AI ACADEMY · LEVEL 3 · GRADE 8 · WEEK 15 · STUDENT LESSON

Source Quality

Learn to understand, design, build, test and explain AI systems responsibly.

Project: Verified Study Buddy

Before you start

AI-2 Week 29: identify the exact record that supports a claim.

Plan time to read, investigate and explain. Keep predictions separate from observations.

STUDENT LESSON · 1 OF 18

Your mission

> Start with the target: Explain the mechanism and terminology of conflicting and time-sensitive sources. Try the recall before opening notes.

Your learning target

I can explain the **mechanism** and terminology of conflicting and time-sensitive sources.

I can apply the stated procedure to a new case with a traceable result.

I can identify an assumption or limitation and design a revealing follow-up.

Remember before reading

Close your notes first. A rough first answer helps us choose the right starting point; it is not a score for your ability.

Without opening the old lesson, explain one key idea from Hallucination Failure Types. Give an example and a mistake that the idea helps you avoid.

Without opening the old lesson, explain one key idea from Speech and Audio Systems. Give an example and a mistake that the idea helps you avoid.

Without opening the old lesson, explain one key idea from Prompt Evaluation. Give an example and a mistake that the idea helps you avoid.

After trying, check the relevant lesson or ask your teacher. Change the part of your explanation that the **evidence** shows was wrong.

Week 15: Source Quality

Authority, **relevance**, **currency**, and **independence** determine source usefulness.

CREATOR MISSION

Rank four sources for a low-risk school research question.

Creator name and date:

> **Write or draw your reasoning and evidence.**

Readiness for the connected explanation

Recall Abstention and clarification. Explain why a recorded result needs its **input** conditions and **evidence** source before it can support a claim.

This week’s end goal

By the end, I can apply source **authority** and effective dates rather than choosing the newest-looking upload.

STUDENT LESSON · 2 OF 18

Notice the evidence

> Investigate the supplied Source Quality case. Separate observations, given facts and assumptions before choosing an explanation.

PICTURE STORY

Notice → Predict → Explain

Begin with visible **evidence**. Do not explain more than the picture and information support.

Start with this puzzle

MYSTERY

The learners must use source quality to solve a problem. What information do they have? What decision or calculation do they make? What would count as **evidence** that it worked?

Three **observation**s (what you can point to):

Write or draw your reasoning and evidence.

My **prediction** and the clue supporting it:

Write or draw your reasoning and evidence.

A closer explanation

Changing facts require a stated time and source-version policy. Current-looking records can conflict without enough **evidence** to choose between them.

Begin by writing the question the procedure is intended to answer. Identify the information already supplied, the information it will produce and the information still missing.

These are constructed classroom examples; they do not require live accounts, private records or an external service. Do not treat a plausible explanation as a measured outcome.

STUDENT LESSON · 3 OF 18

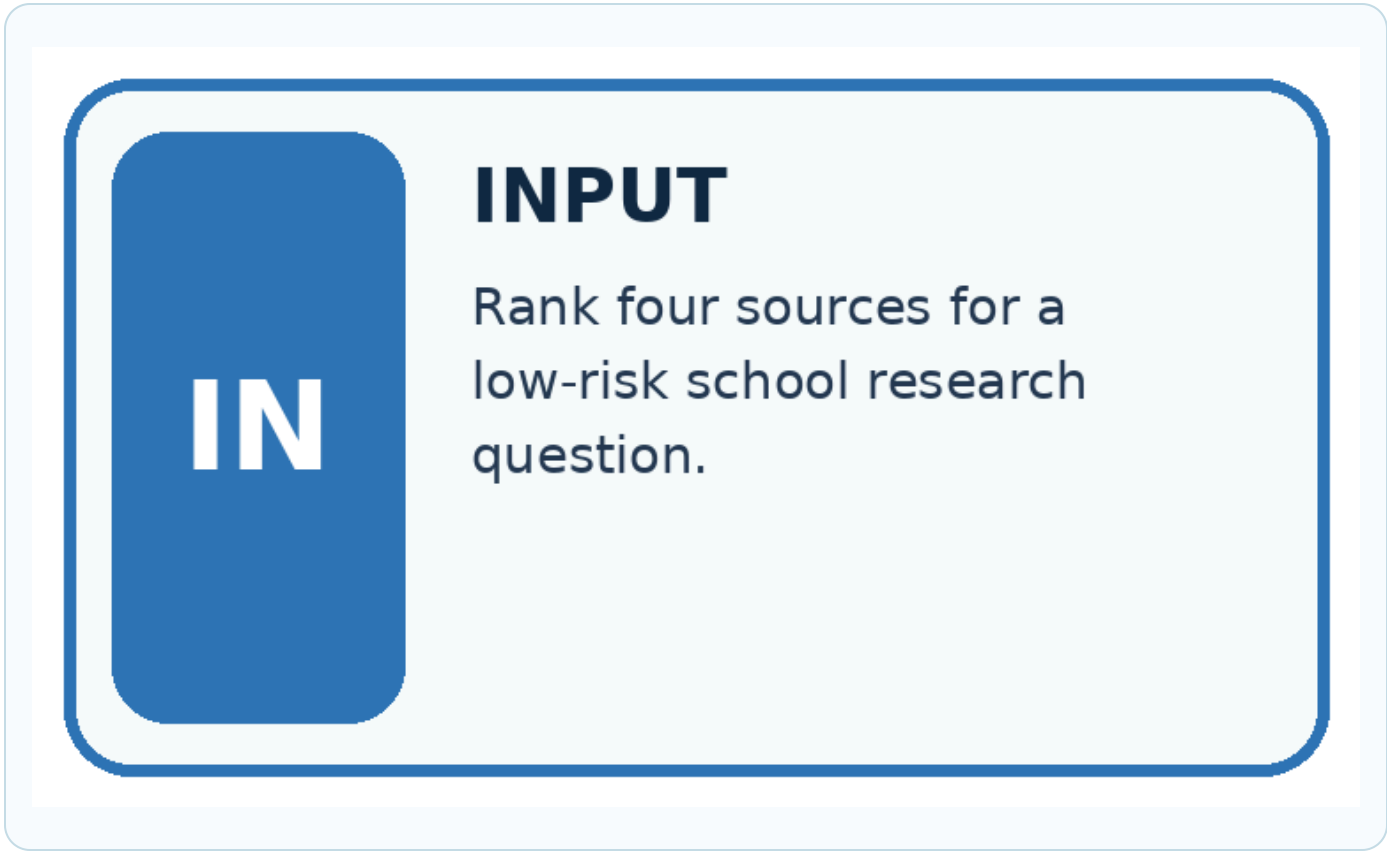

See how it works

> Follow the mechanism for Source Quality. Connect each labelled input, deciding step and result.

VISUAL MECHANISM

Input → Process → Output

Trace the information. At each stage, ask what changed and how you could test it.

↓

SYSTEM
Authority, relevance, currency, and independence determine source usefulness.

↓

OUT
EVIDENCE
Rank four sources for a low-risk school research question.

Which stage could fail even when the other two are correct? Explain:

Write or draw your reasoning and evidence.

A closer explanation

For this toy task a signed amendment supersedes the referenced original from its **effective time**. Keep both records. A newer timestamp alone has no **authority** unless the policy grants it.

Conflicting and time-sensitive sources — evidence trace

INPUT AND SCOPE	CHECK OR CALCULATION	CONCLUSION AND LIMIT
Notice N says room A from Monday. Signed amendment M references N and changes to B effective Wednesday. Query asks Tuesday, then Thursday.	For this toy task a signed amendment supersedes the referenced original from its effective time. Keep both records. A newer timestamp alone has no authority unless the policy grants it.	Tuesday uses A; Thursday uses B. The amendment effective time, not merely upload order, determines the change.

The figure connects this chapter's worked input, declared procedure and result. Read the complete worked reasoning for qualifiers and intermediate steps; the abbreviated labels do not replace that reasoning.

Before applying the procedure, write its units, denominator or decision boundary where relevant. A partner should be able to repeat each step using the same **input**s.

If a required **input** is absent or violates the stated contract, record that condition explicitly instead of quietly replacing it with a convenient value.

Connect the picture and the explanation

Point to the **input**, the deciding step and the result in this week's visual. Explain the same step in ordinary words. A picture helps when you can say what each part represents.

STUDENT LESSON · 4 OF 18

Compare the cases

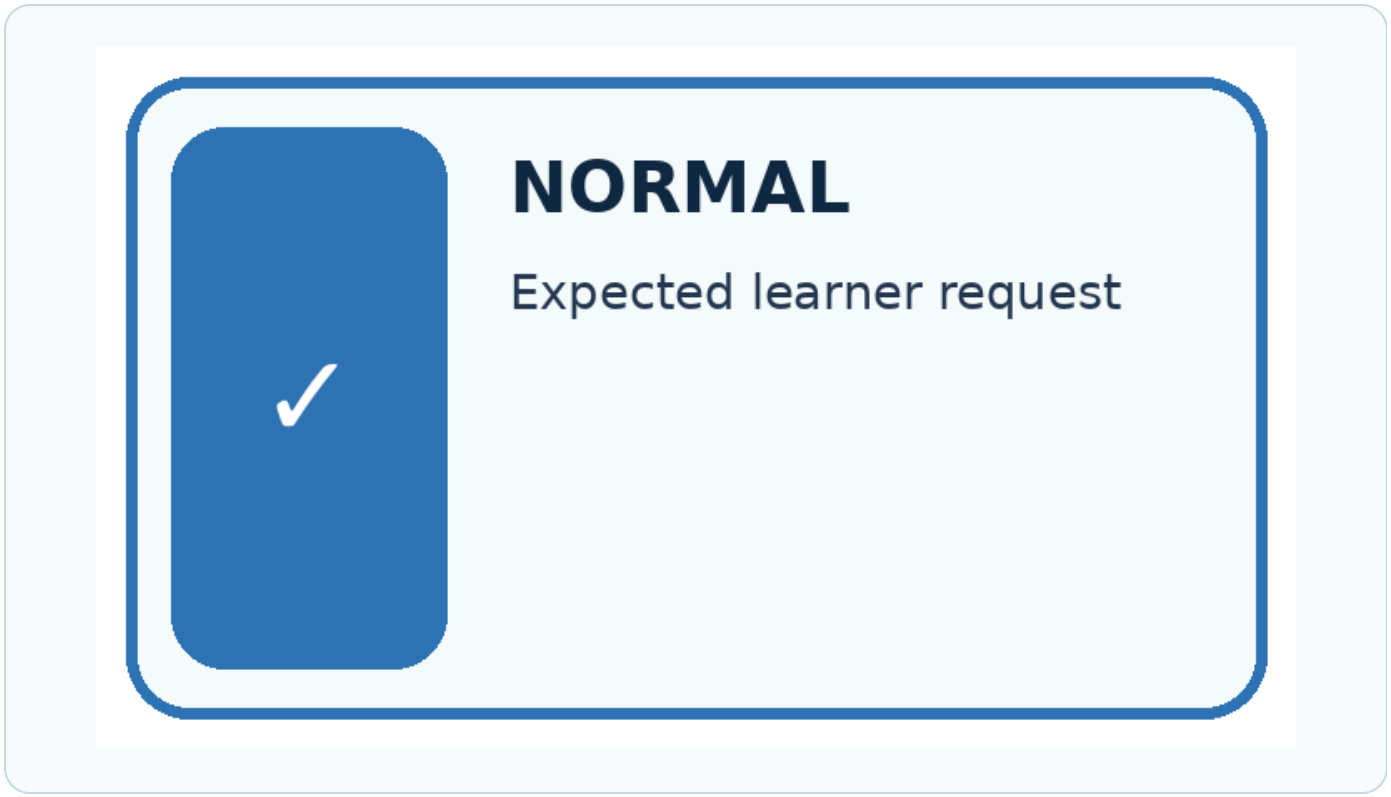

> Compare the supplied cases for Source Quality. Identify the detail that changes the conclusion.

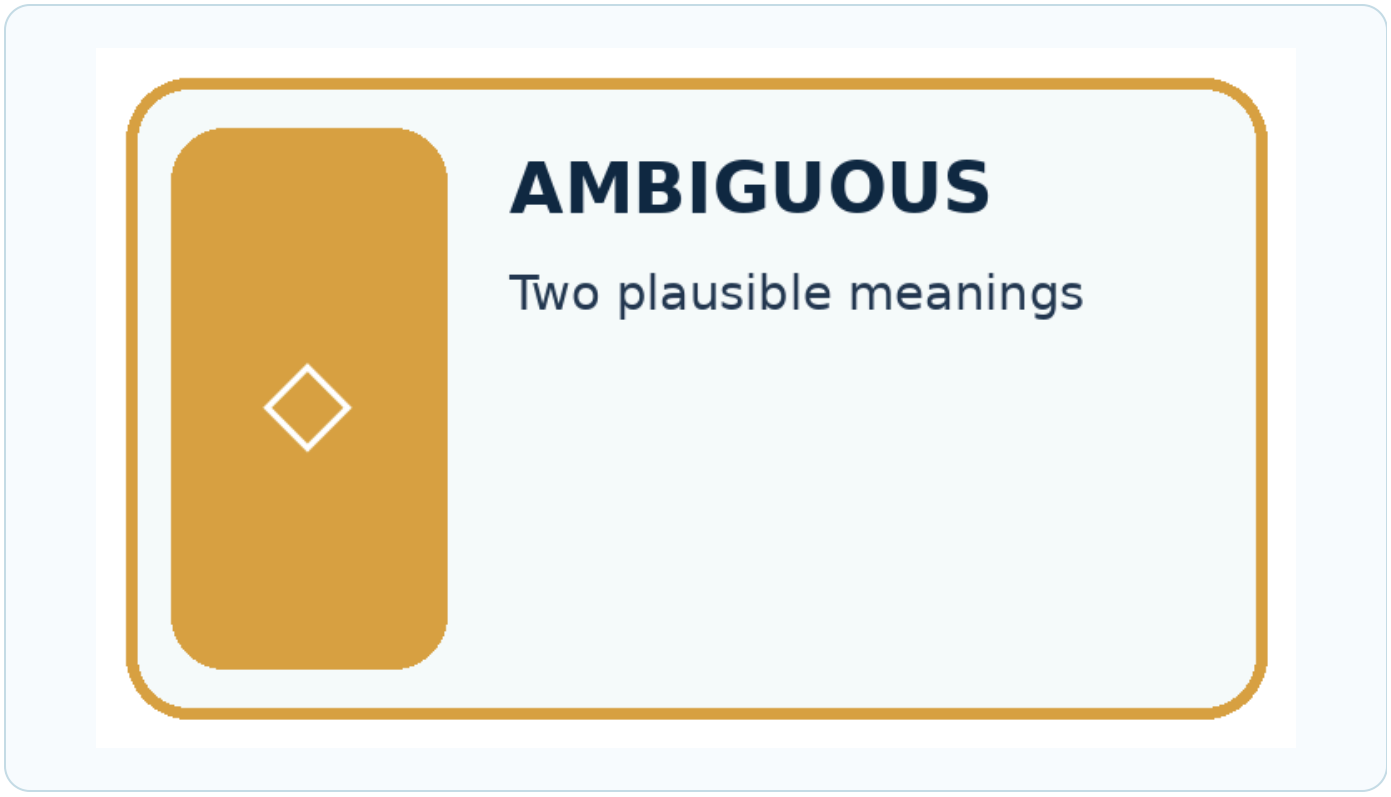

The case to investigate

CASE GALLERY

Four Tests, Four Kinds of **Evidence**

A system is not understood until it survives more than one comfortable example.

NORMAL
Expected learner request

AMBIGUOUS
Two plausible meanings

The normal case

NORMAL CASE: predict and name **evidence**. BOUNDARY CASE: predict and name **evidence**.

Check missing information

MISSING INFORMATION: predict and name **evidence**. TRANSFER CASE: predict and name **evidence**.

Which case is most likely to reveal a hidden assumption? Why?

Write or draw your reasoning and evidence.

Change one thing in the pictured case

Change one thing

Change: A signed amendment C explicitly revokes B effective day 12 and restores Hall 1.

Predicted result

Prediction: Day 9 stays Hall 3; day 13 becomes Hall 1.

Why the result follows

Reason: The new authoritative change applies from its stated effective date, not retroactively.

STUDENT LESSON · 5 OF 18

Words that unlock the idea

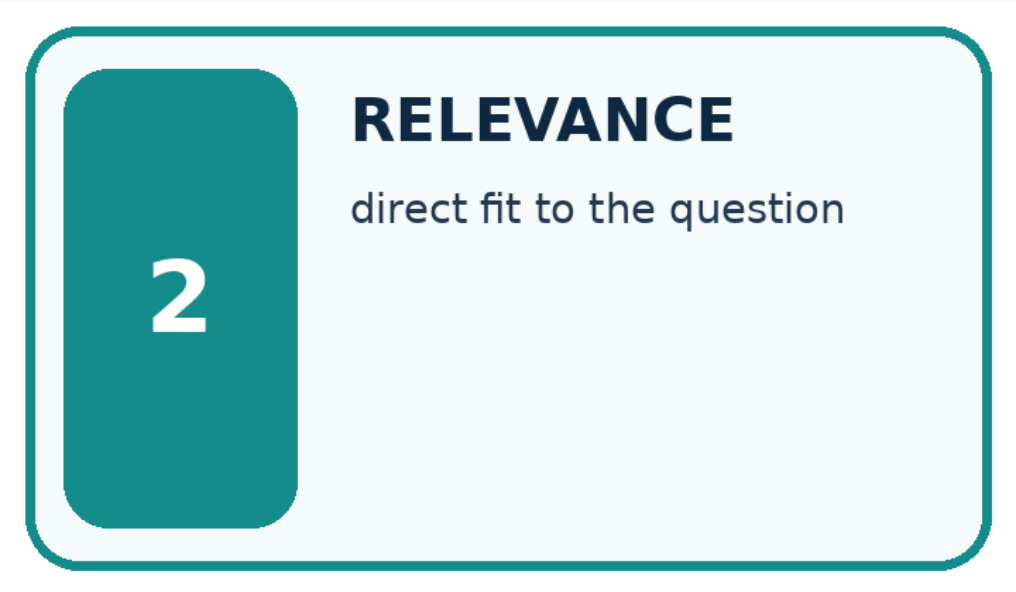

> Use the vocabulary of Source Quality to explain a concrete decision, rather than only memorising definitions.

VOCABULARY LAB

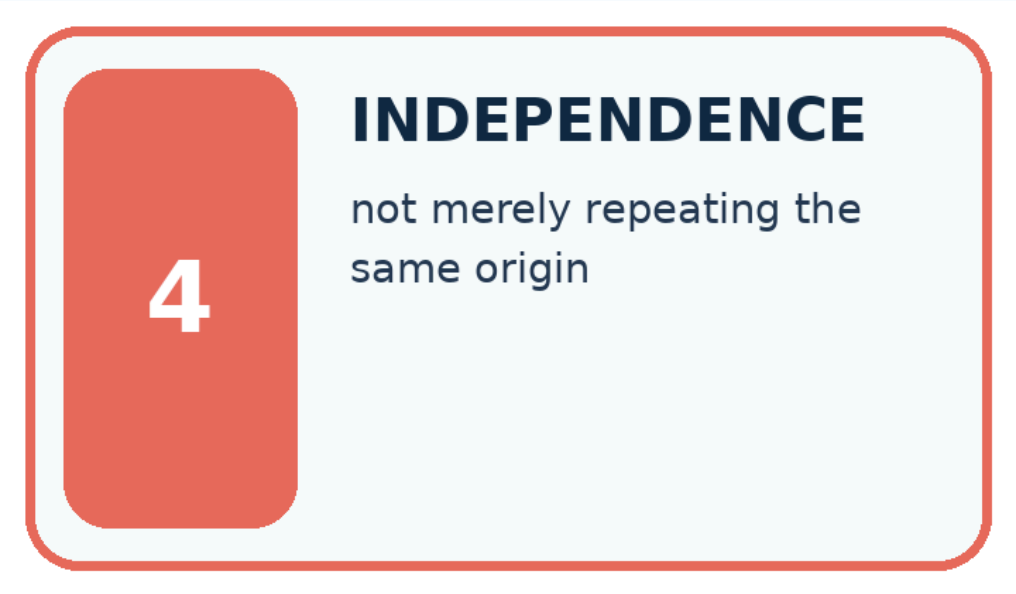

Words You Can Use to Reason

A definition matters when you can recognize the idea, use it, and contrast it with a near-miss.

1
AUTHORITY
expertise and responsibility behind a source

2
RELEVANCE
direct fit to the question

Word	My own example	Not this / boundary
authority	A person or source with relevant responsibility or evidence for a particular decision or claim.	
relevance	How directly information helps answer the stated question or perform the task.	

Word	My own example	Not this / boundary
currency	How up to date information is for the task and time concerned.	
independence	Separation from influences relevant to a judgment, such as keeping final test cases out of model selection.	

Words used in the closer explanation

Word	Meaning
Effective time	When a declared change begins to apply
Supersession	A documented replacement relationship between versions
Temporal scope	The time conditions a claim concerns

STUDENT LESSON · 6 OF 18

Follow a worked example

> Follow the worked trace for Source Quality, predict a step, then compare with its explanation.

WORKED EVIDENCE

Reason Step by Step

Predict first. Then check each step. A correct answer without visible reasoning is incomplete **evidence**.

WEEK 15 • WORKED EVIDENCE

1. A museum page may be authoritative for artifact facts.
2. A current weather agency page matters more for today’s storm.
3. Two articles copying one press release are not independent.
4. Rank sources by the actual claim—not by appearance alone.

1. A museum page may be authoritative for artifact facts.

2. A current weather agency page matters more for today’s storm.

3. Two articles copying one press release are not independent.

4. Rank sources by the actual claim—not by appearance alone.

Recalculate, retrace, or restate the reasoning in your own representation:

Write or draw your reasoning and evidence.

CHECK Did the **evidence** answer the exact question? Did the total, path, or source record stay consistent?

A closer explanation

Notice N says room A from Monday. Signed amendment M references N and changes to B effective Wednesday. Query asks Tuesday, then Thursday.

Tuesday uses A; Thursday uses B. The amendment **effective time**, not merely upload order, determines the change.

Worked explanation · Source Quality

Compare the intermediate **evidence** with the final statement. Explain why each number or decision follows from the stated **input**s.

The conclusion belongs to this scenario and procedure; changing the **input**s, evaluation population or **authority** can change what it establishes. Retain the raw record so a later revision can be compared honestly.

Learn from the worked case

Cover the result before checking it. Say what is given, choose the procedure, and follow one step at a time. Then uncover the result and explain your first mismatch. Ask why a step is allowed, not only what number it produces.

A pictorial worked case: Source Quality

A fictional Study Buddy answers which room a club is authorised to use.

The facts we will use

Supplied facts

Signed notice A: Hall 1 from day 1. Signed amendment B references A and changes to Hall 3 effective day 8.

Supplied facts

An old copy of A is reuploaded on day 10. B remains the authoritative amendment. Queries concern day 6 and day 9.

AI ACADEMY / AI-3/15

Source Quality

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Check authority

B is a signed amendment to A, not an unrelated comment.

2. Day 6

Before effective day 8, authorised room is Hall 1.

3. Day 9

From day 8 onward, authorised room is Hall 3.

4. Ignore upload shortcut

Reuploading old A on day 10 does not revoke B.

CHANGE ONE THING

A signed amendment C explicitly revokes B effective day 12 and restores Hall 1.

Explain the changed result using the matching lesson.

Follow the labelled picture with the matching explanation. Open the vector diagram

Read the picture one step at a time

STEP	WHAT HAPPENS AND WHY
1. Check authority	B is a signed amendment to A, not an unrelated comment.
2. Day 6	Before effective day 8, authorised room is Hall 1.
3. Day 9	From day 8 onward, authorised room is Hall 3.
4. Ignore upload shortcut	Reuploading old A on day 10 does not revoke B.

Match each pictured step to the supplied facts. This is a worked teaching case, not an independent assessment.

Why this result follows

Why the result follows

A source's upload time and the time its rule takes effect answer different questions. Preserve version relationships and the query's intended date. The current authoritative chain gives a consistent answer to both queries.

A later filename or timestamp alone cannot establish that an old record supersedes a signed amendment.

What this example does not establish

Keep the stated limit

Authority is declared in this fictional case; real conflicting sources may require the responsible owner's review.

Keep the stated limit

Read the labelled picture: Which source fields must be checked before answering day 9?

Keep the stated limit

Change one thing: A signed amendment C explicitly revokes B effective day 12 and restores Hall 1. Predict the result before checking the explanation. What remains the same?

STUDENT LESSON · 7 OF 18

Find and repair a mistake

> Find the unsupported step in the Source Quality claim and explain a repair using the supplied evidence.

Find the first error

ERROR DETECTIVE

Compare → Diagnose → Repair

Do not patch the answer. Find the earliest unsupported assumption, wrong step, or weak **evidence**.

!

COMPARE • DIAGNOSE

Weak idea: The first search result is the best source. Strong move: inspect the claim, source, stage, schema, or test evidence; repair one cause; rerun.

Evidence record	Expected	Actual	Likely cause / next test
normal case	works		
boundary case	stated rule		
missing input	safe response		
fresh transfer	generalizes		

Repair one cause. Why is this repair better than changing several things?

Write or draw your reasoning and evidence.

A closer explanation

Check the claim against the facts

Complete the supported workbook tasks before attempting W4 independently. Record any hints or help used. After feedback, use the teacher's fresh retry rather than copying the earlier answer.

For a project, select a relevant new case, predict the outcome from the declared rule and preserve the result alongside any revision.

Exit: propose one revealing change to the worked scenario. State the expected outcome and the evidence that would make you revise your explanation.

STUDENT LESSON · 8 OF 18

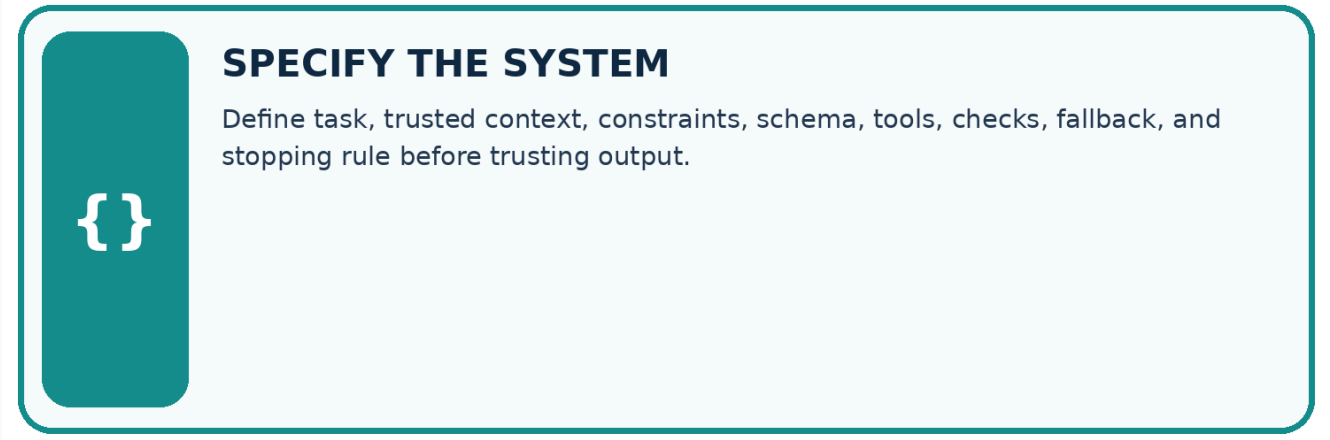

Practise together

> Practise Source Quality with support, then explain the deciding step in your own words.

LOGIC STUDIO

Specify Before You Run

Prompts, schemas, retrieval, tool calls, and code are inspectable parts of one AI product.

SET task, audience, constraints, **output**_schema LOAD approved_context or retrieval_result CALL model or allowed_tool VALIDATE fields, claims, citations, and safety IF **evidence** missing: ask, retrieve, or abstain RETURN useful **output** + source trail + limitations

> Trace one **input**. Which line changes the state or chooses a path?

Write or draw your reasoning and evidence.

A closer explanation

An unspecified **authority** or effective-time rule leaves a conflict unresolved; do not invent precedence.

A useful check asks what would make the reasoning fail. Distinguish a failure to execute the declared procedure from a weakness in the procedure itself.

The first may require a correction; the second requires an explicitly revised method and new **evidence**. Preserve unsuccessful cases so an improved result cannot hide the original problem.

Guided: restate the worked result, then name the assumption or limitation that prevents a broader conclusion.

Practise with less help: Trace the worked case

Use workbook W2 for the connected example “Conflicting and time-sensitive sources”. First fill the **input** and rule boxes. Try the middle steps before asking for a hint. After a hint, try the next step yourself.

Plan	Do	Check
What is given? Which rule or procedure applies?	Record each intermediate step.	Does the result follow? What remains unknown?

Explain your trace to a partner. Your partner points to one step to check. Swap roles on the next case. Each person writes their own explanation.

Check your reasoning

Use the worked case for Conflicting and time-sensitive sources. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported.

Point to the step or supplied fact that decides; explain your repair if needed.

Answer on your own before discussion. If you are unsure, say which step you need help with.

Explain the picture

Which source fields must be checked before answering day 9?

My explanation using a pictured step and the given facts

This is supported practice. Keep the separately named independent case for an attempt before feedback.

STUDENT LESSON · 9 OF 18

Run the investigation

> Investigate Source Quality. Record the prediction, actual observation or labelled paper trace, explanation and next test separately.

EVIDENCE LAB

Predict → Test → Record → Explain

Keep expected and actual results separate. Surprises are useful data when recorded honestly.

Score four sources against all criteria, trace origin links, and defend the best pair for one precise claim.

Test / input · Prediction · Actual · Evidence / calculation · Change or keep?

> **Test / input:** normal
> **Prediction:** _____
> **Actual:** _____
> **Evidence / calculation:** _____
> **Change or keep?:** _____

> **Test / input:** boundary
> **Prediction:** _____
> **Actual:** _____
> **Evidence / calculation:** _____
> **Change or keep?:** _____

> **Test / input:** missing
> **Prediction:** _____
> **Actual:** _____
> **Evidence / calculation:** _____
> **Change or keep?:** _____

> **Test / input:** fresh transfer
> **Prediction:** _____
> **Actual:** _____
> **Evidence / calculation:** _____
> **Change or keep?:** _____

What did the hardest test teach you that the normal test did not?

Write or draw your reasoning and evidence.

Plan → try → check

Before trying: what do I expect, and why? While trying: which step could first go wrong? Afterwards: what did I actually observe, and what should change? Keep “not run” if you only traced the procedure.

STUDENT LESSON · 10 OF 18

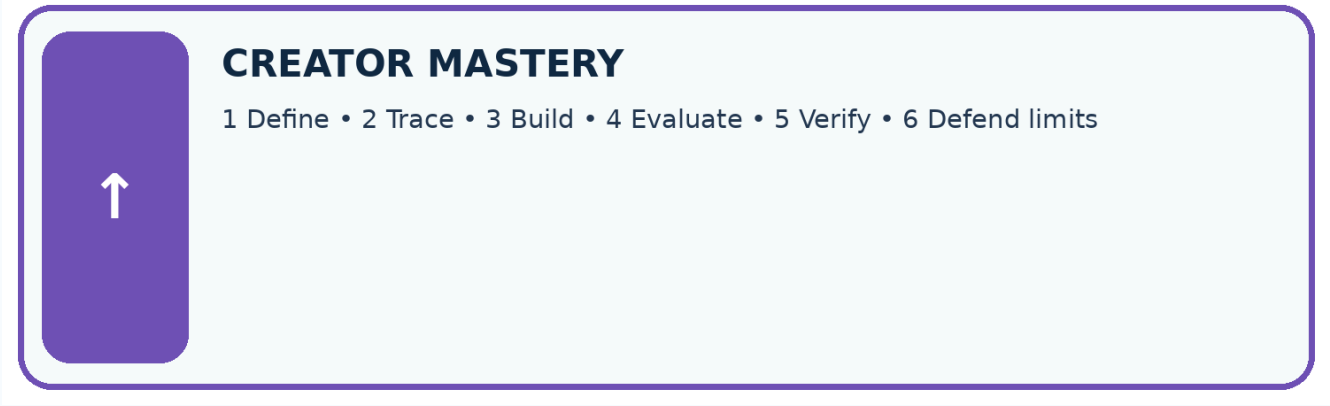

Build your understanding

> Move from recall to tracing, diagnosis and transfer in Source Quality. Explain why each step is justified.

MASTERY

From Knowing the Word to Owning the Idea

Move upward only when you can produce **evidence** without copying the worked example.

1 • NAME: Define the concept without repeating the textbook.

2 • TRACE: Show the information, state, branch, calculation, or **evidence** path.

3 • APPLY: Solve a different example independently.

4 • CHALLENGE: Find a boundary case, counterexample, or unfair outcome.

5 • EXPLAIN LIMITS: Say when the result should not be trusted or used alone.

My strongest **evidence** of independent understanding:

> **Write or draw your reasoning and evidence.**

STUDENT LESSON · 11 OF 18

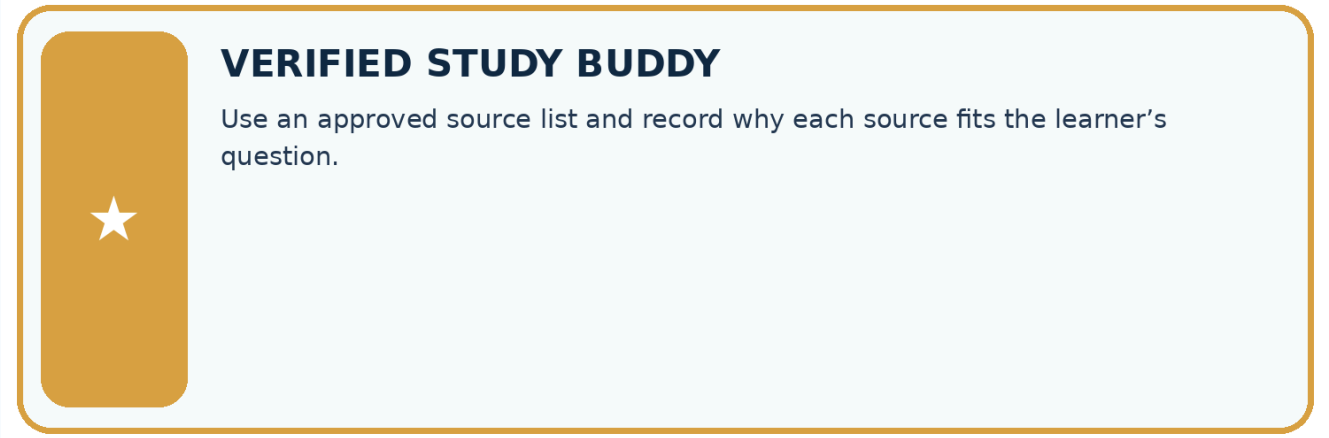

Connect your project

> Apply this week's idea to Verified Study Buddy. Keep an annotated decision and the evidence supporting it.

CUMULATIVE PROJECT

Verified Study Buddy

Every week adds one inspectable piece. The system must show how it reached a result.

THIS WEEK'S CHECKPOINT Use an approved source list and record why each source fits the learner's question.

Trace the system

SYSTEM MAP Learner need → prompt/schema → approved sources/retrieval → model/tool → structured answer → verification → **human decision**

What will you add, change, or verify in the project this week?

Write or draw your reasoning and evidence.

What should remain under **human control**?

Write or draw your reasoning and evidence.

Responsible design

RESPONSIBLE DESIGN Collect only necessary information. Show uncertainty and limits. Never confuse fluent **output** with verified truth.

Evidence for your project

Store Study Buddy source identity, version, **authority** and effective date, especially for schedules or changing classroom rules.

STUDENT LESSON · 12 OF 18

Show what you know

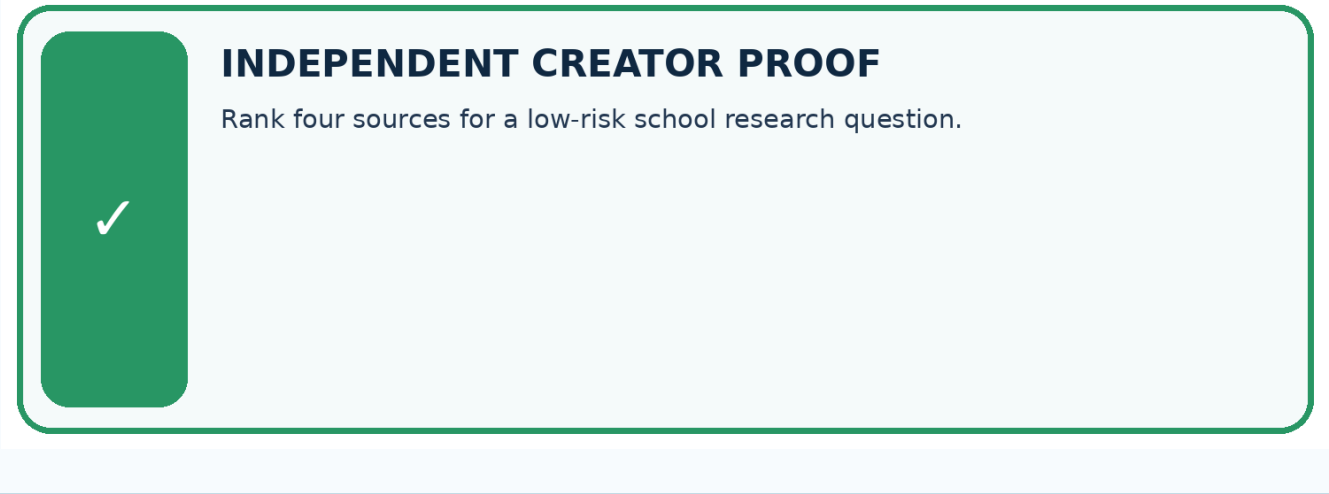

Use a genuinely new case for independent evidence. Previously discussed examples remain practice; use the separately named independent case before feedback.

Independent evidence

INDEPENDENT MASTERY PROOF

Explain • Transfer • Test • Defend

Complete this page without copying the worked example. Your reasoning matters more than decoration.

Try a more demanding case

CHALLENGE Rank four sources for a low-risk school research question.

1. My fresh example, trace, calculation, or design:

Write or draw your reasoning and evidence.

2. My **evidence** that it works (include a boundary or missing-data case):

Write or draw your reasoning and evidence.

3. One limitation, fairness concern, or situation needing human review:

Write or draw your reasoning and evidence.

Check your explanation

SELF-CHECK ☐ I explained the **mechanism** ☐ I used **evidence** ☐ I tested a fresh case ☐ I named a limitation ☐ I can answer 'why?'

STUDENT LESSON · 13 OF 18

Study a complete case

Revisit the complete Source Quality case for supported practice. Repeated examples do not become fresh assessments.

Week 15 Worked case

Use the supplied details to practise the weekly concept before attempting the independent question. This case extends the illustrated lesson.

The situation

An original experiment report and an anonymous unlinked summary describe a method.

The question

> Where should verification begin?

Worked explanation

Read the original method, scope and limitations. Original does not mean infallible; summaries may omit conditions.

Explain it in your own words

> Which detail supports the answer, and why does it matter?

Write or draw your reasoning and evidence.

Trace the supplied case visually

Follow a summary back to its evidence

Evidence or stage	Value or result
Summary	Identify its source
Original report	Read method and scope
Limitations	Keep conditions attached
Conclusion	State what evidence supports

An original experiment report and an anonymous unlinked summary describe a method.

> Where should verification begin?

Read the original method, scope and limitations. Original does not mean infallible; summaries may omit conditions.

STUDENT LESSON · 14 OF 18

Try a new case independently

> Attempt the reserved new case before feedback. Record support; the earlier examples below remain additional practice.

Independent case: Apply a new case independently

Original allows capacity 14. Signed amendment lowers it to 9 effective day 5. Query concerns days 4 and 6. Trace both and preserve versions.

> **My independent explanation, trace and limits**

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

Week 15 Independent application

Close the worked explanation. Apply the idea to this different question without copying.

> For a school's current opening time, compare an undated repost with a dated notice issued by the school. Which is the stronger starting source, and what must still be checked?

My answer, with a trace, calculation or supporting **evidence**

Write or draw your reasoning and evidence.

Create and test

Change one relevant detail. Predict the result before testing. Include a boundary or missing-information case when it helps reveal a limit.

My changed **input** and expected result

Write or draw your reasoning and evidence.

Connect to your project

Use an approved source list and record why each source fits the learner's question.

The **evidence** I will keep

Write or draw your reasoning and evidence.

Your teacher has the independent answer and scoring criteria. Complete the matching workbook week to keep your practice **evidence** together.

Transfer practice from the original programme

> A school notice updated Friday conflicts with a blog quoting Monday's notice about a room change. Which source should you inspect first, and why is newest alone not enough?

> **Explain the mechanism, evidence and one limit.**

Use feedback to improve

Attempt the independent case before hints. Record whether you worked alone, used a hint or followed a model. After feedback, fix the first unsupported step and explain why it changed.

A later check uses a changed case, not a copied answer.

STUDENT LESSON · 15 OF 18

Your lesson route

> Use this map to navigate Source Quality, connect the goals to tasks and keep one evidence record for each attempt.

Start with this question: A fictional Study Buddy answers which room a club is authorised to use.

By the end, I can	How I will show it
Explain the mechanism and terminology of conflicting and time-sensitive sources	Explain the deciding step, show a trace or test, and state one limit.

By the end, I can	How I will show it
Apply the stated procedure to a new case with a traceable result	Explain the deciding step, show a trace or test, and state one limit.
Identify an assumption or limitation and design a revealing follow-up	Explain the deciding step, show a trace or test, and state one limit.

Remember → watch and explain → try with help → investigate → try independently → keep project **evidence**. Your teacher may spread this lesson across several classes.

Keep your first **prediction**. Compare it with what the **evidence** shows and explain any change.

STUDENT LESSON · 16 OF 18

Finish and return

> Explain Source Quality without notes, identify a remaining question and plan a later check with a changed case.

Close your notes. Explain this goal in your own words: Explain the **mechanism** and terminology of conflicting and time-sensitive sources

> **My deciding step, evidence and one remaining question**

If you are unsure, return to the worked picture and explain one arrow. If you are ready, change an **input** or assumption and justify your **prediction**.

Save your workbook **evidence**. At the next review, try a different case before opening your old answer.

Supported practice, repair and portfolio

> Attempt supported questions before using hints or feedback. Review a missing building block, then keep the completed work.

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

A fictional Study Buddy answers which room a club is authorised to use.

Practice 1: explain the deciding evidence

Which labelled step matches this detail? Reuploading old A on day 10 does not revoke B.

1. Day 9

2. Ignore upload shortcut

3. Day 6

4. Check **authority**

My selected conclusion, deciding fact and explanation

Hint · try first

Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

Feedback · compare after trying

After your attempt, compare with the supported explanation: Ignore upload shortcut Reuploading old A on day 10 does not revoke B. A source's upload time and the time its rule takes effect answer different questions.

Preserve version relationships and the query's intended date. The current authoritative chain gives a consistent answer to both queries.

A later filename or timestamp alone cannot establish that an old record supersedes a signed amendment.

Practice 2: explain the deciding evidence

Changed case · predict first

Changed-case practice: A signed amendment C explicitly revokes B effective day 12 and restores Hall 1. Which conclusion is supported by the supplied facts?

1. Day 9 stays Hall 3; day 13 becomes Hall 1.

2. We can decide the result without examining the changed **input** or the procedure.

3. This one example guarantees correct results for every future **input**.

My selected conclusion, deciding fact and explanation

Hint · try first

Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

Feedback · compare after trying

After your attempt, compare with the supported explanation: Day 9 stays Hall 3; day 13 becomes Hall 1. The new authoritative change applies from its stated effective date, not retroactively.

Repair a missing building block

Review Hallucination Failure Types (ai-3/14). Goal: Explain the **mechanism** and terminology of generation failures and verification. Short practice: Can we conclude there will definitely be no lunch from S alone?.

Return to this week and explain what you changed.

Review Speech and Audio Systems (ai-3/12). Goal: Explain the **mechanism** and terminology of speech pipelines and multimodal **evidence**.

Short practice: Which stage was initially wrong, and which stage was correctly operating on a wrong **input**?. Return to this week and explain what you changed.

Review Prompt Evaluation (ai-3/9). Goal: Explain the **mechanism** and terminology of controlled prompt experiments. Short practice: Why is B's selection defensible here without calling it universally superior?.

Return to this week and explain what you changed.

Keep your completed work

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run **evidence**. Open the HTML copy to read or print it.

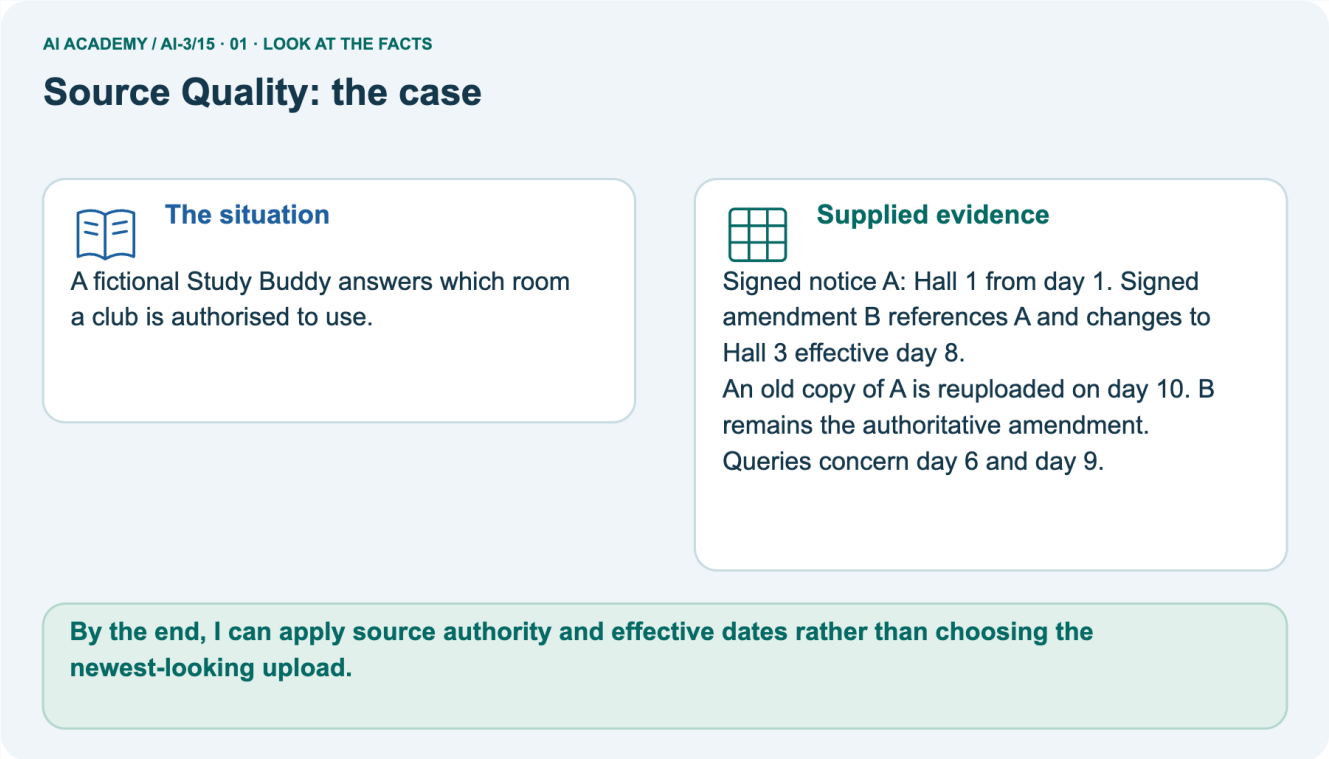

Drafts stay in this browser when storage is available; clear drafts on a shared device.

STUDENT LESSON · 18 OF 18

Visual concept journey

> Explain each Source Quality graphic using its labels, deciding evidence and relevant limitation.

01. Source Quality: the case

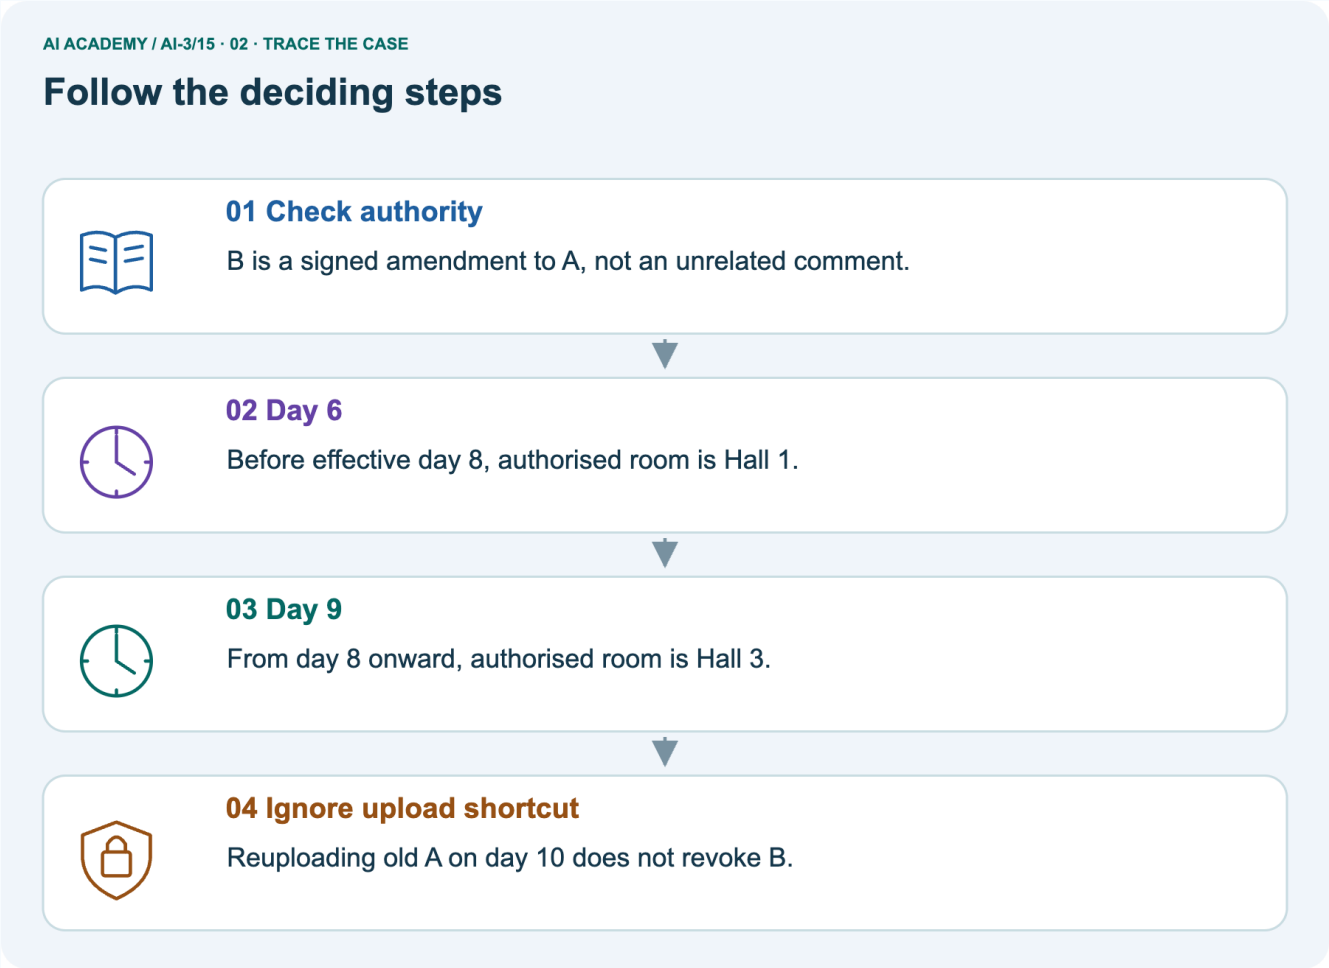

Follow the labelled picture with the matching explanation. Open the vector diagram

A fictional Study Buddy answers which room a club is authorised to use. Supplied facts: Signed notice A: Hall 1 from day 1. Signed amendment B references A and changes to Hall 3 effective day 8.

An old copy of A is reuploaded on day 10. B remains the authoritative amendment. Queries concern day 6 and day 9.

> Point to the given fact that matters most. Explain why it matters.

02. Follow the deciding steps

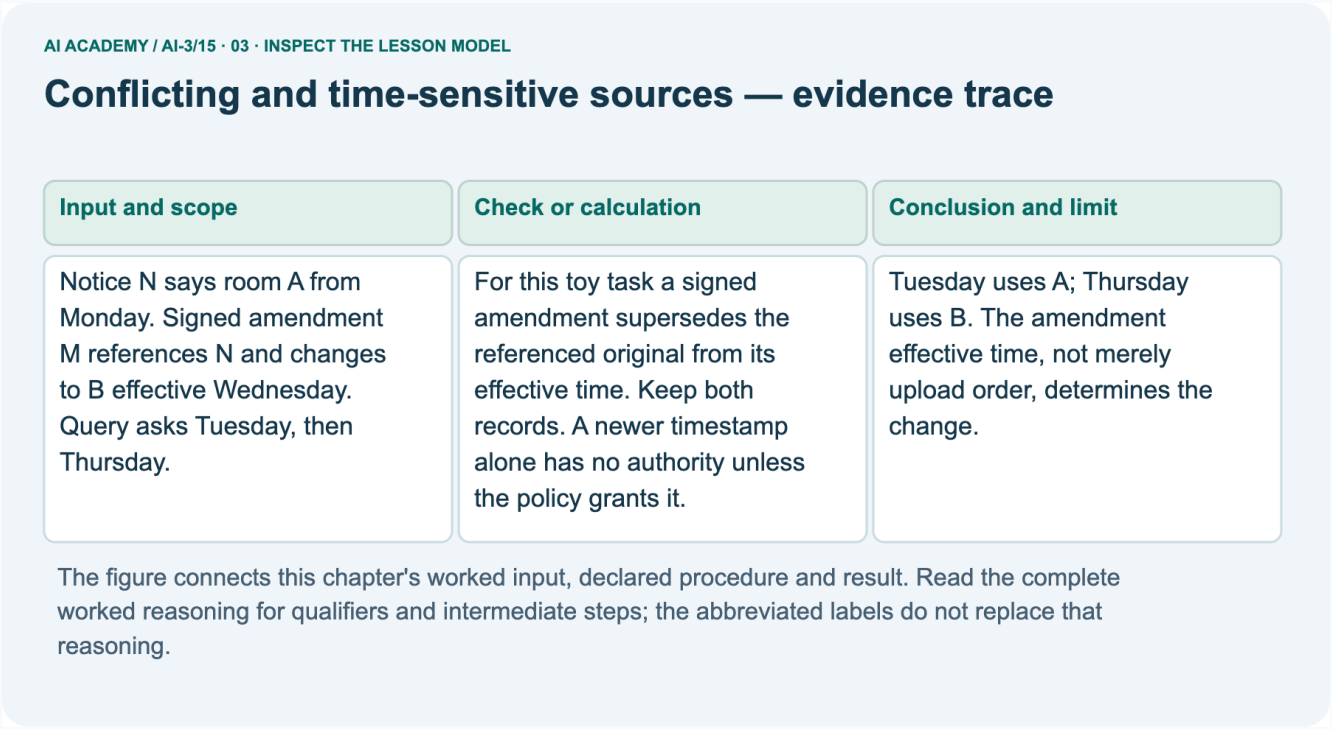

Follow the labelled picture with the matching explanation. Open the vector diagram

Check **authority**: B is a signed amendment to A, not an unrelated comment. → Day 6: Before effective day 8, authorised room is Hall 1. → Day 9: From day 8 onward, authorised room is Hall 3. → Ignore upload shortcut: Reuploading old A on day 10 does not revoke B.

> Point to each numbered stage and explain which recorded **input** it uses.

03. Conflicting and time-sensitive sources — evidence trace

Follow the labelled picture with the matching explanation. Open the vector diagram

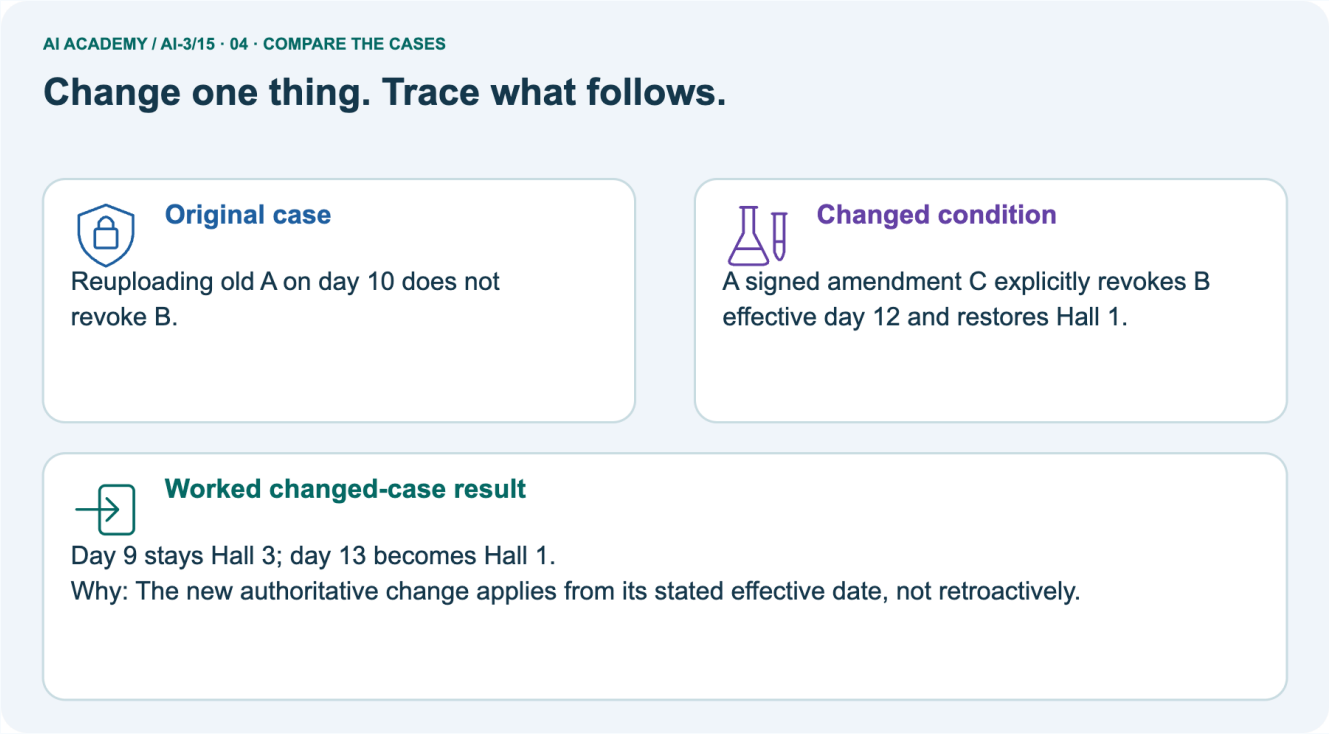

Conflicting and time-sensitive sources — **evidence** trace. Notice N says room A from Monday. Signed amendment M references N and changes to B effective Wednesday.

Query asks Tuesday, then Thursday. | For this toy task a signed amendment supersedes the referenced original from its **effective time**. Keep both records.

A newer timestamp alone has no **authority** unless the policy grants it. | Tuesday uses A; Thursday uses B. The amendment **effective time**, not merely upload order, determines the change.

> Read the labels and values. Explain the relationship the model shows.

04. Change one thing. Trace what follows.

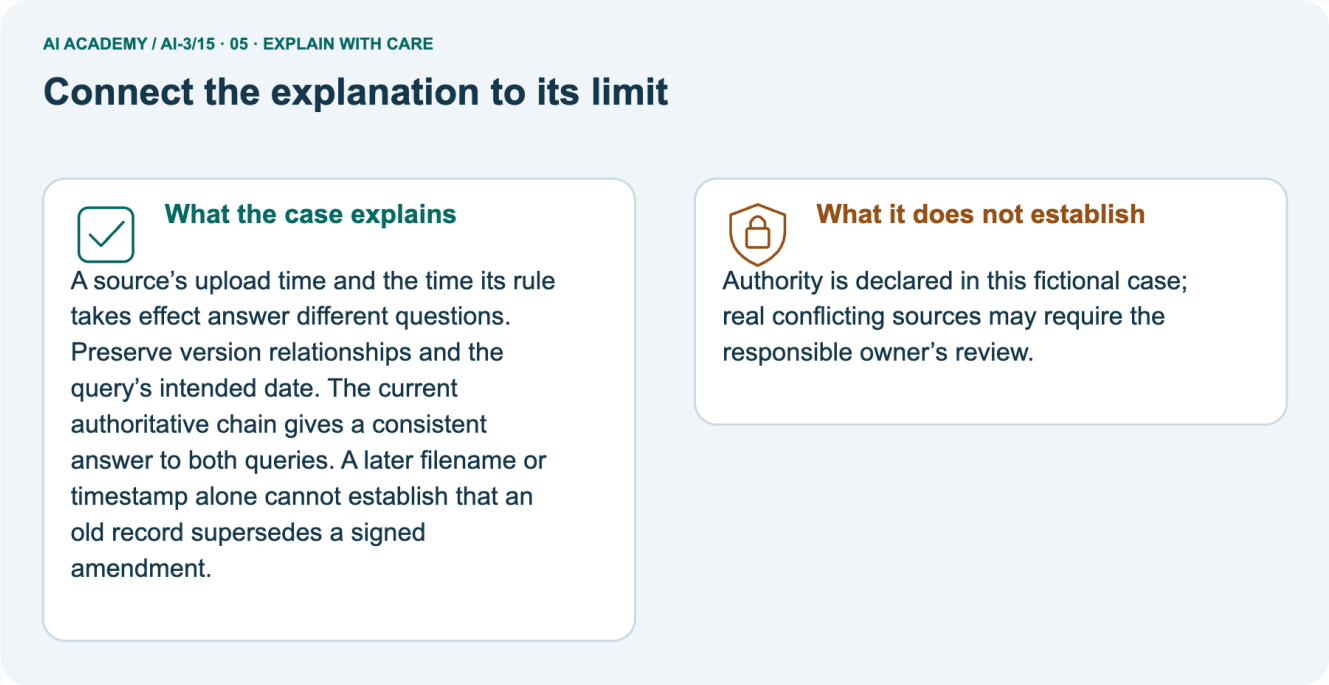

Follow the labelled picture with the matching explanation. Open the vector diagram

Original case: Reuploading old A on day 10 does not revoke B. Changed condition: A signed amendment C explicitly revokes B effective day 12 and restores Hall 1. Expected result: Day 9 stays Hall 3; day 13 becomes Hall 1.

Reason: The new authoritative change applies from its stated effective date, not retroactively.

> Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude.

05. Connect the explanation to its limit

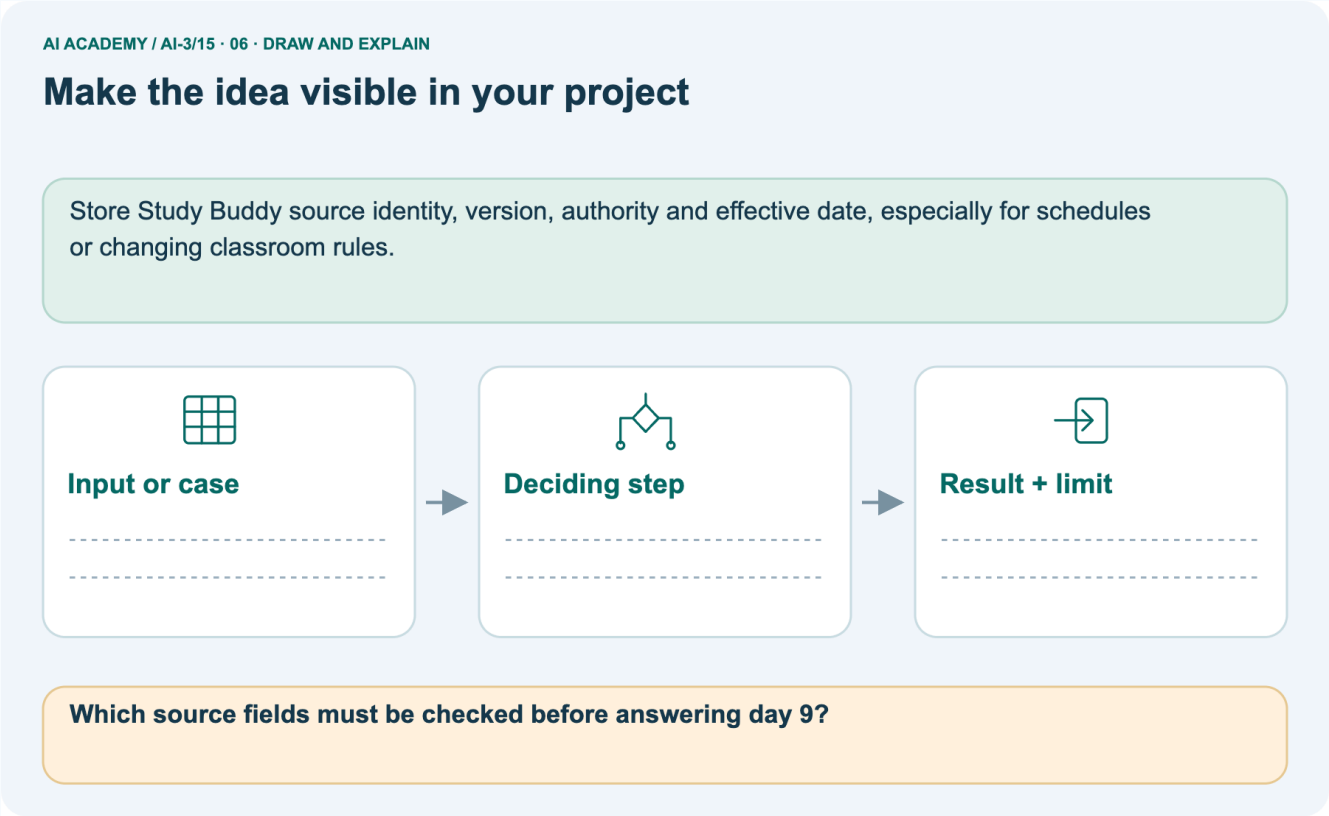

Follow the labelled picture with the matching explanation. Open the vector diagram

A source’s upload time and the time its rule takes effect answer different questions. Preserve version relationships and the query’s intended date. The current authoritative chain gives a consistent answer to both queries.

A later filename or timestamp alone cannot establish that an old record supersedes a signed amendment. Limit: **Authority** is declared in this fictional case; real conflicting sources may require the responsible owner’s review.

> Explain the case, then point to a limit on the claim.

06. Make the idea visible in your project

Follow the labelled picture with the matching explanation. Open the vector diagram

Store Study Buddy source identity, version, **authority** and effective date, especially for schedules or changing classroom rules. Draw your **input**, deciding step, result and limit.

Supported question: Which source fields must be checked before answering day 9?

Draw your project trace and justify the deciding step using **evidence**.

Save or print your responses for your portfolio. Progress and drafts on the hosted website stay in the current browser. Use only fictional or teacher-approved data.
