

Privacy by Choosing Less

Project: Helpful Classroom Sorter

1. Recall and choose your starting point

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Fair for Whom?

Without opening the old lesson, explain one key idea from Fair for Whom?. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Good Data, Bad Data

Without opening the old lesson, explain one key idea from Good Data, Bad Data. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Confidence Is Not Correctness

Without opening the old lesson, explain one key idea from Confidence Is Not Correctness. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

2. Practise with fading help

Use W2: Challenge a claim of anonymity for Privacy and data minimisation. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs · Procedure I chose · Middle steps · Result and check

Given inputs: _____

Procedure I chose: _____

Middle steps: _____

Result and check: _____

The step I completed without help, and the hint I needed

3. Individual reasoning check

Use the worked case for Privacy and data minimisation. Proposed explanation: “More data always improves a task”. Decide whether this explanation is supported. Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

4. Independent transfer case

Independent case: Design a different minimal-data task

A fictional library wants only the total number of books needing repair in each category: cover, page or binding. It does not need to contact borrowers. A draft repair sheet asks for borrower name, home address, book repair category and borrower photograph. Design a plan: state the purpose, required and removed fields, who handles source sheets, what totals are shared with the librarian, and who disposes of sheets at what agreed point. Use no real borrower details.

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

5. Your learning target

A book recommender requests genre, maximum pages, home address and a selfie. Keep only fields needed for genre and length matching. Explain one consequence of storing extra fields.

6. Solve the given case

A genre-based book helper asks for genre, home address and a photograph.

Which fields are necessary?

Show your trace, calculation or evidence

Write or draw your reasoning and evidence.

7. Check a changed case

A book helper needs reading topic and approximate difficulty. Someone asks it to collect home address too. Which information can be left out, and why?

My independent answer and reason

Write or draw your reasoning and evidence.

Week 24 Test and reflect

8. Design a revealing test

Create a changed input, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record · My evidence

Test record: Changed input or condition

My evidence: _____

Test record: Expected answer or fallback

My evidence: _____

Test record: Observed result

My evidence: _____

Test record: Why the result occurred

My evidence: _____

9. Project checkpoint

Cross out names, faces, and ownership details unless an explicit need survives review; set a deletion rule for sorter records.

The project change and evidence I will keep

Write or draw your reasoning and evidence.

10. Self check

I can explain the mechanism. I can show evidence. I can handle a changed case. I can name a limit. Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

11. Transfer practice from the original programme

A book recommender requests genre, maximum pages, home address and a selfie. Keep only fields needed for genre and length matching. Explain one consequence of storing extra fields.

My independently reasoned answer

Record support used: none, hint or teacher explanation.

12. W1 Trim a form to its purpose

The fictional workshop vote asks for name, full date of birth, address, photograph and topic choice. Its only purpose is to count votes for drawing, music and coding. State which field to keep, which to remove and why. Explain why collecting the extra fields first is different from never collecting them.

My reasoning and evidence

13. W2 Challenge a claim of anonymity

A teacher replaces names with codes and keeps a separate code-to-name key. A pupil calls the records anonymous. Explain the problem. Then explain why removing names while leaving photographs would not settle the question either.

My reasoning and evidence

14. W3 Share the result the audience needs

The fictional class has drawing 8, music 7 and coding 5. Write the result needed to choose a workshop. A pupil suggests posting every vote slip online as proof. Explain a lower-exposure way to check and share the result. Why can a total about a one-person club still reveal a choice?

My reasoning and evidence

15. W4 Design a different minimal-data task

A fictional library wants only the total number of books needing repair in each category: cover, page or binding. It does not need to contact borrowers. A draft repair sheet asks for borrower name, home address, book repair category and borrower photograph. Design a plan: state the purpose, required and removed fields, who handles source sheets, what totals are shared with the librarian, and who disposes of sheets at what agreed point. Use no real borrower details.

My reasoning and evidence

16. W5 Respond to an unnecessary upload

Someone plans to upload the library repair sheet with borrower details to an unapproved AI tool to add three totals. Explain a smaller-input alternative and a no-upload method. If the sheet was already shared, state a suitable first response and one claim you must not make about deleting it.

My reasoning and evidence

17. Feedback, return check and learning record

Evidence · My record

Evidence: Worked alone / hint / model

My record: _____

Evidence: First step I repaired and why

My record: _____

Evidence: New case checked later; date and result

My record: _____

Evidence: What I can now explain without notes

My record: _____

Evidence: One remaining question

My record: _____

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

18. Pictorial case practice: Privacy by Choosing Less

A fictional teacher wants to count broken craft tools by type, without contacting borrowers.

Needed output: totals for scissors, ruler and hole-punch repairs.

Draft form requests pupil name, birthday, tool type and repair-needed Yes/No. No borrower follow-up is

required.

Privacy by Choosing Less

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. State purpose

Count repairs by tool type, not by person.

2. Choose fields

Retain tool type and repair-needed status.

3. Remove excess

Name and birthday are unnecessary for this stated task.

4. Report totals

Aggregate each tool type's Yes count; record the authorised retention plan.

CHANGE ONE THING

The teacher adds an authorised task to return one repaired tool to its borrower.

Explain the changed result using the matching lesson.

For the original task, does adding an anonymous-looking pupil code improve the repair count?

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice evidence.

Project connection: Write the sorter's purpose, necessary fields, access rules and deletion point before collecting any real classroom information.
