

# Authentication and authorisation

Project: Grounded Learning Service

## 1. Recall and choose your starting point

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

### Configuration and secrets

Without opening the old lesson, explain one key idea from Configuration and secrets. Give an example and a mistake that the idea helps you avoid.

**My remembered idea, example and correction**

---

---

---

### Architecture and data flow

Without opening the old lesson, explain one key idea from Architecture and data flow. Give an example and a mistake that the idea helps you avoid.

**My remembered idea, example and correction**

---

---

---

## 2. Practise with fading help

Use W2: Trace the worked case for Authentication and authorisation. Record the answer once; the lesson and workbook refer to the same attempt.

**Given inputs · Procedure I chose · Middle steps · Result and check**

**Given inputs:** \_\_\_\_\_

**Procedure I chose:** \_\_\_\_\_

**Middle steps:** \_\_\_\_\_

**Result and check:** \_\_\_\_\_

\_\_\_\_\_

**The step I completed without help, and the hint I needed**

---

---

---

### 3. Individual reasoning check

Use the worked case for Authentication and authorisation. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported. Point to the step or supplied fact that decides; explain your repair if needed.

**My explanation before partner discussion**

---

---

---

---

### 4. Independent transfer case

**Independent case: Apply a new case independently**

Actor roles are none, student, teacher; target is teacher guide. Decide each under the policy.

**My independent explanation, trace and limits**

---

---

---

---

---

---

---

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

## 5. W1 Explain the mechanism

Explain the weekly mechanism in your own words. Use the worked scenario to name its input, decision rule and output.

### My reasoning and evidence

---

---

---

---

---

---

## 6. W2 Trace the worked case

A student session submits role=teacher in request data and asks for a guide. Show the intermediate steps and give the conclusion with its scope.

### My reasoning and evidence

---

---

---

---

---

---

---

## 7. W3 Audit the limit

A report omits this qualification: Successful authentication does not grant every resource or operation. Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

### My reasoning and evidence

---

---

---

---

---

---

## 8. W4 Apply a new case independently

Actor roles are none, student, teacher; target is teacher guide. Decide each under the policy.

### My reasoning and evidence

---

---

---

---

---

---

---

---

## 9. W5 Design a revealing follow-up

For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison. Do not reuse W4 as a new final test after receiving feedback.

### My reasoning and evidence

---

---

---

---

---

---

---

---

## 10. Project checkpoint and reflection

Add a labelled authentication and authorisation evidence sheet to Grounded Learning Service. Show how you can explain the mechanism and terminology of authentication and authorisation. Use the supplied fictional case and keep its inputs, intermediate steps, calculation or prediction, and limitation. Connect this record to last week’s record; a matching answer without a trace is insufficient.

**My project change, supporting evidence and remaining limit**

---

---

---

---

---

---

---

## 11. Feedback, return check and learning record

**Evidence · My record**

**Evidence:** Worked alone / hint / model

**My record:** \_\_\_\_\_

\_\_\_\_\_

**Evidence:** First step I repaired and why

**My record:** \_\_\_\_\_

\_\_\_\_\_

**Evidence:** New case checked later; date and result

**My record:** \_\_\_\_\_

\_\_\_\_\_

**Evidence:** What I can now explain without notes

**My record:** \_\_\_\_\_

\_\_\_\_\_

**Evidence:** One remaining question

**My record:** \_\_\_\_\_

\_\_\_\_\_

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

## 12. Pictorial case practice: Authentication and authorisation

A verified reader cannot edit. Jo logs in as a verified museum volunteer and asks to edit card C.

Trusted policy grants volunteers read access to C; only curators may edit it.

## Authentication and authorisation

### Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

#### 1. Identify Jo

Authentication establishes Jo's identity and volunteer role.

#### 2. Check the action

Editing C requires curator authority.

#### 3. Deny the edit

Keep C unchanged; the authenticated volunteer lacks this permission.

### CHANGE ONE THING

Use a verified curator permitted to edit C.

Explain the changed result using the matching lesson.

Explain why Jo's valid volunteer login does not permit editing C. Which trusted role change allows the action, and why is a role written in the request insufficient?

### My picture-based explanation and changed-case prediction

---

---

---

---

---

---

Support used: alone / hint / worked example. This record is practice evidence.

Project connection: For the Grounded Learning Service, retain an annotated trace and the changed-case result. Name the contract or evidence that makes the deciding step valid, so another team can review it.
