Source Quality

Learn to understand, design, build, test and explain AI systems responsibly.

Project: Verified Study Buddy

THE CONNECTED WEEK

Teach source usefulness for a precise time-scoped question.

Supply complete authority/origin facts,distinguish copies and unrelated official records,and assess the fresh amendment case.

Keep one habit: Ask which field establishes applicability and which unknown policy would prevent a supported choice.

MAIN LESSON · SECTION 1

Prepare this connected week

> Use one main plan and keep practice separate from the independent first attempt.

Learning goal and precision

Primary target: Explain the **mechanism** and terminology of conflicting and time-sensitive sources

Two 45-minute sessions. Changing facts require a stated time and source-version policy. Current-looking records can conflict without enough **evidence** to choose between them.

Use the supplied constructed scenarios to make the **mechanism** inspectable. Collect W4 before sharing solutions.

Students should name intermediate **evidence** and limitations; classroom pacing and learning effectiveness remain unvalidated.

By the end, I can apply source **authority** and effective dates rather than choosing the newest-looking upload.

What to prepare

- Use the supplied scenario, student illustrations and blank paper. For numeric work, offer counters or a calculator after learners show the setup. Fictional records are supplied; personal data and paid accounts are unnecessary.
- Lesson and workbook; paper and pencil
- Calculator and optional local Python 3 for arithmetic; no live API or private data
- Prepare the fresh retry separately and withhold its solution until after collection

Main teaching plan

Session · Sequence and minutes · Resources

> **Session:** Session 1 · Understand · 45 min
>
> **Sequence and minutes:** 0–7: recall and prerequisite; 7–15: inspect the concrete case and predict; 15–30: teacher models the worked trace; 30–40: learners explain a step using the text and visual; 40–45: check the core idea.
>
> **Resources:** Sections 1–6; record the brief recall in the workbook.

> **Session:** Session 2 · Practise · 45 min
>
> **Sequence and minutes:** 0–5: retrieve the procedure; 5–15: W2 completion practice; 15–23: explain and check with a partner; 23–30: each learner answers the misconception check; 30–40: targeted reteaching or a harder variation; 40–45: prepare the investigation.

> **Resources:** Sections 7–10; use the matching workbook W2 and misconception check.

> **Session:** Session 3 · Investigate and transfer · 45 min
>
> **Sequence and minutes:** 0–5: retrieve the decision rule; 5–20: investigate or trace; 20–30: start the independent case; 30–38: connect the project; 38–43: act on feedback; 43–45: plan the return check.
>
> **Resources:** Use “Run the investigation”, “Connect your project”, “Show what you know”, “Study a complete case” and “Try a new case independently”. Give extra time for the full task set. If this week has a coding lab, use its named section; section numbers can change when extra explanations are included.

This is a starting allocation of 135 minutes, not a validated duration. Preserve all named topics. Schedule extra time for connected examples, the full investigation, independent cases and project building.

Repeated copies of a case share one recorded attempt; they are not new **evidence**.

Opening retrieval and readiness

Without opening the old lesson, explain one key idea from Hallucination Failure Types. Give an example and a mistake that the idea helps you avoid.

Look for: Explain the **mechanism** and terminology of generation failures and verification

Reference example, not the only acceptable wording: Teacher explanation: Generated answers may invent facts, misread quantities or cite irrelevant passages.

Verification checks each claim against **evidence** rather than accepting fluent wording. Split an answer into atomic claims. For each, record the exact source passage, support status and any needed calculation.

Mark unsupported and contradicted claims separately; do not repair them by inventing sources.

Without opening the old lesson, explain one key idea from Speech and Audio Systems. Give an example and a mistake that the idea helps you avoid.

Look for: Explain the **mechanism** and terminology of speech pipelines and multimodal **evidence**

Reference example, not the only acceptable wording: Teacher explanation: A multimodal pipeline may transcribe speech, inspect an image and generate a response.

Errors at one stage can propagate even when later stages run correctly. Track source modality, segment/time references, transcription, interpretation and final claims separately.

Compare conflicting **evidence** without assuming one modality always wins. Ask for clarification when the task needs unresolved information.

Without opening the old lesson, explain one key idea from Prompt Evaluation. Give an example and a mistake that the idea helps you avoid.

Look for: Explain the **mechanism** and terminology of controlled prompt experiments

Reference example, not the only acceptable wording: Teacher explanation: A prompt experiment compares complete specifications using the same task cases.

Define success before inspecting **output**s; change one intended instruction and preserve other settings. Evaluate both prompts on paired cases with fixed model/version, source records, **output** contract and scoring rubric.

Use development results for selection, then reserve new final cases. Score each case rather than counting attractive sentences.

A result depends on the **input**s, procedure and conditions that produced it. Preserve data roles and distinguish observed outcomes from **prediction**s or unmeasured conditions.

If the prior concept cannot be explained, use a short retrieval activity before this chapter.

▼ Earlier wording, alternatives and picture transcripts

Teach the learning cycle

Retrieval answer guidance

Hallucination Failure Types

Speech and Audio Systems

Prompt Evaluation

Use the student module and workbook section with this exact week title. The worked case, independent question and answers below form one aligned lesson sequence.

What the learner must demonstrate

A school notice updated Friday conflicts with a blog quoting Monday's notice about a room change. Which source should you inspect first, and why is newest alone not enough?

Concept to explain

Authority, **relevance**, **currency**, and **independence** determine source usefulness.

Term	Meaning
authority	A person or source with relevant responsibility or evidence for a particular decision or claim.
relevance	How directly information helps answer the stated question or perform the task.
currency	How up to date information is for the task and time concerned.
independence	Separation from influences relevant to a judgment, such as keeping final test cases out of model selection.

Prepare the class

This compact option is not the full-week schedule. Use the main teaching cycle and allow extra sessions for the investigation, independent work and project.

Allow 80 minutes: recall 8; explanation 12; worked demonstration 15; guided practice 20; independent assessment 15; project and reflection 10. Extend the lab into a second session when needed.

Preparation for the connected explanation

Readiness answer

End goal for the pictorial case

This added worked case illustrates the week's main idea. Retain all original and connected topics; schedule its practice within the teaching cycle.

MAIN LESSON · SECTION 2

Teach relevance,origin and effective authority as separate checks

> Keep weekday and numbered-day records separately labelled.

State the version-policy contract

Changing facts require a stated time and source-version policy. Current-looking records can conflict without enough **evidence** to choose between them.

For this toy task a signed amendment supersedes the referenced original from its **effective time**. Keep both records. A newer timestamp alone has no **authority** unless the policy grants it.

Classroom policy: the supplied signed amendment supersedes its referenced original from the start of the stated effective day, including that day. An old record reuploaded later does not revoke the amendment. Signed status and issuer authority are givens for this exercise; no real signature or document authenticity is verified. Keep issued/uploaded dates, effective dates and version links as separate fields.

Trace the separate N/M weekday review

Notice N says room A from Monday. Signed amendment M references N and changes to B effective Wednesday. Query asks Tuesday, then Thursday.

Tuesday uses A; Thursday uses B. The amendment **effective time**, not merely upload order, determines the change.

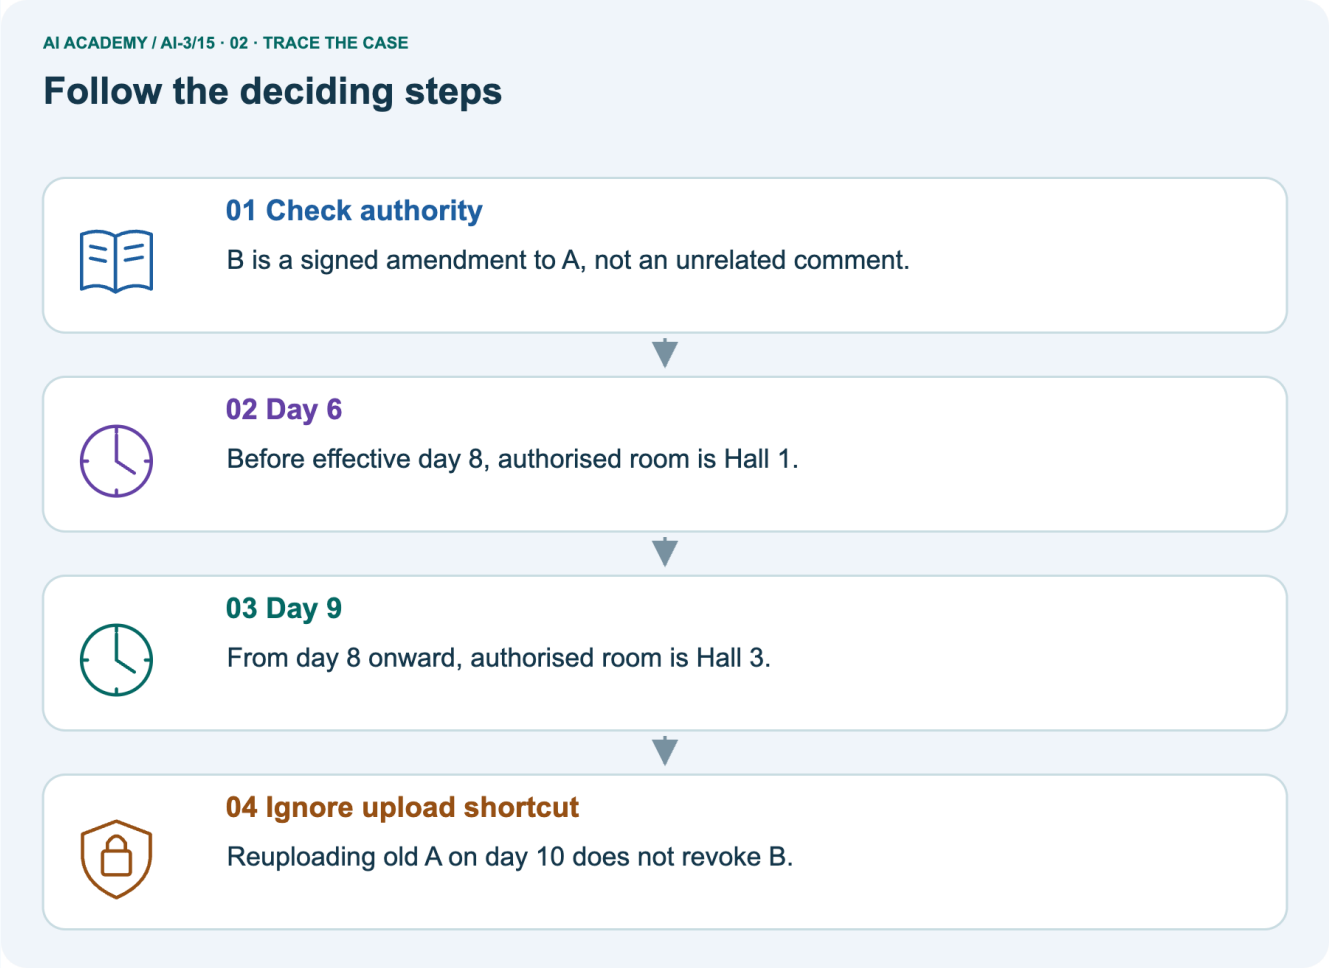

Read the numbered-day A/B case

A fictional Study Buddy answers which room a club is authorised to use.

Signed notice A: Hall 1 from day 1. Signed amendment B references A and changes to Hall 3 effective day 8.

An old copy of A is reuploaded on day 10. B remains the authoritative amendment. Queries concern day 6 and day 9.

Trace the declared assignment chain

Follow the labelled picture with the matching explanation. Open the vector diagram

Read the picture one step at a time

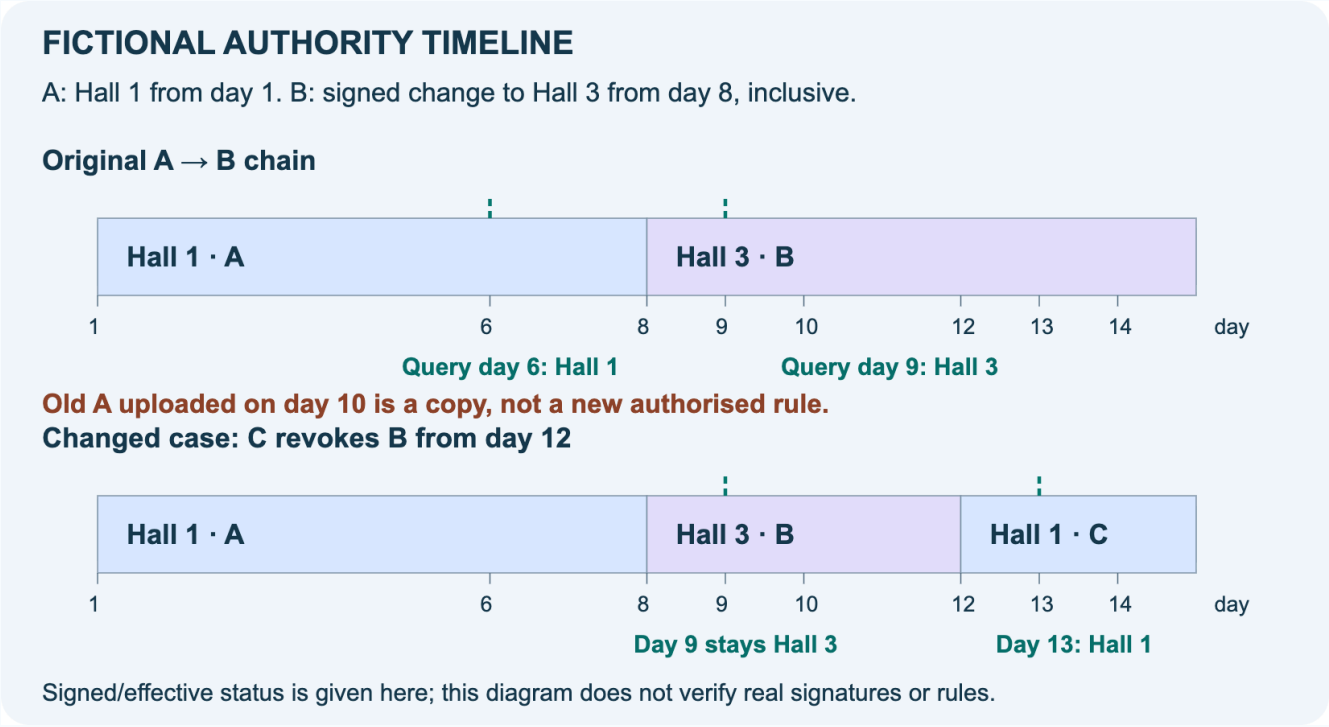

STEP	WHAT HAPPENS AND WHY
1. Check authority	B is a signed amendment to A, not an unrelated comment.
2. Day 6	Before effective day 8, authorised room is Hall 1.
3. Day 9	From day 8 onward, authorised room is Hall 3.
4. Ignore upload shortcut	Reuploading old A on day 10 does not revoke B.

Match each pictured step to the supplied facts. This is a worked teaching case, not an independent assessment.

A source's upload time and the time its rule takes effect answer different questions. Preserve version relationships and the query's intended date. The current authoritative chain gives a consistent answer to both queries.

A later filename or timestamp alone cannot establish that an old record supersedes a signed amendment.

Inspect base and changed timelines

Predict the explicit C revocation

Change: A signed amendment C explicitly revokes B effective day 12 and restores Hall 1.

Prediction: Day 9 stays Hall 3; day 13 becomes Hall 1.

Reason: The new authoritative change applies from its stated effective date, not retroactively.

State limits on real authority verification

Authority is declared in this fictional case; real conflicting sources may require the responsible owner's review.

Cover the result. Ask learners to name the **input**s and predict the next step. Uncover one step, connect the icon to the actual procedure, and explain its **evidence**. Then change the supplied condition and compare.

The picture is a representation; it does not document execution of a real AI model.

▼ Earlier wording, alternatives and picture transcripts

Explain the mechanism

Input → Process → Output

Trace the information. At each stage, ask what changed and how you could test it.

Which stage could fail even when the other two are correct? Explain:

Predict first. Then check each step. A correct answer without visible reasoning is incomplete **evidence**.

1. A museum page may be authoritative for artifact facts.

2. A current weather agency page matters more for today's storm.

3. Two articles copying one press release are not independent.

4. Rank sources by the actual claim—not by appearance alone.

Recalculate, retrace, or restate the reasoning in your own representation:

CHECK Did the **evidence** answer the exact question? Did the total, path, or source record stay consistent?

Concrete teaching case

An original experiment report and an anonymous unlinked summary describe a method.

Where should verification begin?

Exact explanation to model

Read the original method, scope and limitations. Original does not mean infallible; summaries may omit conditions.

Explain the added worked example

Begin by writing the question the procedure is intended to answer. Identify the information already supplied, the information it will produce and the information still missing.

These are constructed classroom examples; they do not require live accounts, private records or an external service. Do not treat a plausible explanation as a measured outcome.

Before applying the procedure, write its units, denominator or decision boundary where relevant. A partner should be able to repeat each step using the same **input**s.

If a required **input** is absent or violates the stated contract, record that condition explicitly instead of quietly replacing it with a convenient value.

Key terms

Term	Meaning
Effective time	When a declared change begins to apply
Supersession	A documented replacement relationship between versions
Temporal scope	The time conditions a claim concerns

Model the reasoning aloud

Use the complete worked example below before asking learners to complete W2. Reveal a small part, invite a **prediction**, then explain the deciding step.

These teacher notes contain solutions; do not reveal the independent case answer during modelling.

Compare the intermediate **evidence** with the final statement. Explain why each number or decision follows from the stated **input**s.

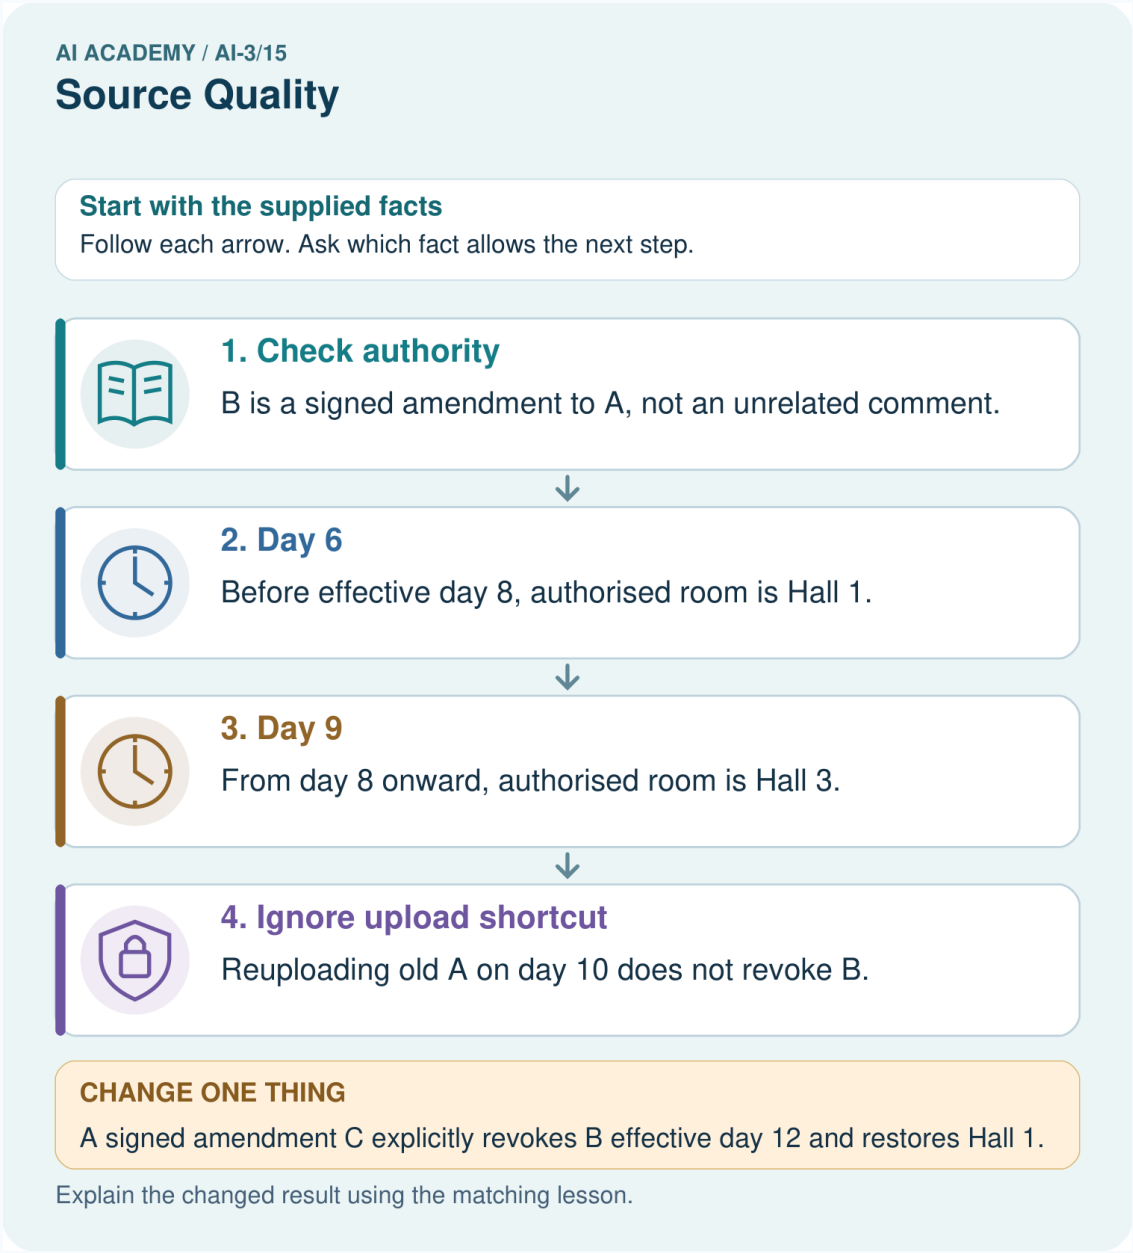

The conclusion belongs to this scenario and procedure; changing the **input**s, evaluation population or **authority** can change what it establishes. Retain the raw record so a later revision can be compared honestly.

Thinking move	Teacher prompt
Plan	What is given? What is the question? Which procedure fits these facts?
Do	Point to each input and intermediate step in the worked trace. Name the rule that allows the next step.
Check	Does the output answer the question? Which assumption or limitation prevents a larger claim?

Use the diagram and verbal explanation together. Ask learners to match a sentence to a specific visual step; do not assign learners fixed visual or auditory learning styles.

A pictorial worked case: Source Quality

The facts we will use

Follow the labelled picture with the matching explanation. Open the vector diagram

Why this result follows

What this example does not establish

Change one thing in the pictured case

Ask while showing the picture

MAIN LESSON · SECTION 3

Guide the explanation, then remove help

> Collect each learner’s reasoning before showing feedback.

Main completion prompt

Completion task: Notice N says room A from Monday. Signed amendment M references N and changes to B effective Wednesday. Query asks Tuesday, then Thursday. Show the intermediate steps and give the conclusion with its scope.

Expected reasoning and fading help

Teacher check: Teacher explanation: Tuesday uses A; Thursday uses B. The amendment **effective time**, not merely upload order, determines the change.

Start by identifying the given **input**s together. Leave the intermediate steps blank. If needed, model one step, then withdraw that help on the next step. Move to a full trace only when the partial trace is understood.

For partners, alternate explainer and checker; collect a response from every learner before discussion.

Individual misconception check

Use the worked case for Conflicting and time-sensitive sources. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported.

Point to the step or supplied fact that decides; explain your repair if needed.

Expected correction: An unspecified **authority** or effective-time rule leaves a conflict unresolved; do not invent precedence.

Collect explanations, not only yes/no votes. If a misunderstanding is common, re-model the relevant step for the class.

If it affects a few learners, give a short targeted group explanation while others solve a more demanding variation.

Pictorial question and changed-case reasoning

Which source fields must be checked before answering day 9?

The amendment's **authority**, reference to A, effective day 8 and queried day 9; the answer is Hall 3.

Changed-case reasoning: Day 9 stays Hall 3; day 13 becomes Hall 1. The new authoritative change applies from its stated effective date, not retroactively.

Collect each learner's explanation before discussion. Use the first missing connection between **input**, deciding step and result to choose support. This question is worked-case practice, not fresh mastery **evidence**.

Keep each learner explaining

- Ask: Which facts are given, and which would we have to assume? Learners mark relevant details before discussing answers.
- Say: Predict first. Show the rule, information path or calculation that would produce the result. A correct guess is not yet an explanation.
- In pairs, one learner solves while the other checks **evidence**; exchange roles. Remove the worked answer before independent assessment.

▼ Earlier wording, alternatives and picture transcripts

Demonstrate and guide practice

Board sequence

Write the given facts: An original experiment report and an anonymous unlinked summary describe a method.

Write the question to explain: Where should verification begin?

Reveal after **prediction**s: Read the original method, scope and limitations. Original does not mean infallible; summaries may omit conditions.

Use the earlier changed question as optional later practice. Reserve Trace a new capacity version independently for the first independent attempt before hints or feedback.

Classroom dialogue

Reveal reasoning one step at a time. Explain why a tempting alternative fails. Write units and denominators for arithmetic, trace conditions for decisions, and identify supporting sources for claims.

Model these guided questions

Guided: Tuesday uses A; Thursday uses B. The amendment **effective time**, not merely upload order, determines the change.

Qualification: An unspecified **authority** or effective-time rule leaves a conflict unresolved; do not invent precedence.

Exit: accept a concrete variation with its predicted outcome and a stated condition that would challenge the **mechanism**; reject a claim resting on unmeasured **evidence**.

Case-specific teaching sequence

Stage	Teacher action
Session 1: 0–7 minutes	Retrieve the prerequisite; identify the input, procedure and evidence source.
7–18 minutes	Explain section 1 and vocabulary. Complete W1 with a mechanism-based explanation.
18–32 minutes	Trace the declared procedure and worked case. Complete W2, recording intermediate steps.
32–45 minutes	Discuss the diagram with the worked input; use W3 to distinguish measured claims and limitations.

Stage	Teacher action
Session 2: 0–8 minutes	Retrieve the worked reasoning and collect the guided response before discussing it.
8–20 minutes	Compare a proposed boundary variant with the original case; identify what remains fixed.
20–35 minutes	Collect W4 independently. Require the procedure trace and the bounded conclusion.
35–45 minutes	Use W5 and exit responses for feedback. Administer the fresh retry after feedback and preserve both attempts.

Reduce help deliberately

Individual reasoning check

Pictorial practice question

Reasoned teacher answer

MAIN LESSON · SECTION 4

Run the supplied investigation

> Keep expected results, observed paper traces and remaining limits distinguishable.

Supplied materials and answer guidance

Four-card lab: A+B supports the club C7 assignment on day 9 as Hall 3. C is an unsigned copy of A and adds no independent confirmation; D concerns availability rather than club assignment. A+B is one authority chain. The base timeline gives Hall 1 on day 6 and Hall 3 on day 9. Adding C from day 12 leaves day 9 unchanged and gives Hall 1 on day 13. The separate weekday review uses N for Tuesday and M for Thursday.

Signed and effective status are supplied facts, not digitally verified. Keep the independent capacity task withheld.

Run and record

1. Predict → Test → Record → Explain
2. Keep expected and actual results separate. Surprises are useful data when recorded honestly.
3. Audit the four supplied fictional source cards for the club C7day9assignment. Record authority,relevance,effective dates and origin links without inventing numeric weights. Distinguish an amendment chain from independent corroboration and availability from authorisation.
4. What did the hardest test teach you that the normal test did not?

Keep an inspectable record

Record	What to capture
Input or evidence	Exact data, instruction or claim
Expected result	Answer or safe fallback declared before the run
Observed result	Actual result, including errors
Explanation	Rule, calculation or evidence explaining the outcome
Next test	One justified change and a new prediction

Diagnose the first misunderstanding

The worked result establishes every future case: An unspecified **authority** or effective-time rule leaves a conflict unresolved; do not invent precedence.

A missing **input** may be replaced without recording the change: A replacement changes the **evidence** or contract. Record the change and its justification; do not silently turn unknown into a measured value.

Repeating an assessed case is new independent **evidence**: A replay checks consistency. An example used for feedback or revision cannot later be described as untouched final evaluation.

Choose support from the response

What the response shows	Next teaching action
Missing or misread facts	Read the case aloud, mark supplied versus unknown facts, and let the learner restate it.
Wrong procedure	Return to the deciding step in the worked case. Contrast it with the proposed incorrect explanation.
Arithmetic or implementation error	Trace intermediate values or lines; preserve the first mismatch and retry that step.
Correct result without a reason	Ask for a trace and a changed case before marking independent understanding.
An unsupported wider claim	Ask which supplied evidence supports the claim and which further observation would be needed.

Offer an oral explanation, drawing, enlarged visual or fewer examples when that removes a reading/writing barrier. Keep the same reasoning goal.

Stretch secure learners by changing a boundary or assumption and asking them to defend the effect, not simply by assigning more of the same questions.

▼ Earlier wording, alternatives and picture transcripts

Run the weekly evidence lab

Words You Can Use to Reason

A definition matters when you can recognize the idea, use it, and contrast it with a near-miss.

Make the lab runnable

Use the supplied investigation for shared practice. Keep predictions and observed paper-trace results separate. Reserve Trace a new capacity version independently for the individual first attempt before feedback; do not use the reserved case as a paired lab task.

Diagnose and reteach

For guessing, return to given facts and request a trace. For vocabulary without application, use one example and one non-example. For arithmetic errors, check the setup before the calculation.

Finish with a different uncoached case before recording mastery.

Address these additional misconceptions

Match the support to the first error

MAIN LESSON · SECTION 5

Assess the selected new case

> Keep this key until after the first attempt; accept valid alternatives with defensible reasoning.

Selected independent question and key

Selected case: Original allows capacity 14. Signed amendment lowers it to 9 effective day 5. Query concerns days 4 and 6. Trace both and preserve versions.

Teacher explanation: Day 4 limit 14; day 6 limit 9. Cite the applicable version and retain the **supersession** link.

Judge explanation, trace and limits

Dimension	Evidence required
Explanation	Names the applicable idea or procedure and ties it to the supplied facts.
Trace and result	Preserves the given inputs and shows the relevant intermediate steps; distinguishes a prediction from an observed execution.
Limits	States the assumptions, missing evidence or conditions under which the result would change.

Record each dimension as not yet, with support, or independent. Accept a valid alternative procedure with a defensible trace.

Do not penalise an honestly recorded model failure if the learner correctly explains its **evidence** and limits.

Give one usable repair action

Name the earliest unsupported step and give one action to repair it. Have the learner make that repair now and explain why. Then assess the relevant skill on a fresh, fully specified case.

Confirm it was not previously practised with feedback; solve and check the new case before assigning it. A follow-up design prompt is a starting brief, not automatically an equivalent test.

W1 Explain the mechanism

Explain the weekly **mechanism** in your own words. Use the worked scenario to name its **input**, decision rule and **output**.

Teacher explanation: Changing facts require a stated time and source-version policy. Current-looking records can conflict without enough **evidence** to choose between them.

For this toy task a signed amendment supersedes the referenced original from its **effective time**. Keep both records. A newer timestamp alone has no **authority** unless the policy grants it.

W2 Trace the worked case

Notice N says room A from Monday. Signed amendment M references N and changes to B effective Wednesday. Query asks Tuesday, then Thursday. Show the intermediate steps and give the conclusion with its scope.

Teacher explanation: Tuesday uses A; Thursday uses B. The amendment **effective time**, not merely upload order, determines the change.

W3 Audit the limit

A report omits this qualification: An unspecified **authority** or effective-time rule leaves a conflict unresolved; do not invent precedence.

Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

Teacher explanation: An unspecified **authority** or effective-time rule leaves a conflict unresolved; do not invent precedence.

State the observed result separately from the unverified or out-of-scope claim; preserve the original **evidence** rather than inventing a missing fact.

W5 Design a revealing follow-up

For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison.

Do not reuse W4 as a new final test after receiving feedback.

Teacher explanation: Accept a concrete variant of the worked **input** or a missing/conflicting/boundary condition, with an expectation derived from the declared procedure.

Require preserved settings, original **output**s and data roles. An unspecified **authority** or effective-time rule leaves a conflict unresolved; do not invent precedence.

The new case should test this particular **mechanism** rather than merely restate the original result.

▼ Earlier wording, alternatives and picture transcripts

Assess and explain the answers

Worked case answer

Read the original method, scope and limitations. Original does not mean infallible; summaries may omit conditions.

Additional transfer practice question

For a school's current opening time, compare an undated repost with a dated notice issued by the school. Which is the stronger starting source, and what must still be checked?

Reasoned practice answer

Start with the school's notice. Check that the date, campus and term apply to the question and that no newer notice supersedes it.

What counts as evidence

Criterion	0 points	1 point	2 points
Result	Incorrect or absent	Partly correct	Correct with necessary conditions
Reasoning	No supporting trace	Some steps	Clear mechanism, calculation or source support
Limit	Overclaims certainty	Vague limitation	Relevant uncertainty or missing fact
Transfer	Copies without adapting	Adapts with prompts	Solves a changed case independently

Use 6/8 as a classroom checkpoint, with 2 required for both Result and Reasoning. This is a proposed teaching rule, not a validated certification threshold.

Do not count a coached answer as independent mastery; correct unsafe or unsupported claims regardless of total.

Feedback

Ask the learner to find the **evidence** that challenges this claim: “Any official-looking page is current and relevant automatically.” Keep the first attempt and an uncoached retry separate.

Original transfer answer

Inspect the school's current notice because it is responsible for the room assignment and may supersede Monday's version. Confirm it concerns the same event and date.

A newer unrelated or unofficial source would not automatically override an authoritative notice.

Explanations for the additional workbook examples

W1 Explain the mechanism

W2 Trace the worked case

W3 Audit the limit

W4 Apply a new case independently

Original allows capacity 14. Signed amendment lowers it to 9 effective day 5. Query concerns days 4 and 6. Trace both and preserve versions.

Teacher explanation: Day 4 limit 14; day 6 limit 9. Cite the applicable version and retain the **supersession** link.

W5 Design a revealing follow-up

Assess independent transfer

Selected case answer

Feedback that the learner uses

MAIN LESSON · SECTION 6

Connect, adapt and return

> Retain the project evidence and revisit the reasoning on a changed case.

Project evidence to keep

Use an approved source list and record why each source fits the learner's question.

Keep the decision, **input**, result, explanation and remaining limitation in the project **evidence** record. Retrieve this record next week rather than restarting the project.

Store Study Buddy source identity, version, **authority** and effective date, especially for schedules or changing classroom rules.

Support while preserving the reasoning goal

Provide one short approved passage; separate instruction, **input**, **output** and **evidence**. Stretch: introduce an unsupported claim or conflicting source and validate claim by claim with a fallback.

Provide an **input**/procedure/result/limit frame and a calculator when needed. Ask students to identify the first step before completing the whole trace.

Extension: compare two concrete variants of this **mechanism** while holding unrelated conditions fixed; report both successful and unsuccessful outcomes.

W4: Day 4 limit 14; day 6 limit 9. Cite the applicable version and retain the **supersession** link. Require intermediate reasoning and the stated scope.

Fresh retry: Original closing 18:00; amendment closing 17:00 effective day 10; queries days 9 and 10. Expected reasoning: Day 9 uses 18:00; day 10 uses 17:00 under the inclusive effective-time rule.

If students need support, record it and reassess with another new case rather than awarding **independence** to a copied answer.

Plan the delayed check

Suggested return points in this level: ai-3/16, ai-3/18, ai-3/21. Use actual classroom dates, adjusting for holidays and gaps. One, three and six teaching weeks are scheduling choices, not a claimed optimal spacing.

At a delayed check, ask for the idea from memory and a changed application. Compare with the earlier independent response and record support used.

For a new level, revisit the previous capstone before checking the new prerequisites.

Record	Teacher evidence
Learner code and date	
Concept and case used; prior exposure	
Explanation / trace / limits	
Support and first repair	
Changed case and delayed outcome	
Next teaching action	

Use the **evidence** to choose reteaching or the next step. A completed page, confidence rating or attractive project does not by itself demonstrate understanding.

Bridge to next week

Ask for one decision the learner can now justify and one situation requiring more **evidence** or human review. Confidence ratings are separate from correct independent performance.

Next: Week 16: Verify Numbers and Dates. Retrieve today's **evidence** and identify what carries forward and what is new.

Next is Week16: Verify Numbers and Dates. Carry forward source identity,effective times and query scope when checking a calculated value or date.

▼ **Reference: alternative planning checklist**

REFERENCE · SECTION 7

Reference: alternative planning checklist

> Use as a reminder alongside the main route rather than teaching the cycle twice.

Preparation and schedule

Teaching target: Explain the **mechanism** and terminology of conflicting and time-sensitive sources

Prepare the labelled worked-case picture, the matching workbook, fictional **input** cards and a place for individual responses. No paid AI account is required for the paper reasoning activities.

Session · Plan · Resources

> **Session:** Session 1 · Understand · 45 min
>
> **Plan:** 0–7: recall and prerequisite; 7–15: inspect the concrete case and predict; 15–30: teacher models the worked trace; 30–40: learners explain a step using the text and visual; 40–45: check the core idea.
>
> **Resources:** Sections 1–6; record the brief recall in the workbook.

> **Session:** Session 2 · Practise · 45 min

> **Plan:** 0–5: retrieve the procedure; 5–15: W2 completion practice; 15–23: explain and check with a partner; 23–30: each learner answers the misconception check; 30–40: targeted reteaching or a harder variation; 40–45: prepare the investigation.
>
> **Resources:** Sections 7–10; use the matching workbook W2 and misconception check.

> **Session:** Session 3 · Investigate and transfer · 45 min
>
> **Plan:** 0–5: retrieve the decision rule; 5–20: investigate or trace; 20–30: start the independent case; 30–38: connect the project; 38–43: act on feedback; 43–45: plan the return check.
>
> **Resources:** Use “Run the investigation”, “Connect your project”, “Show what you know”, “Study a complete case” and “Try a new case independently”. Give extra time for the full task set. If this week has a coding lab, use its named section; section numbers can change when extra explanations are included.

Practice and assessment reminders

Before class, solve the supported practice: Notice N says room A from Monday. Signed amendment M references N and changes to B effective Wednesday. Query asks Tuesday, then Thursday.

Show the intermediate steps and give the conclusion with its scope.

Reasoned practice answer: Teacher explanation: Tuesday uses A; Thursday uses B. The amendment **effective time**, not merely upload order, determines the change.

Check every learner before discussion: Use the worked case for Conflicting and time-sensitive sources. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported.

Point to the step or supplied fact that decides; explain your repair if needed.

Misconception repair: An unspecified **authority** or effective-time rule leaves a conflict unresolved; do not invent precedence.

Support: read the exact case aloud, enlarge the labelled picture, supply **input** cards and model only the first deciding step. Accept a spoken explanation or drawing; retain the reasoning goal.

Extension: A signed amendment C explicitly revokes B effective day 12 and restores Hall 1. Require a **prediction** and a reason before comparing. Expected result: Day 9 stays Hall 3; day 13 becomes Hall 1.

Reason: The new authoritative change applies from its stated effective date, not retroactively.

Independent assessment: withhold the reserved answer until the learner has attempted the new case. Record support separately from correctness.

Criterion	Not yet	With support	Independent
Explanation	Names an answer without a deciding fact	Uses a hint to link fact and decision	Explains the deciding fact in own words
Trace or test	Cannot connect input and result	Completes steps with prompts	Traces or tests a changed case accurately
Limits and revision	Claims more than evidence supports	Names a limit after a prompt	States a defensible limit and useful next test

Project checkpoint: Test changed cases. Keep normal, boundary and failure cases; compare expected and observed results.

Use the weekly teacher answer for topic-specific reasoning. A saved progress tick is an activity record; judge mastery from the learner's explanation and **evidence**.

▼ **Reference: feedback and records**

REFERENCE · SECTION 8

Reference: feedback and records

> Use digital tools where they help retain an explanation and its evidence.

Keep practice and independent evidence separate

Use the two formative questions as supported practice, not as independent mastery scores. Discuss the deciding **evidence** rather than accepting a guessed selection.

The feedback comes from the reviewed public worked case. Do not reveal the separately reserved independent teacher answer until the learner has attempted that case.

Repair and portfolio records

Use the earlier worked-explanation links to address a specific missing building block, then return to the current question. Adapt this suggestion after observing the learner; it is not an automatic diagnosis.

Collect the completed-work portfolio as **evidence**. Record support separately from correctness, and assess explanation, trace/test and limitations. Progress ticks and quiz selections alone do not establish mastery.

<details>
<summary>Earlier wording, alternatives and picture transcripts</summary>

This week has no code block. Use this routine when a later lesson includes an executable lab.

Ask students to predict before running code. Preserve errors and actual **output**s; collect a changed test and an explanation. The branch-boundary and indexing lessons deliberately include failure cases.

REFERENCE · SECTION 9

Reference: teach with the six pictures

> Choose the picture for the teaching move and connect it to the explanation.

01. Source Quality: the case

Follow the labelled picture with the matching explanation. Open the vector diagram

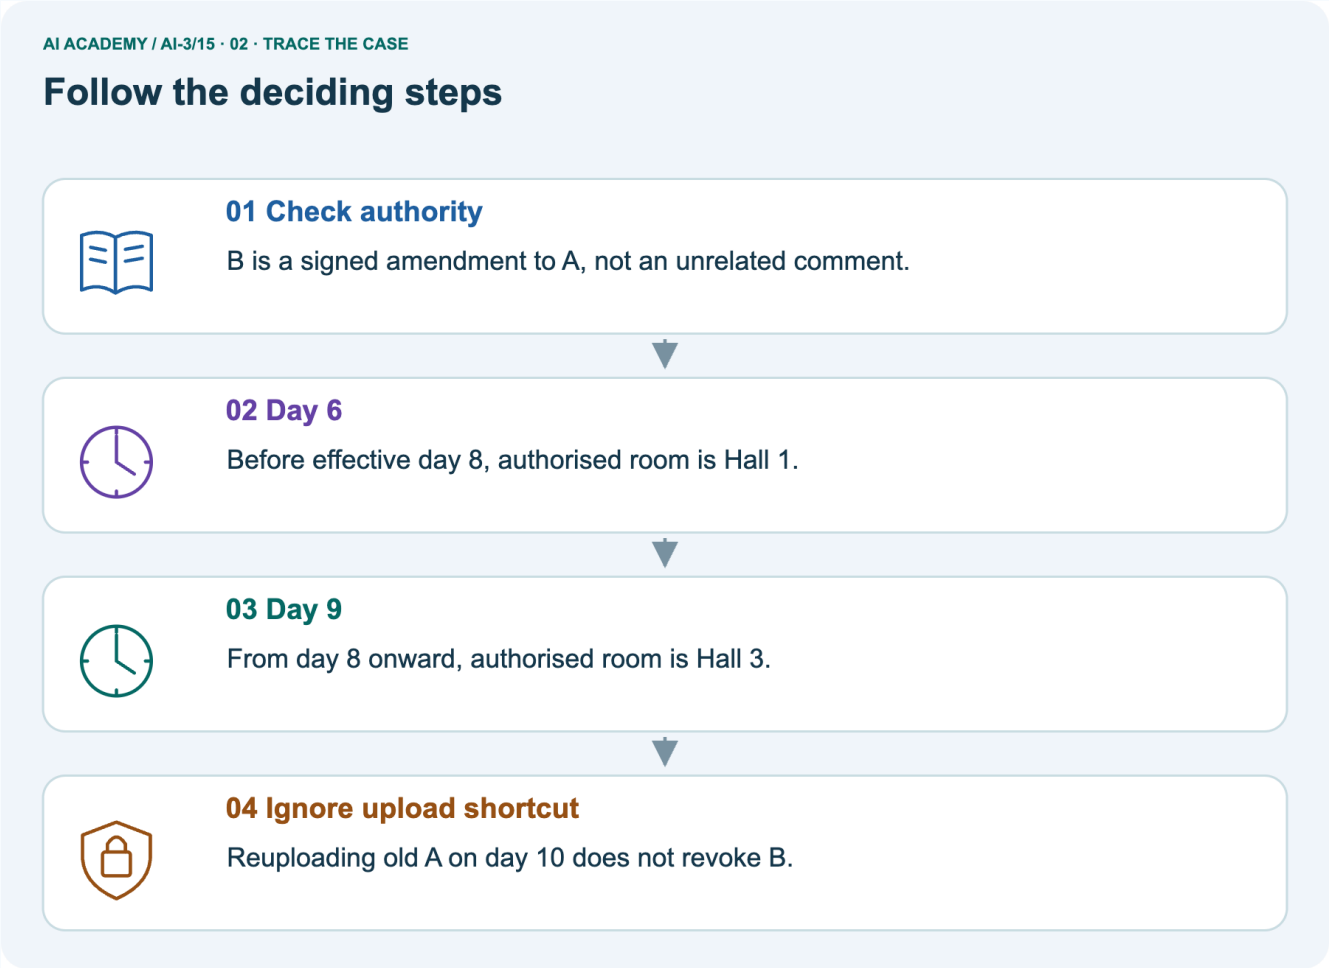

A fictional Study Buddy answers which room a club is authorised to use. Supplied facts: Signed notice A: Hall 1 from day 1. Signed amendment B references A and changes to Hall 3 effective day 8.

An old copy of A is reuploaded on day 10. B remains the authoritative amendment. Queries concern day 6 and day 9.

Point to the given fact that matters most. Explain why it matters.

Teacher prompt: Point to the given fact that matters most. Explain why it matters. Ask learners to describe one label or arrow in ordinary words. Use the adjacent transcript if the image is difficult to see.

02. Follow the deciding steps

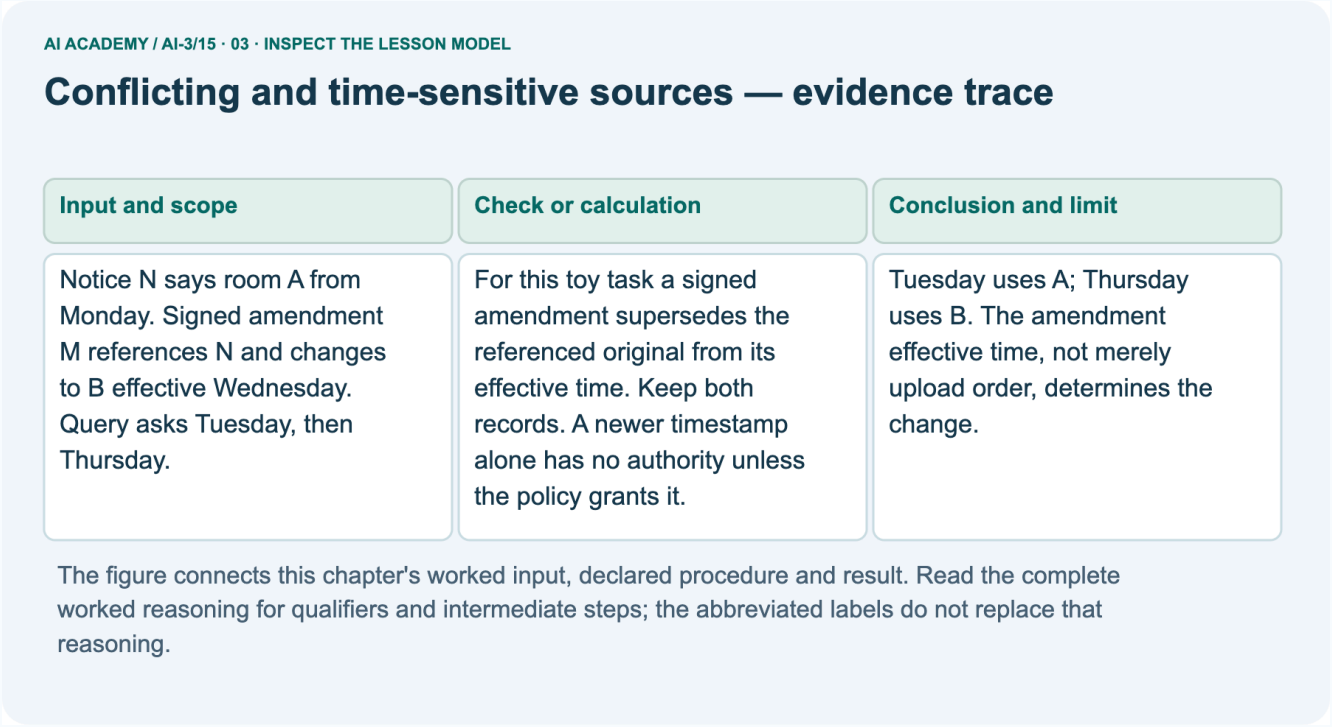

Follow the labelled picture with the matching explanation. Open the vector diagram

Check **authority**: B is a signed amendment to A, not an unrelated comment. → Day 6: Before effective day 8, authorised room is Hall 1. → Day 9: From day 8 onward, authorised room is Hall 3. → Ignore upload shortcut: Reuploading old A on day 10 does not revoke B.

Point to each numbered stage and explain which recorded **input** it uses.

Teacher prompt: Point to each numbered stage and explain which recorded **input** it uses. Ask learners to describe one label or arrow in ordinary words. Use the adjacent transcript if the image is difficult to see.

03. Conflicting and time-sensitive sources — evidence trace

Follow the labelled picture with the matching explanation. Open the vector diagram

Conflicting and time-sensitive sources — **evidence** trace. Notice N says room A from Monday. Signed amendment M references N and changes to B effective Wednesday.

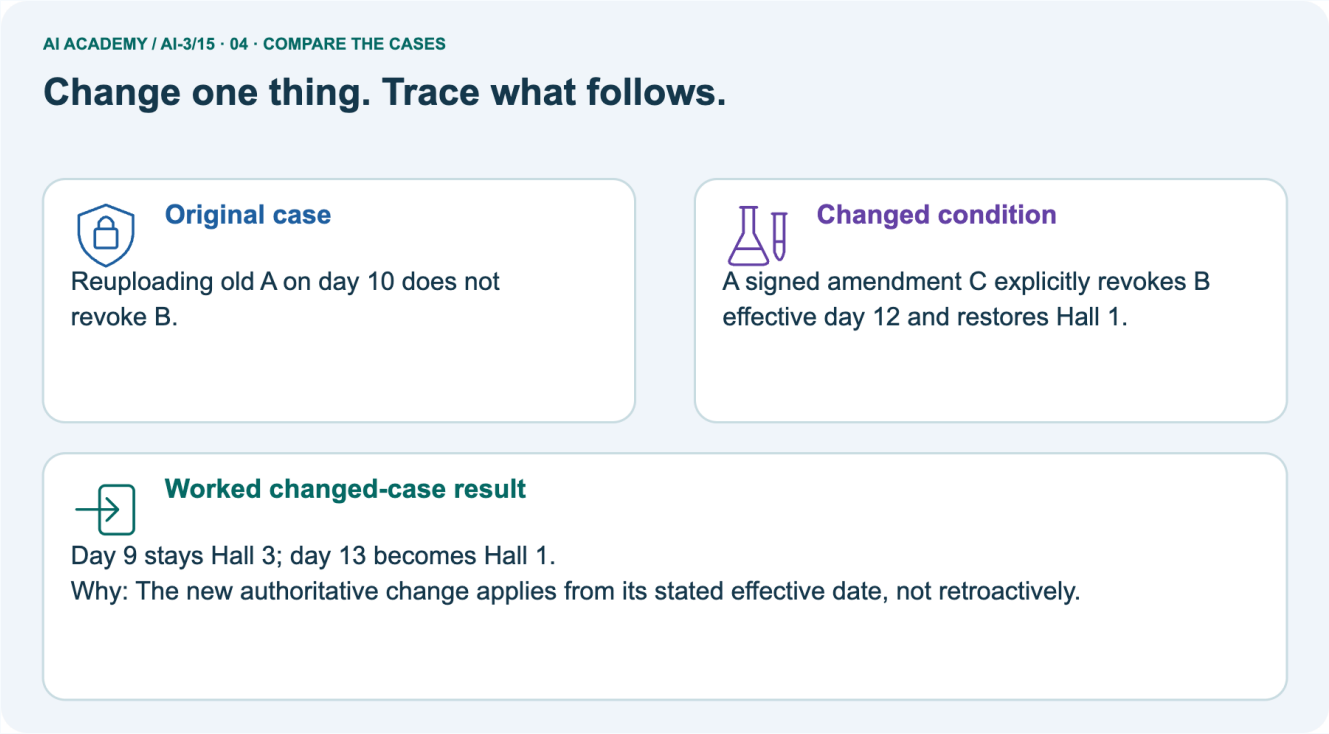

Query asks Tuesday, then Thursday. | For this toy task a signed amendment supersedes the referenced original from its **effective time**. Keep both records.

A newer timestamp alone has no **authority** unless the policy grants it. | Tuesday uses A; Thursday uses B. The amendment **effective time**, not merely upload order, determines the change.

Read the labels and values. Explain the relationship the model shows.

Teacher prompt: Read the labels and values. Explain the relationship the model shows. Ask learners to describe one label or arrow in ordinary words. Use the adjacent transcript if the image is difficult to see.

04. Change one thing. Trace what follows.

Follow the labelled picture with the matching explanation. Open the vector diagram

Original case: Reuploading old A on day 10 does not revoke B. Changed condition: A signed amendment C explicitly revokes B effective day 12 and restores Hall 1. Expected result: Day 9 stays Hall 3; day 13 becomes Hall 1.

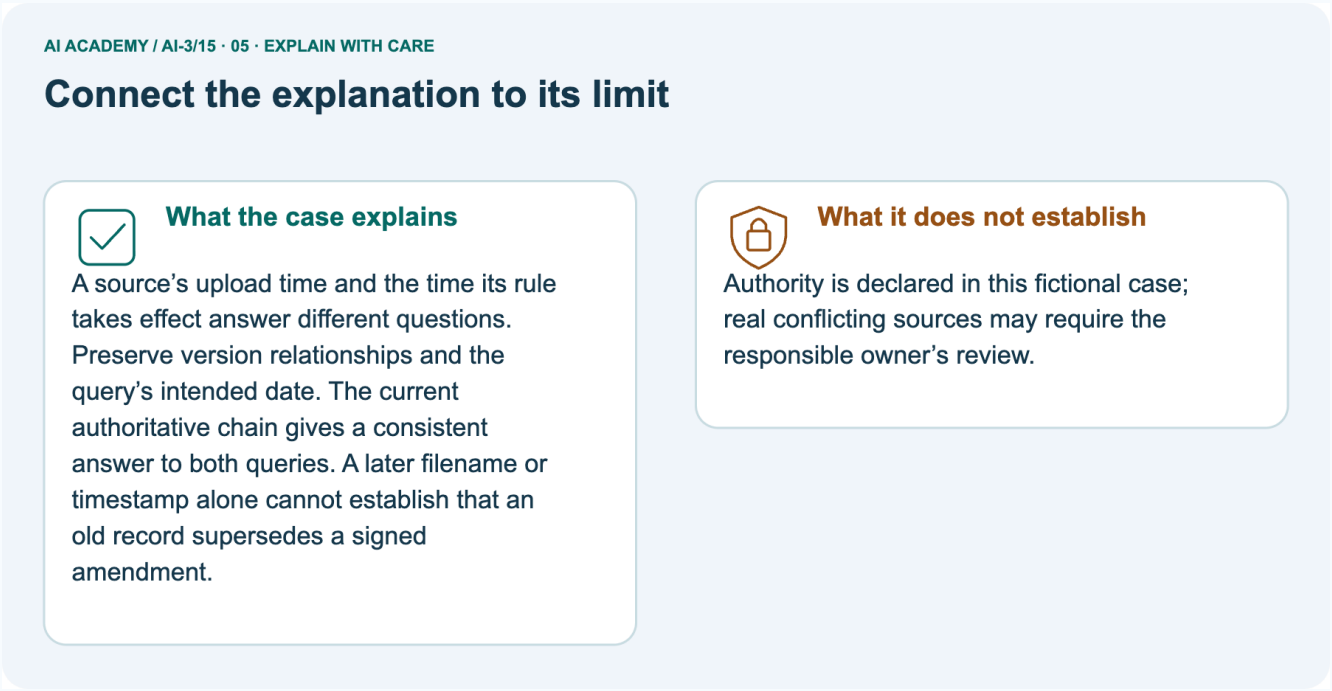

Reason: The new authoritative change applies from its stated effective date, not retroactively.

Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude.

Teacher prompt: Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude. Ask learners to describe one label or arrow in ordinary words.

Use the adjacent transcript if the image is difficult to see. Changed-case reasoning: The new authoritative change applies from its stated effective date, not retroactively.

05. Connect the explanation to its limit

Follow the labelled picture with the matching explanation. Open the vector diagram

A source's upload time and the time its rule takes effect answer different questions. Preserve version relationships and the query's intended date. The current authoritative chain gives a consistent answer to both queries.

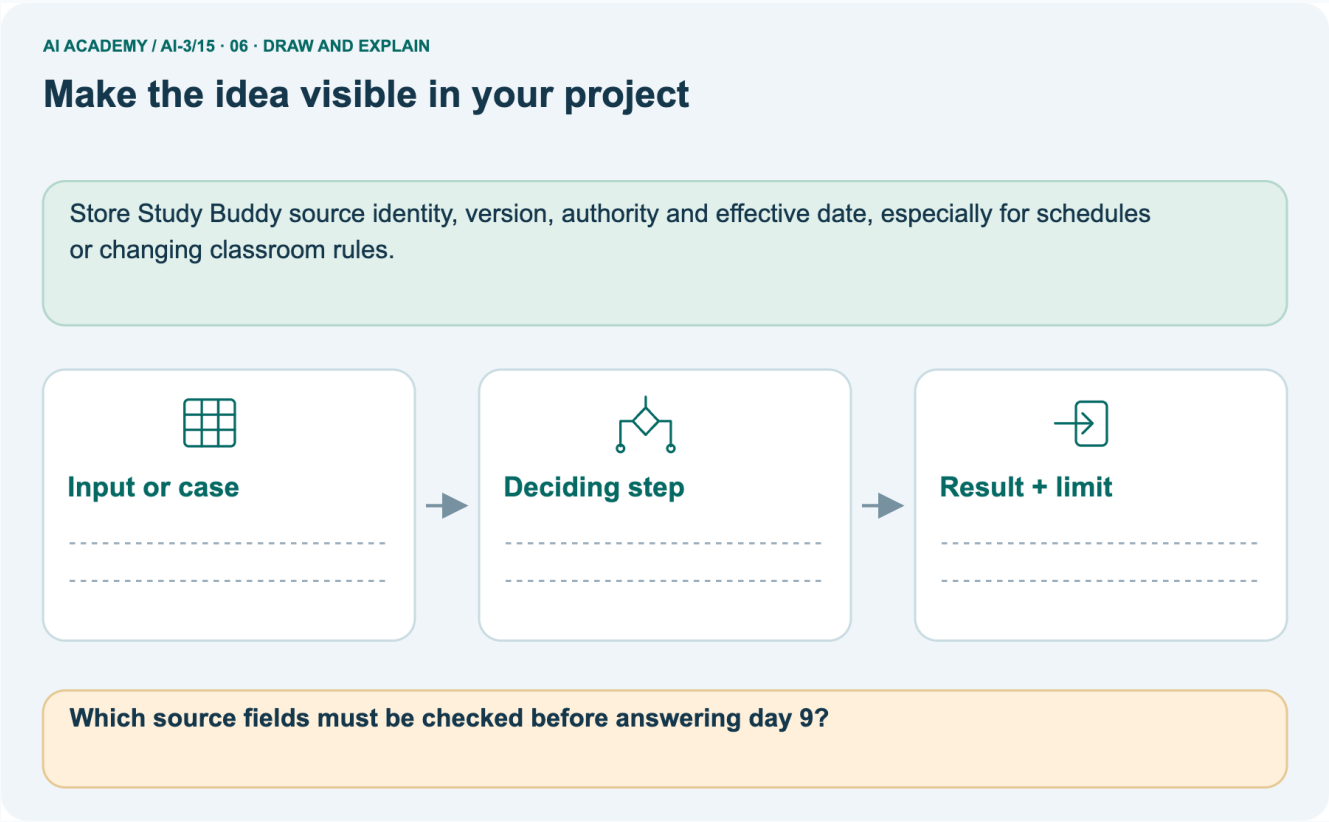

A later filename or timestamp alone cannot establish that an old record supersedes a signed amendment. Limit: **Authority** is declared in this fictional case; real conflicting sources may require the responsible owner's review.

Explain the case, then point to a limit on the claim.

Teacher prompt: Explain the case, then point to a limit on the claim. Ask learners to describe one label or arrow in ordinary words. Use the adjacent transcript if the image is difficult to see.

Keep the stated scope: **Authority** is declared in this fictional case; real conflicting sources may require the responsible owner's review.

06. Make the idea visible in your project

Follow the labelled picture with the matching explanation. Open the vector diagram

Store Study Buddy source identity, version, **authority** and effective date, especially for schedules or changing classroom rules. Draw your **input**, deciding step, result and limit.

Supported question: Which source fields must be checked before answering day 9?

Draw your project trace and justify the deciding step using **evidence**.

Teacher prompt: Draw your project trace and justify the deciding step using **evidence**. Ask learners to describe one label or arrow in ordinary words. Use the adjacent transcript if the image is difficult to see.

Supported practice key: The amendment's **authority**, reference to A, effective day 8 and queried day 9; the answer is Hall 3.

▼ Earlier wording, alternatives and picture transcripts

Use one picture at a time. Hide a worked result before asking for a **prediction**, then reveal it for feedback. These are supported teaching cases; retain the separate independent assessment for a fresh first attempt.

01. Source Quality: the case

02. Follow the deciding steps

03. Conflicting and time-sensitive sources — evidence trace

04. Change one thing. Trace what follows.

05. Connect the explanation to its limit

06. Make the idea visible in your project
