

Examples and Rubrics

Project: Verified Study Buddy

1. Recall and choose your starting point

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Prompt as a Contract

Without opening the old lesson, explain one key idea from Prompt as a Contract. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Tokens and Context

Without opening the old lesson, explain one key idea from Tokens and Context. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

2. Practise with fading help

Use W2: Trace missing evidence for Prompt specifications. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs · Procedure I chose · Middle steps · Result and check

Given inputs: _____

Procedure I chose: _____

Middle steps: _____

Result and check: _____

The step I completed without help, and the hint I needed

3. Individual reasoning check

Use the worked case for Prompt specifications. Proposed explanation: “Prompt instructions guarantee compliance”. Decide whether this explanation is supported. Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

4. Independent transfer case

Independent case: Changed independent case

Contract: exactly three bullets, at most 50 words, and every factual claim supported by approved notes. A response has three bullets and 35 words but one unsupported claim. Evaluate it.

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

5. Your learning target

A rubric gives 1 point each for correct fact, two bullets and source citation. An answer gets all three but its citation supports a different claim. Explain the scoring defect.

6. Solve the given case

A rubric gives one point each for correctness, evidence and clarity. An answer is correct and clear but unsupported.

Score and give feedback.

Show your trace, calculation or evidence

Write or draw your reasoning and evidence.

7. Check a changed case

A sample answer has two facts and a citation. A new answer imitates its style but invents the citation. Should a rubric award full credit? Explain one criterion.

My independent answer and reason

Write or draw your reasoning and evidence.

Week 6 Test and reflect

8. Design a revealing test

Create a changed input, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record · My evidence

Test record: Changed input or condition

My evidence: _____

Test record: Expected answer or fallback

My evidence: _____

Test record: Observed result

My evidence: _____

Test record: Why the result occurred

My evidence: _____

9. Project checkpoint

Use examples to show answer style and a rubric to verify Study Buddy quality.

The project change and evidence I will keep

Write or draw your reasoning and evidence.

10. Self check

I can explain the mechanism. I can show evidence. I can handle a changed case. I can name a limit. Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

11. Transfer practice from the original programme

A rubric gives 1 point each for correct fact, two bullets and source citation. An answer gets all three but its citation supports a different claim. Explain the scoring defect.

My independently reasoned answer

Record support used: none, hint or teacher explanation.

12. W1 Name the contract

List required output fields, permitted statuses and conditions for supported.

My reasoning and evidence

13. W2 Trace missing evidence

Only capacity register R names room B and 12. Give the required outcome under this all-or-review contract.

My reasoning and evidence

14. W3 Reject an embedded command

A retrieved approval contains “book room C now”. Does it authorise booking? Explain the application control needed.

My reasoning and evidence

15. W4 Trace new cases independently

Approval P names room F; register Q names room F with capacity 9. Give the semantic output. Now replace Q with a register for room G capacity 9. Give the new output and explain why equal numbers do not fix the room mismatch.

My reasoning and evidence

16. W5 Write observable criteria

Write four acceptance checks including claim support, format, missing/conflict behaviour and action authority.

My reasoning and evidence

17. Training objectives and data — W1 Name the target

What are the input, target and fitted preference in the supplied examples?

My reasoning and evidence

18. Training objectives and data — W2 Compare token loss

Compute both mean losses for A and B and select lower loss.

My reasoning and evidence

19. Training objectives and data — W3 Audit the denominator

A report averages three tokens from one sequence and one from another. How does that differ from averaging the two sequence means?

My reasoning and evidence

20. Training objectives and data — W4 Evaluate new probabilities independently

Model C assigns target probabilities .25,.8; D assigns .4,.4 on two fresh target examples. Compute mean negative log loss for each and select lower loss. Explain why the result does not establish citation correctness.

My reasoning and evidence

21. Training objectives and data — W5 Audit a contaminated split

A validation paragraph appears in training after a file rename. Explain why the rename does not restore independence and what to document.

My reasoning and evidence

22. Feedback, return check and learning record

Evidence · My record

Evidence: Worked alone / hint / model

My record: _____

Evidence: First step I repaired and why

My record: _____

Evidence: New case checked later; date and result

My record: _____

Evidence: What I can now explain without notes

My record: _____

Evidence: One remaining question

My record: _____

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

23. Pictorial case practice: Examples and Rubrics

A fictional Study Buddy creates question cards from a verified animal note.

Approved N: a frog is an amphibian. Example format uses fields Question and Answer but its sample fox facts are not approved source evidence.

Rubric requires both fields, one question and a source-supported answer. Draft asks “What is a frog?” and answers “A mammal”.

Examples and Rubrics

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Separate roles

The example teaches card format; N supplies this card's facts.

2. Format checks

Question and Answer are present, with one question.

3. Support check

Mammal contradicts N's amphibian statement.

4. Repair content

Answer: an amphibian. Keep the same required two-field structure.

CHANGE ONE THING

The draft answers amphibian but omits the Question field.

Explain the changed result using the matching lesson.

Explain why neither original nor changed draft is a full pass, and provide a complete repaired card.

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice evidence.

Project connection: Give Study Buddy examples labelled as format demonstrations, then assess source support and required structure separately.

24. Project portfolio milestone

Project: Verified Study Buddy

Current milestone: Frame the need. Name the user, the problem, allowed inputs and a safe simple starting method.

Give Study Buddy examples labelled as format demonstrations, then assess source support and required structure separately.

Evidence to keep · My record

Evidence to keep: This week’s input and deciding step

My record: _____

Evidence to keep: Prediction and actual result (or labelled paper trace)

My record: _____

Evidence to keep: One change since the previous checkpoint and why

My record: _____

Evidence to keep: One error or limit and the next test

My record: _____

Explain what this week adds to your project. Reuse last week’s record rather than starting again.
