Evidence and Sources

Learn to understand, design, build, test and explain AI systems responsibly.

Project: Transparent Book Recommender

THE CONNECTED WEEK

Inspect the claim. Read the passage. Report the support.

Distinguish citation presence, link resolution, exact cited support and unresolved truth.

Keep one habit: Claim → citation ID → passage → supported/conflicting/unverified → scoped correction.

MAIN LESSON · SECTION 1

Does the cited record support this exact claim?

> Separate citation presence, link validity and claim support.

Your learning goals

I can explain the **mechanism** and terminology of **claim** support and citation evaluation.

I can apply the stated procedure to a new case with a traceable result.

I can identify an assumption or limitation and design a revealing follow-up.

Recall evidence and evaluation

- Close your notes first. A rough first answer helps us choose the right starting point; it is not a score for your ability.

- Recall Prompt Experiments: a **claim** needs the **evidence** and conditions that support it. This week, inspect each cited passage rather than judging an answer by its fluent wording or number of links.

Your end goal

By the end, I can separate citation presence, **link validity** and support for an exact **claim**.

▼ Earlier wording, alternatives and picture transcripts

Your learning target

Remember before reading

Without opening the old lesson, explain one key idea from Prompt Experiments. Give an example and a mistake that the idea helps you avoid.

Without opening the old lesson, explain one key idea from Image and Voice Pipelines. Give an example and a mistake that the idea helps you avoid.

Without opening the old lesson, explain one key idea from Recommendation Scores. Give an example and a mistake that the idea helps you avoid.

After trying, check the relevant lesson or ask your teacher. Change the part of your explanation that the **evidence** shows was wrong.

Week 29: **Evidence** and **Source**s

Claims require **source**s matched to the question and checked **independent**ly.

THINKER MISSION

Verify a generated answer using two suitable **source**s.

Thinker name and date:

> **Write or draw your reasoning and evidence.**

Readiness for the connected explanation

This week’s end goal

MAIN LESSON · SECTION 2

A real link can still support the wrong claim

> Read the record, identify its scope and check each statement.

The claim-support contract

Citation evaluation checks **source** existence, exact passage support and coverage of answer **claim**s. A real citation can still be irrelevant.

Use supplied records without inventing missing evidence

Begin by writing the question the procedure is intended to answer. Identify the information already supplied, the information it will produce and the information still missing.

These are constructed classroom examples; they do not require live accounts, private records or an external service. Do not treat a plausible explanation as a measured outcome.

▼ **Earlier wording, alternatives and picture transcripts**

PICTURE STORY

Notice → Predict → Explain

Begin with visible **evidence**. Do not explain more than the picture and information support.

MYSTERY

The learners must use **evidence** and **source**s to solve a problem. What information do they have? What decision or calculation do they make? What would count as **evidence** that it worked?

Three **observation**s (what you can point to):

> **Write or draw your reasoning and evidence.**

My **prediction** and the clue supporting it:

> **Write or draw your reasoning and evidence.**

A closer explanation

MAIN LESSON · SECTION 3

Trace four claims through three separate checks

> Each metric needs its own denominator.

Define support under the classroom rubric

For this classroom rubric count a **claim** as supported only when its cited passage entails it. Separately count correct citation links. Use the number of factual **claim**s as the support denominator.

Read the complete four-claim audit

Four-claim classroom audit	Supplied outcome
C1	Citation exists; passage supports claim

Four-claim classroom audit	Supplied outcome
C2	Citation exists; passage supports claim
C3	Citation exists; passage does not support claim
C4	No citation; not supported by a cited passage

Keep claims and links as different counting units

Before applying the procedure, write its units, denominator or decision boundary where relevant. A partner should be able to repeat each step using the same **input**s.

If a required **input** is absent or violates the stated contract, record that condition explicitly instead of quietly replacing it with a convenient value.

Explain the visual evidence

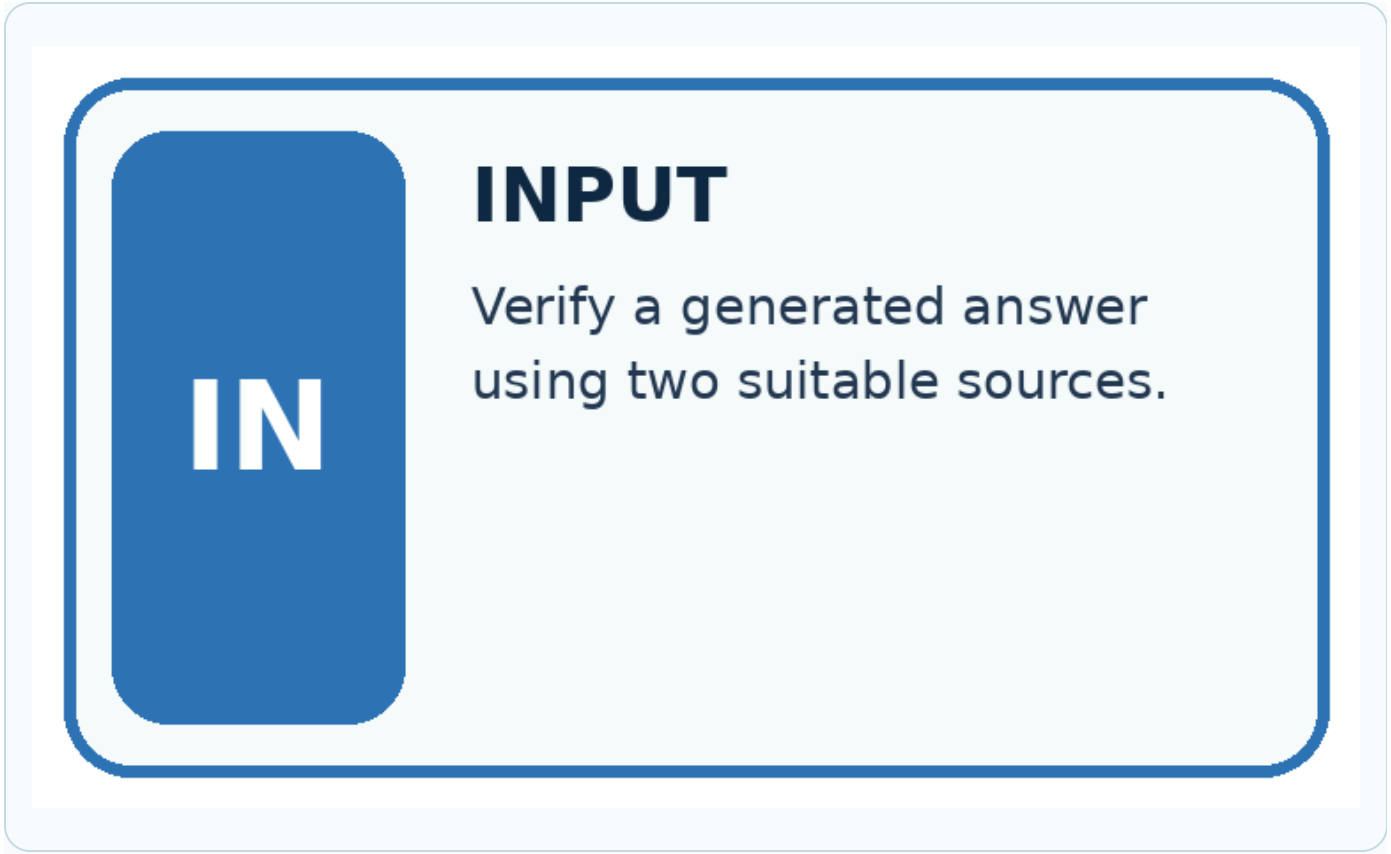

- Point to the **input**, the deciding step and the result in this week's visual. Explain the same step in ordinary words. A picture helps when you can say what each part represents.

▼ Earlier wording, alternatives and picture transcripts

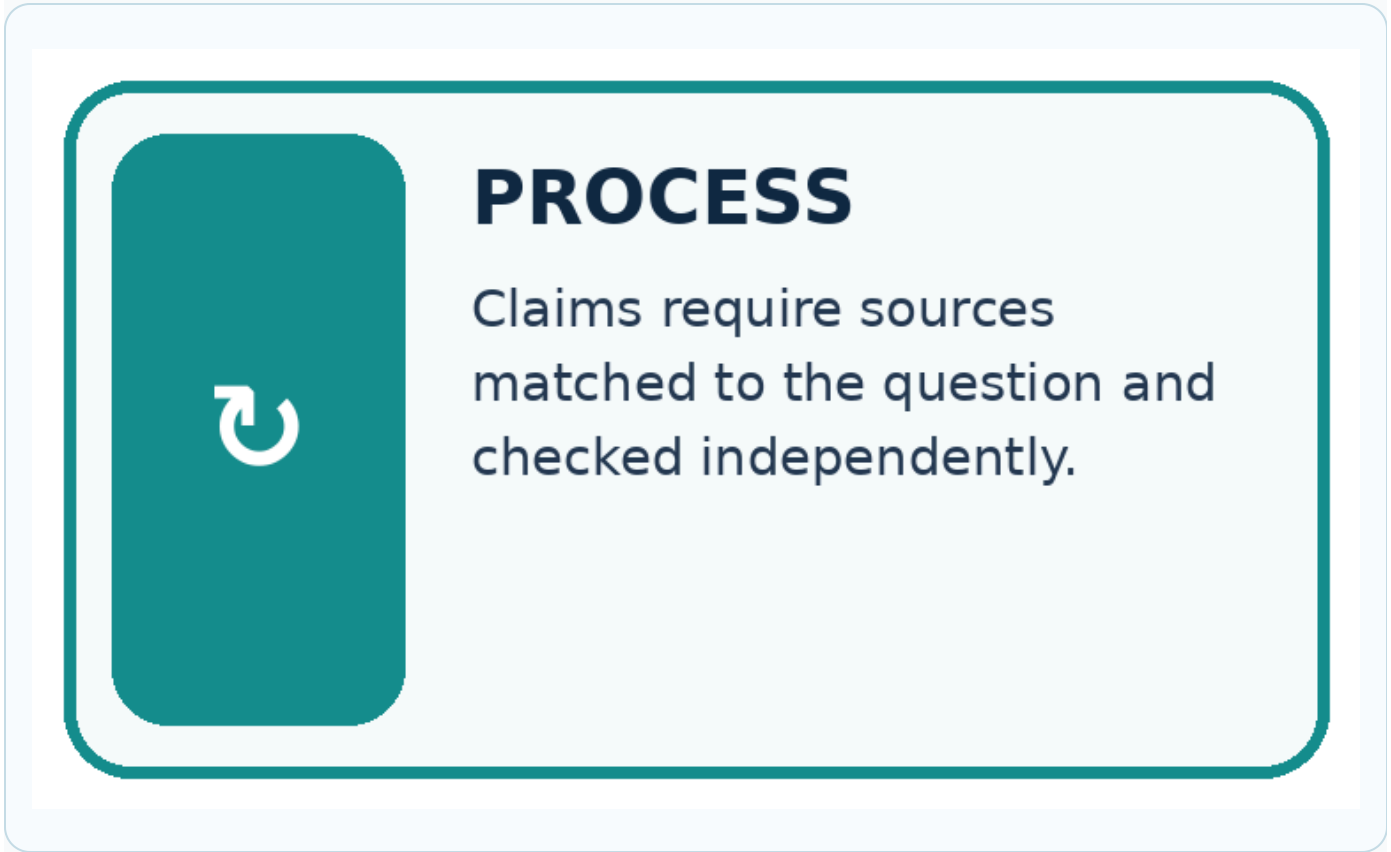

VISUAL **MECHANISM**

Input → **Process** → **Output**

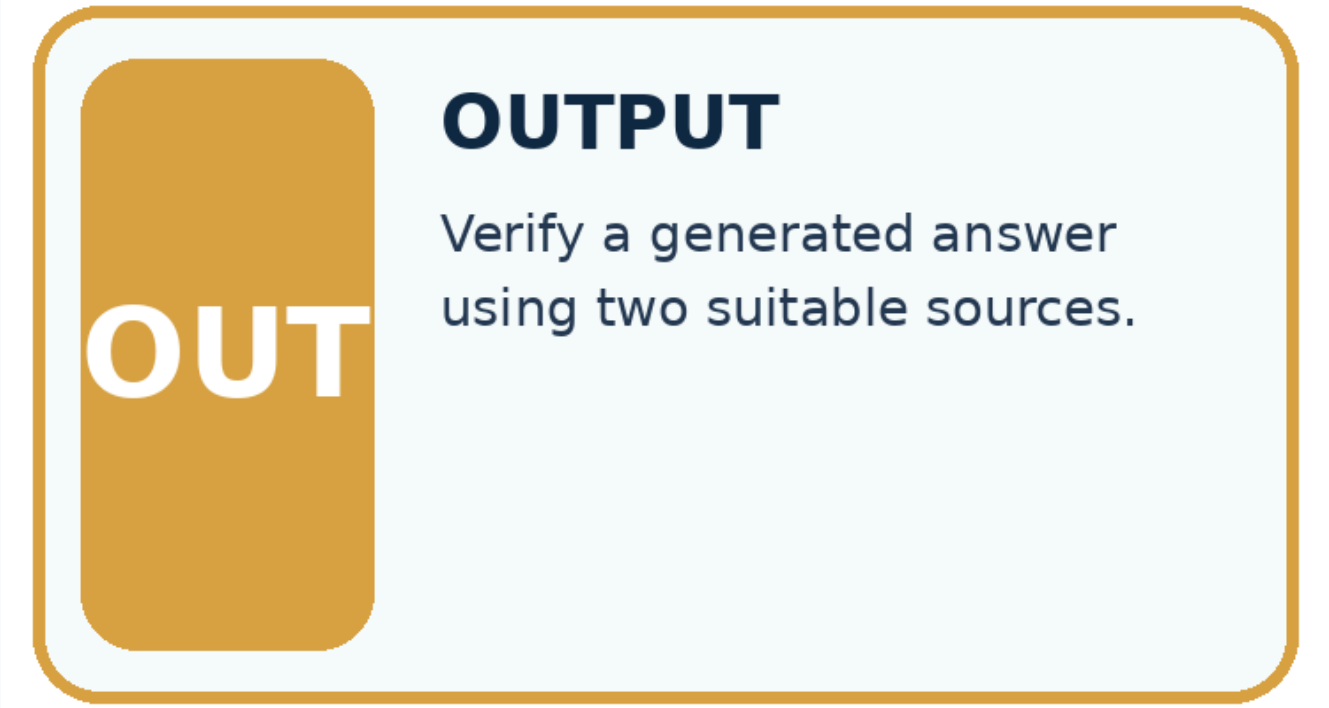

Trace the information. At each stage, ask what changed and how you could test it.

IN
INPUT
Verify a generated answer using two suitable sources.

↓

↻
PROCESS
Claims require sources matched to the question and checked independently.

↓

Which stage could fail even when the other two are correct? Explain:

Write or draw your reasoning and evidence.

A closer explanation

Claim support and citation evaluation — evidence trace

INPUT AND SCOPE

An answer has four factual claims. Three have citations, but only two are supported by their cited passages. All links exist.

CHECK OR CALCULATION

For this classroom rubric count a claim as supported only when its cited passage entails it.

CONCLUSION AND LIMIT

Claim support is 2/4=50%; citation presence is 3/4=75%; link existence among three citations is 3/3. These measure different failures.

The figure connects this chapter's worked input, declared procedure and result. Read the complete worked reasoning for qualifiers and intermediate steps; the abbreviated labels do not replace that reasoning.

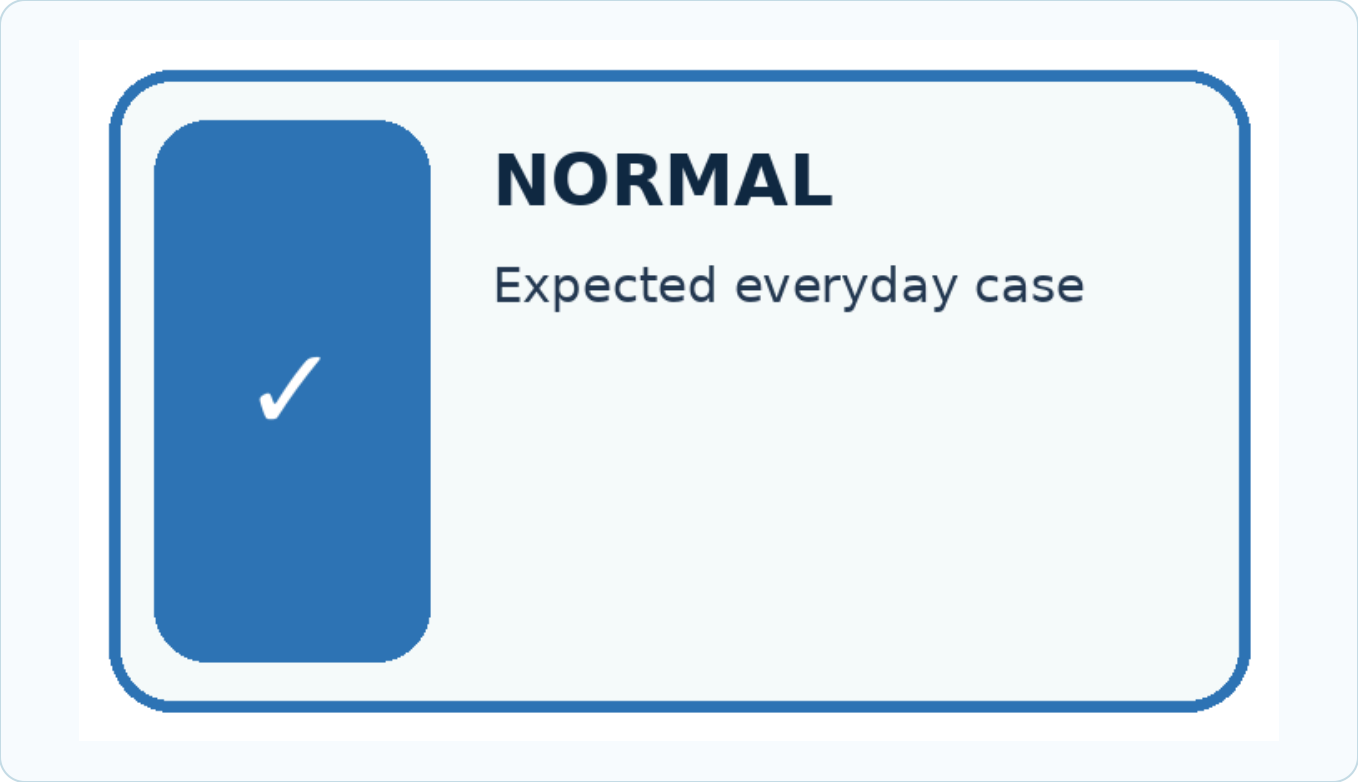

Connect the picture and the explanation

MAIN LESSON · SECTION 4

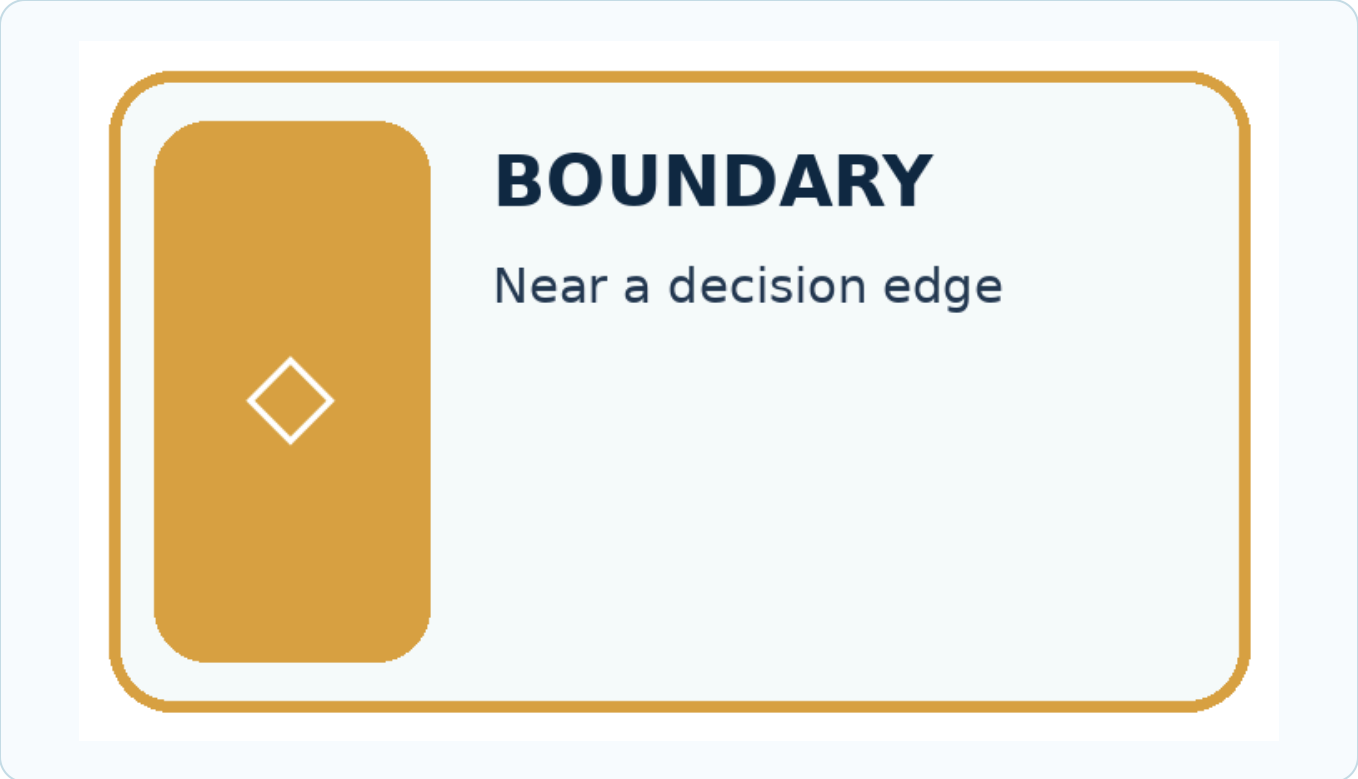

Compare evidence that supports, conflicts or is missing

> A citation label is a pointer to inspect, not a guarantee.

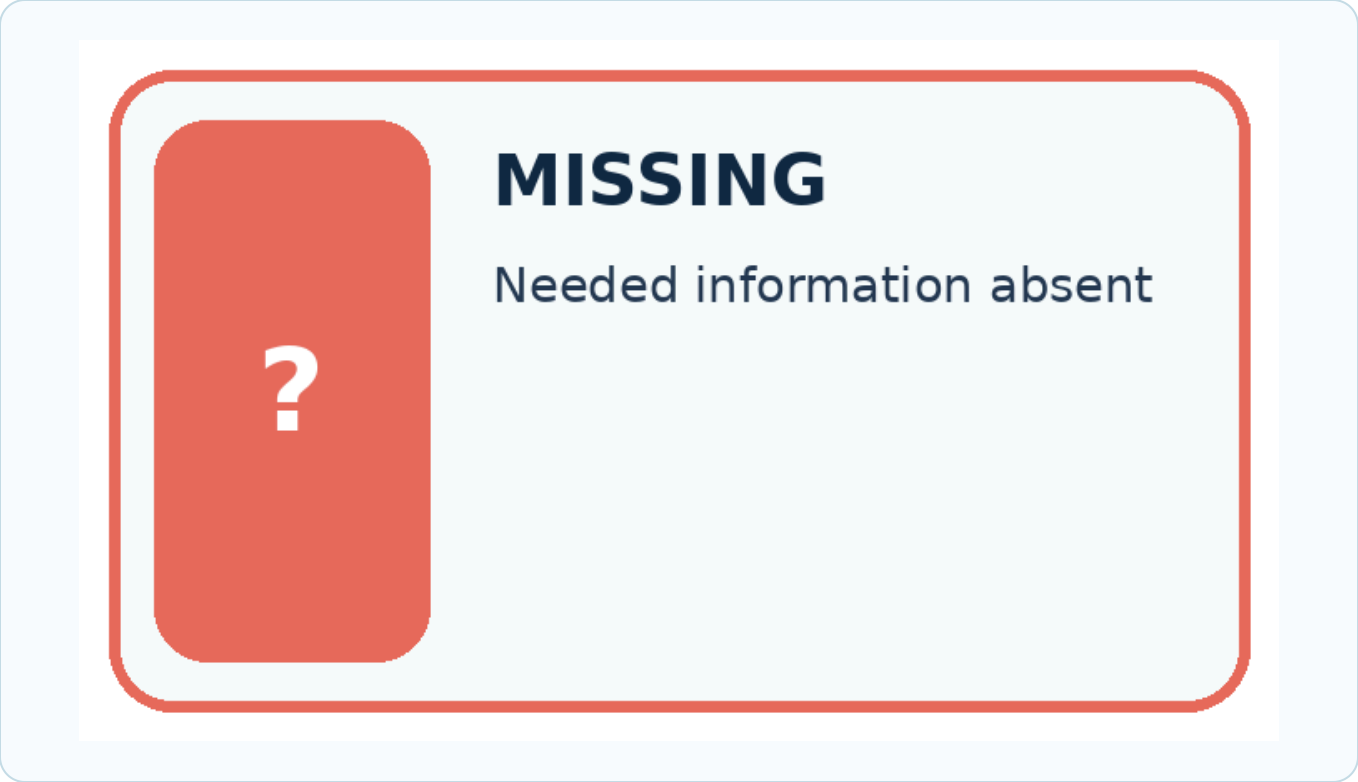

Four pictures with a purpose

Normal case: predict the result and deciding evidence.

Boundary case: identify the exact limit.

Missing information: name what must be clarified.

Transfer case: explain which procedure still applies.

Choose a revealing case

- Which case is most likely to reveal a hidden assumption? Why?

> **Write or draw your reasoning and evidence.**

Predict the supplied changed case

- Change: Change the third **claim** to “the record does not assess suitability”.

▼ Check after predicting

Prediction: That statement accurately describes the supplied record’s limits.

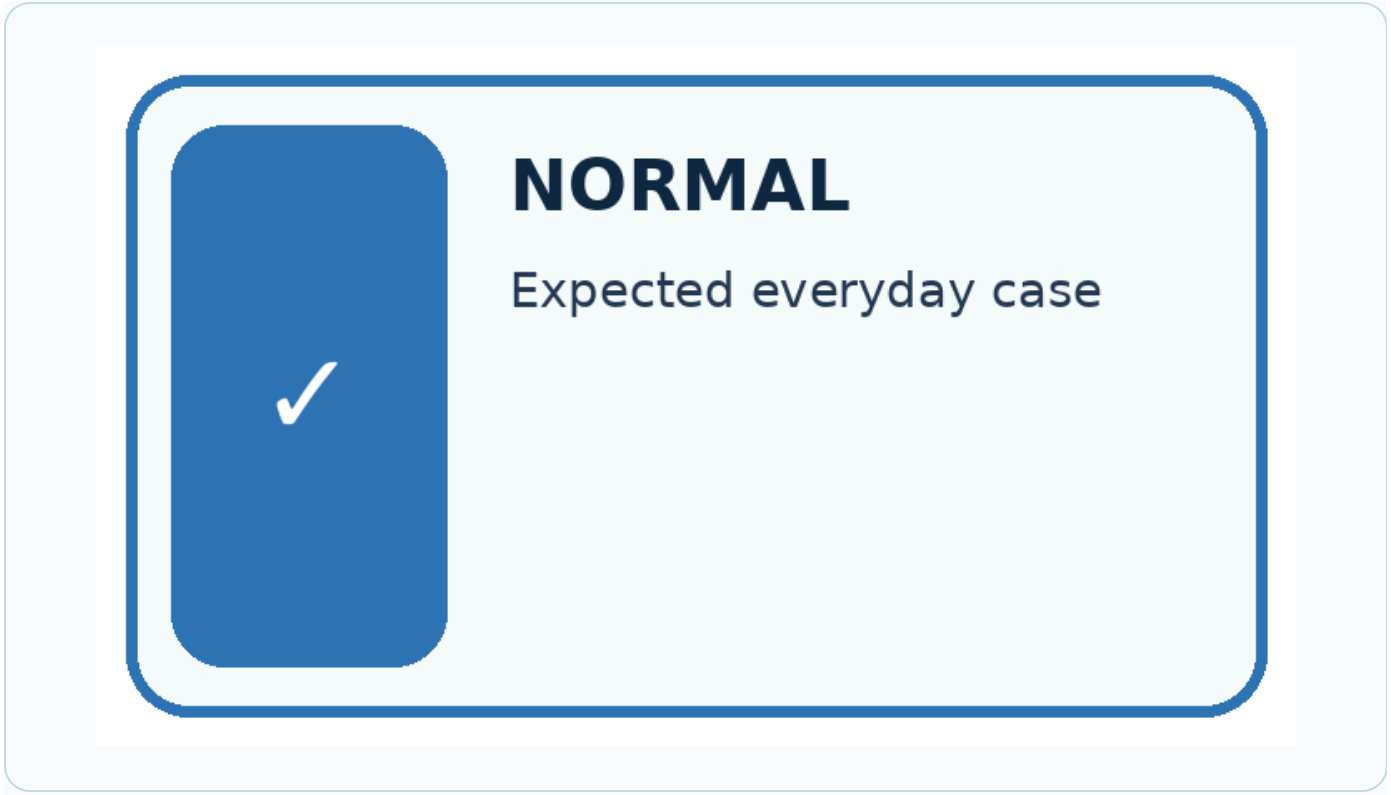

Reason: R gives pages and shelf only; it contains no suitability assessment.

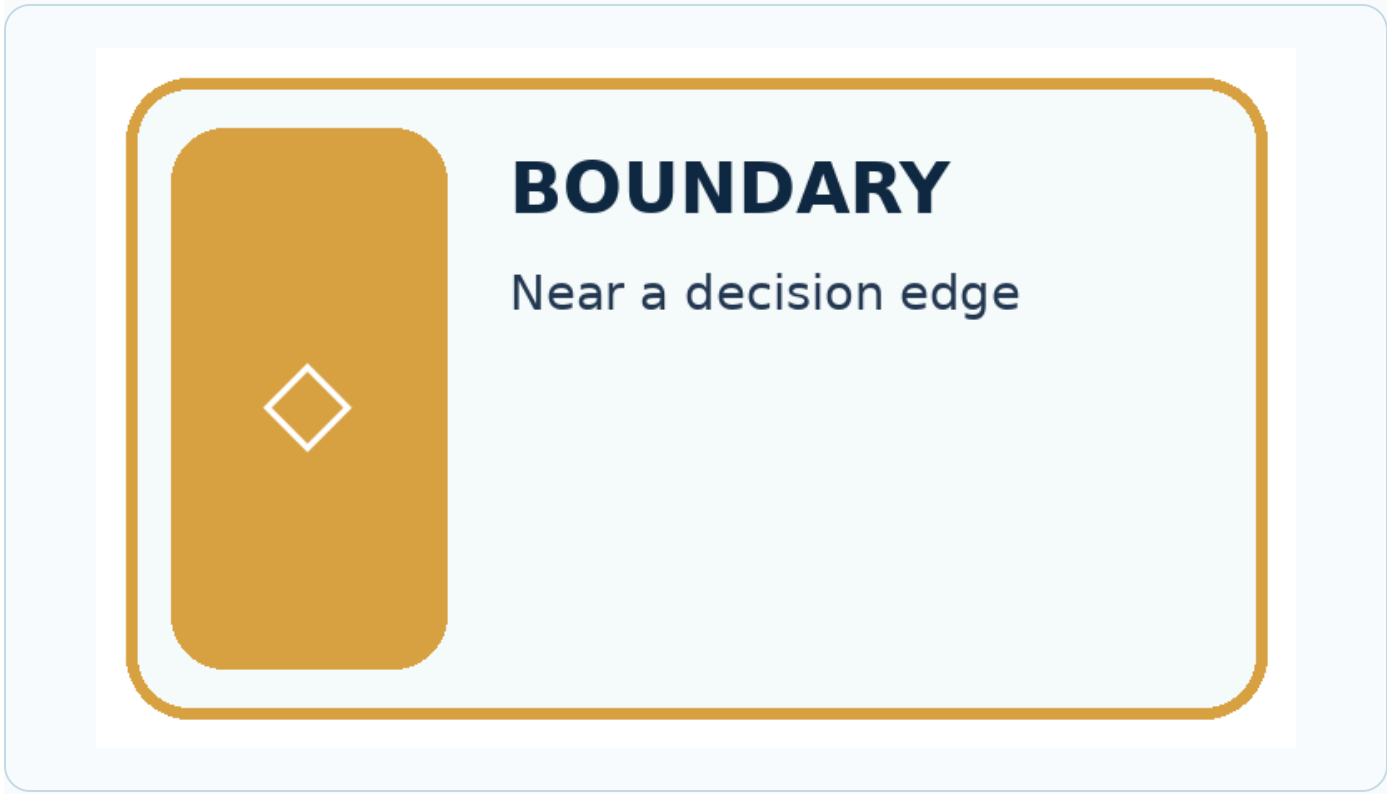

▼ Earlier wording, alternatives and picture transcripts

CASE GALLERY

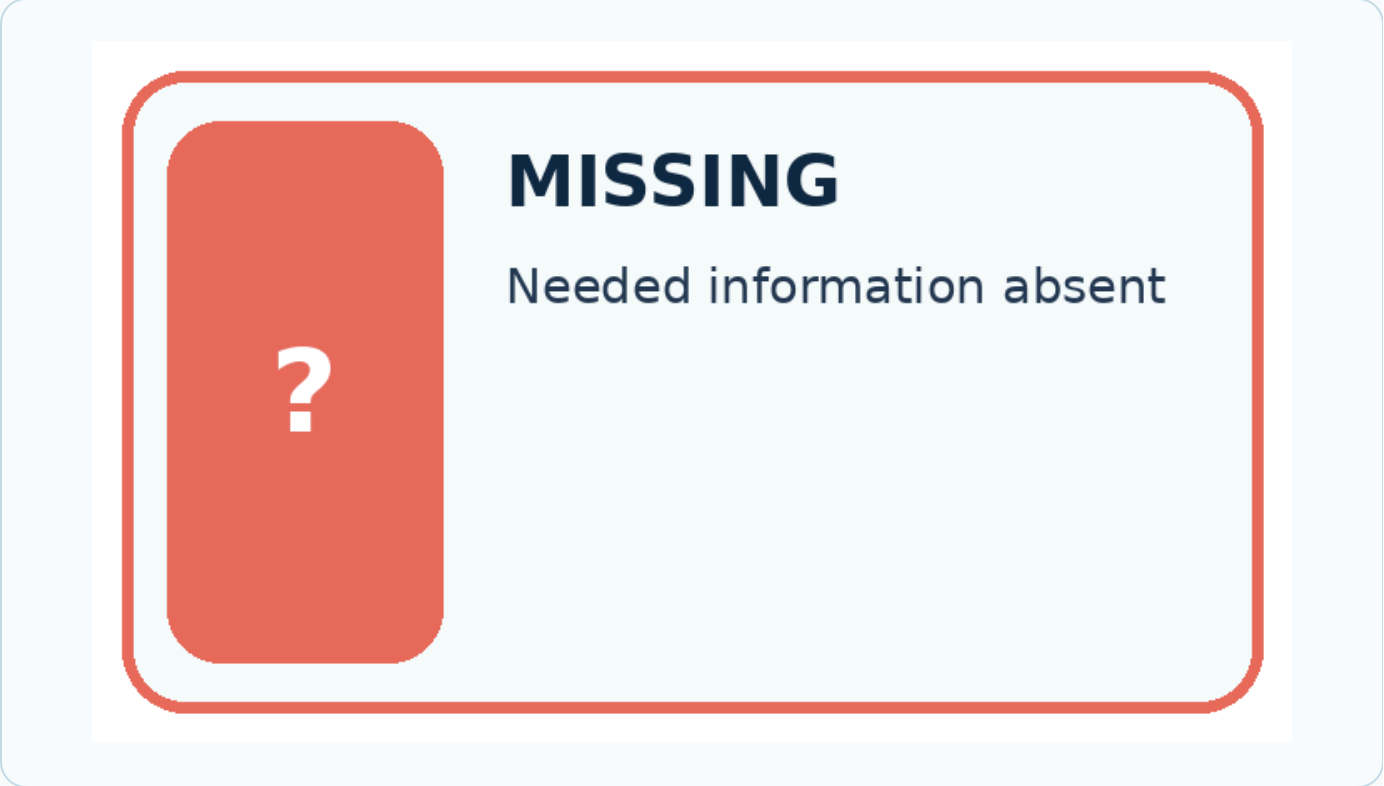

Four Tests, Four Kinds of **Evidence**

A system is not understood until it survives more than one comfortable example.

NORMAL CASE: predict and name **evidence**. BOUNDARY CASE: predict and name **evidence**.

MISSING INFORMATION: predict and name **evidence**. TRANSFER CASE: predict and name **evidence**.

Change one thing in the pictured case

MAIN LESSON · SECTION 6

Compare a four-claim audit and a separate catalogue picture

> Keep each answer's claim count separate.

Calculate the four-claim results

An answer has four factual **claim**s. Three have citations, but only two are supported by their cited passages. All links exist.

Claim support is 2/4=50%; citation presence is 3/4=75%; link existence among three citations is 3/3. These measure different failures.

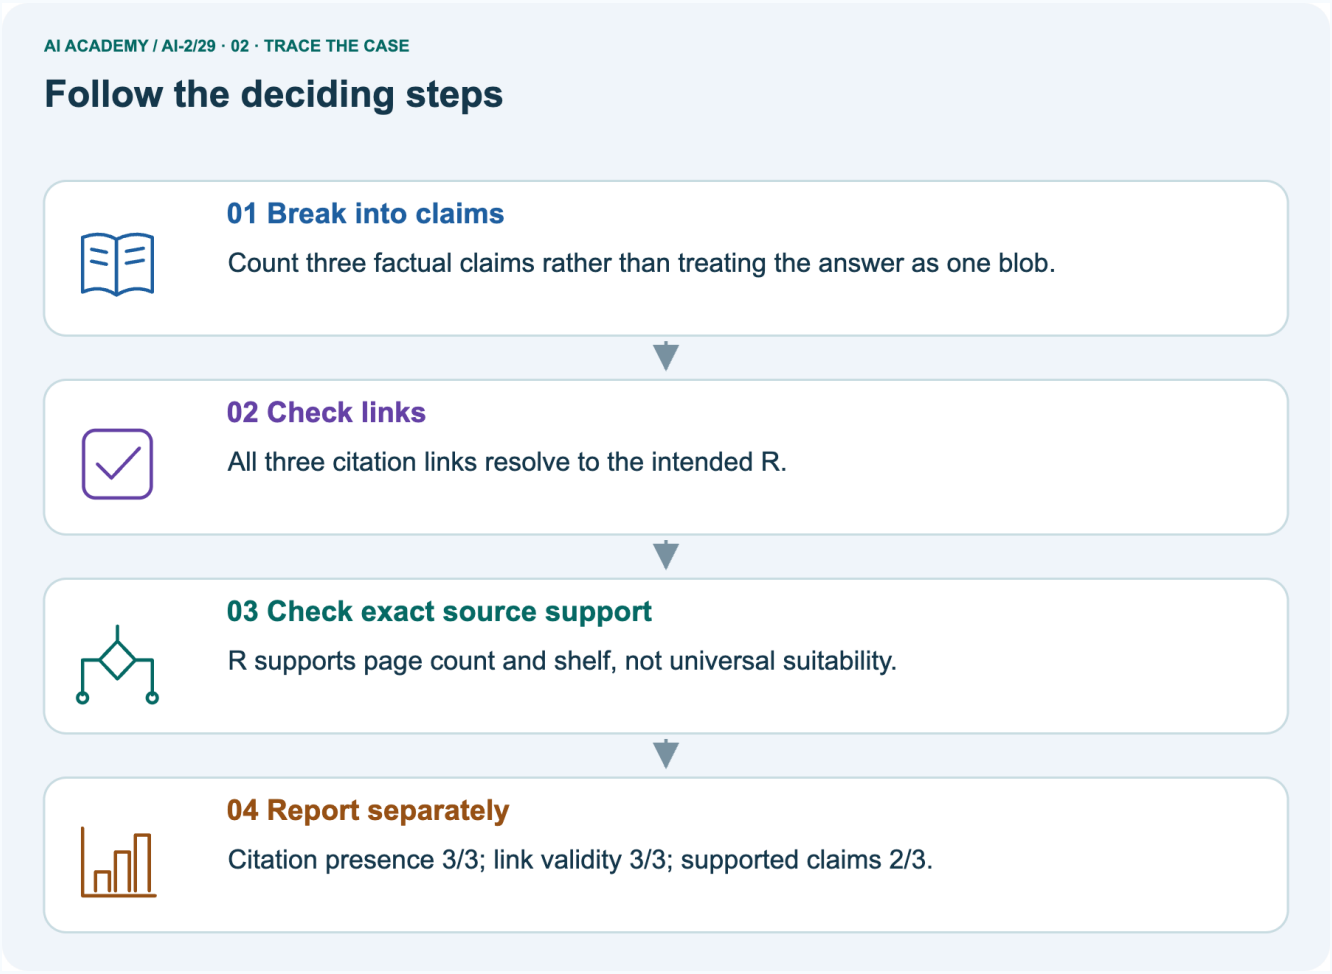

Read the separate three-claim Ocean Maps record

A fictional catalogue answer contains three factual statements and cites existing records.

Record R: book Ocean Maps has 80 pages and is available on shelf 2.

Claims: 80 pages [R]; shelf 2 [R]; suitable for every child [R]. All three citations resolve to R.

Trace links and exact support

Follow the labelled picture with the matching explanation. Open the vector diagram

Read the picture one step at a time

STEP	WHAT HAPPENS AND WHY
1. Break into claims	Count three factual claims rather than treating the answer as one blob.
2. Check links	All three citation links resolve to the intended R.
3. Check exact source support	R supports page count and shelf, not universal suitability.
4. Report separately	Citation presence 3/3; link validity 3/3; supported claims 2/3.

Match each pictured step to the supplied facts. This is a worked teaching case, not an independent assessment.

Explain the unsupported universal claim

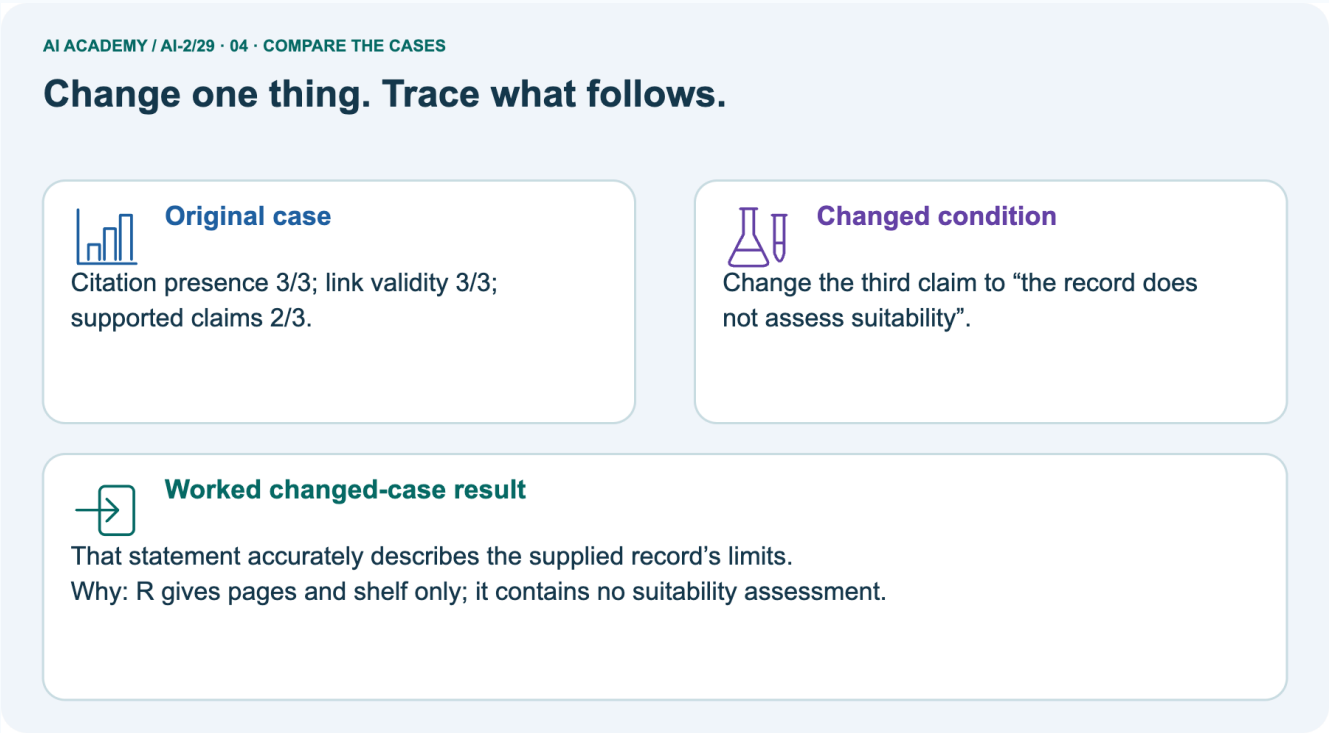

An existing citation is not automatically **evidence** for every nearby sentence. Read the cited passage and compare its exact scope with the **claim**. The universal suitability statement extends beyond what R says.

Remove or qualify unsupported content; adding more copies of the same link does not create the missing **evidence**.

Predict a claim about the record's own limit

- Change one thing: Change the third **claim** to "the record does not assess suitability". Predict the result before checking the explanation. What remains the same?

▼ Check after predicting

Follow the labelled picture with the matching explanation. Open the vector diagram

Keep source support separate from real-world truth

- **Source** support is relative to supplied records; those records can themselves be incomplete, outdated or incorrect.

- Read the labelled picture: Why is the original answer not fully supported despite having citations on every **claim**?

▼ Earlier wording, alternatives and picture transcripts

WORKED **EVIDENCE**

Reason Step by Step

Predict first. Then check each step. A correct answer without visible reasoning is incomplete **evidence**.

1. **Claim**: a book won an award in 2024.

2. Find the award organization’s record and the publisher’s page.

3. Check exact title, year, edition, and whether **source**s are **independent**.

4. If **evidence** conflicts or is absent, mark ‘not verified’ rather than guess.

Recalculate, retrace, or restate the reasoning in your own representation:

Write or draw your reasoning and evidence.

CHECK Did the **evidence** answer the exact question? Did the total, path, or **source** record stay consistent?

A closer explanation

Compare the intermediate **evidence** with the final statement. Explain why each number or decision follows from the stated **input**s.

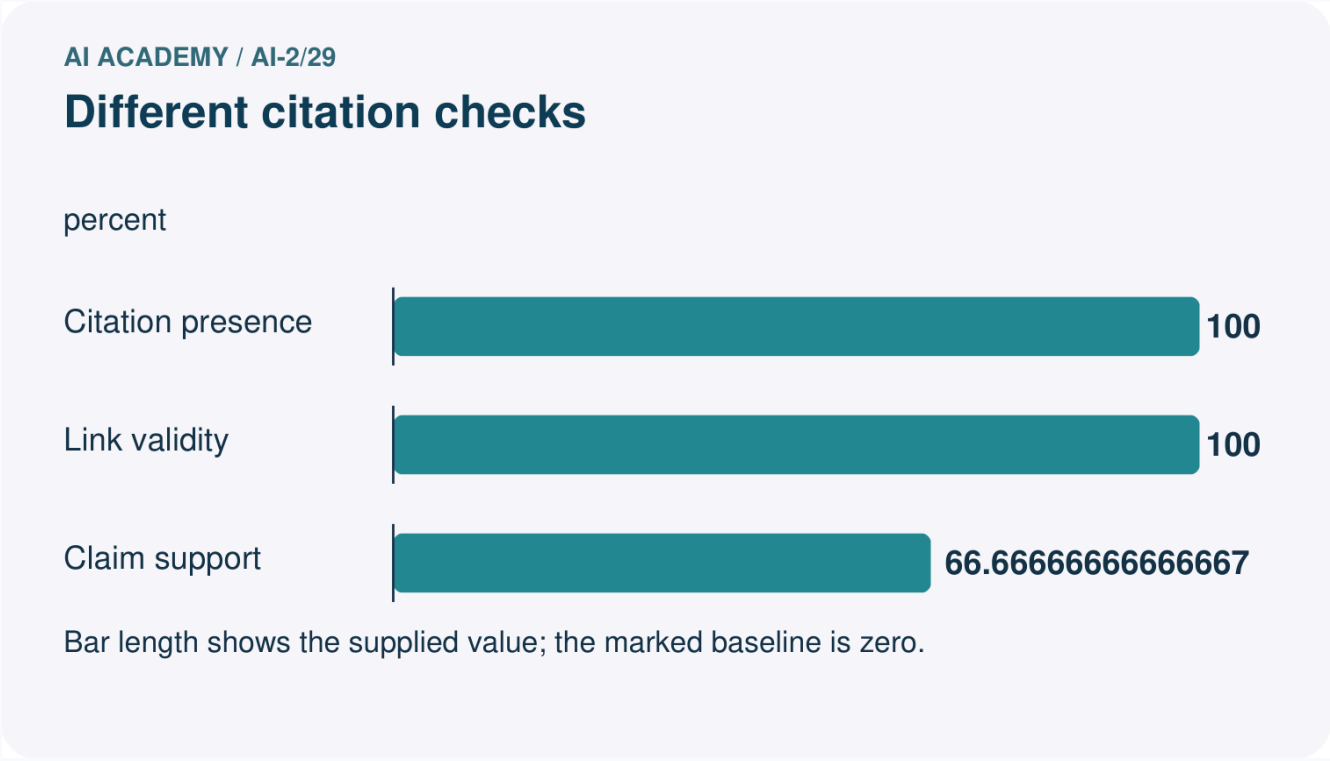

The conclusion belongs to this scenario and procedure; changing the **input**s, evaluation population or authority can change what it establishes. Retain the raw record so a later revision can be compared honestly.

Learn from the worked case

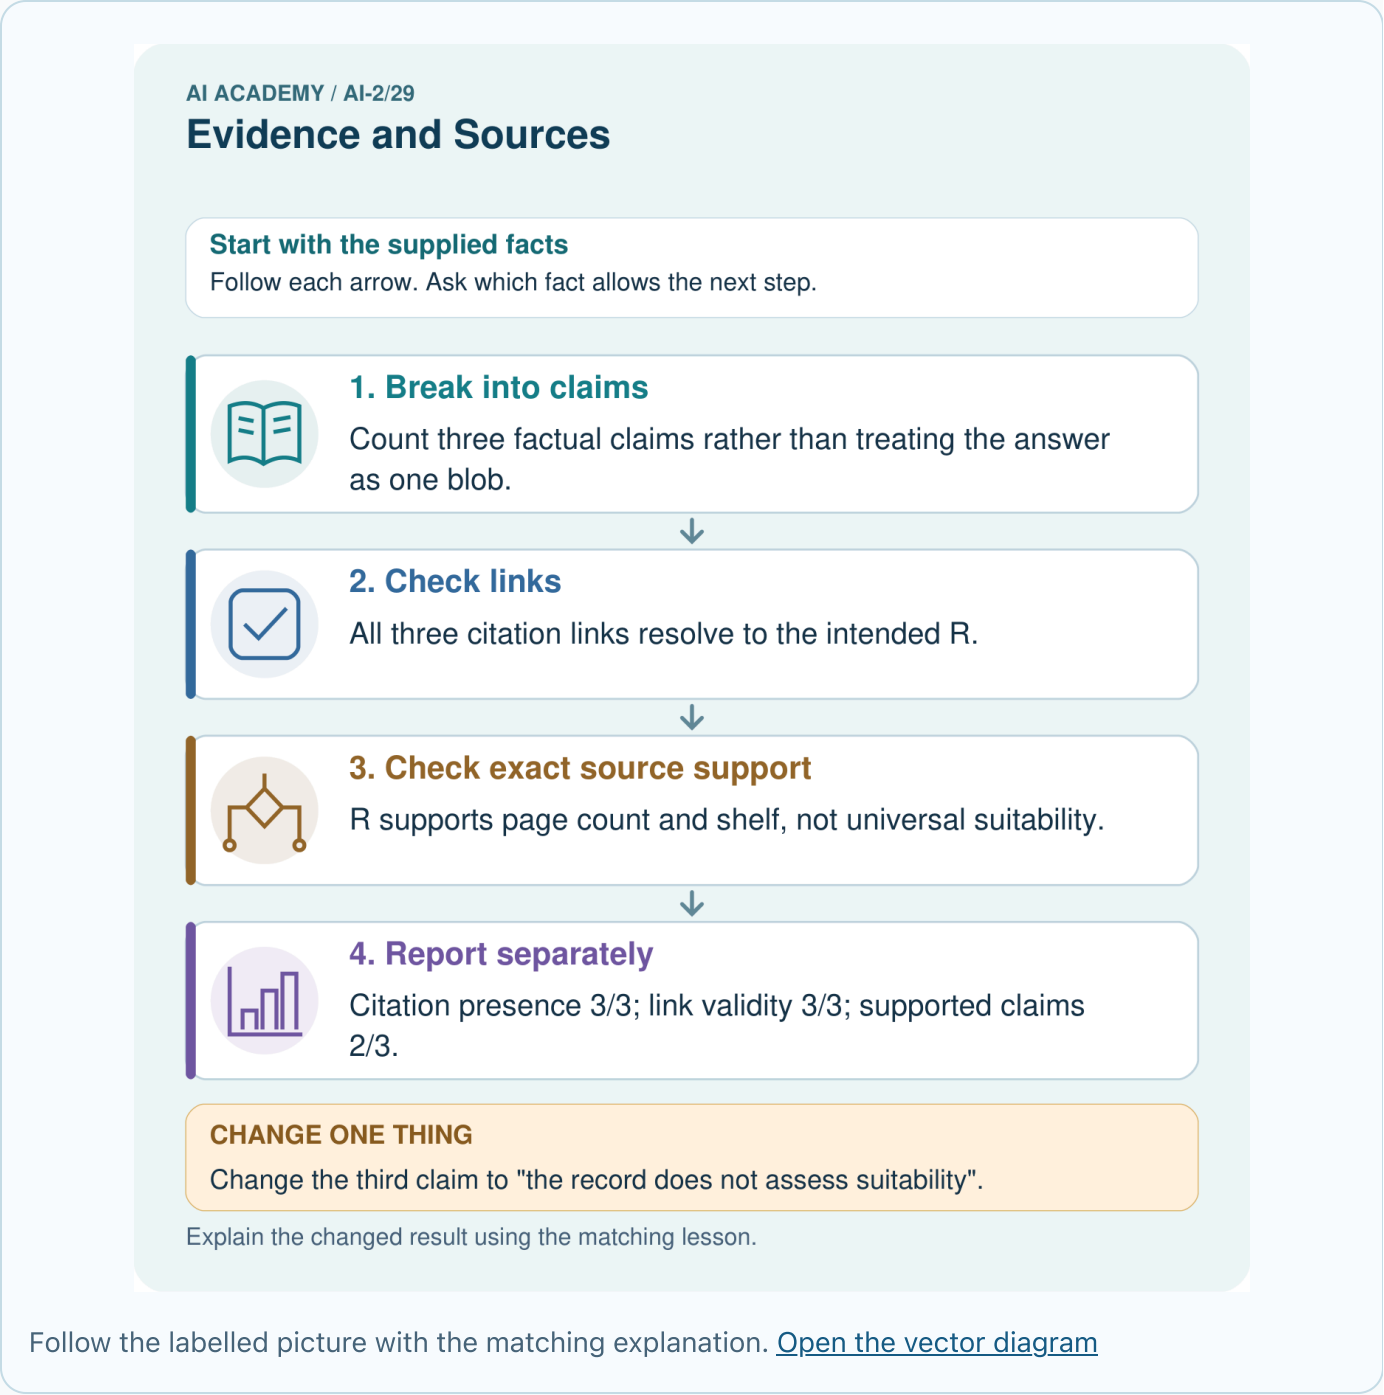

Cover the result before checking it. Say what is given, choose the procedure, and follow one step at a time. Then uncover the result and explain your first mismatch. Ask why a step is allowed, not only what number it produces.

A pictorial worked case: Evidence and Sources

The facts we will use

Follow the labelled picture with the matching explanation. Open the vector diagram

Follow the labelled picture with the matching explanation. Open the vector diagram

Why this result follows

What this example does not establish

MAIN LESSON · SECTION 7

Repair a claim that goes beyond its source

> Name exactly what the record says and what it leaves unresolved.

Find the first unsupported step

Claim to repair: All three links resolve to R, so Ocean Maps is suitable for every child. The supplied R states only80pages and shelf2. Under the stated rubric, those two claims are supported; universal suitability is not. Remove it or state that the supplied record does not assess suitability. Repeating the same citation adds no new evidence. A source can also be wrong or stale; support from this record is not a guarantee of truth.

Propose a revealing source check

> **Exit: propose one revealing change to the worked scenario. State the expected outcome and the evidence that would make you revise your explanation.**

▼ **Earlier wording, alternatives and picture transcripts**

ERROR DETECTIVE

Compare → Diagnose → Repair

Do not patch the answer. Find the earliest unsupported assumption, wrong step, or weak **evidence**.

!

COMPARE • DIAGNOSE

Weak idea: Two websites always count as two independent sources. Strong move: locate evidence, change one cause, and retest.

Evidence record	Expected	Actual	Likely cause / next test
normal case	works		
boundary case	stated rule		
missing input	safe response		
fresh transfer	generalizes		

Repair one cause. Why is this repair better than changing several things?

> **Write or draw your reasoning and evidence.**

A closer explanation

Complete the supported workbook tasks before attempting W4 **independent**ly. Record any hints or help used. After feedback, use the teacher's fresh retry rather than copying the earlier answer.

For a project, select a relevant new case, predict the outcome from the declared rule and preserve the result alongside any revision.

MAIN LESSON · SECTION 8

Practise the four-claim audit with less help

> Use matching claim and citation denominators.

The evidence boundary

Citation counts do not establish truth beyond the supplied **source**s or the correctness of uncited **claim**s.

Complete the four-claim W2 trace

Practise with less help: Trace the worked case

Use workbook W2 for the connected example "**Claim** support and citation evaluation". First fill the **input** and rule boxes. Try the middle steps before asking for a hint. After a hint, try the next step yourself.

Plan	Do	Check
What is given? Which rule or procedure applies?	Record each intermediate step.	Does the result follow? What remains unknown?

Repair an overclaim before discussion

- Use the worked case for **Claim** support and citation evaluation. Proposed explanation: "The worked result establishes every future case". Decide whether this explanation is supported.

  Point to the step or supplied fact that decides; explain your repair if needed.

- Answer on your own before discussion. If you are unsure, say which step you need help with.

Check your reasoning

Explain the separate three-claim picture

- Why is the original answer not fully supported despite having citations on every **claim**?

Explain the picture

> **My explanation using a pictured step and the given facts**

Keep independent work separate

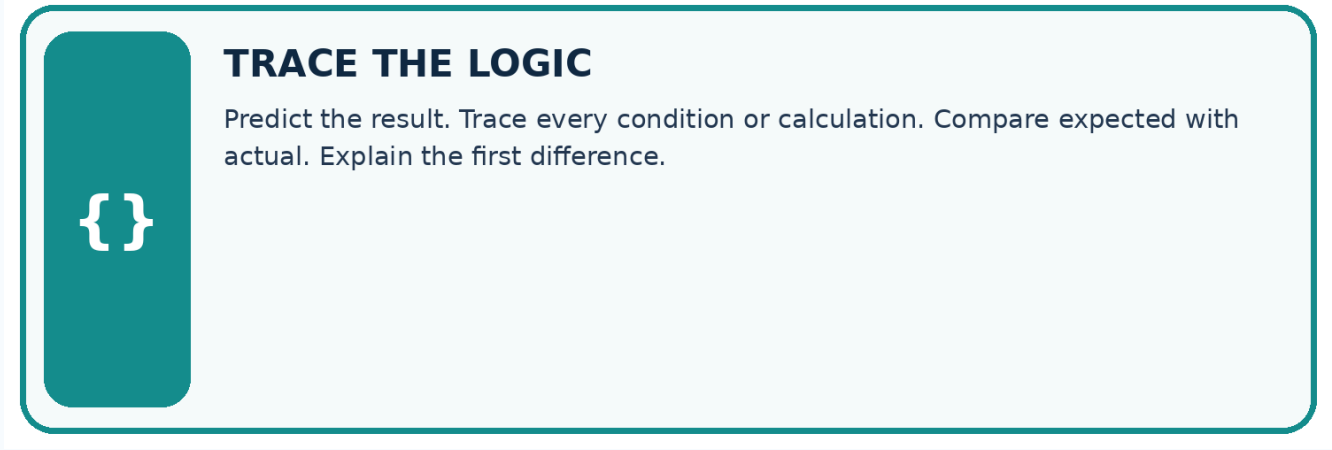

This is supported practice. Keep the separately named **independent** case for an attempt before feedback.

▼ **Earlier wording, alternatives and picture transcripts**

LOGIC STUDIO

Trace Before You Run

Block code, pseudocode, tables, and diagrams are different ways to expose the same reasoning.

SET **evidence**_record PREDICT expected_result RUN one normal case and one boundary case COMPARE actual_result with expected_result IF different: locate first cause; change one factor; RETEST EXPLAIN result, limitation, and next safe step

Trace one **input**. Which line changes the state or chooses a path?

> **Write or draw your reasoning and evidence.**

A closer explanation

A useful check asks what would make the reasoning fail. Distinguish a failure to execute the declared procedure from a weakness in the procedure itself.

The first may require a correction; the second requires an explicitly revised method and new **evidence**. Preserve unsuccessful cases so an improved result cannot hide the original problem.

Guided: restate the worked result, then name the assumption or limitation that prevents a broader conclusion.

Explain your trace to a partner. Your partner points to one step to check. Swap roles on the next case. Each person writes their own explanation.

MAIN LESSON · SECTION 9

Audit six complete claims against supplied passages

All records are fictional and self-contained; no online search is required.

The complete source set

Source ID	Complete fictional source passage
R	Edition OM-1 of Ocean Maps has80pages and is listed on shelf2.
S	Edition OM-2 of Ocean Maps has96pages and is listed on shelf5.
T	Library opening hours are09:00–16:00.
Z	No record with this ID is supplied.

The six claims to inspect

Claim	Citation
OM-1 has80pages	R
OM-1 is on shelf5	R
OM-1 is suitable for every child	R
The library opens at09:00	T
OM-1 costs12coins	Z
OM-2 has96pages	none

Audit, calculate and repair

1. Paper source audit: treat the supplied passages as the complete classroom source set, not a live catalogue. For each of the six claims mark citation present, whether its ID resolves, and whether that cited passage supports the exact claim. Label the shelf5 assertion conflicting with R; universal suitability unverified; Z missing. The uncited OM-2 claim is supported elsewhere in the supplied set but not by a cited passage, so it does not count as cited support under this rubric. Compute the three rates and propose repairs without changing edition IDs or averaging page counts. Distinguish link-resolution failure, contradiction and lack of support. Extra copies of R are not independent sources. No award result, price or real-world catalogue truth is supplied. Keep the independent five-claim task for a first attempt before feedback.

Keep an evidence record

Test / input · Prediction · Actual · Evidence / calculation · Change or keep?

> **Test / input:** normal
>
> **Prediction:** _____

Actual: _____

Evidence / calculation: _____

Change or keep?: _____

Test / input: boundary

Prediction: _____

Actual: _____

Evidence / calculation: _____

Change or keep?: _____

Test / input: missing

Prediction: _____

Actual: _____

Evidence / calculation: _____

Change or keep?: _____

Test / input: fresh transfer

Prediction: _____

Actual: _____

Evidence / calculation: _____

Change or keep?: _____

What did the hardest test teach you that the normal test did not?

Write or draw your reasoning and evidence.

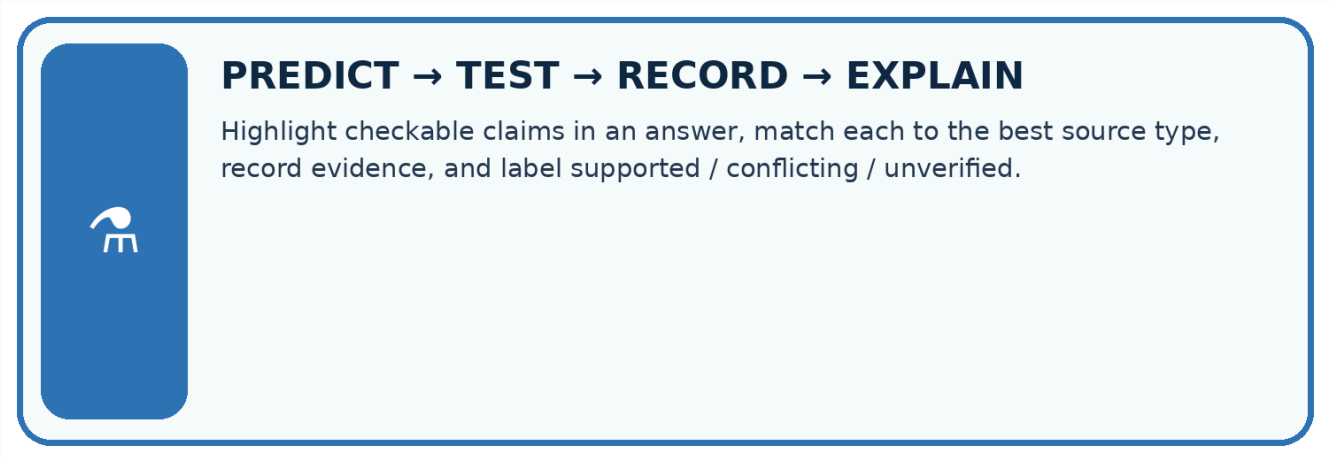

Before trying: what do I expect, and why? While trying: which step could first go wrong? Afterwards: what did I actually observe, and what should change? Keep “not run” if you only traced the procedure.

▼ Earlier wording, alternatives and picture transcripts

EVIDENCE LAB

Predict → Test → Record → Explain

Keep expected and actual results separate. Surprises are useful data when recorded honestly.

Use the supplied six **claim**s and **source** passages. Audit citation presence, ID resolution, exact cited support and conflicting versus missing **evidence**. Do not infer real-world truth or perform an unspecified live search.

Plan → try → check

MAIN LESSON · SECTION 14

Try alone: audit the fresh five-claim record

> Keep claim-level rates and citation-level resolution separate.

Independent givens and scope

Five **claim**s; four cited; three supported by cited passages; one cited ID is nonexistent. Compute support and citation presence and explain link limits.

For this independent counting task, treat each cited claim as having one citation and the nonexistent ID as the only unresolved link; the other three citations resolve. The supplied support count is by cited passage, not an assertion that uncited claims are false. No additional passage content is supplied, so do not invent it.

Your first attempt and help record

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

Your teacher has the **independent** answer and scoring criteria. Complete the matching workbook week to keep your practice **evidence** together.

Use feedback after attempting

Attempt the **independent** case before hints. Record whether you worked alone, used a hint or followed a model. After feedback, fix the first unsupported step and explain why it changed.

A later check uses a changed case, not a copied answer.

▼ Earlier wording, alternatives and picture transcripts

Independent case: Apply a new case independently

Week 29 Independent application

Close the worked explanation. Apply the idea to this different question without copying.

An answer cites a page about opening hours to support a **claim** about book prices. Is a citation enough? What must be checked?

My answer, with a trace, calculation or supporting **evidence**

> **Write or draw your reasoning and evidence.**

Create and test

Change one relevant detail. Predict the result before testing. Include a boundary or missing-information case when it helps reveal a limit.

My changed **input** and expected result

> **Write or draw your reasoning and evidence.**

Connect to your project

Separate profile-based ranking **evidence** from factual book information and cite the latter.

The **evidence** I will keep

Write or draw your reasoning and evidence.

Transfer practice from the original programme

Two catalogue records list 96 and 112 pages for a title. A helper averages them and reports 104. Explain the mistake and a better verification **process**.

Explain the mechanism, evidence and one limit.

Use feedback to improve

MAIN LESSON · SECTION 11

Attach a supporting passage to each project fact

> Keep a visible boundary between recorded facts, score-based choices and judgments.

This week’s concrete project contribution

For each factual book-explanation claim, keep its edition ID, source ID, exact supporting passage and record version/date if available. Preserve ranking scores separately from facts about a book. If evidence conflicts, check record identity and authority before correcting; if unresolved, say so. A record that supports page count cannot establish a universal suitability claim. More links to the same record do not provide independent corroboration.

Attach **source** IDs to recommender explanation facts and separately audit whether each **source** supports its precise statement.

Keep the checkpoint and human choice

THIS WEEK'S CHECKPOINT Separate profile-based ranking **evidence** from factual book information and cite the latter.

SYSTEM MAP Reader need → allowed **input**s → transparent rule or score → ranked candidates → explanation → test record → **human decision**

What will you add, change, or verify in the project this week?

> **Write or draw your reasoning and evidence.**

What should remain under **human control**?

> **Write or draw your reasoning and evidence.**

RESPONSIBLE DESIGN Collect only necessary information. Show uncertainty and limits. Never confuse a ranking with a fact about a person.

▼ Earlier wording, alternatives and picture transcripts

CUMULATIVE PROJECT

Transparent Book Recommender

Every week adds one inspectable piece. The system must show how it reached a result.

Evidence for your project

MAIN LESSON · SECTION 16

Finish: state which passage supports which claim

> A complete citation list does not establish complete support.

Explain without notes

- Close your notes. Explain this goal in your own words: Explain the **mechanism** and terminology of **claim** support and citation evaluation

My deciding step, evidence and one remaining question

Plan a changed-case return

If you are unsure, return to the worked picture and explain one arrow. If you are ready, change an **input** or assumption and justify your **prediction**.

Save your workbook **evidence**. At the next review, try a different case before opening your old answer.

Reference bank and extra practice

Choose the reference that helps your next step.

▼ **Your quick word guide**

REFERENCE · SECTION 5

Your quick word guide

> Use the words to explain a particular step, record or limit.

Core vocabulary

Word	My own example	Not this / boundary
claim	A statement that can be examined using evidence and reasoning.	
source	The record, person or material from which information is obtained.	
independent	Produced or assessed without the specific influence being excluded; state whether this means uncoached work or separate test data.	
corroborate	Support a claim with additional relevant evidence, ideally independent of the first source.	

Terms for the connected explanation

Word	Meaning
Entailment	Whether the cited passage supports the specific claim
Citation coverage	Which claims include source references

Word	Meaning
Link validity	Whether a source reference resolves to the intended record

▼ Earlier wording, alternatives and picture transcripts

VOCABULARY LAB

Words You Can Use to Reason

A definition matters when you can recognize the idea, use it, and contrast it with a near-miss.

2

SOURCE

where evidence comes from

3

INDEPENDENT

not copied from the same origin

Words used in the closer explanation

▼ **Choose a stronger thinking challenge**

REFERENCE · SECTION 10

Choose a stronger thinking challenge

> Choose the next useful challenge rather than treating the whole ladder as compulsory.

Pick your next step

- 1 • NAME: Define the concept without repeating the textbook.
- 2 • TRACE: Show the information, state, branch, calculation, or **evidence** path.
- 3 • APPLY: Solve a different example **independent**ly.
- 4 • CHALLENGE: Find a boundary case, counterexample, or unfair outcome.

- 5 • EXPLAIN LIMITS: Say when the result should not be trusted or used alone.

- My strongest **evidence** of **independent** understanding:

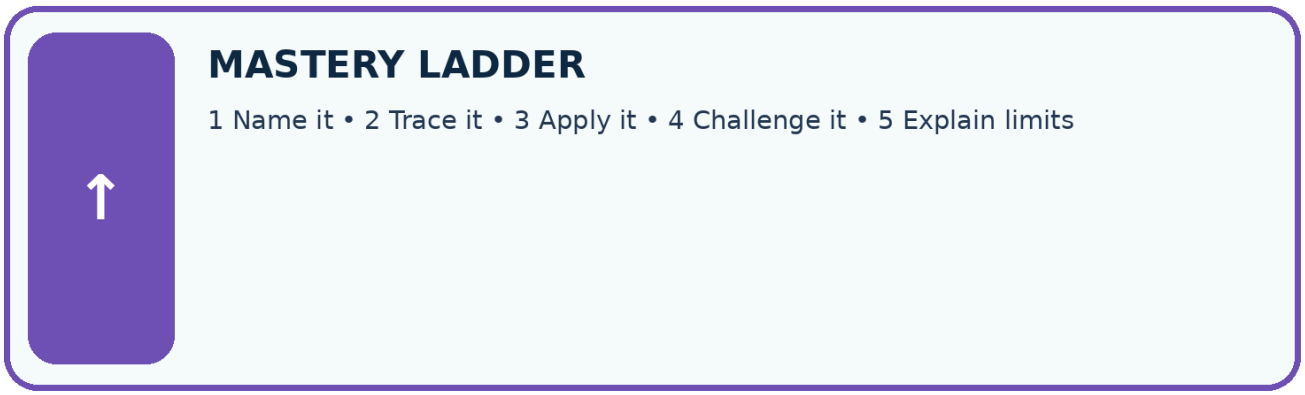

Write or draw your reasoning and evidence.

▼ Earlier wording, alternatives and picture transcripts

MASTERY

From Knowing the Word to Owning the Idea

Move upward only when you can produce **evidence** without copying the worked example.

▼ Reference: check your explanation

Reference: check your explanation

> Use after practice. Audit a new claim-and-citation record independently is the selected independent case.

Check the evidence and its limit

- 1. My fresh example, trace, calculation, or design:
- 2. My **evidence** that it works (include a boundary or missing-data case):
- 3. One limitation, fairness concern, or situation needing human review:

> **Write or draw your reasoning and evidence.**

> **Write or draw your reasoning and evidence.**

Self-check and record

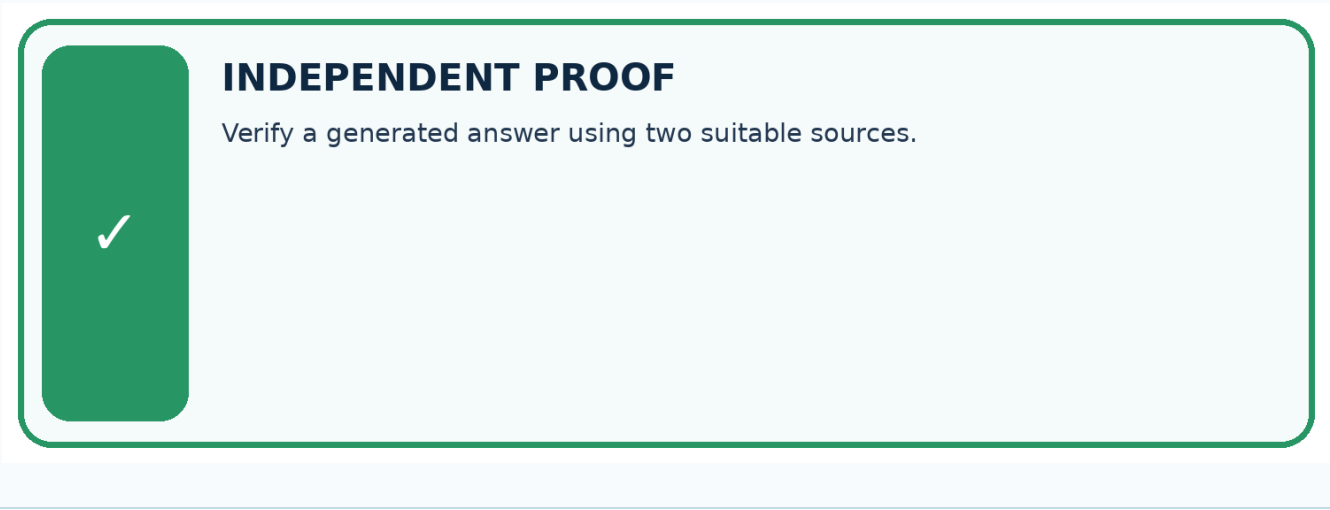

SELF-CHECK ☐ I explained the **mechanism** ☐ I used **evidence** ☐ I tested a fresh case ☐ I named a limitation ☐ I can answer 'why?'

▼ **Earlier wording, alternatives and picture transcripts**

INDEPENDENT MASTERY PROOF

Checklist for explaining this week's idea

Use after practice. Audit a new claim-and-citation record independently is the selected independent case.

EXPLANATION CHECK Use claims for support and citation-presence rates, citations for link resolution; explain scope.

Write or draw your reasoning and evidence.

▼ **Extra practice: Check the claim against the exact edition**

REFERENCE · SECTION 13

Extra practice: Check the claim against the exact edition

> Try the question before opening its worked explanation.

Read the supplied case and question

An answer says 80 pages, but the catalogue for that edition says 120.

What **evidence** guides correction?

Your explanation

- Which detail supports the answer, and why does it matter?

Write or draw your reasoning and evidence.

▼ Check after trying

Check the exact edition and authoritative catalogue record. Record the supporting **source**.

Evidence or stage	Value or result
Answer	80 pages
Catalogue	120 pages for this edition
Resolution	Verify edition and cite the correct record

▼ Earlier wording, alternatives and picture transcripts

Week 29 Worked case

Use the supplied details to practise the weekly concept before attempting the **independent** question. This case extends the illustrated lesson.

The situation

The question

Worked explanation

Explain it in your own words

Trace the supplied case visually

Check the claim against the exact edition

An answer says 80 pages, but the catalogue for that edition says 120.

What **evidence** guides correction?

Check the exact edition and authoritative catalogue record. Record the supporting **source**.

▼ **Reference: original lesson checklist**

REFERENCE · SECTION 15

Reference: original lesson checklist

> Use an additional checklist when it helps inspect your explanation.

Targets and evidence

By the end, I can	How I will show it
Explain the mechanism and terminology of claim support and citation evaluation	Explain the deciding step, show a trace or test, and state one limit.
Apply the stated procedure to a new case with a traceable result	Explain the deciding step, show a trace or test, and state one limit.
Identify an assumption or limitation and design a revealing follow-up	Explain the deciding step, show a trace or test, and state one limit.

Keep your route and first prediction

Remember → watch and explain → try with help → investigate → try **independent**ly → keep project **evidence**. Your teacher may spread this lesson across several classes.

Keep your first **prediction**. Compare it with what the **evidence** shows and explain any change.

▼ Earlier wording, alternatives and picture transcripts

Start with this question: A fictional catalogue answer contains three factual statements and cites existing records.

▼ Extra practice: pictures, repair and feedback

REFERENCE · SECTION 17

Extra practice: pictures, repair and feedback

> Attempt each question before opening its explanation. Use one browser or paper copy.

First supported question

- A fictional catalogue answer contains three factual statements and cites existing records.
- Which labelled step matches this detail? Citation presence 3/3; **link validity** 3/3; supported **claim**s 2/3.
- 1. Check exact **source** support
- 2. Check links
- 3. Report separately

- 4. Break into **claim**s

- Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

Practice 1: explain the deciding evidence

> **My selected conclusion, deciding fact and explanation**

▼ **Check the first explanation**

After your attempt, compare with the supported explanation: Report separately Citation presence 3/3; **link validity** 3/3; supported **claim**s 2/3. An existing citation is not automatically **evidence** for every nearby sentence.

Read the cited passage and compare its exact scope with the **claim**. The universal suitability statement extends beyond what R says.

Remove or qualify unsupported content; adding more copies of the same link does not create the missing **evidence**.

Changed-case question

- Changed-case practice: Change the third **claim** to “the record does not assess suitability”. Which conclusion is supported by the supplied facts?

- 1. That statement accurately describes the supplied record’s limits.

- 2. This one example guarantees correct results for every future **input**.

- 3. We can decide the result without examining the changed **input** or the procedure.

- Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

Practice 2: explain the deciding evidence

> **My selected conclusion, deciding fact and explanation**
>
> ---
>
> ---
>
> ---
>
> ---

▼ **Check the changed case**

After your attempt, compare with the supported explanation: That statement accurately describes the supplied record's limits. R gives pages and shelf only; it contains no suitability assessment.

Repair and save your work

Review Prompt Experiments (ai-2/28). Goal: Explain the **mechanism** and terminology of controlled prompt experiments. Short practice: Name the case P passes and Q fails, and explain why it matters..

Return to this week and explain what you changed.

Review Image and Voice Pipelines (ai-2/26). Goal: Explain the **mechanism** and terminology of speech pipelines and multimodal **evidence**.

Short practice: Which stage first fails, and why should the faulty transcript not be silently overwritten?. Return to this week and explain what you changed.

Review Recommendation Scores (ai-2/23). Goal: Compute a weighted score. Short practice: Why does B not become the winner when its score is largest?. Return to this week and explain what you changed.

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run **evidence**. Open the HTML copy to read or print it.

Drafts stay in this browser when storage is available; clear drafts on a shared device.

▼ Earlier wording, alternatives and picture transcripts

Use this supported practice once, in the browser or on paper. Keep the reserved **independent** assessment for a separate first attempt before teacher feedback.

Repair a missing building block

Keep your completed work

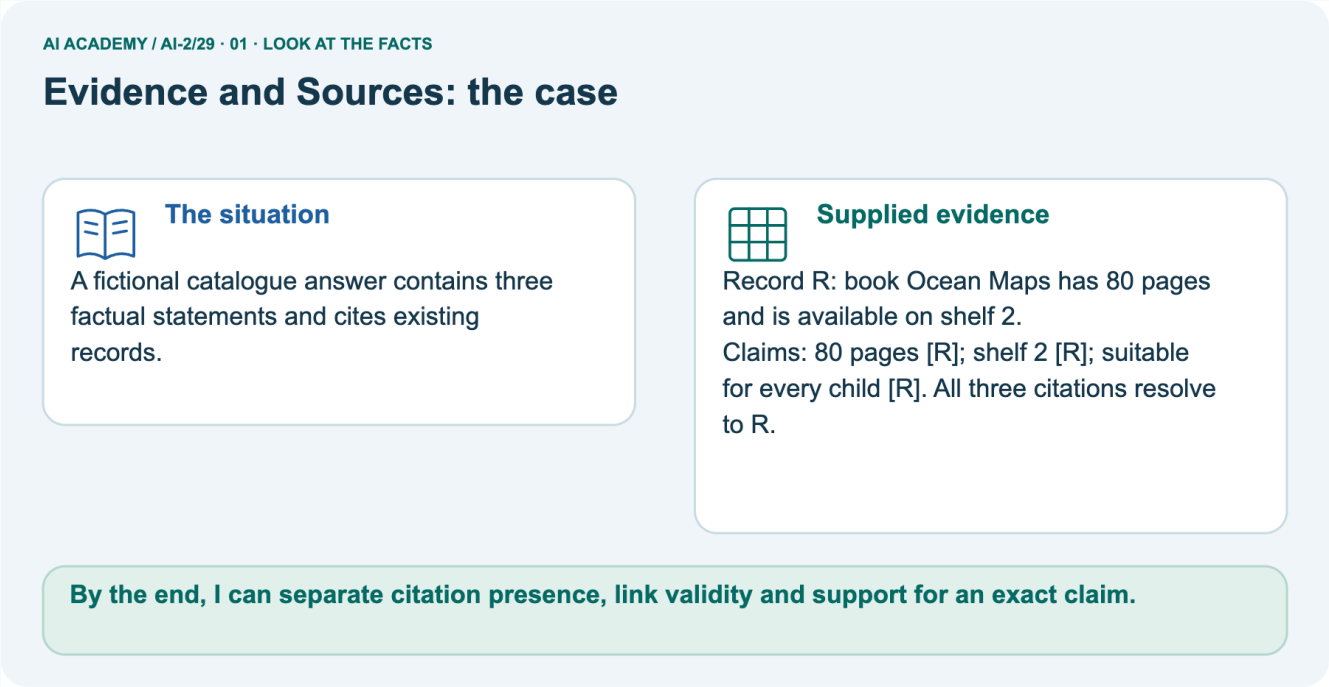

▼ Reference: the six-picture journey

REFERENCE · SECTION 18

Reference: the six-picture journey

> Revisit the picture that serves the current question; key diagrams already sit beside the main explanation.

01. Evidence and Sources: the case

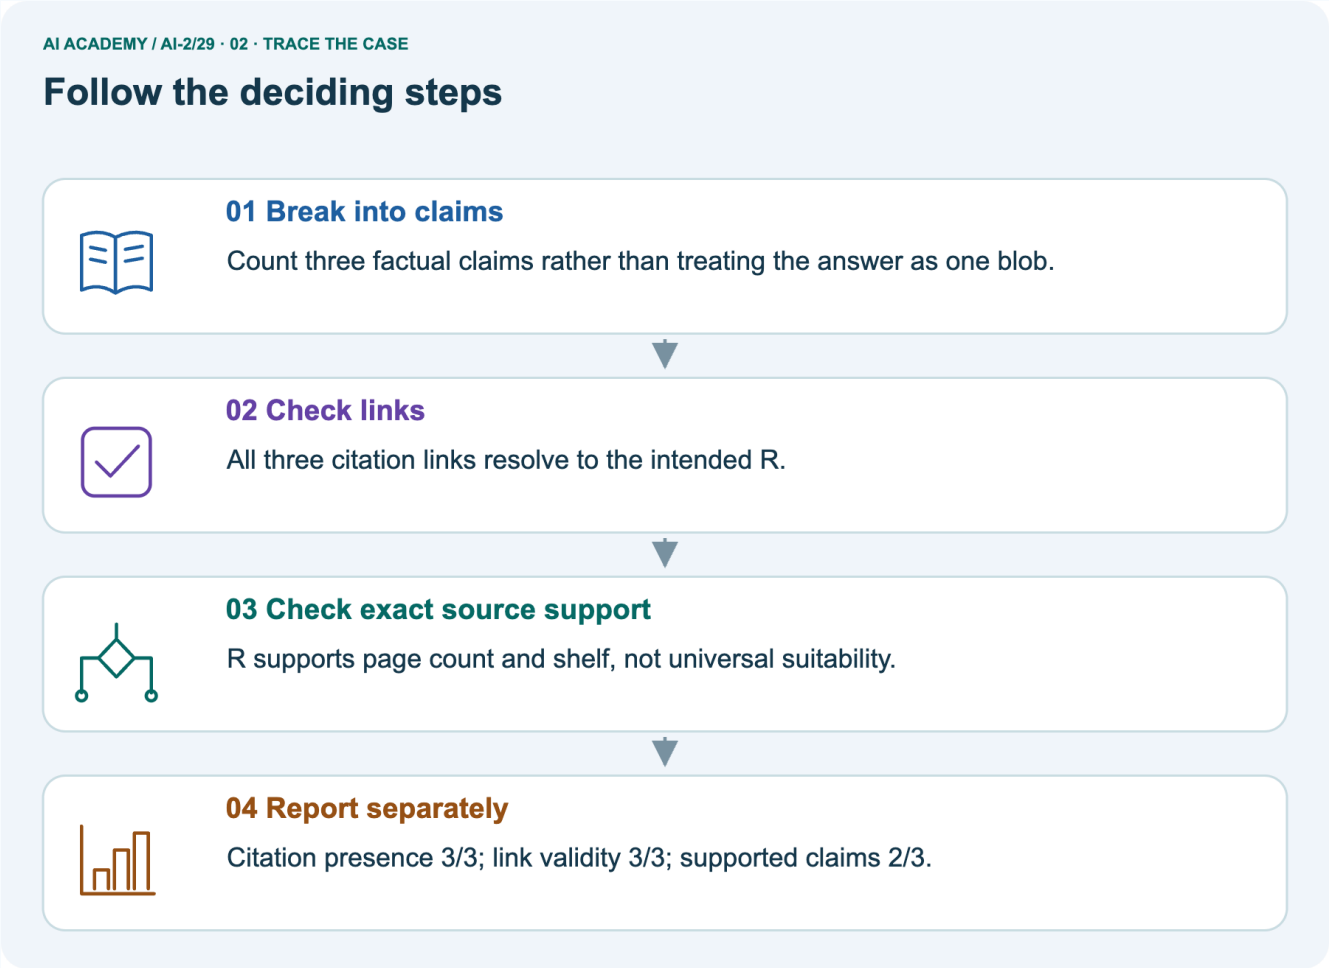

Follow the labelled picture with the matching explanation. Open the vector diagram

A fictional catalogue answer contains three factual statements and cites existing records.
Supplied facts: Record R: book Ocean Maps has 80 pages and is available on shelf 2.

Claims: 80 pages [R]; shelf 2 [R]; suitable for every child [R]. All three citations resolve to R.

Point to the given fact that matters most. Explain why it matters.

02. Follow the deciding steps

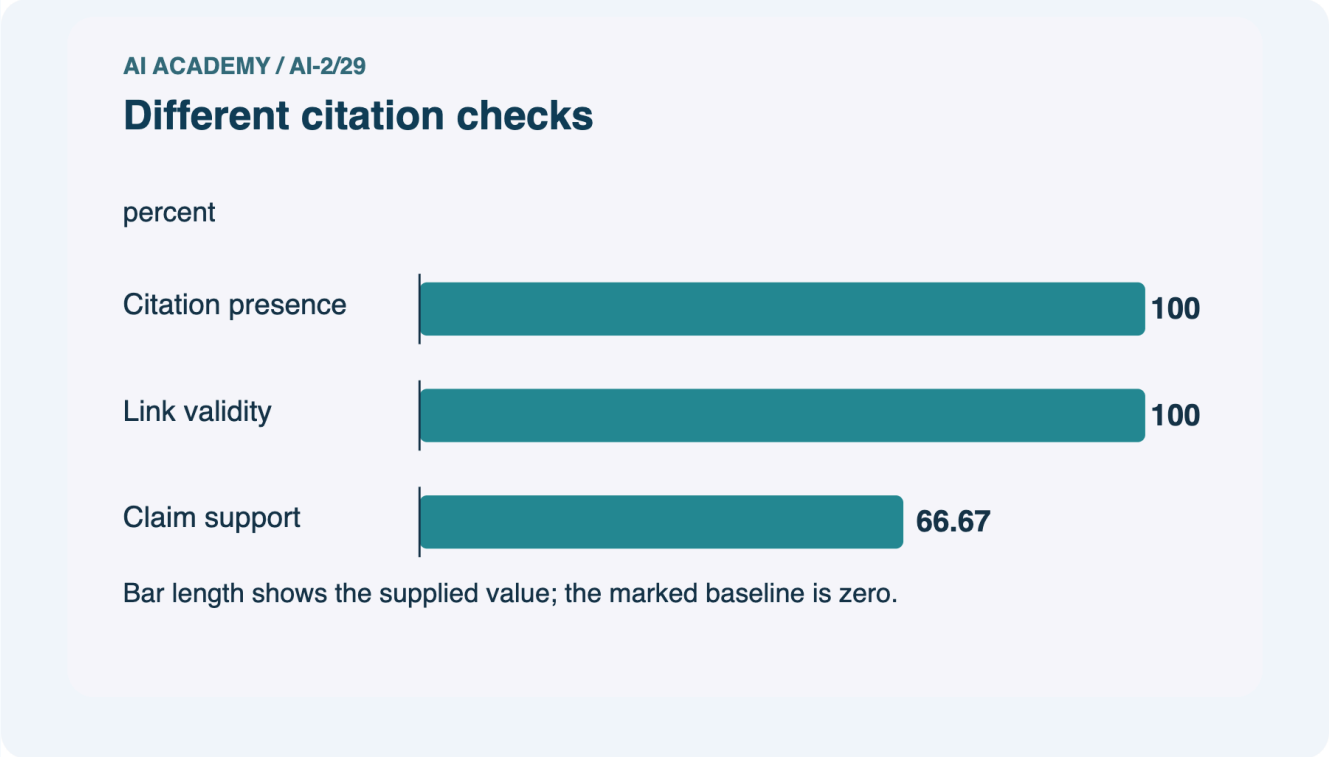

Follow the labelled picture with the matching explanation. Open the vector diagram

Break into **claim**s: Count three factual **claim**s rather than treating the answer as one blob. → Check links: All three citation links resolve to the intended R. → Check exact **source** support: R supports page count and shelf, not universal suitability. → Report separately: Citation presence 3/3; **link validity** 3/3; supported **claim**s 2/3.

Point to each numbered stage and explain which recorded **input** it uses.

03. Different citation checks

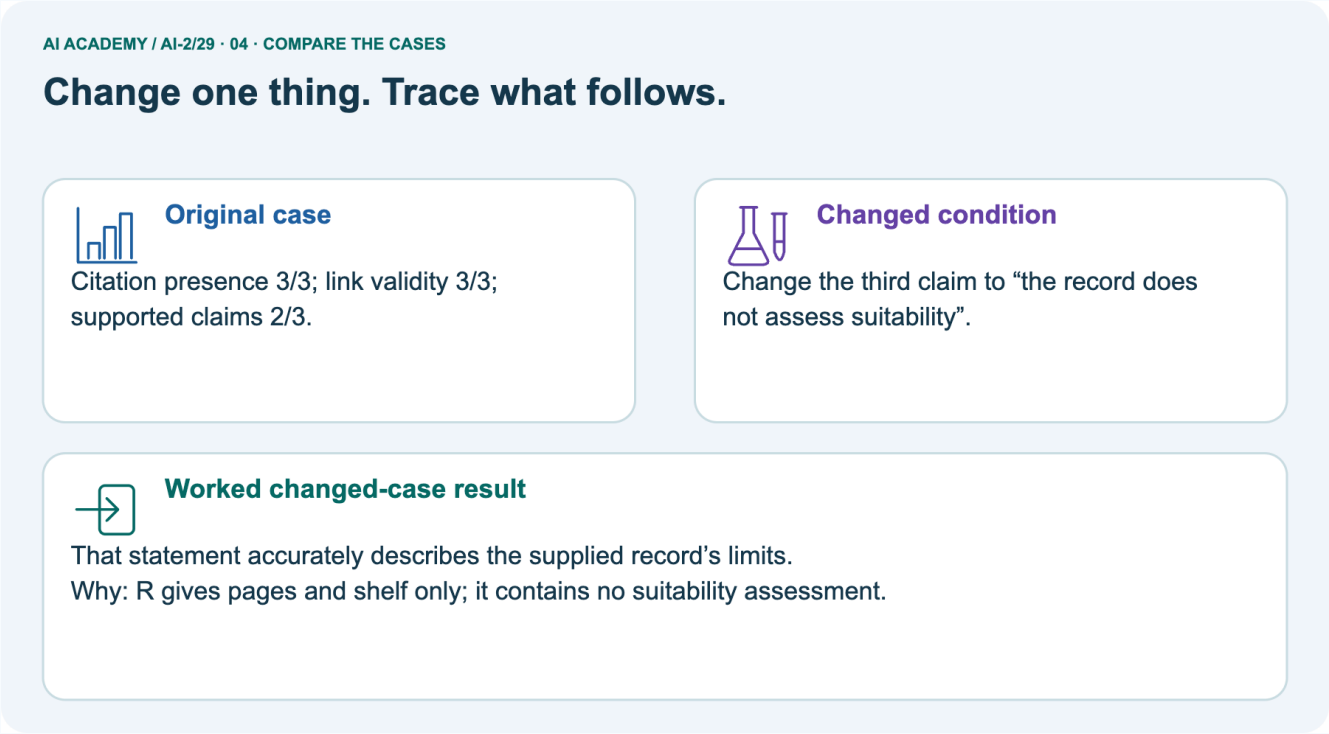

Follow the labelled picture with the matching explanation. Open the vector diagram

Different citation checks. Units: percent. Citation presence: 100. **Link validity**: 100. **Claim** support: 66.66666666666667.

Read the labels and values. Explain the relationship the model shows.

04. Change one thing. Trace what follows.

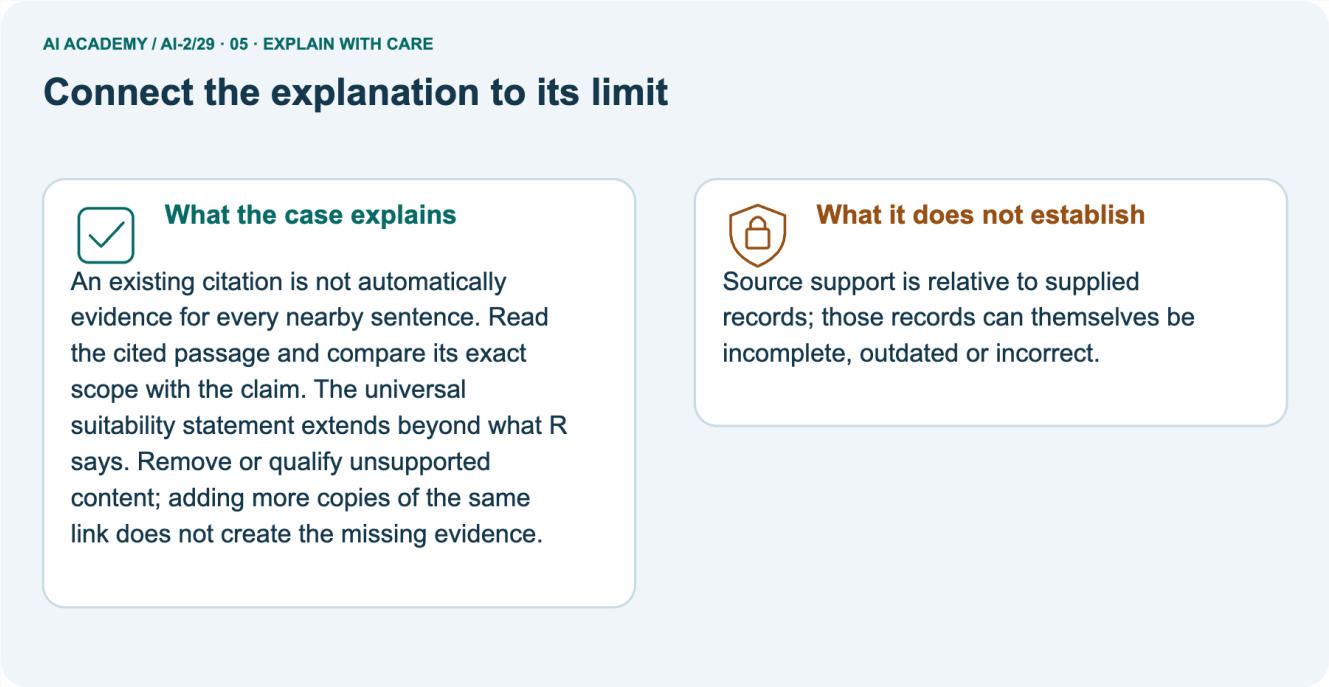

Follow the labelled picture with the matching explanation. Open the vector diagram

Original case: Citation presence 3/3; **link validity** 3/3; supported **claim**s 2/3. Changed condition: Change the third **claim** to “the record does not assess suitability”.

Expected result: That statement accurately describes the supplied record’s limits. Reason: R gives pages and shelf only; it contains no suitability assessment.

Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude.

05. Connect the explanation to its limit

Follow the labelled picture with the matching explanation. Open the vector diagram

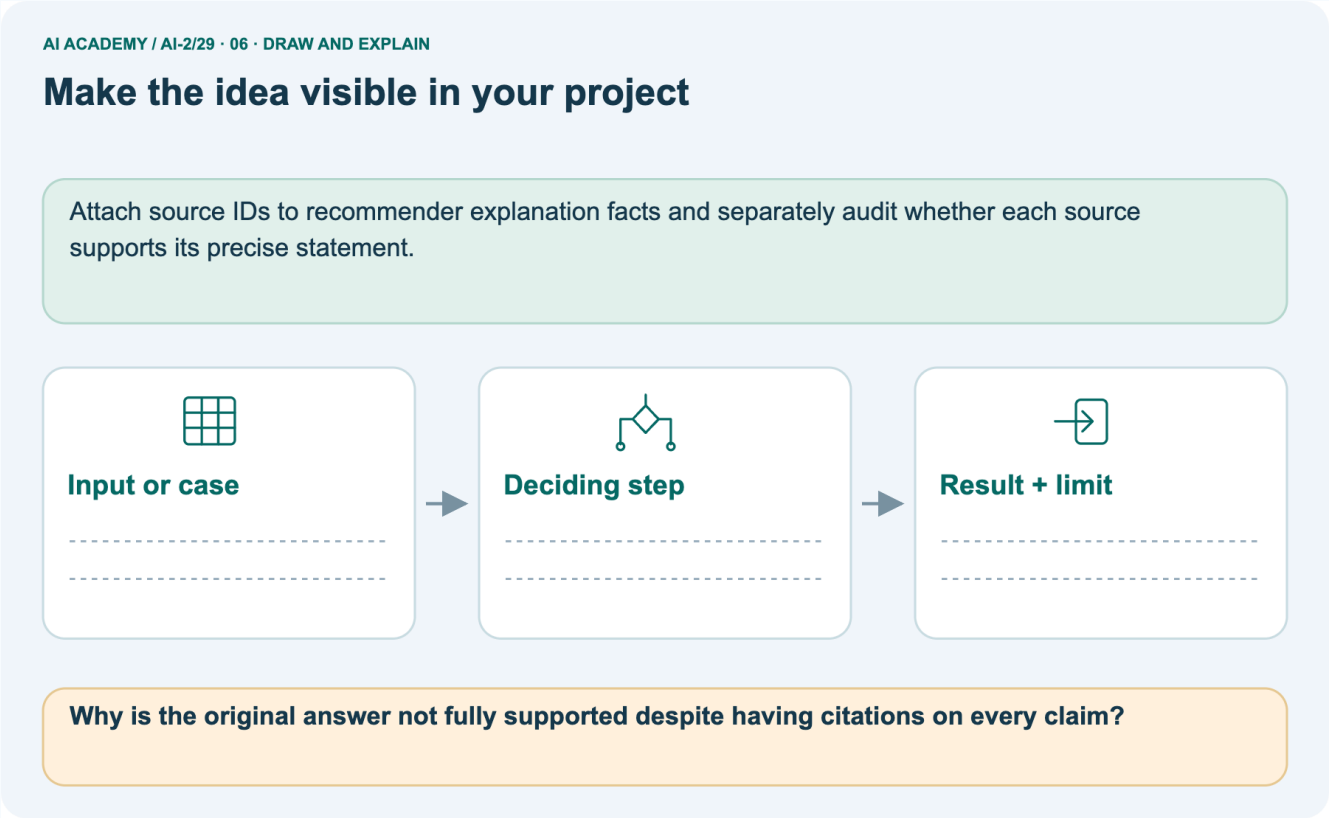

An existing citation is not automatically **evidence** for every nearby sentence. Read the cited passage and compare its exact scope with the **claim**. The universal suitability statement extends beyond what R says.

Remove or qualify unsupported content; adding more copies of the same link does not create the missing **evidence**.

Limit: **Source** support is relative to supplied records; those records can themselves be incomplete, outdated or incorrect.

Explain the case, then point to a limit on the **claim**.

06. Make the idea visible in your project

Follow the labelled picture with the matching explanation. Open the vector diagram

Attach **source** IDs to recommender explanation facts and separately audit whether each **source** supports its precise statement. Draw your **input**, deciding step, result and limit.

Supported question: Why is the original answer not fully supported despite having citations on every **claim**?

Draw your project trace and justify the deciding step using **evidence**.

▼ Earlier wording, alternatives and picture transcripts

01. Evidence and Sources: the case

02. Follow the deciding steps

03. Different citation checks

04. Change one thing. Trace what follows.

05. Connect the explanation to its limit

06. Make the idea visible in your project

▼ Optional interactive practice and completed work
