain the weekly mechanism in your own words. Use the worked scenario to name its input, decision rule and output.

My reasoning and evidence

6. W2 Trace the worked case

Statements:used20 fictional queries; 16 passed; real student use was not studied. Show the intermediate steps and give the conclusion with its scope.

My reasoning and evidence

7. W3 Audit the limit

A report omits this qualification: A limitation should constrain a claim rather than be hidden in unrelated prose. Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

My reasoning and evidence

8. W4 Apply a new case independently

Statements:fixed cutoff5; 12/15 relevant returned items; judgments came from one reviewer. Classify.

My reasoning and evidence

9. W5 Design a revealing follow-up

For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison. Do not reuse W4 as a new final test after receiving feedback.

My reasoning and evidence

10. Project checkpoint and reflection

Add a labelled methods results and limitations evidence sheet to Reproducible AI Research Study. Show how you can explain the mechanism and terminology of methods results and limitations. Use the supplied fictional case and keep its inputs, intermediate steps, calculation or prediction, and limitation. Connect this record to last week’s record; a matching answer without a trace is insufficient.

My project change, supporting evidence and remaining limit

11. Feedback, return check and learning record

Evidence · My record

Evidence: Worked alone / hint / model

My record: _____

Evidence: First step I repaired and why

My record: _____

Evidence: New case checked later; date and result

My record: _____

Evidence: What I can now explain without notes

My record: _____

Evidence: One remaining question

My record: _____

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

12. Pictorial case practice: Methods results and limitations

Separate procedure, finding and limit. A fictional report tests two frozen classifiers on five labelled leaf photos from one camera.

A is correct on 3/5; B on 4/5. No outdoor photos appear in the set.

AI ACADEMY / AI-7/4

Two models on five shared photos

correct photos out of 5

Bar length shows the supplied value; the marked baseline is zero.

Methods results and limitations

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Identify the method

Same five photos, labels and scoring are used for both models.

2. State the result

A scores 60%; B scores 80% on this fixed set.

3. State the limit

The set supplies no outdoor-camera performance evidence.

CHANGE ONE THING

The conclusion says B is best for outdoor farming.

Explain the changed result using the matching lesson.

Place the five-photo procedure, 3/5 versus 4/5 finding and missing outdoor evidence in their proper categories. Why cannot the result establish that B is best for outdoor farming?

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice evidence.

Project connection: For the Reproducible AI Research Study, retain an annotated worked trace and the changed-case reasoning. Connect the claim to its records, units and assumptions so another investigator can challenge or reproduce it.

13. Project portfolio milestone

Project: Reproducible AI Research Study

Current milestone: Frame the need. Name the user, the problem, allowed inputs and a safe simple starting method.

For the Reproducible AI Research Study, retain an annotated worked trace and the changed-case reasoning. Connect the claim to its records, units and assumptions so another investigator can challenge or reproduce it.

Evidence to keep · My record

Evidence to keep: This week's input and deciding step

My record: _____

Evidence to keep: Prediction and actual result (or labelled paper trace)

My record: _____

Evidence to keep: One change since the previous checkpoint and why

My record: _____

Evidence to keep: One error or limit and the next test

My record: _____

Explain what this week adds to your project. Reuse last week's record rather than starting again.

14. Supported practice and learning evidence

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

Separate procedure, finding and limit. A fictional report tests two frozen classifiers on five labelled leaf photos from one camera.

Practice 1: explain the deciding evidence

Which labelled step matches this detail? The set supplies no outdoor-camera performance evidence.

1. State the result
2. State the limit
3. Identify the method

My selected conclusion, deciding fact and explanation

Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

After your attempt, compare with the supported explanation: State the limit The set supplies no outdoor-camera performance evidence. Methods tell how evidence was produced; results state observations; limitations describe what those observations cannot settle. Keeping them distinct prevents a result from becoming an oversized claim.

Practice 2: explain the deciding evidence

Changed-case practice: The conclusion says B is best for outdoor farming. Which conclusion is supported by the supplied facts?

1. Reject that extension without outdoor evidence.
2. This one example guarantees correct results for every future input.
3. We can decide the result without examining the changed input or the procedure.

My selected conclusion, deciding fact and explanation

Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

After your attempt, compare with the supported explanation: Reject that extension without outdoor evidence. The reported conditions do not include the proposed use population.

Repair a missing building block

Review Finding primary research (ai-7/3). Goal: Explain the mechanism and terminology of finding primary research. Short practice: Separate what the blog claims from what the original report records. Which methods and denominator must be inspected, and what status is honest if the original report is unavailable?. Return to this week and explain what you changed.

Review A question that evidence can answer (ai-7/1). Goal: Explain the mechanism and terminology of a question that evidence can answer. Short practice: Which proposed diagram question has a measurable outcome? Name its versions, six-case denominator and fixed scoring, then explain why giving only B easier tasks spoils the comparison.. Return to this week and explain what you changed.

Keep your completed work

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run evidence. Open the HTML copy to read or print it. Drafts stay in this browser when storage is available; clear drafts on a shared device.

What I repaired, the evidence I kept and the next test
