

Verify Numbers and Dates

Project: Verified Study Buddy

1. Recall and choose your starting point

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Source Quality

Without opening the old lesson, explain one key idea from Source Quality. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Multimodal Evidence

Without opening the old lesson, explain one key idea from Multimodal Evidence. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Image Generation Models

Without opening the old lesson, explain one key idea from Image Generation Models. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

2. Practise with fading help

Use W2: Trace the worked case for Claim support and citation evaluation. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs · Procedure I chose · Middle steps · Result and check

Given inputs: _____

Procedure I chose: _____

Middle steps: _____

Result and check: _____

The step I completed without help, and the hint I needed

3. Individual reasoning check

Use the worked case for Claim support and citation evaluation. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported. Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

4. Independent transfer case

Independent case: Changed independent case

A draft claims 18 of 24 learners is 60%, and gives an April 31 deadline. Check both statements without inventing a deadline.

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

5. Your learning target

A report says $21/28=70\%$ and gives February 30 as the deadline. Correct what can be computed and identify what must be checked externally.

6. Solve the given case

An answer says $15/20=80\%$ and sets a deadline of February 30.

Verify both.

Show your trace, calculation or evidence

Write or draw your reasoning and evidence.

7. Check a changed case

A report says 12 of 40 responses is 40%. Recalculate and state the correction with the denominator.

My independent answer and reason

Write or draw your reasoning and evidence.

Week 16 Test and reflect

8. Design a revealing test

Create a changed input, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record · My evidence

Test record: Changed input or condition

My evidence: _____

Test record: Expected answer or fallback

My evidence: _____

Test record: Observed result

My evidence: _____

Test record: Why the result occurred

My evidence: _____

9. Project checkpoint

Route arithmetic to a calculator and dates to direct sources before presenting them.

The project change and evidence I will keep

Write or draw your reasoning and evidence.

10. Self check

I can explain the mechanism. I can show evidence. I can handle a changed case. I can name a limit. Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

11. Transfer practice from the original programme

A report says $21/28=70\%$ and gives February 30 as the deadline. Correct what can be computed and identify what must be checked externally.

My independently reasoned answer

Record support used: none, hint or teacher explanation.

12. W1 Explain the mechanism

Explain the weekly mechanism in your own words. Use the worked scenario to name its input, decision rule and output.

My reasoning and evidence

13. W2 Trace the worked case

An answer has four factual claims. Three have citations, but only two are supported by their cited passages. All links exist. Show the intermediate steps and give the conclusion with its scope.

My reasoning and evidence

14. W3 Audit the limit

A report omits this qualification: Citation counts do not establish truth beyond the supplied sources or the correctness of uncited claims. Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

My reasoning and evidence

15. W4 Apply a new case independently

Five claims; four cited; three supported by cited passages; one cited ID is nonexistent. Compute support and citation presence and explain link limits.

My reasoning and evidence

16. W5 Design a revealing follow-up

For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison. Do not reuse W4 as a new final test after receiving feedback.

My reasoning and evidence

17. Feedback, return check and learning record

Evidence · My record

Evidence: Worked alone / hint / model

My record: _____

Evidence: First step I repaired and why

My record: _____

Evidence: New case checked later; date and result

My record: _____

Evidence: What I can now explain without notes

My record: _____

Evidence: One remaining question

My record: _____

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

18. Pictorial case practice: Verify Numbers and Dates

A fictional Study Buddy checks a science-club summary against supplied counts and calendar facts.

Record: 15 of 20 fictional model trials passed. Draft: "70% passed; the meeting is on June 31."

June has 30 days. No authoritative record gives the intended meeting date.

Verify Numbers and Dates

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Check denominator

There are 15 passes out of 20 total trials.

2. Calculate percentage

$15 / 20 \times 100 = 75\%$, not 70%.

3. Validate date

June 31 is invalid because June has 30 days.

4. Resolve missing intent

Ask the event owner for the correct date; do not assume June 30 or July 1.

CHANGE ONE THING

The count is revised to 14 passes out of 20, but no date record is added.

Explain the changed result using the matching lesson.

Which part can be corrected immediately from existing evidence, and which needs follow-up?

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice evidence.

Project connection: Make Study Buddy check quantities, units, dates and source support separately; record unresolved fields instead of guessing.
