

Evidence and Sources

Project: Transparent Book Recommender

1. Recall and choose your starting point

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Prompt Experiments

Without opening the old lesson, explain one key idea from Prompt Experiments. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Image and Voice Pipelines

Without opening the old lesson, explain one key idea from Image and Voice Pipelines. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Recommendation Scores

Without opening the old lesson, explain one key idea from Recommendation Scores. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

2. Practise with fading help

Use W2: Trace the worked case for Claim support and citation evaluation. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs · Procedure I chose · Middle steps · Result and check

Given inputs: _____

Procedure I chose: _____

Middle steps: _____

Result and check: _____

The step I completed without help, and the hint I needed

3. Individual reasoning check

Use the worked case for Claim support and citation evaluation. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported. Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

4. Independent transfer case

Independent case: Apply a new case independently

Five claims; four cited; three supported by cited passages; one cited ID is nonexistent. Compute support and citation presence and explain link limits.

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

5. Your learning target

Two catalogue records list 96 and 112 pages for a title. A helper averages them and reports 104. Explain the mistake and a better verification process.

6. Solve the given case

An answer says 80 pages, but the catalogue for that edition says 120.

What evidence guides correction?

Show your trace, calculation or evidence

Write or draw your reasoning and evidence.

7. Check a changed case

An answer cites a page about opening hours to support a claim about book prices. Is a citation enough? What must be checked?

My independent answer and reason

Write or draw your reasoning and evidence.

Week 29 Test and reflect

8. Design a revealing test

Create a changed input, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record · My evidence

Test record: Changed input or condition

My evidence: _____

Test record: Expected answer or fallback

My evidence: _____

Test record: Observed result

My evidence: _____

Test record: Why the result occurred

My evidence: _____

9. Project checkpoint

Separate profile-based ranking evidence from factual book information and cite the latter.

The project change and evidence I will keep

Write or draw your reasoning and evidence.

10. Self check

I can explain the mechanism. I can show evidence. I can handle a changed case. I can name a limit. Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

11. Transfer practice from the original programme

Two catalogue records list 96 and 112 pages for a title. A helper averages them and reports 104. Explain the mistake and a better verification process.

My independently reasoned answer

Record support used: none, hint or teacher explanation.

12. W1 Explain the mechanism

Explain the weekly mechanism in your own words. Use the worked scenario to name its input, decision rule and output.

My reasoning and evidence

13. W2 Trace the worked case

An answer has four factual claims. Three have citations, but only two are supported by their cited passages. All links exist. Show the intermediate steps and give the conclusion with its scope.

My reasoning and evidence

14. W3 Audit the limit

A report omits this qualification: Citation counts do not establish truth beyond the supplied sources or the correctness of uncited claims. Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

My reasoning and evidence

15. W4 Apply a new case independently

Five claims; four cited; three supported by cited passages; one cited ID is nonexistent. Compute support and citation presence and explain link limits.

My reasoning and evidence

16. W5 Design a revealing follow-up

For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison. Do not reuse W4 as a new final test after receiving feedback.

My reasoning and evidence

17. Feedback, return check and learning record

Evidence · My record

Evidence: Worked alone / hint / model

My record: _____

Evidence: First step I repaired and why

My record: _____

Evidence: New case checked later; date and result

My record: _____

Evidence: What I can now explain without notes

My record: _____

Evidence: One remaining question

My record: _____

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

18. Pictorial case practice: Evidence and Sources

A fictional catalogue answer contains three factual statements and cites existing records.

Record R: book Ocean Maps has 80 pages and is available on shelf 2.

Claims: 80 pages [R]; shelf 2 [R]; suitable for every child [R]. All three citations resolve to R.

Different citation checks

percent

Bar length shows the supplied value; the marked baseline is zero.

Evidence and Sources

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Break into claims

Count three factual claims rather than treating the answer as one blob.

2. Check links

All three citation links resolve to the intended R.

3. Check exact source support

R supports page count and shelf, not universal suitability.

4. Report separately

Citation presence 3/3; link validity 3/3; supported claims 2/3.

CHANGE ONE THING

Change the third claim to "the record does not assess suitability".

Explain the changed result using the matching lesson.

Why is the original answer not fully supported despite having citations on every claim?

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice evidence.

Project connection: Attach source IDs to recommender explanation facts and separately audit whether each source supports its precise statement.
