

Operational Labels

Project: Transparent Book Recommender

1. Recall and choose your starting point

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Rows Columns and Data Types

Without opening the old lesson, explain one key idea from Rows Columns and Data Types. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Loops and Stopping

Without opening the old lesson, explain one key idea from Loops and Stopping. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Decompose a Goal

Without opening the old lesson, explain one key idea from Decompose a Goal. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

2. Practise with fading help

Use W2: Replace a vague instruction for Categories and operational labels. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs · Procedure I chose · Middle steps · Result and check

Given inputs: _____

Procedure I chose: _____

Middle steps: _____

Result and check: _____

The step I completed without help, and the hint I needed

3. Individual reasoning check

Use the worked case for Categories and operational labels. Proposed explanation: “A blank is the same as a failing value”. Decide whether this explanation is supported. Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

4. Independent transfer case

Independent case: Changed independent case

Two labellers use book-length rules: fewer than 120 pages and at most 120 pages. Label books with 110,120,121 pages. The agreed policy is at most 120. Repair the disagreement.

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

5. Your learning target

Two labelers use 'short' to mean $\text{pages} < 100$ and $\text{pages} \leq 100$. They disagree only on 100-page books. Write a shared definition and explain how to repair the existing labels.

6. Solve the given case

Short means fewer than 100 pages. Two annotators disagree about a 100-page book.

Resolve the label.

Show your trace, calculation or evidence

Write or draw your reasoning and evidence.

7. Check a changed case

Use a clear label rule: short means 80 pages or fewer. Two judges label an 80-page book differently. What shared instruction resolves this disagreement?

My independent answer and reason

Write or draw your reasoning and evidence.

Week 8 Test and reflect

8. Design a revealing test

Create a changed input, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record · My evidence

Test record: Changed input or condition

My evidence: _____

Test record: Expected answer or fallback

My evidence: _____

Test record: Observed result

My evidence: _____

Test record: Why the result occurred

My evidence: _____

9. Project checkpoint

Define 'good match' before training or evaluating the recommender.

The project change and evidence I will keep

Write or draw your reasoning and evidence.

10. Self check

I can explain the mechanism. I can show evidence. I can handle a changed case. I can name a limit. Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

11. Transfer practice from the original programme

Two labelers use 'short' to mean $\text{pages} < 100$ and $\text{pages} \leq 100$. They disagree only on 100-page books. Write a shared definition and explain how to repair the existing labels.

My independently reasoned answer

Record support used: none, hint or teacher explanation.

12. W1 Apply the calendar guide

The calendar policy accepts whole-number days 1 through 30 inclusive and a room code A or B. Check known failures first, then unknown fields, then readiness. Label these cards and give evidence: day 30 room B; day 31 room A; day 14 room unreadable; day 31 room unreadable.

My reasoning and evidence

13. W2 Replace a vague instruction

A helper says Label a card ready if it looks nice. Explain why this can lead to inconsistent labels. Replace it with an instruction that another person can apply using the calendar policy, including what to do about a blank field.

My reasoning and evidence

14. W3 Count and investigate disagreement

For the same four cards, Mina records ready, revise, review, ready. Theo records ready, review, review, revise. How many positions agree? Identify the disagreements. Can you decide which annotator is correct from these label lists alone? Explain what else you need.

My reasoning and evidence

15. W4 Transfer the method to a new record

A fictional equipment-request form accepts a whole-number borrowing duration of 1 through 7 days inclusive and one item code X or Y. Label revise if any known field fails; otherwise label review if a field is blank or unreadable; otherwise label ready. Classify these forms and justify each: 7 days X; 8 days Y; unreadable duration X; 8 days blank code. Explain whether ready alone grants permission to borrow.

My reasoning and evidence

16. W5 Keep a policy change visible

Version 1 accepts calendar days 1 through 30. Version 2 accepts days 1 through 31. A card says day 31 room A. State its label under each version. Explain why mixing the two labels without recording the version could create a misleading training dataset.

My reasoning and evidence

17. Feedback, return check and learning record

Evidence · My record

Evidence: Worked alone / hint / model

My record: _____

Evidence: First step I repaired and why

My record: _____

Evidence: New case checked later; date and result

My record: _____

Evidence: What I can now explain without notes

My record: _____

Evidence: One remaining question

My record: _____

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

18. Pictorial case practice: Operational Labels

Two fictional catalogue reviewers label books compact or extended.

Agreed policy: compact means at most 80 pages; extended means more than 80.

Reviewer A uses $\text{pages} < 80$; reviewer B uses $\text{pages} \leq 80$. Inspect books of 79, 80, 81 pages.

Operational label boundary

	Pages	A labels	B labels
Book 1	79	compact	compact
Book 2	80	extended	compact
Book 3	81	extended	extended

Read a cell using both its row and column labels.

Operational Labels

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Shared definition

At most 80 includes a book with exactly 80 pages.

2. Reviewer A

79 compact; 80 and 81 extended.

3. Reviewer B

79 and 80 compact; 81 extended.

4. Repair boundary

A must use ≤ 80 ; retain the disagreement and changed policy implementation.

CHANGE ONE THING

Change the documented policy to fewer than 80 instead.

Explain the changed result using the matching lesson.

Why can we not resolve the disagreement merely by taking a majority of reviewers?

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice evidence.

Project connection: Give Transparent Book Recommender metadata labels explicit definitions and boundary examples for reviewers.
