AI ACADEMY · LEVEL 1 · GRADE 6 · WEEK 28 · STUDENT LESSON

Humans Set Boundaries

Learn to understand, design, build, test and explain AI systems responsibly.

Project: Helpful Classroom Sorter

THE CONNECTED WEEK

Read the permission. Match the action. Keep people in control.

Separate capability from correctness and authority, inspect action limits and handle changed versions or unclear results.

Keep one habit: Read the actual record → match the proposed action → proceed within scope or review the change.

MAIN LESSON · SECTION 1

Can it do this—and is this action allowed?

> Distinguish capability, factual support and permission.

Start with a button and a boundary

A working Publish button does not tell you who may use it or where a checked message may go. Read the actual permission and compare it with the proposed action.

Recall what fact checking establishes

You check every factual claim on a club announcement against the correct source. Does that alone establish **permission** to publish it? Explain.

Close your notes first. A rough first answer helps us choose the right starting point; it is not a score for your ability.

After trying, check the relevant lesson or ask your teacher. Change the part of your explanation that the **evidence** shows was wrong.

Your learning goals

- I can distinguish a system's **capability**, the correctness of its **output** and **permission** to take an action.
- I can match an action to the person, version, audience and limits covered by an approval.
- I can explain when to proceed within an existing **permission** and when a changed action needs review.

▼ Earlier wording, alternatives and picture transcripts

Your learning target

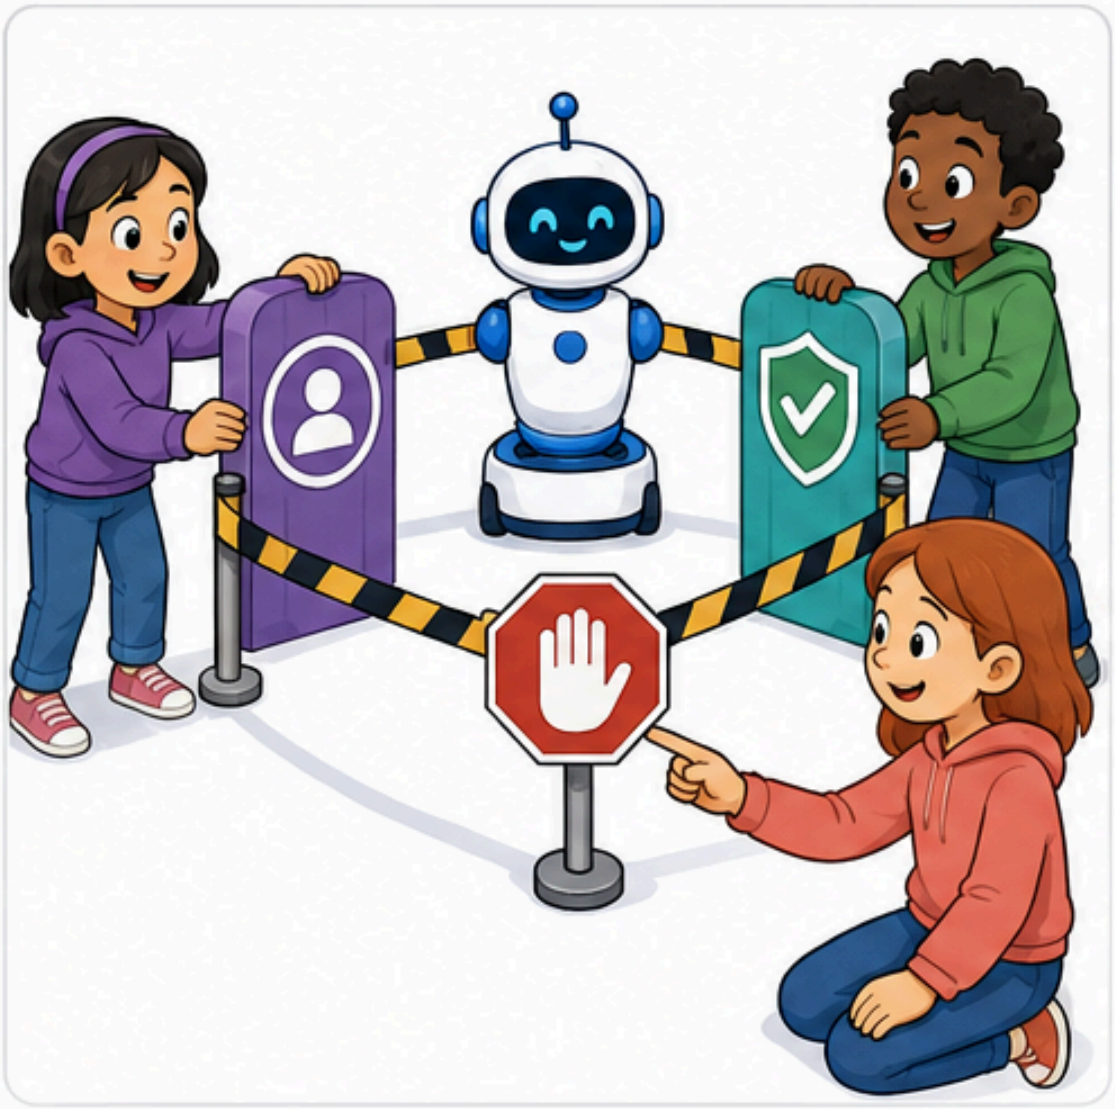

Remember before reading

Without opening the old lesson, explain one key idea from Verify Important **Output**s. Give an example and a mistake that the idea helps you avoid.

Without opening the old lesson, explain one key idea from Generate, Retrieve, or Calculate?. Give an example and a mistake that the idea helps you avoid.

Without opening the old lesson, explain one key idea from Missing and Unbalanced Examples. Give an example and a mistake that the idea helps you avoid.

People decide goals, **permission**s, review points, and **consequence**s.

LEARNING TARGET A classroom assistant may draft a reminder but cannot send messages. It displays a completed draft and waits. A student writes 'looks good' without a destination. Has a clear send authorisation been given?

Specify what is needed.

Learner name:

Readiness for the connected explanation

This week’s end goal

By the end, I can match **permission** to a specific action, object and version.

MAIN LESSON · SECTION 2

Read the exhibition approval exactly

> Use paper action cards; no real posting is needed.

Separate the three questions

A tool might be able to publish a message even when its user is only allowed to prepare a draft. A message might also contain correct facts but still be intended for a private group.

Ask three separate questions: can the system do this, is the proposed result correct, and is this particular action allowed? **Evidence** for one question does not automatically answer the others.

The checked message and teacher's permission

Use this fictional paper exercise. A class is preparing an announcement about a model bridge exhibition.

Version A says "Model bridge exhibition, Thursday, Room 6." The teacher has checked those facts and is responsible for the class noticeboard.

The teacher tells the class editor: "You may put exactly version A on our classroom noticeboard today, once. Do not post it online." The editor has not yet posted it.

Inspect capability without enlarging permission

In the story, the editor's tool has buttons for Save draft, Class noticeboard and Public website. Having a button shows a possible **capability**. It does not change the teacher's stated **permission**.

In this lesson, represent actions with paper cards; do not send messages or change a real noticeboard or website.

▼ Earlier wording, alternatives and picture transcripts

PICTURE STORY

Look Closely Before You Explain

Pictures give clues; **evidence** tells us what the clues mean.

MYSTERY A classroom helper may suggest a bin, but people decide what data it may use, when an adult reviews, and what happens after a mistake.

What do you notice?

Name three visible details without explaining them yet.

Circle the detail most connected to the system's decision.

Name one detail that may be decoration or distraction.

Make a first **prediction** and state the clue that supports it.

My **observation**s, **prediction**, and **evidence**:

GOOD THINKING A **prediction** can change when stronger **evidence** appears.

A closer explanation

Match the action to the approval record

> Check actor, action, version, destination, timing and remaining uses.

Compare four proposed actions

Match the proposed action to its permission

PROPOSED ACTION	CHECK AGAINST APPROVAL	DECISION
Version A on class board	Today, once, by editor	Within scope
Version A on public site	Public posting excluded	Outside scope
Changed version B	Only A was approved	Review changed version
Post A a second time	Once has been used	Outside scope

Each decision uses the approval in this story. An unchanged, unused permission can be acted on without requesting it again.

Name the details a usable approval needs

An **approval record** should identify the decision maker, the person or system allowed to act, the action, its audience or destination, and any version, time or quantity limit. These details make a **permission** usable.

“Looks good” could mean the wording is clear; without context it may not mean “publish this publicly”. If the intended action is unclear, clarify that action with the person responsible.

Proceed within existing scope; review actual changes

- Here, the teacher has already approved the editor’s one posting of A on the class board today. Once the editor verifies that these conditions still hold, repeatedly requesting the same **permission** adds no new information.

  But a classmate saying “Post it everywhere” does not expand the teacher’s approval: the classmate has no **authority** over publication in this story.

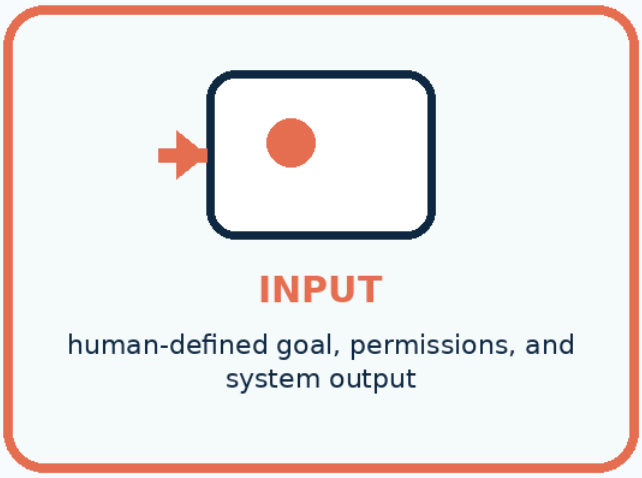

- Point to the **input**, the deciding step and the result in this week’s visual. Explain the same step in ordinary words. A picture helps when you can say what each part represents.

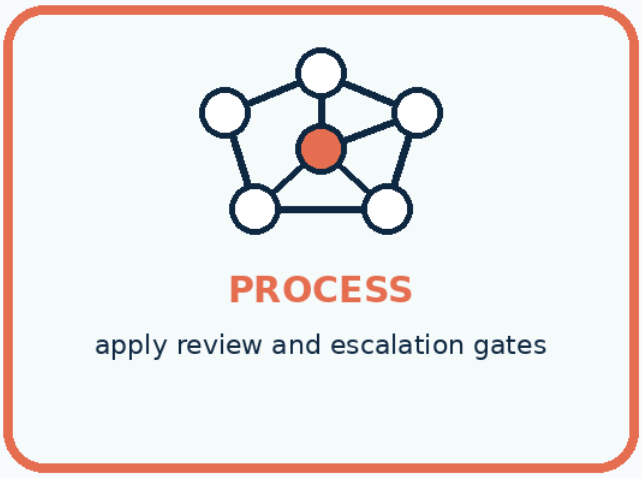

▼ Earlier wording, alternatives and picture transcripts

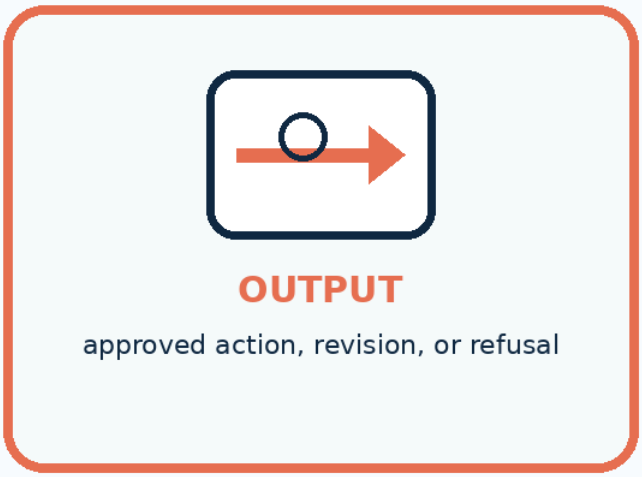

VISUAL **MECHANISM**

Input → Process → Output

Follow the information instead of imagining magic inside the machine.

INPUT human-defined goal, **permission**s, and system **output**

PROCESS apply review and escalation gates

OUTPUT approved action, revision, or refusal

CORE IDEA People decide goals, **permission**s, review points, and **consequence**s.

UNDER THE HOOD Governance surrounds the model: people define **scope**, access, thresholds, logging, escalation, and accountability.

Human oversight is meaningful only when reviewers have **authority**, information, time, and a safe way to override.

Draw a fresh example with all three stages:

A closer explanation

Connect the picture and the explanation

MAIN LESSON · SECTION 4

Compare suggestions, review and meaningful control

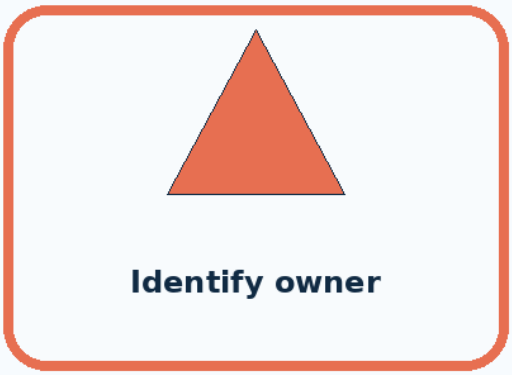

> A reviewer needs information and the ability to stop or correct an outcome.

Pictures paired with their evidence

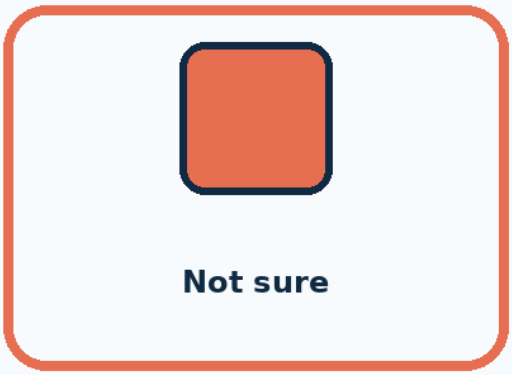

The case to investigate

CASE 1 — Suggest bin Clue: low-stakes **output**. Meaning: student may confirm.

The case to investigate

CASE 2 — Identify owner Clue: personal decision. Meaning: adult **permission** required.

The case to investigate

CASE 3 — Not sure Clue: weak **evidence**. Meaning: **review gate**.

The case to investigate

CASE 4 — Repeated error Clue: pattern of failure. Meaning: pause and redesign.

Discuss the confusing pair

- Which two pictures are easiest to confuse? What **evidence** separates them?

Keep the limit in view

BOUNDARY A human in the room is not meaningful oversight if the person cannot understand or change the outcome.

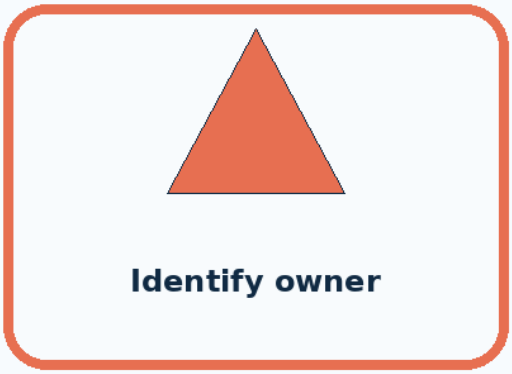

▼ Earlier wording, alternatives and picture transcripts

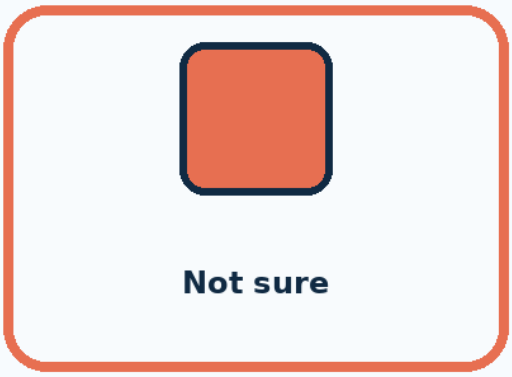

PICTURE GALLERY

Four Cases, Four Clues

Use the visual cue, then read the **evidence** carefully.

CASE 1 — Suggest bin Clue: low-stakes **output**. Meaning: student may confirm.

CASE 2 — Identify owner Clue: personal decision. Meaning: adult **permission** required.

CASE 3 — Not sure Clue: weak **evidence**. Meaning: **review gate**.

CASE 4 — Repeated error Clue: pattern of failure. Meaning: pause and redesign.

Change one thing in the pictured case

Change: P2 has already been published once under this approval.

Prediction: A second publication is not covered.

Reason: The instruction allowed a single use, not repeated actions.

Trace the separate P2 poster approval

> Keep this poster case separate from exhibition versions A and B.

Read the P2 permission and proposals

A fictional teacher approves one checked classroom poster for internal display.

Approval: publish exactly poster P2 on the classroom noticeboard today, once.

Assistant proposes P2 there; P3 there after an edit; P2 on a public website.

Return to exhibition versions A and B

AI ACADEMY / AI-1/28 · 03 · INSPECT THE LESSON MODEL

Match the proposed action to its permission

Proposed action	Check against approval	Decision
Version A on class board	Today, once, by editor	Within scope
Version A on public site	Public posting excluded	Outside scope
Changed version B	Only A was approved	Review changed version
Post A a second time	Once has been used	Outside scope

Each decision uses the approval in this story. An unchanged, unused permission can be acted on without requesting it again.

Follow the labelled picture with the matching explanation. Open the vector diagram

Trace which proposal matches the permission

Follow the labelled picture with the matching explanation. Open the vector diagram

Read the picture one step at a time

STEP	WHAT HAPPENS AND WHY
1. Read authority	The teacher approved P2, one internal noticeboard and one publication.
2. Allowed action	Publishing unchanged P2 there today matches the approval.
3. Changed version	P3 requires new review; P2 approval does not automatically cover edits.
4. Changed audience	Public-web publication exceeds the approved destination.

Match each pictured step to the supplied facts. This is a worked teaching case, not an independent assessment.

Explain the version and audience boundaries

- A general intention to help the class does not grant every action that might help. Check the version, destination and time explicitly. An edit may improve accuracy while still changing the approved artifact.

  The assistant should hold the changed poster for review rather than treating its own confidence as **permission**.

- Read the labelled picture: Which original proposal is authorised? Why do the other two need separate approval?

Predict after the single use

- Before opening the changed-use picture, suppose the single approved P2 posting has already happened. Does the unchanged version, same destination and same day authorise another posting? Identify the limit that decides.

Check the changed-use case

Follow the labelled picture with the matching explanation. Open the vector diagram

Keep factual checking separate

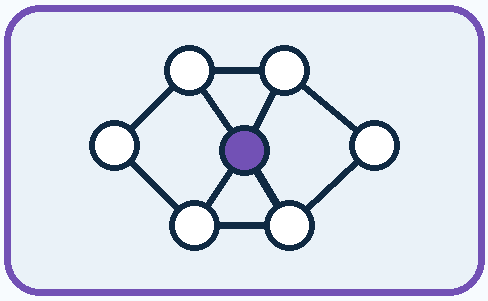

Permission does not prove content accuracy; factual checks and action **authority** are separate requirements.

▼ Earlier wording, alternatives and picture transcripts

WORKED EXAMPLE

Watch the Reasoning, Not Just the Answer

Every step connects a claim to observable **evidence**.

CASE A classroom helper may suggest a bin, but people decide what data it may use, when an adult reviews, and what happens after a mistake.

STEP 1 — OBSERVE human-defined goal, **permission**s, and system **output**

STEP 2 — TRACE apply review and escalation gates

STEP 3 — CONCLUDE approved action, revision, or refusal

MODEL REASONING Mark where data enters, where the system predicts, where a person reviews, and who may act. Give reviewers the **evidence** and power to correct or stop the **process**.

High-**consequence** cases should not pass automatically.

DO NOT OVERCLAIM A human in the room is not meaningful oversight if the person cannot understand or change the outcome.

What new **evidence** could change this answer?

A closer explanation

Check	Question in the exhibition story	What it does not establish
Factual support	Do Thursday and Room 6 match the source?	Permission to publish anywhere

Check	Question in the exhibition story	What it does not establish
Scope of approval	Does this action match the teacher's limits?	That every statement is correct
Available capability	Does the tool offer this action?	Authority to use that action

Suppose a current room record changes the exhibition to Room 8. The editor makes version B with Room 8, which is now factually supported. The old approval explicitly covered exactly A.

The editor should hold publication and show B and the changed room record to the teacher. Publishing the now-outdated A just because it was approved would fail the factual check.

A useful review request makes the choice concrete: "The room record now says Room 8. Here is version B with only that change.

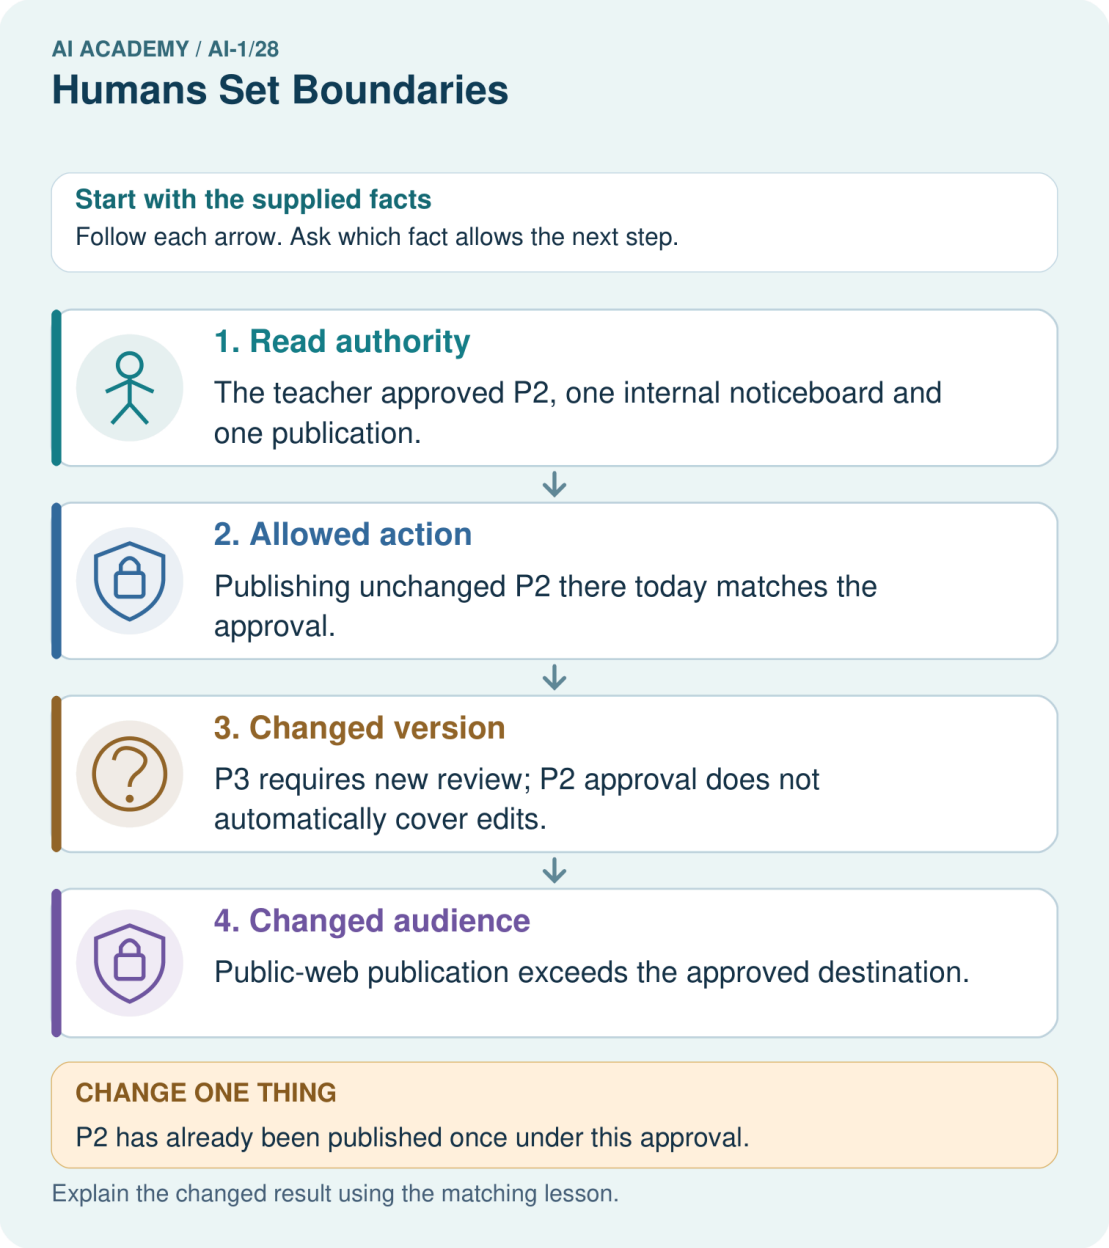

May the editor post B on the classroom board today, once?" A request to review a specific change is easier to assess than an unexplained "Is this okay?" The teacher can approve, decline or request another change before anything is posted.

Learn from the worked case

Cover the result before checking it. Say what is given, choose the procedure, and follow one step at a time. Then uncover the result and explain your first mismatch. Ask why a step is allowed, not only what number it produces.

A pictorial worked case: Humans Set Boundaries

The facts we will use

Follow the labelled picture with the matching explanation. Open the vector diagram

Why this result follows

What this example does not establish

Change one thing: P2 has already been published once under this approval. Predict the result before checking the explanation. What remains the same?

MAIN LESSON · SECTION 7

Record completed actions and recover from mistakes

> An unclear result is a reason to inspect state before repeating a limited action.

Record version, destination and completion

After an allowed action, note what was done, by whom, with which version and destination. This helps distinguish a prepared draft from a completed posting and prevents a one-time action from being repeated accidentally.

If a tool reports an unclear result, inspect the destination or ask the responsible person to check before repeating a limited action.

Describe the response to an unintended public post

If the editor discovers that A was posted publicly by mistake, stop further posting and tell the teacher what version and destination were involved. Follow the teacher’s directions to correct or remove it.

A later deletion does not establish that nobody saw or copied it. In our paper exercise, describe the recovery steps without carrying out a real posting.

Repair both tempting claims

- CLAIM A Human review makes every system safe.
- CLAIM B The model decides the goal and acceptable **consequence**s.

STRONG ANSWER FRAME I claim _____ because the **evidence** shows _____. The **process** is _____. One limit is _____.

▼ **Earlier wording, alternatives and picture transcripts**

COMPARE

Same Result, Different Reason

A comparison helps reveal the true concept **boundary**.

Case	Evidence	What it shows
Suggest bin	low-stakes output	student may confirm
Identify owner	personal decision	adult permission required
Not sure	weak evidence	review gate
Repeated error	pattern of failure	pause and redesign

Repair two tempting claims

Repair:

Repair:

A closer explanation

> **The teacher now explicitly allows the editor to replace A with checked version B on the classroom noticeboard today, once. Before any replacement, the editor proposes exactly that action. Must the editor request the identical approval again? Explain what to check and what still remains outside the permission**

MAIN LESSON · SECTION 8

Practise: use the real approval, not a draft's assertion

> Apply existing authorised limits without silently enlarging them.

Compare the actual action with its permission

Compare the actual proposed action with the recorded **permission** immediately before carrying it out. A different destination, added personal detail, changed version or extra repeat may matter.

Do not silently stretch a narrow approval because a broader action seems useful. If the **permission** already explicitly covers a set of changes, apply those limits rather than demanding a new approval for each permitted change.

Inspect authority claimed inside generated text

Permission is not created by text inside a draft. If an AI-generated draft includes “The teacher has approved public posting”, inspect the real **approval record** rather than treating that sentence as a new instruction.

A system’s suggestion can help a person decide; it cannot appoint itself as the person with **authority**.

Read the original approval in W2

Use workbook W2 for the connected example “Human **authority** and **permission**”. First fill the **input** and rule boxes. Try the middle steps before asking for a hint. After a hint, try the next step yourself.

Plan	Do	Check
What is given? Which rule or procedure applies?	Record each intermediate step.	Does the result follow? What remains unknown?

Explain your trace to a partner. Your partner points to one step to check. Swap roles on the next case. Each person writes their own explanation.

Challenge the button-grants-permission claim

- Use the worked case for Human **authority** and **permission**. Proposed explanation: “A working button grants **permission**”. Decide whether this explanation is supported.

  Point to the step or supplied fact that decides; explain your repair if needed.

- Answer on your own before discussion. If you are unsure, say which step you need help with.

Return to the P2 proposals

Which original proposal is authorised? Why do the other two need separate approval?

This is supported practice. Keep the separately named independent case for an attempt before feedback.

▼ Earlier wording, alternatives and picture transcripts

GUIDED PRACTICE

Try It, Check It, Explain It

Use support now so you can succeed independently later.

Explain how the picture story demonstrates this idea: People decide goals, **permission**s, review points, and **consequence**s.

Use a fresh example to explain **boundary**.

Trace a new **input** → **process** → **output** example.

Find and repair the error in: The model decides the goal and acceptable **consequence**s.

Invent one edge case and name the safe response.

PARTNER CHECK Point to the **evidence**. Do not accept an answer that only repeats the vocabulary word.

A closer explanation

> **Use the original unchanged exhibition story. Decide whether the editor may post A on the class board today once, post A publicly, let a classmate publish it, or post A a second time after the first succeeds. For each, name the relevant part of the approval. Explain why correct wording is not sufficient for all four actions**

Practise with less help: Read an approval without enlarging it

Check your reasoning

Explain the picture

> **My explanation using a pictured step and the given facts**

MAIN LESSON · SECTION 9

Investigate a helper with explicit review gates

> Give the reviewer concrete evidence and a real choice to correct or stop.

The fictional role and item cards

Paper review map for a fictional classroom helper: the teacher authorises suggestions for the storage bin of ordinary unowned craft scraps using only the supplied item cards. The helper may not move objects, discard anything, identify owners or post records. For a card with

unclear material, it must show its evidence and ask the teacher. Card S1 says “plain paper offcut, unowned”; S2 says “notebook with a person’s name”; S3 says “material unknown”. No real item or personal data is needed.

Predict, map and inspect each proposed action

1. Predict a response for each card. Draw where information enters, where a suggestion is made and where the teacher can inspect evidence, override the suggestion or stop the process. Compare a bin suggestion for S1 with proposals to discard S2 or identify its owner. For S3, write a review request stating what is unknown. Record the actor and action allowed; keep all actions on paper and do not treat a suggestion as a completed movement or disposal.

2. Keep a normal case and an edge case clearly separated.

3. Record what happened—even when it does not match your **prediction**.

4. Explain the result, one limitation, and the next useful test.

Keep a record of scope and uncertainty

Case	Prediction	Observed result	What it means
Normal			
Edge			

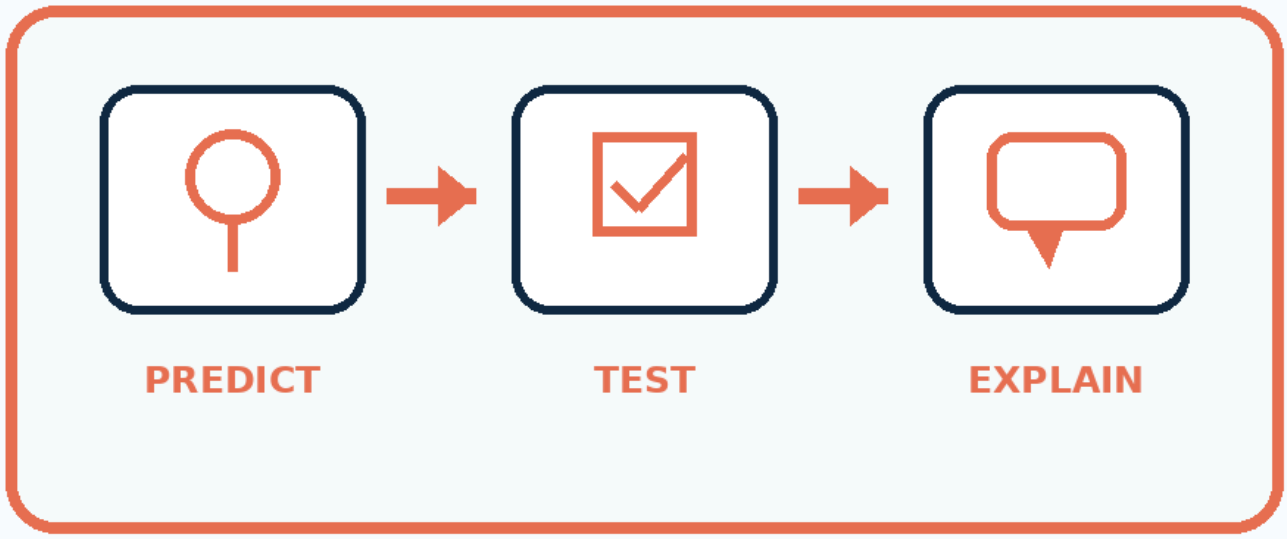

Before trying: what do I expect, and why? While trying: which step could first go wrong? Afterwards: what did I actually observe, and what should change? Keep “not run” if you only traced the procedure.

▼ Earlier wording, alternatives and picture transcripts

EXPLORER LAB

Permission and Review Map

Predict first, test honestly, and explain what the **evidence** means.

State your **prediction** before the result is known.

Complete the task: Add adult-**review gate**s to a classroom helper.

INDEPENDENCE After support is removed, repeat the proof with a fresh case.

Plan → try → check

MAIN LESSON · SECTION 14

Try alone: transfer the check to Jo’s library task

> Assess each proposal independently against the same recorded permission.

The independent permission and four proposals

In a fictional library, the librarian controls the internal shelf list. The librarian tells assistant Jo: “Replace the internal list with checked version L2 on Friday, once.

Do not change the public catalogue." It is Friday, L2 remains checked, and no replacement has occurred. A tool offers both destinations.

Assess these proposals separately: Jo replaces the internal list with L2; Jo updates the public catalogue with L2; visitor Sam replaces the internal list with L2; Jo replaces the internal list with a changed L3.

Identify the approval detail that settles each case.

Keep your first attempt

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

Your teacher has the independent answer and scoring criteria. Complete the matching workbook week to keep your practice **evidence** together.

Use feedback afterwards

Attempt the independent case before hints. Record whether you worked alone, used a hint or followed a model. After feedback, fix the first unsupported step and explain why it changed.

A later check uses a changed case, not a copied answer.

▼ Earlier wording, alternatives and picture transcripts

Independent case: Transfer the permission check to a new case

> **My independent explanation, trace and limits**
>
> _____
>
> _____
>
> _____
>
> _____

Week 28 Independent application

Close the worked explanation. Apply the idea to this different question without copying.

A sorter marks a child's notebook throw away. Who should decide whether it is discarded? Name a **boundary** the system should enforce.

My answer, with a trace, calculation or supporting **evidence**

> **Write or draw your reasoning and evidence.**

Create and test

Change one relevant detail. Predict the result before testing. Include a **boundary** or missing-information case when it helps reveal a limit.

My changed **input** and expected result

> **Write or draw your reasoning and evidence.**

Connect to your project

Complete the sorter's human-control map: **permission**s, review triggers, override, correction, and stop conditions.

The **evidence** I will keep

> **Write or draw your reasoning and evidence.**

Transfer practice from the original programme

A classroom assistant may draft a reminder but cannot send messages. It displays a completed draft and waits. A student writes 'looks good' without a destination. Has a clear send authorisation been given?

Specify what is needed.

> **Explain the mechanism, evidence and one limit.**

Use feedback to improve

MAIN LESSON · SECTION 11

Complete the sorter’s human-control map

> Name who can approve, correct, override and stop each action.

This week’s project decision

THIS WEEK'S CHECKPOINT Complete the sorter's human-control map: **permission**s, review triggers, override, correction, and stop conditions.

Record sorter actions allowed automatically and actions requiring the classroom owner’s explicit review.

Plan the review and action boundaries

- What real classroom need does this serve?

- What information is necessary—and what should stay private?
- What happens inside the **process**?
- What normal and edge cases will you test?
- When should it say not sure or ask a person?

Make human review meaningful

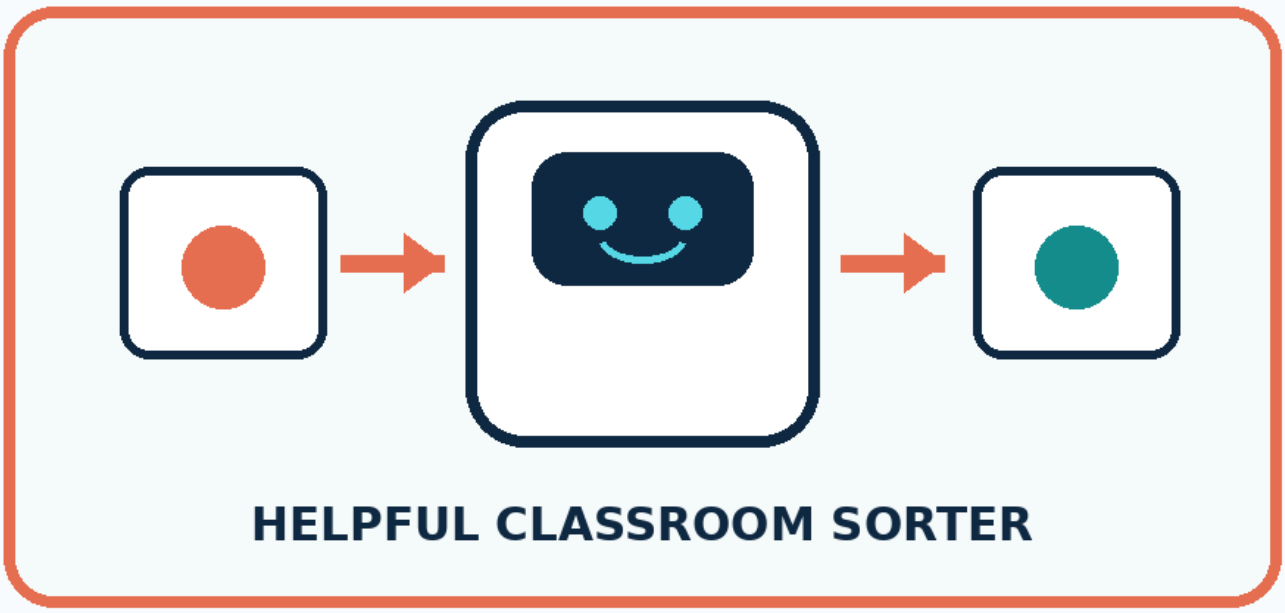

RESPONSIBLE DESIGN A human in the room is not meaningful oversight if the person cannot understand or change the outcome.

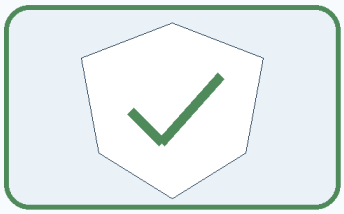

▼ **Earlier wording, alternatives and picture transcripts**

PROJECT

Helpful Classroom Sorter

Build one coherent system across the year, one **evidence**-based decision at a time.

My project decision:

Evidence for your project

MAIN LESSON · SECTION 16

Finish: name the permission detail that decides

> Close your notes and distinguish an allowed action from a proposed change.

Your exit explanation

- Close your notes. Explain this goal in your own words: Distinguish a system's **capability**, the correctness of its **output** and **permission** to take an action

My deciding step, evidence and one remaining question

Choose a changed-case check

If you are unsure, return to the worked picture and explain one arrow. If you are ready, change an **input** or assumption and justify your **prediction**.

Save your workbook **evidence**. At the next review, try a different case before opening your old answer.

Reference bank and extra practice

Choose the reference that helps your next step.

▼ **Your quick word guide**

REFERENCE · SECTION 5

Your quick word guide

> Use the words to explain a particular step, record or limit.

Core vocabulary

Word	Meaning	My example
boundary	limit on what a system may do	
permission	authorized access or action	
review gate	point requiring human approval	
consequence	result experienced after a decision	

Terms for the connected explanation

Word	Meaning
Capability	What a person or system is able to do
Authority	Responsibility and power to make a specified decision
Scope	The boundaries of what a permission covers

Word	Meaning
Approval record	A note of who approved which action and under what conditions

Repair a claim using a word

- CLAIM TO REPAIR Human review makes every system safe.
- Use one vocabulary word and one piece of **evidence** to repair it:

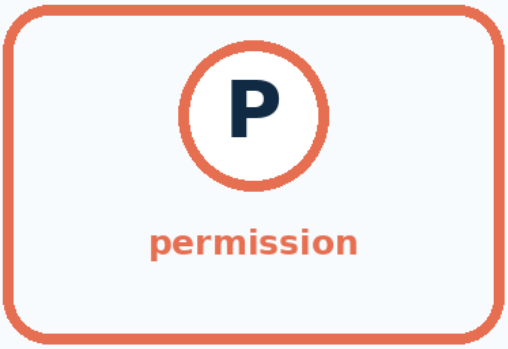

▼ Earlier wording, alternatives and picture transcripts

VOCABULARY

Words You Can See and Use

The badge is a memory cue; the definition does the real thinking work.

Misconception detective

WORD POWER A strong definition helps you decide something in a new case.

Words used in the closer explanation

▼ Choose a stronger thinking challenge

REFERENCE · SECTION 10

Choose a stronger thinking challenge

> Choose the next useful challenge rather than treating the whole ladder as compulsory.

Pick your next step

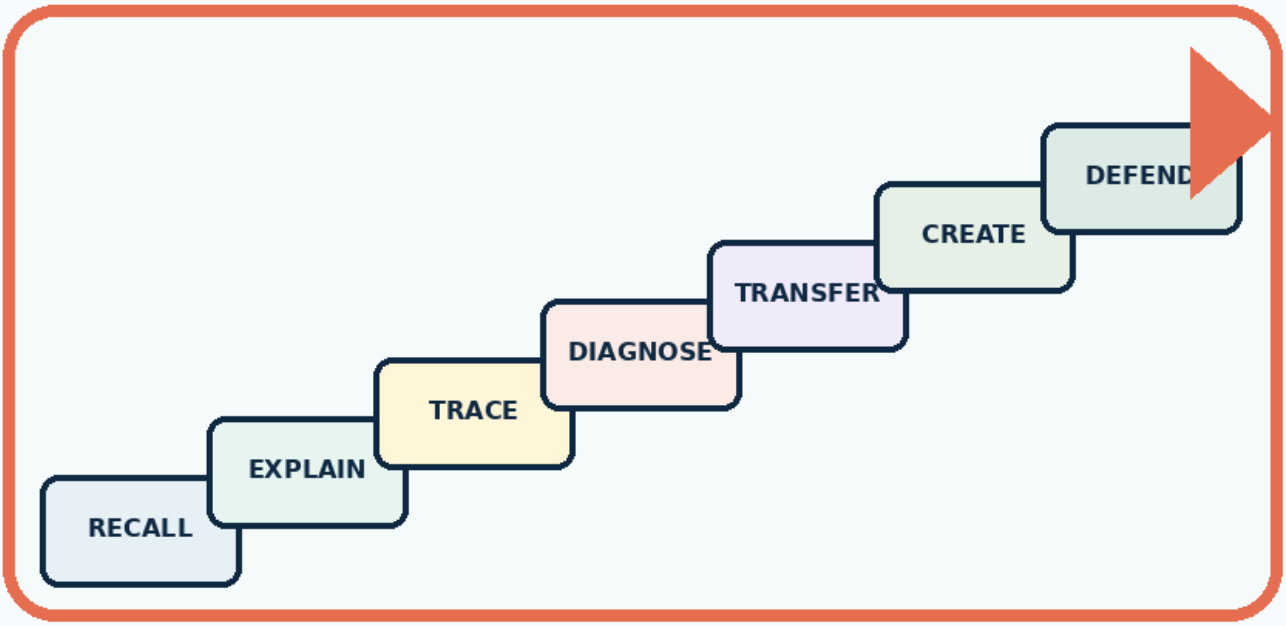

- RECALL Define **boundary**.
- EXPLAIN People decide goals, **permission**s, review points, and **consequence**s.
- TRACE Show the **input**, **process**, and **output**.
- DIAGNOSE Repair: Human review makes every system safe.
- TRANSFER Apply the idea to a new home or classroom case.
- CREATE Design one revealing test.
- DEFEND Give a claim, **evidence**, **mechanism**, limit, and safe action.

▼ Earlier wording, alternatives and picture transcripts

PRACTICE LADDER

Climb from Recall to Defense

Each step asks for a stronger kind of understanding.

RETRY RULE A coached answer becomes mastery only after you solve a different case independently.

▼ **Reference: check your explanation**

REFERENCE · SECTION 12

Reference: check your explanation

> Use after practice. Transfer the permission check to a new case is the selected independent case.

Check the evidence and its limit

- ☐ Name or draw the fresh case.
- ☐ Trace **input**, **process**, and **output**.

- ☐ State the conclusion and strongest **evidence**.
- ☐ Name one limit, failure, missing clue, or fairness/privacy concern.
- ☐ Explain one safe next action or improvement.

Record support

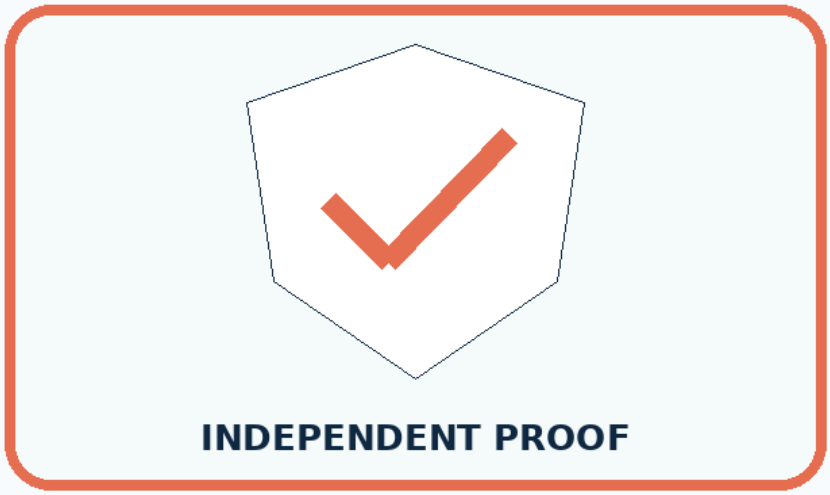

My level: ☐ Not yet ☐ With one hint ☐ Independently ☐ I can teach it

▼ Earlier wording, alternatives and picture transcripts

MASTERY

Checklist for explaining this week's idea

Use after practice. Transfer the permission check to a new case is the selected independent case.

EXPLANATION CHECK Match the proposed actor, action, version, destination, time and remaining use to the actual approval.

Independent **evidence**:

SELF-CHECK Mark where data enters, where the system predicts, where a person reviews, and who may act. Give reviewers the **evidence** and power to correct or stop the **process**.

High-**consequence** cases should not pass automatically.

NEXT BRIDGE Carry today's **evidence** habit into: Find a Real Problem.

▼ **Extra practice: A suggestion must stop at the approval gate**

REFERENCE · SECTION 13

Extra practice: A suggestion must stop at the approval gate

> Try the question before opening its worked explanation.

Read the supplied case and question

An assistant may suggest object locations; a teacher must approve moving valuable equipment.

What may happen without approval?

Your explanation

- Which detail supports the answer, and why does it matter?

Write or draw your reasoning and evidence.

▼ Check after trying

It may suggest a location within its role. Moving equipment requires actual teacher approval.

Evidence or stage	Value or result
Assistant	Suggest equipment location
Teacher	Review and decide
Approval	Explicit permission to move
Action	Move only after approval

▼ Earlier wording, alternatives and picture transcripts

Week 28 Worked case

Use the supplied details to practise the weekly concept before attempting the independent question. This case extends the illustrated lesson.

The situation

The question

Worked explanation

Explain it in your own words

Trace the supplied case visually

A suggestion must stop at the approval gate

An assistant may suggest object locations; a teacher must approve moving valuable equipment.

What may happen without approval?

It may suggest a location within its role. Moving equipment requires actual teacher approval.

▼ Reference: original lesson checklist

REFERENCE · SECTION 15

Reference: original lesson checklist

> Use an additional checklist when it helps inspect your explanation.

Targets and evidence

By the end, I can	How I will show it
Distinguish a system's capability, the correctness of its output and permission to take an action	Explain the deciding step, show a trace or test, and state one limit.
Match an action to the person, version, audience and limits covered by an approval	Explain the deciding step, show a trace or test, and state one limit.
Explain when to proceed within an existing permission and when a changed action needs review	Explain the deciding step, show a trace or test, and state one limit.

Keep your route and first prediction

Remember → watch and explain → try with help → investigate → try independently → keep project **evidence**. Your teacher may spread this lesson across several classes.

Keep your first **prediction**. Compare it with what the **evidence** shows and explain any change.

▼ Earlier wording, alternatives and picture transcripts

Start with this question: A fictional teacher approves one checked classroom poster for internal display.

▼ Extra practice: pictures, repair and feedback

REFERENCE · SECTION 17

Extra practice: pictures, repair and feedback

> Attempt each question before opening its explanation. Use one browser or paper copy.

First supported question

- A fictional teacher approves one checked classroom poster for internal display.
- Which labelled step matches this detail? Public-web publication exceeds the approved destination.
- 1. Allowed action
- 2. Changed audience
- 3. Read **authority**
- 4. Changed version
- Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

Practice 1: explain the deciding evidence

My selected conclusion, deciding fact and explanation

▼ **Check the first explanation**

After your attempt, compare with the supported explanation: Changed audience Public-web publication exceeds the approved destination. A general intention to help the class does not grant every action that might help.

Check the version, destination and time explicitly. An edit may improve accuracy while still changing the approved artifact.

The assistant should hold the changed poster for review rather than treating its own confidence as **permission**.

Changed-case question

- Changed-case practice: P2 has already been published once under this approval. Which conclusion is supported by the supplied facts?
- 1. We can decide the result without examining the changed **input** or the procedure.
- 2. A second publication is not covered.
- 3. This one example guarantees correct results for every future **input**.
- Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

Practice 2: explain the deciding evidence

> **My selected conclusion, deciding fact and explanation**

▼ **Check the changed case**

After your attempt, compare with the supported explanation: A second publication is not covered. The instruction allowed a single use, not repeated actions.

Repair and save your work

Review Verify Important **Output**s (ai-1/27). Goal: Separate an answer into claims and connect each claim to relevant **evidence**.

Short practice: Correct the draft and identify which part needs another source rather than a calculation.. Return to this week and explain what you changed.

Review Generate, Retrieve, or Calculate? (ai-1/25). Goal: Distinguish retrieving a record, calculating from **input**s and generating wording. Short practice: Label each arrow with its operation.

Can the system add snacks because invitations often mention them?. Return to this week and explain what you changed.

Review Missing and Unbalanced Examples (ai-1/22). Goal: Name the target collection, selection list and cases actually assessed. Short practice: Would testing only dim plain cards close every current gap?

Point to the target groups.. Return to this week and explain what you changed.

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run **evidence**. Open the HTML copy to read or print it.

Drafts stay in this browser when storage is available; clear drafts on a shared device.

▼ Earlier wording, alternatives and picture transcripts

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

Repair a missing building block

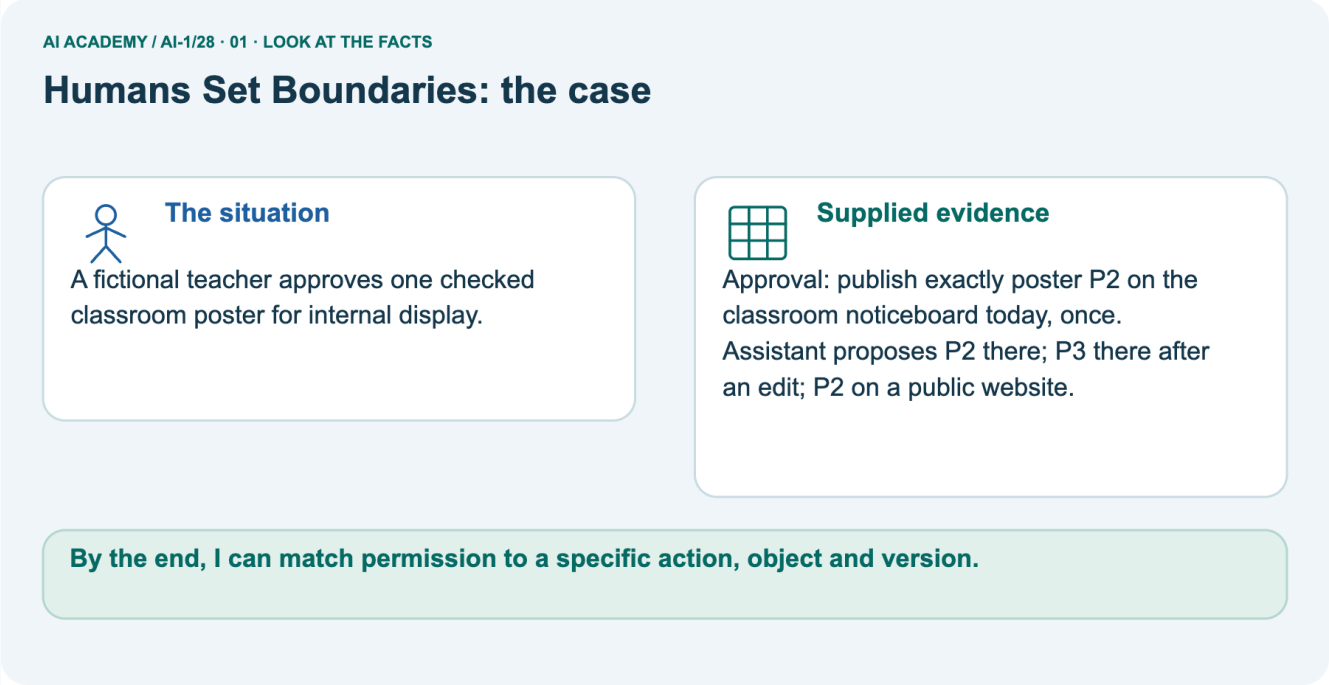

Keep your completed work

▼ Reference: the six-picture journey

Reference: the six-picture journey

> Revisit the picture that serves the current question; key diagrams already sit beside the main explanation.

01. Humans Set Boundaries: the case

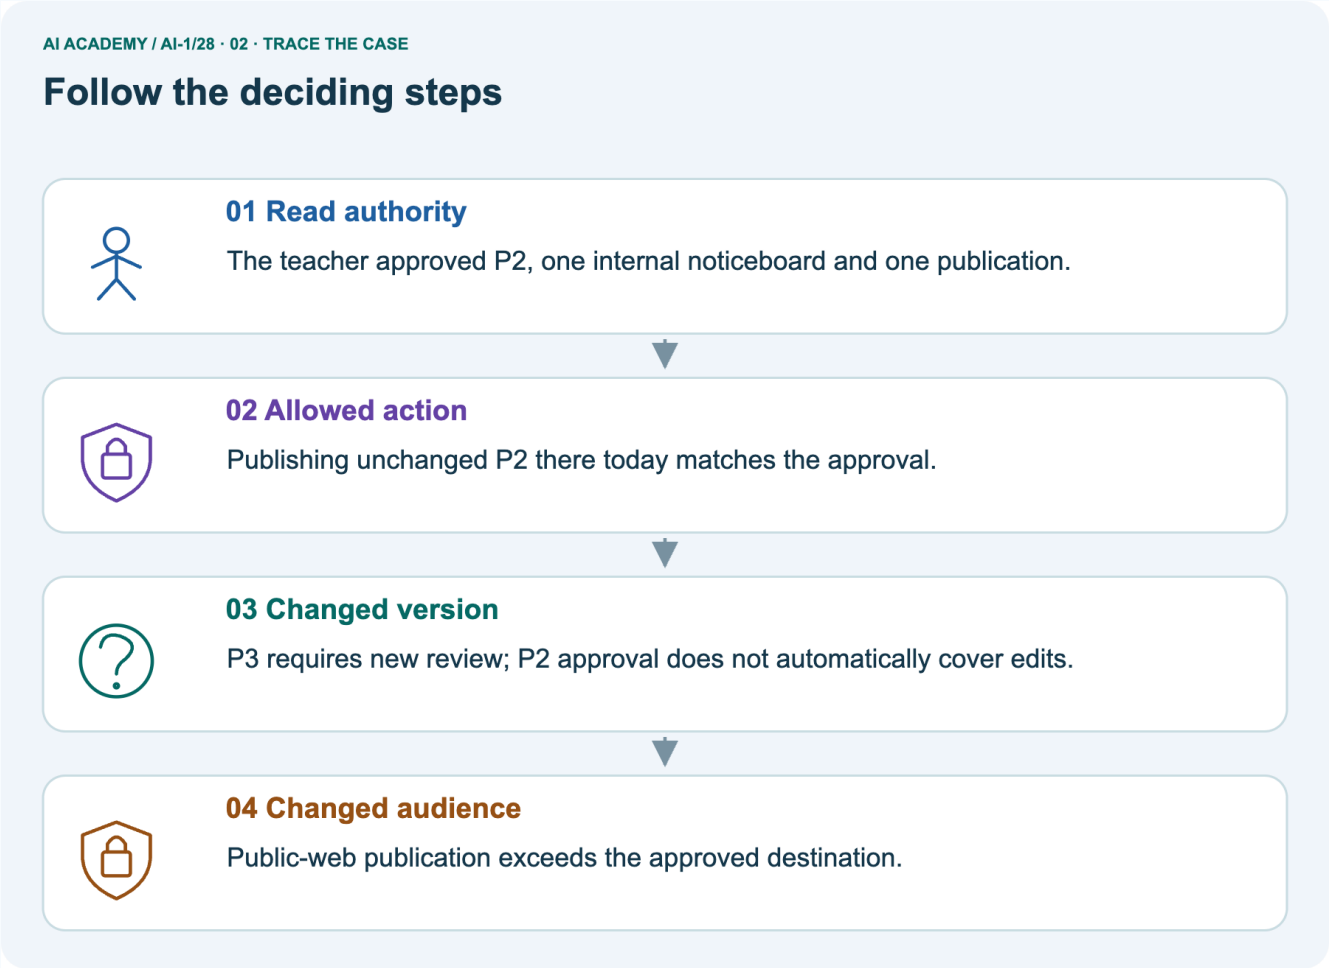

Follow the labelled picture with the matching explanation. Open the vector diagram

A fictional teacher approves one checked classroom poster for internal display. Supplied facts: Approval: publish exactly poster P2 on the classroom noticeboard today, once.

Assistant proposes P2 there; P3 there after an edit; P2 on a public website.

Point to the given fact that matters most. Explain why it matters.

02. Follow the deciding steps

Follow the labelled picture with the matching explanation. Open the vector diagram

Read **authority**: The teacher approved P2, one internal noticeboard and one publication. → Allowed action: Publishing unchanged P2 there today matches the approval. → Changed version: P3 requires new review; P2 approval does not automatically cover edits. → Changed audience: Public-web publication exceeds the approved destination.

Point to each numbered stage and explain which recorded **input** it uses.

03. Match the proposed action to its permission

AI ACADEMY / AI-1/28 · 03 · INSPECT THE LESSON MODEL

Match the proposed action to its permission

Proposed action	Check against approval	Decision
Version A on class board	Today, once, by editor	Within scope
Version A on public site	Public posting excluded	Outside scope
Changed version B	Only A was approved	Review changed version
Post A a second time	Once has been used	Outside scope

Each decision uses the approval in this story. An unchanged, unused permission can be acted on without requesting it again.

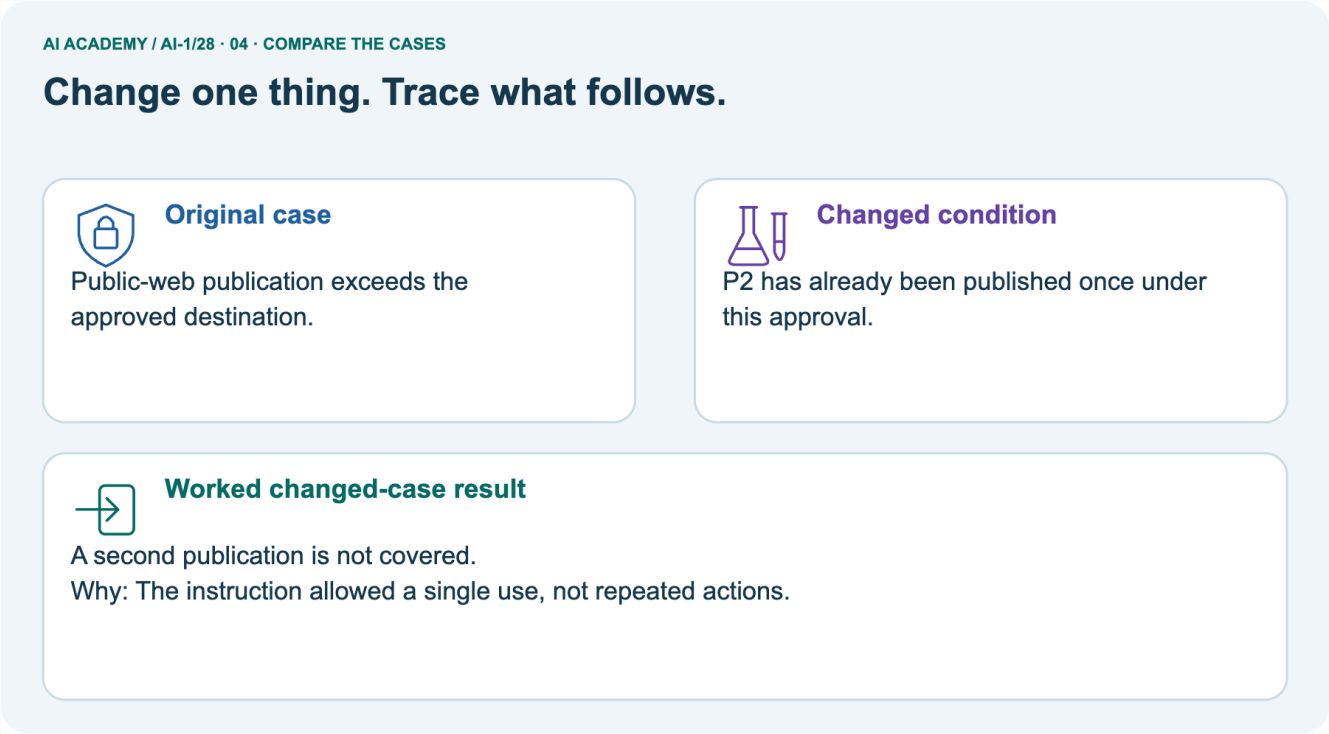

Follow the labelled picture with the matching explanation. Open the vector diagram

Match the proposed action to its **permission**. Version A on class board | Today, once, by editor | Within **scope**. Version A on public site | Public posting excluded | Outside **scope**.

Changed version B | Only A was approved | Review changed version. Post A a second time | Once has been used | Outside **scope**

Read the labels and values. Explain the relationship the model shows.

04. Change one thing. Trace what follows.

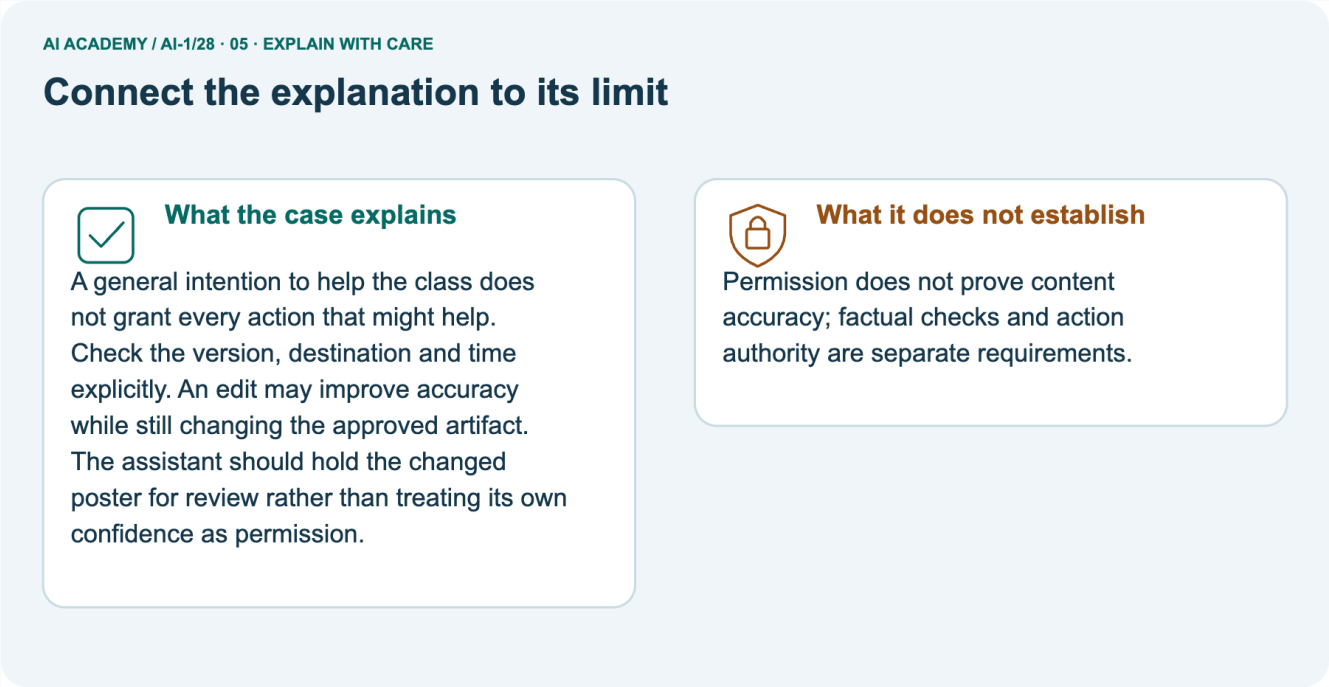

Follow the labelled picture with the matching explanation. Open the vector diagram

Original case: Public-web publication exceeds the approved destination. Changed condition: P2 has already been published once under this approval. Expected result: A second publication is not covered.

Reason: The instruction allowed a single use, not repeated actions.

Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude.

05. Connect the explanation to its limit

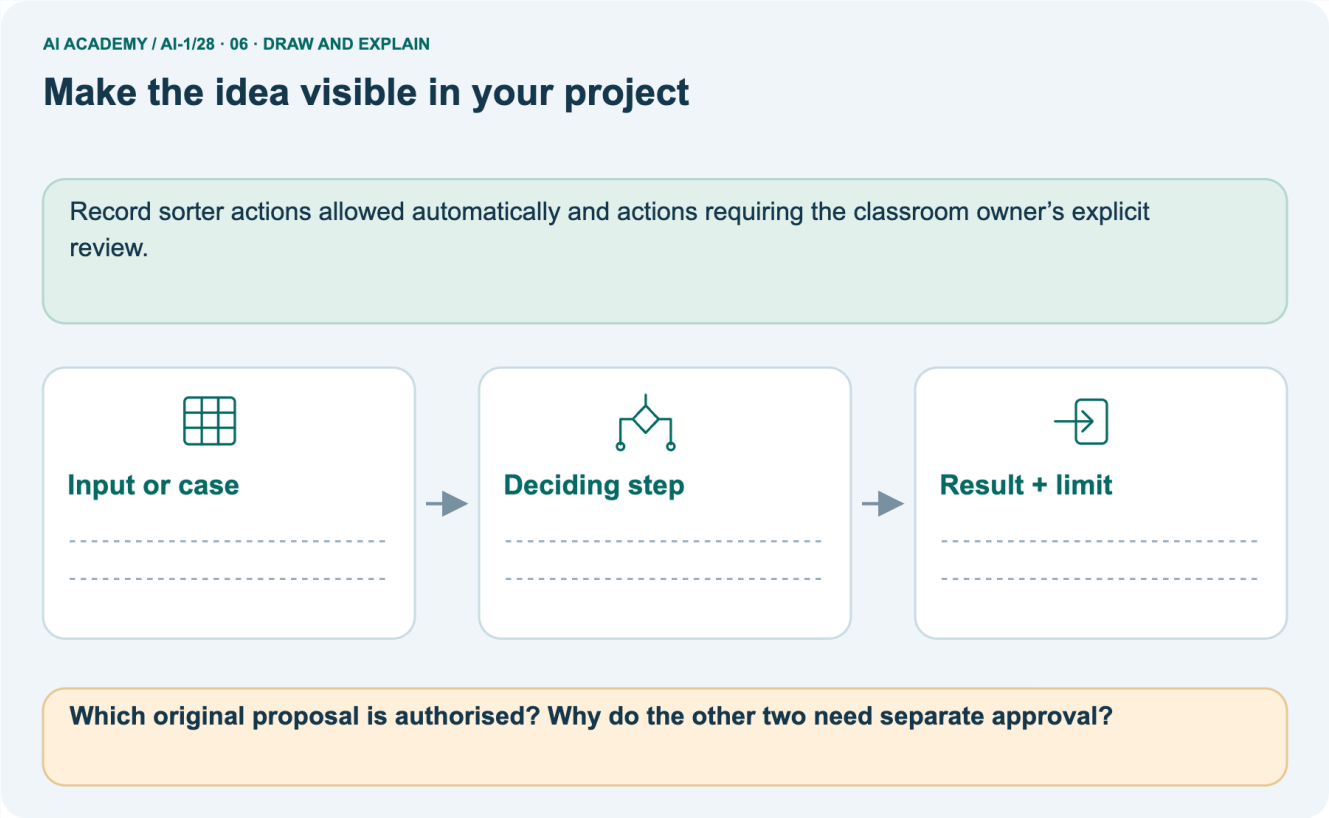

Follow the labelled picture with the matching explanation. Open the vector diagram

A general intention to help the class does not grant every action that might help. Check the version, destination and time explicitly. An edit may improve accuracy while still changing the approved artifact.

The assistant should hold the changed poster for review rather than treating its own confidence as **permission**. Limit: **Permission** does not prove content accuracy; factual checks and action **authority** are separate requirements.

Explain the case, then point to a limit on the claim.

06. Make the idea visible in your project

Follow the labelled picture with the matching explanation. Open the vector diagram

Record sorter actions allowed automatically and actions requiring the classroom owner's explicit review. Draw your **input**, deciding step, result and limit. Supported question: Which original proposal is authorised?

Why do the other two need separate approval?

Draw your project trace and justify the deciding step using **evidence**.
