

Final project manuscript

Project: Reproducible AI Research Study

1. Recall and choose your starting point

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Independent reproduction check

Without opening the old lesson, explain one key idea from Independent reproduction check. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Writing results and limitations

Without opening the old lesson, explain one key idea from Writing results and limitations. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Negative results and claim revision

Without opening the old lesson, explain one key idea from Negative results and claim revision. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

2. Practise with fading help

Use W2: Trace the worked case for Final project manuscript. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs · Procedure I chose · Middle steps · Result and check

Given inputs: _____

Procedure I chose: _____

Middle steps: _____

Result and check: _____

The step I completed without help, and the hint I needed

3. Individual reasoning check

Use the worked case for Final project manuscript. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported. Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

4. Independent transfer case

Independent case: Apply a new case independently

Manuscript says 12 evaluated cases, raw record has 10 completed and 2 missing with 8 passes. Correct the summary.

My independent explanation, trace and limits

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

5. W1 Explain the mechanism

Explain the weekly mechanism in your own words. Use the worked scenario to name its input, decision rule and output.

My reasoning and evidence

6. W2 Trace the worked case

Abstract says 100% success; results table shows 18/20, and two failures are omitted from the figure. Show the intermediate steps and give the conclusion with its scope.

My reasoning and evidence

7. W3 Audit the limit

A report omits this qualification: A manuscript is ready only when its claims and artifacts align; formatting alone cannot certify evidence. Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

My reasoning and evidence

8. W4 Apply a new case independently

Manuscript says 12 evaluated cases, raw record has 10 completed and 2 missing with 8 passes. Correct the summary.

My reasoning and evidence

9. W5 Design a revealing follow-up

For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison. Do not reuse W4 as a new final test after receiving feedback.

My reasoning and evidence

10. Project checkpoint and reflection

For Reproducible AI Research Study, use this week’s independent task as a rehearsal for the final evidence pack: Manuscript says12 evaluated cases, raw record has10 completed and2 missing with8 passes. Correct the summary. Keep actual observations separate from expected results, preserve failures, compare a baseline and explain the limits.

My project change, supporting evidence and remaining limit

11. Feedback, return check and learning record

Evidence · My record

Evidence: Worked alone / hint / model

My record: _____

Evidence: First step I repaired and why

My record: _____

Evidence: New case checked later; date and result

My record: _____

Evidence: What I can now explain without notes

My record: _____

Evidence: One remaining question

My record: _____

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

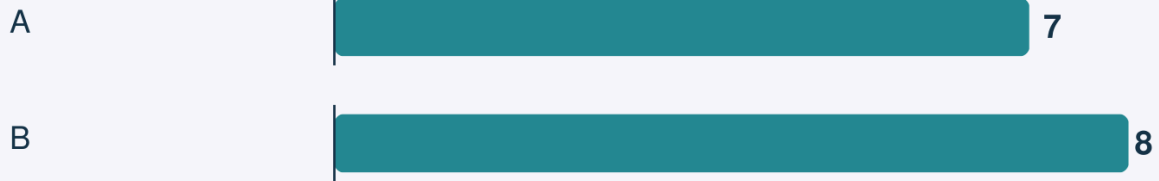

12. Pictorial case practice: Final project manuscript

Build a manuscript from claim to record. A capstone manuscript compares two frozen pattern classifiers on ten reserved cases.

A is correct on 7/10; B on 8/10. All cases are indoor, from five plants with two views each.

Indoor capstone photo outcomes

correct photos out of 10; five plants

Bar length shows the supplied value; the marked baseline is zero.

Final project manuscript

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. State bounded claim

B adds one correct photo on this indoor set.

2. Describe dependence

Ten photos come from five plants; report the grouping.

3. Present results

Show 70% and 80% with counts and case-level outcomes.

4. Preserve limitations

Do not claim outdoor robustness or ten independent plants.

CHANGE ONE THING

The abstract calls the study a test on ten independent plants.

Explain the changed result using the matching lesson.

Connect the manuscript's 7/10 and 8/10 scores to the five-plant grouping. Which abstract claim must be corrected if it says ten independent plants?

My picture-based explanation and changed-case prediction

Support used: alone / hint / worked example. This record is practice evidence.

Project connection: For the Reproducible AI Research Study, retain an annotated worked trace and the changed-case reasoning. Connect the claim to its records, units and assumptions so another investigator can challenge or reproduce it.

13. Project portfolio milestone

Project: Reproducible AI Research Study

Current milestone: Present and defend. Demonstrate the system, explain one failure and justify the next improvement with evidence.

For the Reproducible AI Research Study, retain an annotated worked trace and the changed-case reasoning. Connect the claim to its records, units and assumptions so another investigator can challenge or reproduce it.

Evidence to keep · My record

Evidence to keep: This week's input and deciding step

My record: _____

Evidence to keep: Prediction and actual result (or labelled paper trace)

My record: _____

Evidence to keep: One change since the previous checkpoint and why

My record: _____

Evidence to keep: One error or limit and the next test

My record: _____

Explain what this week adds to your project. Reuse last week's record rather than starting again.
