

Similarity

Project: Helpful Classroom Sorter

1. Recall and choose your starting point

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Confidence Is Not Correctness

Without opening the old lesson, explain one key idea from Confidence Is Not Correctness. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Boundaries and 'Not Sure'

Without opening the old lesson, explain one key idea from Boundaries and 'Not Sure'. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Learning from Examples

Without opening the old lesson, explain one key idea from Learning from Examples. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

2. Practise with fading help

Use W2: Explain a changed winner for Similarity and selected features. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs · Procedure I chose · Middle steps · Result and check

Given inputs: _____

Procedure I chose: _____

Middle steps: _____

Result and check: _____

The step I completed without help, and the hint I needed

3. Individual reasoning check

Use the worked case for Similarity and selected features. Proposed explanation: “Similar has one objective meaning for every task”. Decide whether this explanation is supported. Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

4. Independent transfer case

Independent case: Transfer the comparison to books

A target book has topic space, format comic and language English. Candidates are J: space, prose, English; K: animals, comic, English; L: space, comic, Spanish. Give 1 point per exact match and return all tied highest scorers. Then make topic worth 3 points while keeping the other weights at 1. Report both sets of totals and winners. Explain why a winner may still fail a requirement to read English.

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

5. Your learning target

A reader wants mystery and short books. A has both traits, B only mystery, C only short. Score one point per matching trait. The reader now says short is essential. Explain how the decision should change.

6. Solve the given case

Book A has animals and adventure; B has animals only; C has neither. A reader wants both traits.
Rank by number of matching traits.
Show your trace, calculation or evidence

Write or draw your reasoning and evidence.

7. Check a changed case

Compare books using topic only. Book A is about space with a red cover; B is about space with a blue cover; C is about dogs with a red cover. Which matches A best?

My independent answer and reason

Write or draw your reasoning and evidence.

Week 19 Test and reflect

8. Design a revealing test

Create a changed input, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record · My evidence

Test record: Changed input or condition

My evidence: _____

Test record: Expected answer or fallback

My evidence: _____

Test record: Observed result

My evidence: _____

Test record: Why the result occurred

My evidence: _____

9. Project checkpoint

Choose two useful item traits for similarity-based sorting and explain why each deserves its weight.

The project change and evidence I will keep

Write or draw your reasoning and evidence.

10. Self check

I can explain the mechanism. I can show evidence. I can handle a changed case. I can name a limit. Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

11. Transfer practice from the original programme

A reader wants mystery and short books. A has both traits, B only mystery, C only short. Score one point per matching trait. The reader now says short is essential. Explain how the decision should change.

My independently reasoned answer

Record support used: none, hint or teacher explanation.

12. W1 Show the contributions before the total

For the red round smooth target and candidates A, B and C in the lesson, record the colour, shape and texture contributions under one point per match. Give each total and identify every highest scoring candidate.

My reasoning and evidence

13. W2 Explain a changed winner

Keep the same target and candidates but make texture worth 3 points, with colour and shape worth 1 each. Recalculate A, B and C. Explain what changed and what stayed the same.

My reasoning and evidence

14. W3 Keep unknown separate from different

Candidate E is red and round but its texture is missing. A learner assigns zero for texture and declares E fully scored. Apply our classroom policy. State the known contributions, the missing information and what must happen before a final ranking.

My reasoning and evidence

15. W4 Transfer the comparison to books

A target book has topic space, format comic and language English. Candidates are J: space, prose, English; K: animals, comic, English; L: space, comic, Spanish. Give 1 point per exact match and return all tied highest scorers. Then make topic worth 3 points while keeping the other weights at 1. Report both sets of totals and winners. Explain why a winner may still fail a requirement to read English.

My reasoning and evidence

16. W5 Notice an accidental extra weight

A designer adds a second colour column that copies the first and gives both columns one point. They say no feature has been given extra importance because every column has equal weight. Explain the problem and propose a clearer rule.

My reasoning and evidence

17. Feedback, return check and learning record

Evidence · My record

Evidence: Worked alone / hint / model

My record: _____

Evidence: First step I repaired and why

My record: _____

Evidence: New case checked later; date and result

My record: _____

Evidence: What I can now explain without notes

My record: _____

Evidence: One remaining question

My record: _____

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

18. Pictorial case practice: Similarity

A fictional craft-card matcher compares each candidate with a target.

Target: red, round, smooth. A: red,square,smooth. B: blue,round,smooth. C: red,round,rough.

Initially each exact feature match scores 1; return all highest scorers.

For the second comparison only, colour and shape matches score 1 each and a texture match scores 3.

Declared weights change similarity

	All weights 1	Texture weight 3
A	2	4
B	2	4
C	2	2

Read a cell using both its row and column labels.

Similarity

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Target features

Compare colour, shape and texture separately.

2. Equal weights

A matches colour+texture=2; B shape+texture=2; C colour+shape=2.

3. Initial result

All three tie at 2.

4. Texture weight 3

New scores A=4, B=4, C=2; A and B remain tied.

CHANGE ONE THING

Keep original weights but change the target texture to rough.

Explain the changed result using the matching lesson.

Point to the matches supporting C's new score and explain why there is no tie.

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice evidence.

Project connection: Declare sorter similarity features, weights and tie behavior before using scores to explain recommendations.
