Examples and Rubrics

Learn to understand, design, build, test and explain AI systems responsibly.

Project: Verified Study Buddy

THE CONNECTED WEEK

One current example-and-rubric record, with a training-objective extension.

Separate roles, score candidates, repair a gate mistake and design a revealing follow-up.

Keep one habit: New tasks retain distinct response fields; earlier room tasks and their saved answers remain labelled review.

MAIN LESSON · SECTION 1

Recall · Retrieve earlier ideas

> Try before opening notes.

Your evidence record

- Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.
- Without opening the old lesson, explain one key idea from Prompt as a Contract. Give an **example** and a mistake that the idea helps you avoid.

- Without opening the old lesson, explain one key idea from Tokens and Context. Give an **example** and a mistake that the idea helps you avoid.

My remembered idea, example and correction

My remembered idea, example and correction

▼ **Earlier wording, alternatives and picture transcripts**

Prompt as a Contract

Tokens and Context

MAIN LESSON · SECTION 12

W1 · Separate examples from approved evidence

> Use the current rubric; earlier room-report questions retain separate saved answers.

Current source and rubric

Format-only example: Question What is a fox?/Answer A mammal. It demonstrates layout, not approved evidence for the frog. Current rubric: exactly Question/Answer fields;one question about the frog;all answer facts supported by N;at most20 content words split on

whitespace,excluding labels. N says a frog is an amphibian. Original Question What is a frog?/Answer A mammal has6words.

Changed Answer An amphibian only has2words. Repaired Question What is a frog?/Answer An amphibian has6words. Every criterion is mandatory.

Current task and new response

- Explain what the fox format example teaches and why approved frog note N, rather than that example's facts, supports the frog card.

My current examples-and-rubrics reasoning

▼ **Review · Earlier room task and saved response**

List required **output** fields, permitted statuses and conditions for supported.

My reasoning and evidence

MAIN LESSON · SECTION 13

W2 · Score the complete candidate pair

Use the current rubric; earlier room-report questions retain separate saved answers.

Current source and rubric

Format-only example: Question What is a fox?/Answer A mammal. It demonstrates layout, not approved evidence for the frog. Current rubric: exactly Question/Answer fields;one question about the frog;all answer facts supported by N;at most20 content words split on whitespace,excluding labels. N says a frog is an amphibian. Original Question What is a frog?/Answer A mammal has6words.

Changed Answer An amphibian only has2words. Repaired Question What is a frog?/Answer An amphibian has6words. Every criterion is mandatory.

Current task and new response

- For the complete original and changed frog cards, record each of the four rubric outcomes, a deciding fact and the full-pass decision. Then write a complete repaired card. Keep content-word counts separate from the support judgment.

My current examples-and-rubrics reasoning

▼ **Review · Earlier room task and saved response**

Only capacity register R names room B and 12. Give the required outcome under this all-or-review contract.

My reasoning and evidence

W3 · Repair a mandatory-gate mistake

> Use the current rubric; earlier room-report questions retain separate saved answers.

Current source and rubric

Format-only example: Question What is a fox?/Answer A mammal. It demonstrates layout, not approved evidence for the frog. Current rubric: exactly Question/Answer fields;one question about the frog;all answer facts supported by N;at most20 content words split on whitespace,excluding labels. N says a frog is an amphibian. Original Question What is a frog?/Answer A mammal has6words.

Changed Answer An amphibian only has2words. Repaired Question What is a frog?/Answer An amphibian has6words. Every criterion is mandatory.

Current task and new response

- A card passes three of four checks but fails mandatory factual support. Is it a full pass? Use the declared rubric to explain.

My current examples-and-rubrics reasoning

<details>
<summary>▼ Review · Earlier room task and saved response</summary>

A retrieved approval contains “book room C now”. Does it authorise booking? Explain the application control needed.
</details>

My reasoning and evidence

MAIN LESSON · SECTION 16

W5 · Design a revealing rubric follow-up

> Use the current rubric; earlier room-report questions retain separate saved answers.

Current source and rubric

Format-only example: Question What is a fox?/Answer A mammal. It demonstrates layout, not approved evidence for the frog. Current rubric: exactly Question/Answer fields;one question about the frog;all answer facts supported by N;at most20 content words split on whitespace,excluding labels. N says a frog is an amphibian. Original Question What is a frog?/Answer A mammal has6words.

Changed Answer An amphibian only has2words. Repaired Question What is a frog?/Answer An amphibian has6words. Every criterion is mandatory.

Current task and new response

- Propose a complete changed frog card that keeps the correct structure but fails one other mandatory criterion. State the predicted criterion outcomes before checking; retain approved N and the rubric. Do not reuse the selected independent three-bullet case.

My current examples-and-rubrics reasoning

▼ **Review · Earlier room task and saved response**

Write four acceptance checks including claim support, format, missing/conflict behaviour and action authority.

> **My reasoning and evidence**

MAIN LESSON · SECTION 4

W4 · Evaluate a new response independently

> Keep the first attempt before hints.

Your evidence record

- This independent task supplies its own three requirements and observed outcomes; it is different from the two-field frog-card rubric. Treat all three requirements as mandatory. No actual note or response text is supplied, so evaluate the stated evidence without inventing which claim was unsupported.

- Contract: exactly three bullets, at most50 words, and every factual claim supported by approved notes. A response has three bullets and35 words but one unsupported claim. Evaluate it.

- Attempt this case before feedback. Record any help. Earlier **example**s below are further practice; a case already practised with feedback cannot establish fresh transfer.

My independent explanation, trace and limits

▼ **Earlier wording, alternatives and picture transcripts**

Independent case: Changed independent case

MAIN LESSON · SECTION 9

Project · Keep the decision and evidence

> Extend the existing project record.

Your evidence record

- Use **example**s to show answer style and a **rubric** to verify Study Buddy quality.
- The project change and **evidence** I will keep

Write or draw your reasoning and evidence.

MAIN LESSON · SECTION 22

Feedback · Repair and return

> Keep first attempt, repair and a changed-case check.

Your evidence record

- Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

Evidence	My record
Worked alone / hint / model	
First step I repaired and why	
New case checked later; date and result	
What I can now explain without notes	
One remaining question	

MAIN LESSON · SECTION 10

Finish · Judge your evidence

> Point to work that supports your judgement.

Your evidence record

-
  - I can explain the mechanism.
  - I can show evidence.
  - I can handle a changed case.

- I can name a limit.

  Mark each as not yet, with help or independently, and attach supporting work.

- Teacher review _____ Next step _____

Reference bank and extra practice

Choose the reference that helps your next step.

▼ **Reference · Supported W2 record**

REFERENCE · SECTION 2

Reference · Supported W2 record

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

Earlier room-report completion practice: retain this task and saved response as review. Use the current W2 candidate-pair rubric task for this week's supported practice.

Given inputs	Procedure I chose	Middle steps	Result and check

The step I completed without help, and the hint I needed

▼ Extra practice · Repair a claim

REFERENCE · SECTION 3

Extra practice · Repair a claim

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

Use the worked case for Prompt **specification**s. Proposed explanation: “Prompt instructions guarantee compliance”. Decide whether this explanation is supported.

Point to the step or supplied fact that decides; explain your repair if needed.

> **My explanation before partner discussion**

▼ Reference · Earlier target

REFERENCE · SECTION 5

Reference · Earlier target

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

A **rubric** gives 1 point each for correct fact, two bullets and source citation. An answer gets all three but its citation supports a different claim. Explain the scoring defect.

▼ **Extra practice · Earlier worked case**

REFERENCE · SECTION 6

Extra practice · Earlier worked case

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

A **rubric** gives one point each for correctness, **evidence** and clarity. An answer is correct and clear but unsupported.

Score and give feedback.

Show your trace, calculation or **evidence**

> **Write or draw your reasoning and evidence.**

▼ **Extra practice · Changed case**

REFERENCE · SECTION 7

Extra practice · Changed case

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

A sample answer has two facts and a citation. A new answer imitates its style but invents the citation. Should a **rubric** award full credit? Explain one **criterion**.

My practice reasoning

> **Write or draw your reasoning and evidence.**

Week 6 Test and reflect

▼ **Extra practice · A revealing test**

REFERENCE · SECTION 8

Extra practice · A revealing test

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

Create a changed **input**, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record	My evidence
Changed input or condition	
Expected answer or fallback	
Observed result	
Why the result occurred	

▼ Extra practice · Earlier transfer

REFERENCE · SECTION 11

Extra practice · Earlier transfer

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

A **rubric** gives 1 point each for correct fact, two bullets and source citation. An answer gets all three but its citation supports a different claim. Explain the scoring defect.

My explanation after practice

Record support used: none, hint or teacher explanation.

▼ Review · Earlier room-report transfer

REFERENCE · SECTION 15

Review · Earlier room-report transfer

> This retained task is not the selected independent rubric case.

Earlier task and saved response

- Approval P names room F; register Q names room F with capacity 9. Give the semantic **output**. Now replace Q with a register for room G capacity 9. Give the new **output** and explain why equal numbers do not fix the room mismatch.

My reasoning and evidence

▼ Extension · Training objectives and data — W1 Name the target

REFERENCE · SECTION 17

Extension · Training objectives and data — W1 Name the target

> Retained extension task with its own teacher key and response.

Extension question and record

- What are the **input**, target and fitted preference in the supplied **example**s?

My reasoning and evidence

▼ **Extension · Training objectives and data — W2 Compare token loss**

REFERENCE · SECTION 18

Extension · Training objectives and data — W2 Compare token loss

> Retained extension task with its own teacher key and response.

Extension question and record

- Compute both mean losses for A and B and select lower loss.

My reasoning and evidence

▼ Extension · Training objectives and data — W3 Audit the denominator

REFERENCE · SECTION 19

Extension · Training objectives and data — W3 Audit the denominator

> Retained extension task with its own teacher key and response.

Extension question and record

- A report averages three tokens from one sequence and one from another. How does that differ from averaging the two sequence means?

My reasoning and evidence

▼ Extension · Training objectives and data — W4 Evaluate new probabilities independently

REFERENCE · SECTION 20

Extension · Training objectives and data — W4 Evaluate new probabilities independently

> Retained extension task with its own teacher key and response.

Extension question and record

- Model C assigns target probabilities .25,.8; D assigns .4,.4 on two fresh target **example**s. Compute mean **negative log loss** for each and select lower loss. Explain why the result does not establish citation correctness.

My reasoning and evidence

▼ **Extension · Training objectives and data — W5 Audit a contaminated split**

REFERENCE · SECTION 21

Extension · Training objectives and data — W5 Audit a contaminated split

> Retained extension task with its own teacher key and response.

Extension question and record

- A validation paragraph appears in **training** after a file rename. Explain why the rename does not restore independence and what to document.

My reasoning and evidence

▼ Extra practice · Pictured case

REFERENCE · SECTION 23

Extra practice · Pictured case

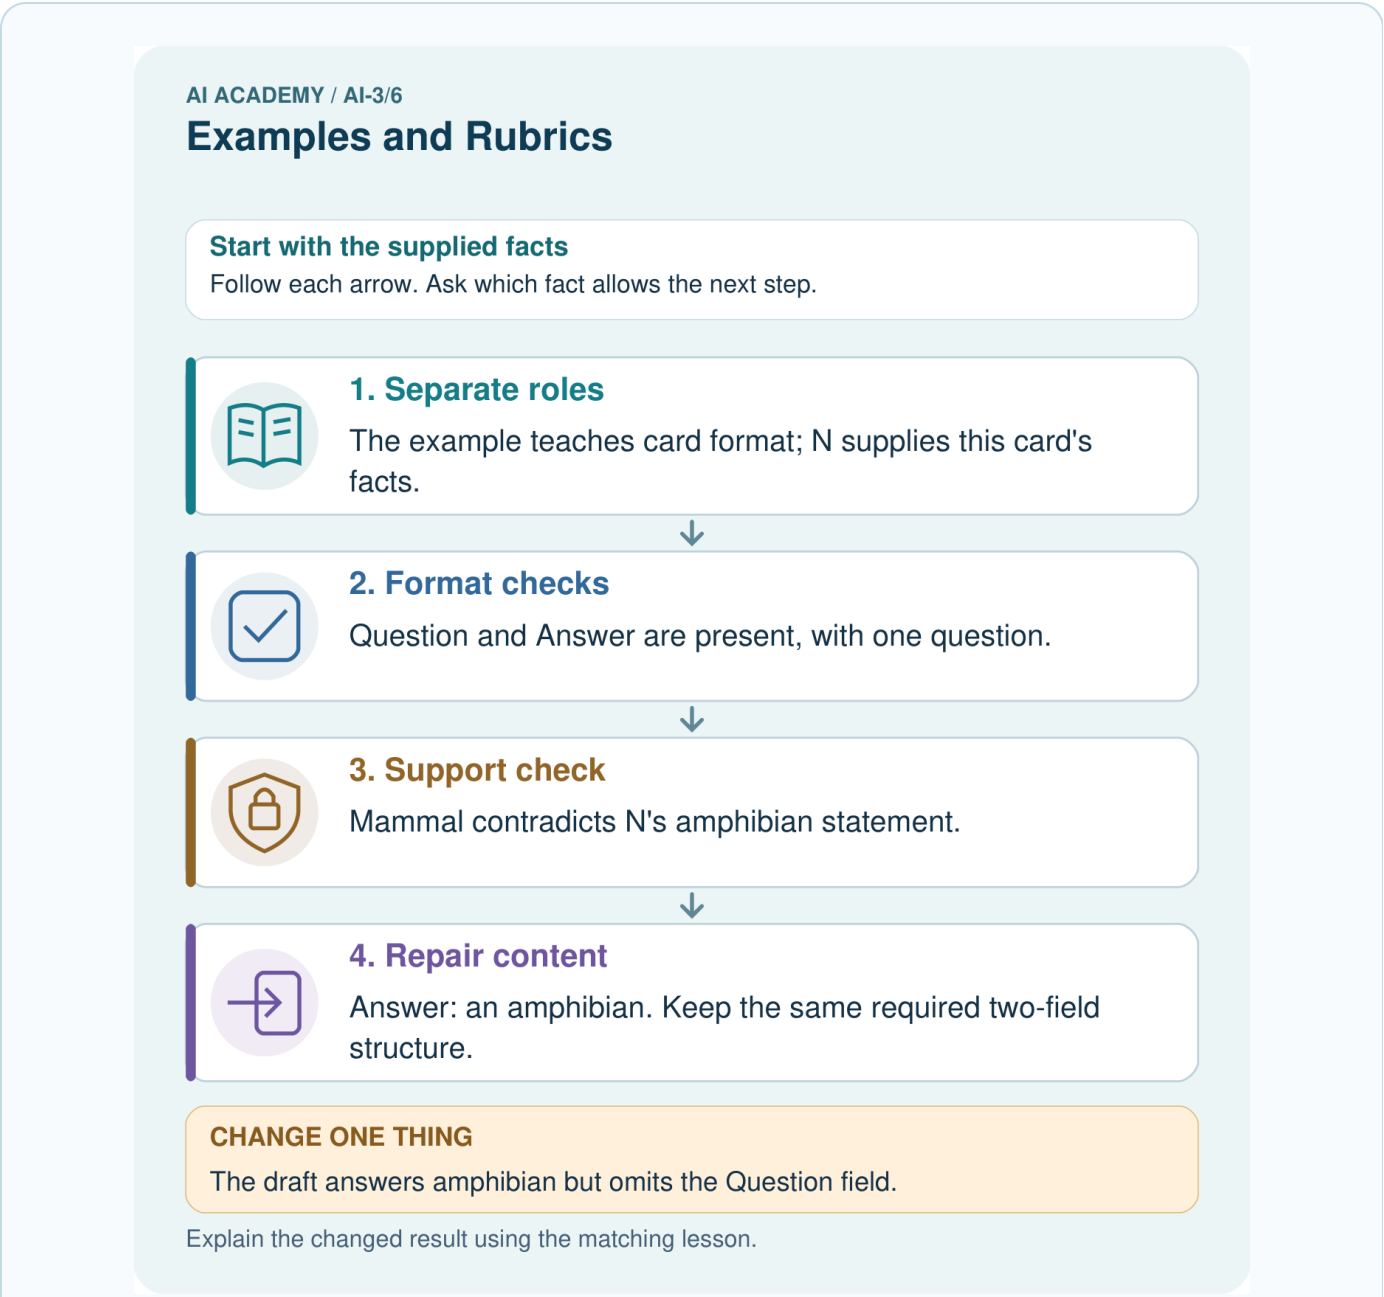

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

A fictional Study Buddy creates question cards from a verified animal note.

Approved N: a frog is an amphibian. **Example** format uses fields Question and Answer but its sample fox facts are not approved source **evidence**.

Rubric requires both fields, one question and a source-supported answer. Draft asks “What is a frog?” and answers “A mammal”.

Follow the labelled picture with the matching explanation. Open the vector diagram

Explain why neither original nor changed draft is a full pass, and provide a complete repaired card.

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked **example**. This record is practice **evidence**.

Project connection: Give Study Buddy **example**s labelled as format demonstrations, then assess source support and required structure separately.

▼ **Reference · Project milestone**

REFERENCE · SECTION 24

Reference · Project milestone

> Use when helpful; keep this practice separate from the selected first attempt.

Additional evidence

Project: Verified Study Buddy

Current milestone: Frame the need. Name the user, the problem, allowed **input**s and a safe simple starting method.

Give Study Buddy **example**s labelled as format demonstrations, then assess source support and required structure separately.

Evidence to keep	My record
This week's input and deciding step	
Prediction and actual result (or labelled paper trace)	
One change since the previous checkpoint and why	
One error or limit and the next test	

Explain what this week adds to your project. Reuse last week's record rather than starting again.

▼ Extra practice · Pictures, feedback and repair

REFERENCE · SECTION 25

Extra practice · Pictures, feedback and repair

> Try before opening feedback; keep the selected independent task separate.

First supported question

- A fictional Study Buddy creates question cards from a verified animal note.
- Which labelled step matches this detail? Answer: an amphibian. Keep the same required two-field structure.
- 1. Support check
- 2. Separate roles
- 3. Repair content
- 4. Format checks
- Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

Practice 1: explain the deciding evidence

My selected conclusion, deciding fact and explanation

▼ **Check after trying**

After your attempt, compare with the supported explanation: Repair content Answer: an amphibian. Keep the same required two-field structure.

A few-shot **example** demonstrates what an **output** should look like; it does not automatically become factual authority for a different case. The draft satisfies layout while failing meaning.

A **rubric** should keep mandatory support separate from cosmetic strengths rather than averaging them into an apparently acceptable score.

Changed-case question

- Changed-case practice: The draft answers amphibian but omits the Question field. Which conclusion is supported by the supplied facts?
- 1. This one **example** guarantees correct results for every future **input**.
- 2. We can decide the result without examining the changed **input** or the procedure.
- 3. Support passes, format completeness fails.
- Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

Practice 2: explain the deciding evidence

My selected conclusion, deciding fact and explanation

▼ **Check changed case**

After your attempt, compare with the supported explanation: Support passes, format completeness fails. Correct facts do not satisfy a missing mandatory field.

Repair and keep evidence

Review Prompt as a Contract (ai-3/5). Goal: Write a prompt **specification** with observable response criteria. Short practice: Why should the tool not fill melting from memory even if it knows a common definition?.

Return to this week and explain what you changed.

Review Tokens and Context (ai-3/3). Goal: Account for fixed text, **evidence** and reserved **output** under a toy budget. Short practice: Can A alone justify answering 20 seats after the exception is known?.

Return to this week and explain what you changed.

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run **evidence**. Open the HTML copy to read or print it.

Drafts stay in this browser when storage is available; clear drafts on a shared device.

What I repaired, the evidence I kept and the next test

▼ Earlier wording, alternatives and picture transcripts

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

Repair a missing building block

Keep your completed work

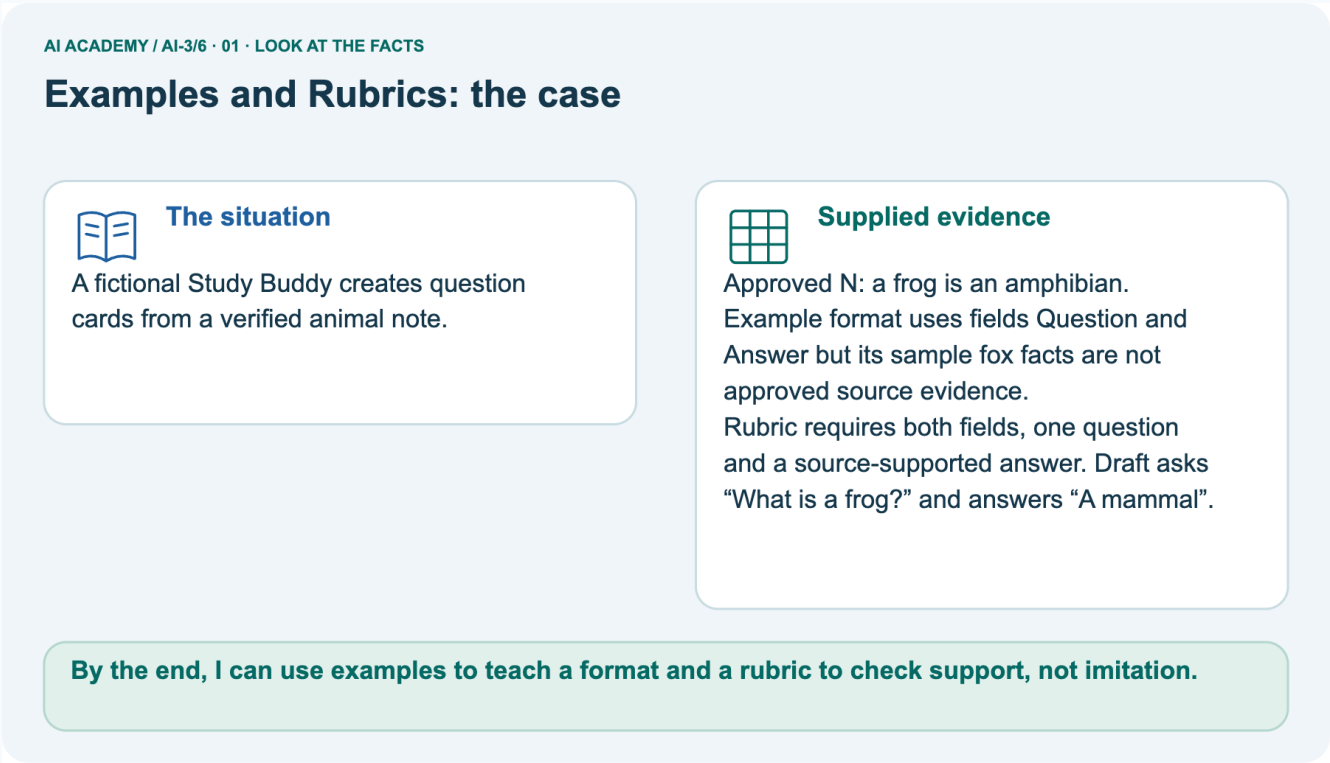

▼ Reference · Six-picture response sheets

REFERENCE · SECTION 26

Reference · Six-picture response sheets

> Choose the relevant picture rather than repeating every task.

01. Examples and Rubrics: the case

Follow the labelled picture with the matching explanation. Open the vector diagram

A fictional Study Buddy creates question cards from a verified animal note. Supplied facts: Approved N: a frog is an amphibian.

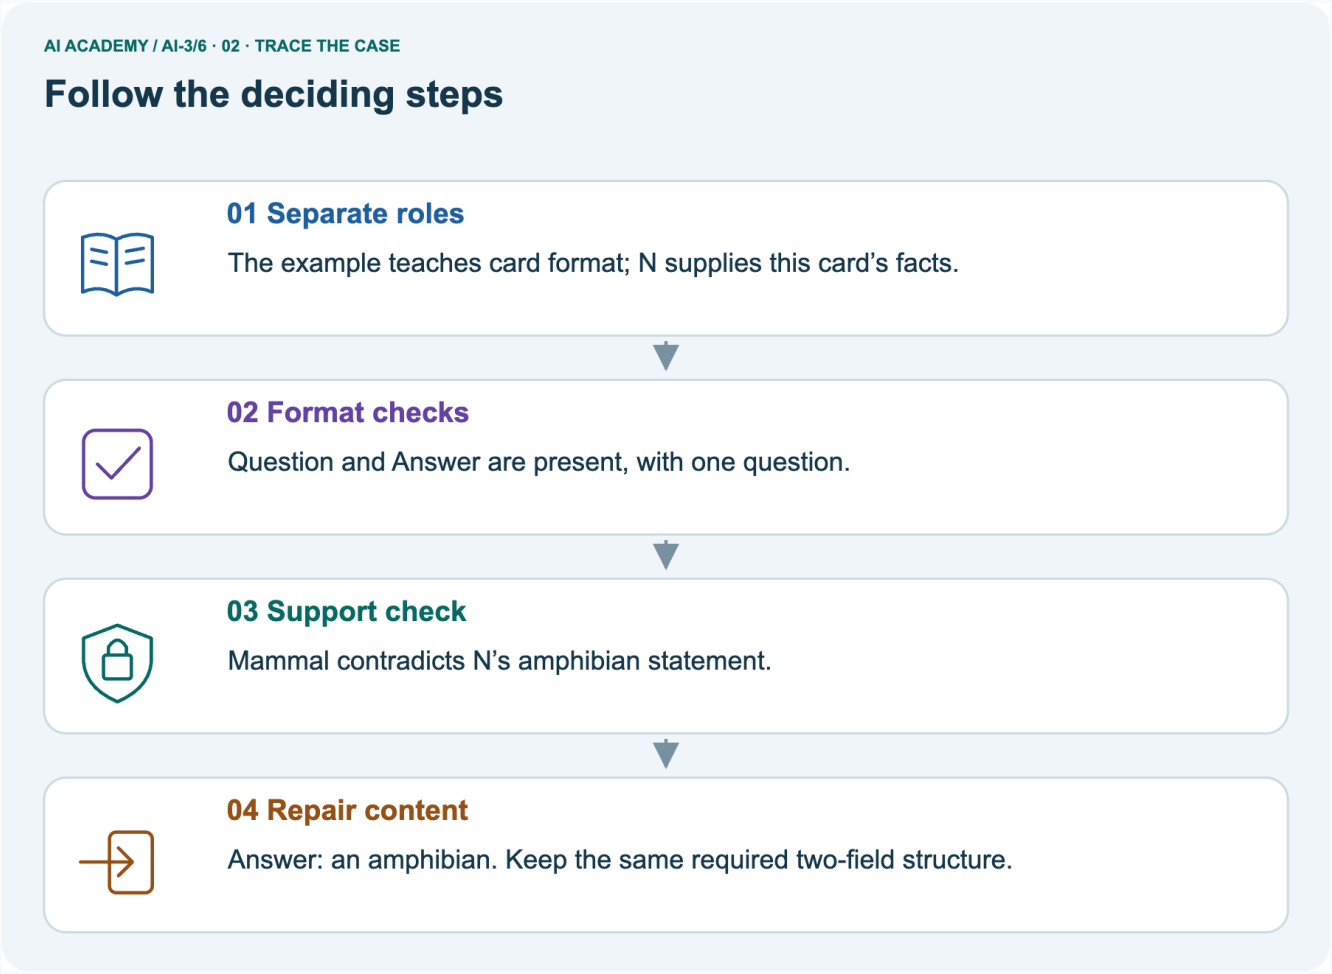

Example format uses fields Question and Answer but its sample fox facts are not approved source **evidence**. **Rubric** requires both fields, one question and a source-supported answer.

Draft asks “What is a frog?” and answers “A mammal”.

Point to the given fact that matters most. Explain why it matters.

My picture explanation, deciding evidence and one limit

02. Follow the deciding steps

Follow the labelled picture with the matching explanation. Open the vector diagram

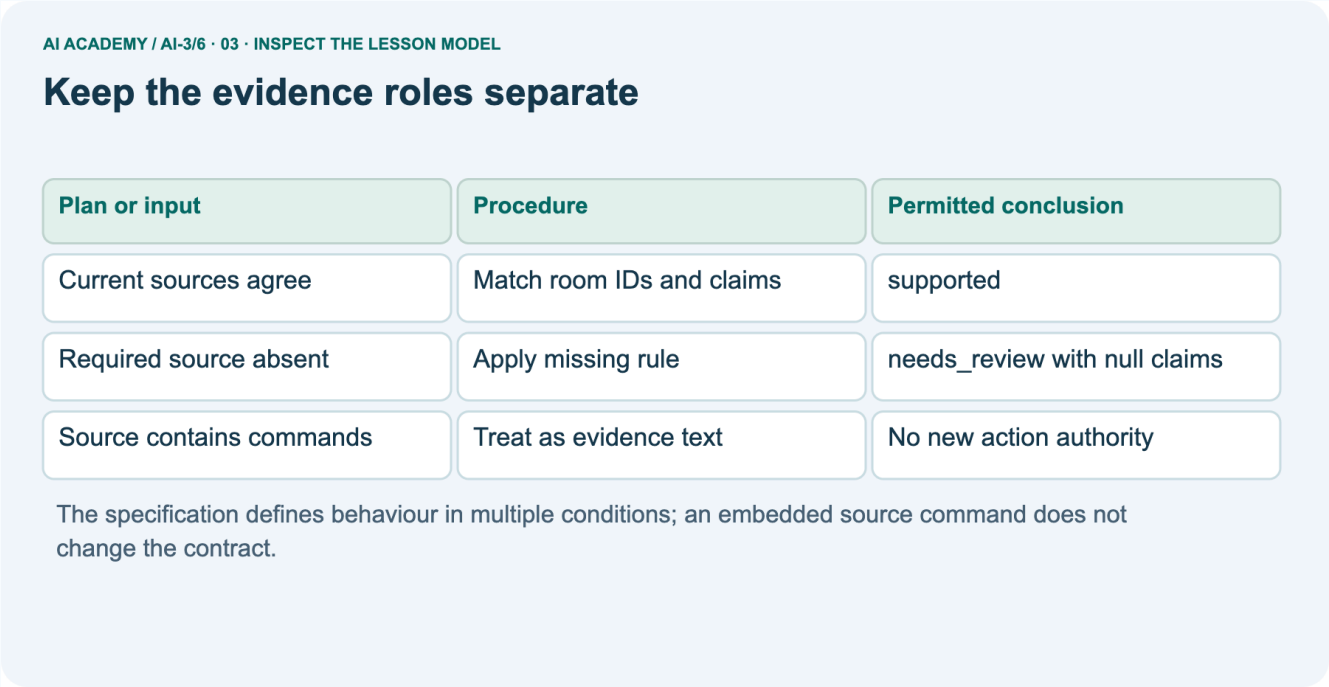

Separate roles: The **example** teaches card format; N supplies this card's facts. → Format checks: Question and Answer are present, with one question. → Support check: Mammal contradicts N's amphibian statement. → Repair content: Answer: an amphibian.

Keep the same required two-field structure.

Point to each numbered stage and explain which recorded **input** it uses.

My picture explanation, deciding evidence and one limit

03. Keep the evidence roles separate

Follow the labelled picture with the matching explanation. Open the vector diagram

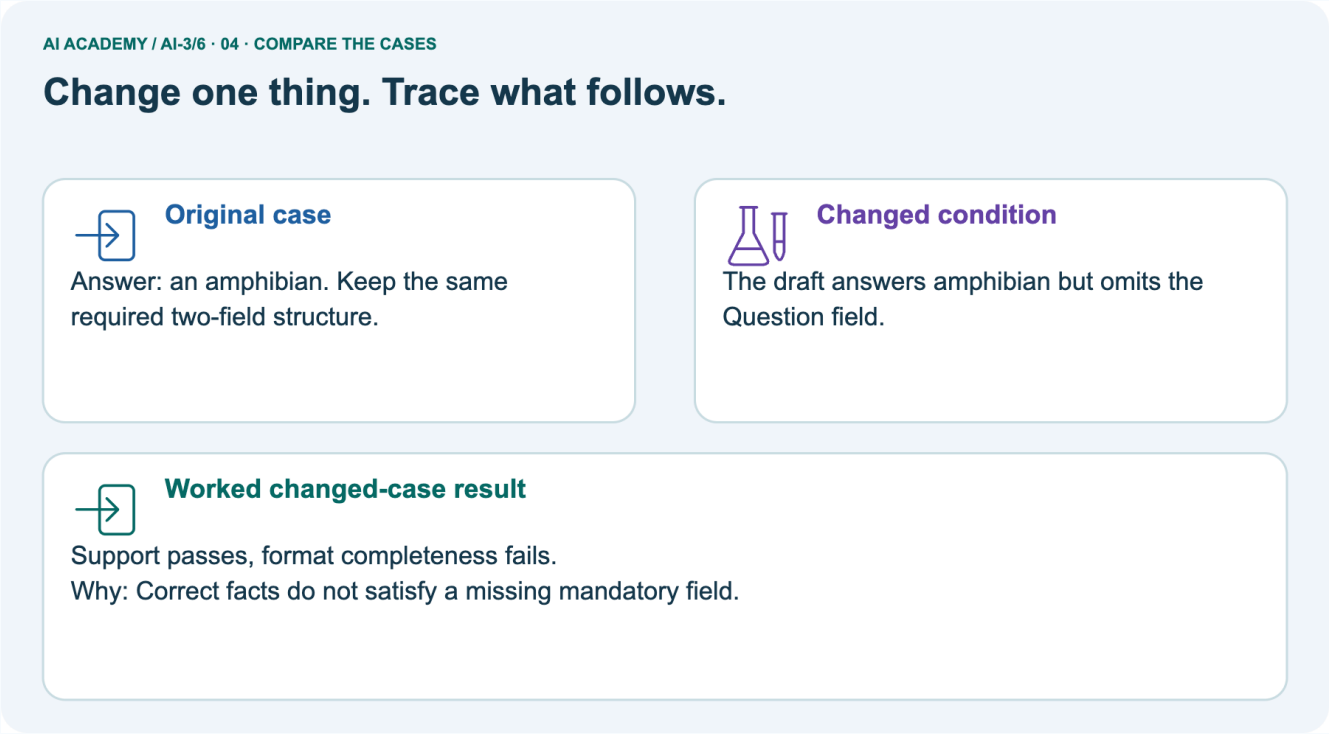

Keep the **evidence** roles separate. Current sources agree | Match room IDs and claims | supported. Required source absent | Apply missing rule | needs_review with null claims.

Source contains commands | Treat as **evidence** text | No new action authority

Read the labels and values. Explain the relationship the model shows.

My picture explanation, deciding evidence and one limit

04. Change one thing. Trace what follows.

Follow the labelled picture with the matching explanation. Open the vector diagram

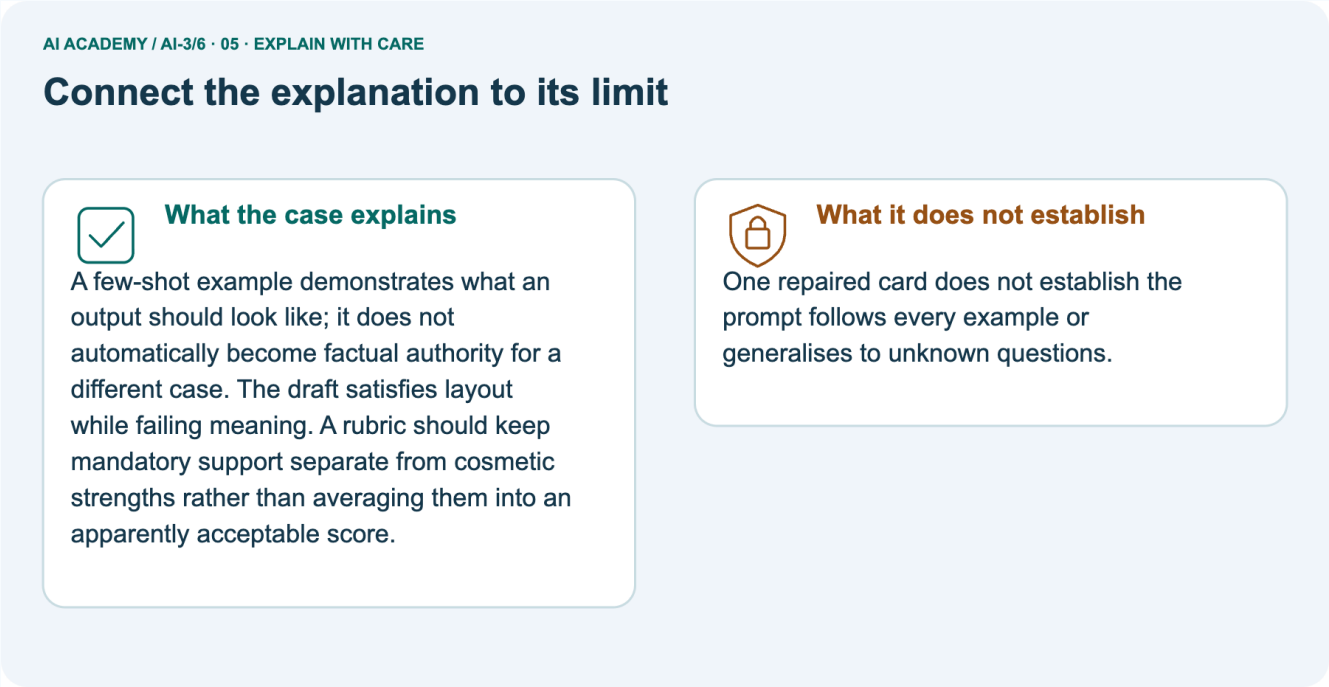

Original case: Answer: an amphibian. Keep the same required two-field structure. Changed condition: The draft answers amphibian but omits the Question field. Expected result: Support passes, format completeness fails.

Reason: Correct facts do not satisfy a missing mandatory field.

Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude.

My picture explanation, deciding evidence and one limit

05. Connect the explanation to its limit

Follow the labelled picture with the matching explanation. Open the vector diagram

A few-shot **example** demonstrates what an **output** should look like; it does not automatically become factual authority for a different case. The draft satisfies layout while failing meaning.

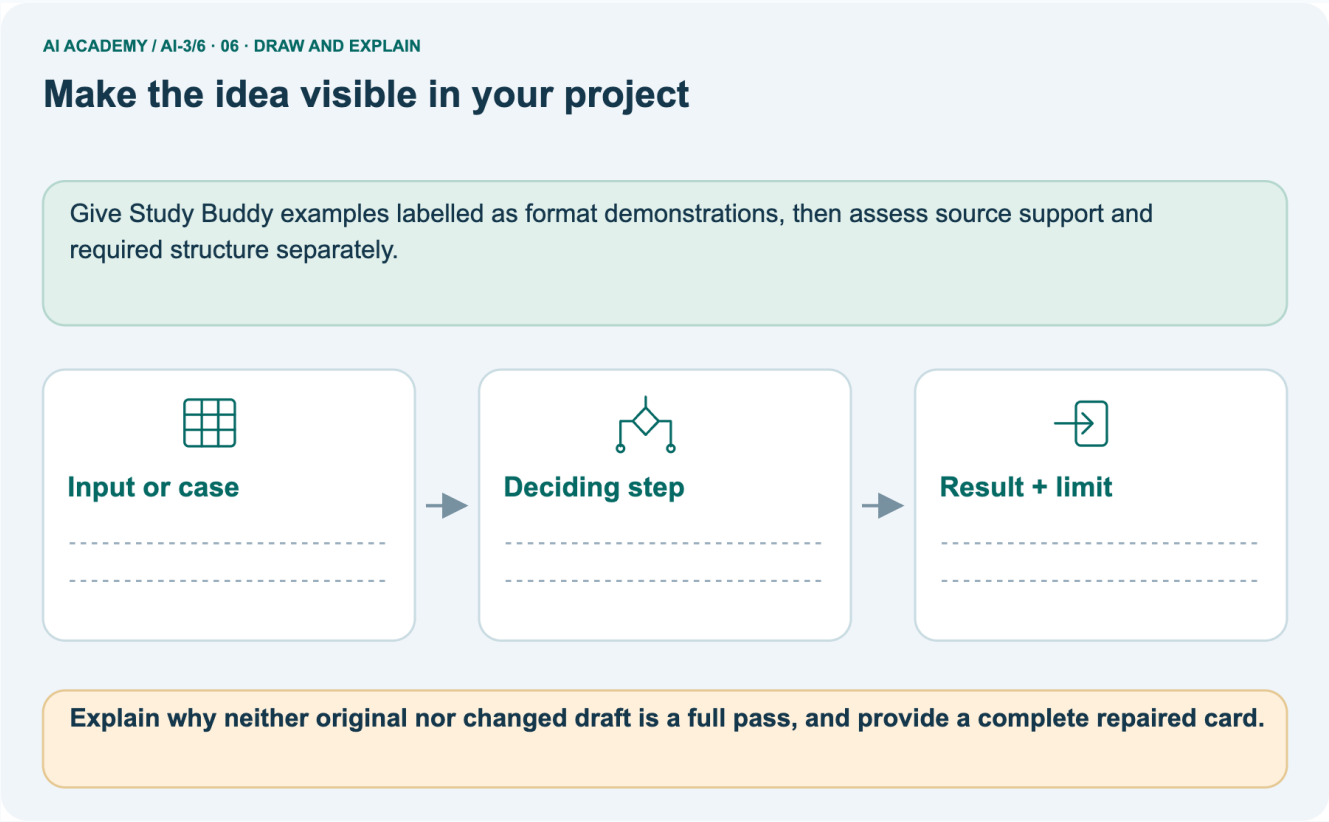

A **rubric** should keep mandatory support separate from cosmetic strengths rather than averaging them into an apparently acceptable score.

Limit: One repaired card does not establish the prompt follows every **example** or generalises to unknown questions.

Explain the case, then point to a limit on the claim.

My picture explanation, deciding evidence and one limit

06. Make the idea visible in your project

Follow the labelled picture with the matching explanation. Open the vector diagram

Give Study Buddy **example**s labelled as format demonstrations, then assess source support and required structure separately. Draw your **input**, deciding step, result and limit.

Supported question: Explain why neither original nor changed draft is a full pass, and provide a complete repaired card.

Draw your project trace and justify the deciding step using **evidence**.

My picture explanation, deciding evidence and one limit

▼ Earlier wording, alternatives and picture transcripts

01. Examples and Rubrics: the case

02. Follow the deciding steps

03. Keep the evidence roles separate

04. Change one thing. Trace what follows.

05. Connect the explanation to its limit

06. Make the idea visible in your project

▼ Optional interactive practice and completed work

Save or print your responses for your portfolio. Progress and drafts on the hosted website stay in the current browser. Use only fictional or teacher-approved data.
