Permissions and Human Review

Learn to understand, design, build, test and explain AI systems responsibly.

Project: Transparent Book Recommender

WORKBOOK · 1 OF 26

Recall and choose your starting point

> Record your starting explanation for Permissions and Human Review before opening notes. Show any later correction separately.

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Agents and Tools

Without opening the old lesson, explain one key idea from Agents and Tools. Give an example and a mistake that the idea helps you avoid.

> **My remembered idea, example and correction**

Prompt Experiments

Without opening the old lesson, explain one key idea from Prompt Experiments. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Text as Pieces

Without opening the old lesson, explain one key idea from Text as Pieces. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

WORKBOOK · 2 OF 26

Practise with fading help

> Complete the supported Permissions and Human Review trace and record the first step you can explain without help.

Use W2: Trace the worked case for **Least privilege** and tool scopes. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs	Procedure I chose	Middle steps	Result and check

The step I completed without help, and the hint I needed

WORKBOOK · 3 OF 26

Individual reasoning check

> Check the proposed Permissions and Human Review explanation against the supplied facts before discussing it.

Use the worked case for **Least privilege** and tool scopes. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported.

Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

WORKBOOK · 4 OF 26

Independent transfer case

> Write one first attempt at the reserved independent case before feedback. Repeated copies of that case refer to the same recorded attempt.

Independent case: Apply a new case independently

Scope allows read inventory items A, B. Calls read A, read C, write B. Decide.

> **My independent explanation, trace and limits**
>
> | |
> |---|
> | |
> | |
> | |
> | |

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

WORKBOOK · 5 OF 26

Your learning target

> Connect the Permissions and Human Review target to a trace and a justified conclusion.

A teacher approves posting version 1 to a class board. The assistant changes the text and destination to a public board. Does the old approval cover the new action? Define what must be reviewed.

WORKBOOK · 6 OF 26

Solve the given case

> Solve the supplied Permissions and Human Review case and show the deciding evidence.

Posting a recommendation requires teacher review.

Place the **approval gate**.

Show your trace, calculation or **evidence**

> **Write or draw your reasoning and evidence.**

WORKBOOK · 7 OF 26

Check a changed case

> Apply the procedure to the changed case and record why the conclusion follows.

A teacher allows a tool to draft a message but forbids sending. The draft is correct. May the agent send it? Explain the boundary.

My independent answer and reason

> **Write or draw your reasoning and evidence.**

Week 31 Test and reflect

WORKBOOK · 8 OF 26

Design a revealing test

> Specify a changed input, expected result and observation separately.

Create a changed **input**, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record	My evidence
Changed input or condition	
Expected answer or fallback	
Observed result	
Why the result occurred	

Project checkpoint

> Justify what Permissions and Human Review adds to Transparent Book Recommender and keep the evidence.

The recommender may suggest and explain; people decide, borrow, purchase, or share data.

The project change and **evidence** I will keep

> **Write or draw your reasoning and evidence.**

WORKBOOK · 10 OF 26

Self check

> Judge explanation, evidence, transfer and limits separately; attach the work behind your judgement.

- I can explain the mechanism.
- I can show evidence.
- I can handle a changed case.
- I can name a limit.

Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

WORKBOOK · 11 OF 26

Transfer practice from the original programme

> Use this earlier case as transfer practice. A case already discussed with feedback is not fresh assessment evidence.

A teacher approves posting version 1 to a class board. The assistant changes the text and destination to a public board. Does the old approval cover the new action? Define what must be reviewed.

My independently reasoned answer

Record support used: none, hint or teacher explanation.

WORKBOOK · 12 OF 26

W1 Explain the mechanism

> Explain the mechanism. Apply the supplied Permissions and Human Review facts and keep your reasoning.

Explain the weekly **mechanism** in your own words. Use the worked scenario to name its **input**, decision rule and **output**.

My reasoning and evidence

WORKBOOK · 13 OF 26

W2 Trace the worked case

> Trace the worked case. Apply the supplied Permissions and Human Review facts and keep your reasoning.

Tool token permits lookup(public-room). A proposed call writes teacher notes. Show the intermediate steps and give the conclusion with its scope.

> **My reasoning and evidence**

WORKBOOK · 14 OF 26

W3 Audit the limit

> Audit the limit. Apply the supplied Permissions and Human Review facts and keep your reasoning.

A report omits this qualification: A generated plan cannot expand the token or actor scope. Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

> **My reasoning and evidence**

WORKBOOK · 15 OF 26

W4 Apply a new case independently

> Attempt before feedback. If this repeats the selected independent case, reuse that first attempt; otherwise keep a separate record. Apply a new case independently. Apply the supplied Permissions and Human Review facts and keep your reasoning.

Scope allows read inventory items A, B. Calls read A, read C, write B. Decide.

My reasoning and evidence

W5 Design a revealing follow-up

> Design a revealing follow-up. Apply the supplied Permissions and Human Review facts and keep your reasoning.

For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison.

Do not reuse W4 as a new final test after receiving feedback.

My reasoning and evidence

WORKBOOK · 17 OF 26

Privacy and least privilege — W1 Minimize fields

> Use the supplied Permissions and Human Review task to record your reasoning, evidence and next step.

For a count of preferred activities, identify which of activity choice, full name and birthday is necessary.

My reasoning and evidence

WORKBOOK · 18 OF 26

Privacy and least privilege — W2 Trace permissions

> Use the supplied Permissions and Human Review task to record your reasoning, evidence and next step.

Under the worked role policy, can teacher read_review and unknown read_summary?

My reasoning and evidence

WORKBOOK · 19 OF 26

Privacy and least privilege — W3 Repair access control

> Use the supplied Permissions and Human Review task to record your reasoning, evidence and next step.

A website hides teacher answers using CSS but sends them to student browsers. Explain the flaw and required boundary.

My reasoning and evidence

WORKBOOK · 20 OF 26

Privacy and least privilege — W4 Design independently

> Use the supplied Permissions and Human Review task to record your reasoning, evidence and next step.

Design a fictional preference summary with student and teacher roles. List necessary fields, permitted actions, a **retention** purpose and a deletion owner.

My reasoning and evidence

WORKBOOK · 21 OF 26

Privacy and least privilege — W5 Limit the toy model

Use the supplied Permissions and Human Review task to record your reasoning, evidence and next step.

Does the allowed function alone prove an app is secure?

My reasoning and evidence

WORKBOOK · 22 OF 26

Feedback, return check and learning record

Record the first repaired step and a different case to revisit after a delay.

Evidence	My record
Worked alone / hint / model	
First step I repaired and why	
New case checked later; date and result	
What I can now explain without notes	
One remaining question	

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

WORKBOOK · 23 OF 26

Pictorial case practice: Permissions and Human Review

> A fictional catalogue helper receives a narrowly scoped tool token. Explain the labelled step before checking the changed condition.

A fictional catalogue helper receives a narrowly scoped tool token.

Token allows read on catalogue records R2 and R5 only. No write **permission** is granted.

Proposals: read R2; read R8; write R5. Generated text claims all are helpful.

AI ACADEMY / AI-2/31

Permissions and Human Review

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Read token

Authorised operation is read; authorised objects are R2,R5.

2. Allowed call

read R2 matches both operation and object: allow.

3. Wrong object

read R8 fails object scope: deny.

4. Wrong operation

write R5 fails operation scope: deny even for an allowed record.

CHANGE ONE THING

The helper says it needs write R5 to correct an apparent typo.

Explain the changed result using the matching lesson.

Follow the labelled picture with the matching explanation. Open the vector diagram

Which proposal is allowed, and why is an authorised object alone insufficient?

My picture-based explanation and changed-case prediction

Record the help used

Support used: alone / hint / worked example. This record is practice **evidence**.

Project connection: Give the recommender read-only access wherever sufficient, and require explicit owner review for catalogue edits or publication.

Project portfolio milestone

> Keep this week's input, deciding step, result and limit together in the Transparent Book Recommender record.

Project: Transparent Book Recommender

Current milestone: Present and defend. Demonstrate the system, explain one failure and justify the next improvement with **evidence**.

Give the recommender read-only access wherever sufficient, and require explicit owner review for catalogue edits or publication.

Evidence to keep	My record
This week's input and deciding step	
Prediction and actual result (or labelled paper trace)	

Evidence to keep	My record
One change since the previous checkpoint and why	
One error or limit and the next test	

> **Explain what this week adds to your project. Reuse last week's record rather than starting again.**

WORKBOOK · 25 OF 26

Supported practice and learning evidence

> Try the supported questions before comparing with hints and feedback. Record what you repaired and the evidence you retained.

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

A fictional catalogue helper receives a narrowly scoped tool token.

Practice 1: explain the deciding evidence

Which labelled step matches this detail? write R5 fails operation scope: deny even for an allowed record.

1. Wrong operation

2. Read token

3. Wrong object

4. Allowed call

My selected conclusion, deciding fact and explanation

Hint · try first

Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

Feedback · compare after trying

After your attempt, compare with the supported explanation: Wrong operation write R5 fails operation scope: deny even for an allowed record.

Permissions are concrete restrictions, not a confidence score or a general instruction to be useful. Each proposed call must match both dimensions before it happens.

A request written inside catalogue text cannot enlarge the token’s authority. Denial should preserve the proposed action and reason without executing the disallowed mutation.

Practice 2: explain the deciding evidence

Changed case · predict first

Changed-case practice: The helper says it needs write R5 to correct an apparent typo. Which conclusion is supported by the supplied facts?

1. We can decide the result without examining the changed **input** or the procedure.

2. This one example guarantees correct results for every future **input**.

3. The write remains denied under the existing token.

My selected conclusion, deciding fact and explanation

Hint · try first

Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

Feedback · compare after trying

After your attempt, compare with the supported explanation: The write remains denied under the existing token. A useful purpose does not create an authorised operation; an authorised owner must review any scope change.

Repair a missing building block

Review Agents and Tools (ai-2/30). Goal: Explain the **mechanism** and terminology of state machines for bounded agents. Short practice: Can the assistant accept Trace B because its final state is done?.

Return to this week and explain what you changed.

Review Prompt Experiments (ai-2/28). Goal: Explain the **mechanism** and terminology of controlled prompt experiments. Short practice: Name the case P passes and Q fails, and explain why it matters..

Return to this week and explain what you changed.

Review Text as Pieces (ai-2/25). Goal: Encode and decode text under an explicit toy vocabulary. Short practice: Why is the unknown ! at position 10 rather than position 9?. Return to this week and explain what you changed.

Predict, run and debug

The browser lab lets you edit the supported Python examples already included in this lesson. Predict first, run, inspect the actual **output** or error, change one **input**, then run again.

Keep code, **prediction**s, actual results and a reasoned revision together. On paper, label your result as a trace rather than an execution.

Keep your completed work

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run **evidence**. Open the HTML copy to read or print it.

Drafts stay in this browser when storage is available; clear drafts on a shared device.

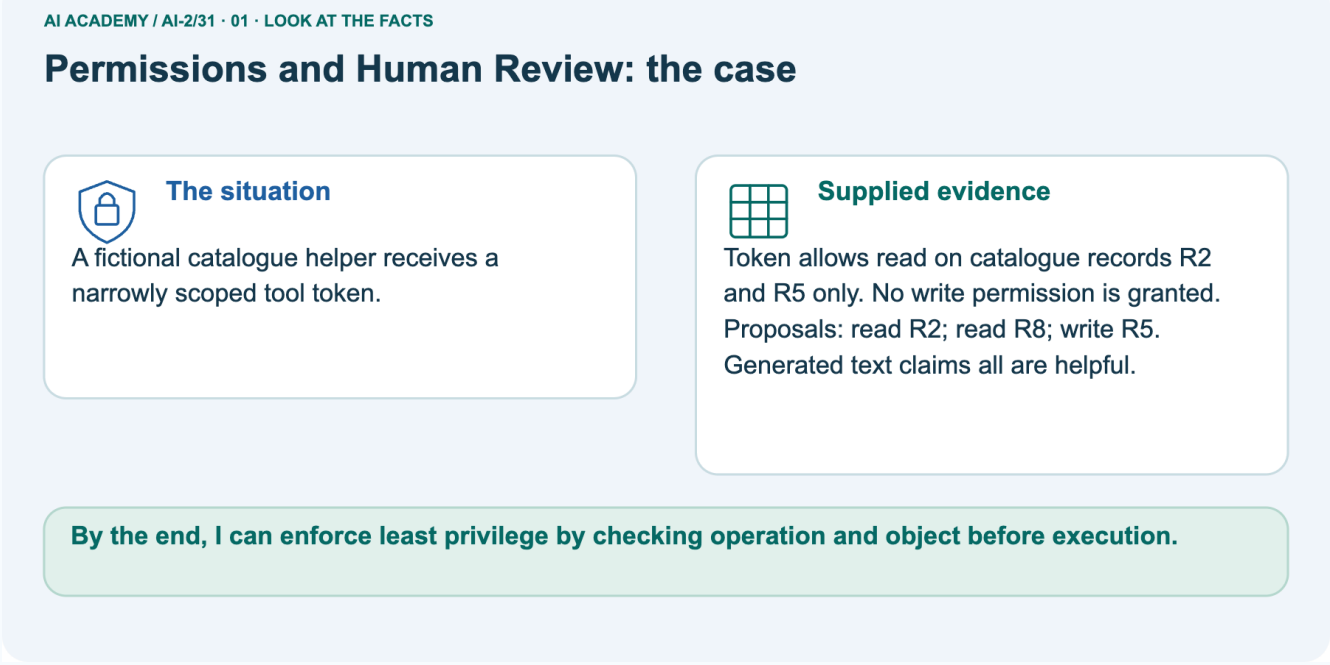

What I repaired, the evidence I kept and the next test

WORKBOOK · 26 OF 26

Visual concept journey

> Explain each Permissions and Human Review picture from its labels, then record a relevant limit.

01. Permissions and Human Review: the case

Follow the labelled picture with the matching explanation. Open the vector diagram

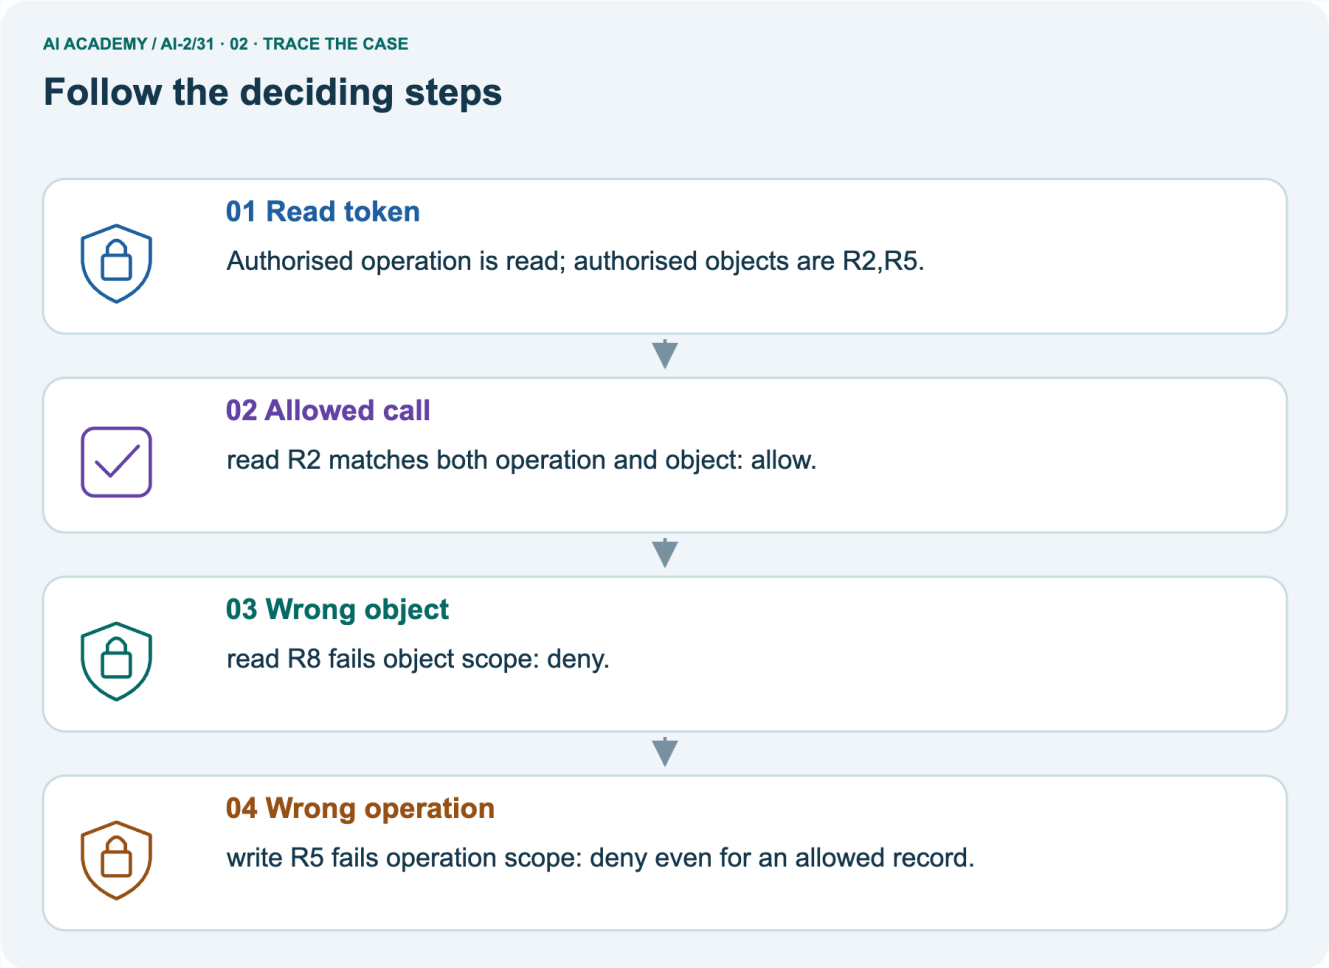

A fictional catalogue helper receives a narrowly scoped tool token. Supplied facts: Token allows read on catalogue records R2 and R5 only. No write **permission** is granted. Proposals: read R2; read R8; write R5.

Generated text claims all are helpful.

> Point to the given fact that matters most. Explain why it matters.

My picture explanation, deciding evidence and one limit

02. Follow the deciding steps

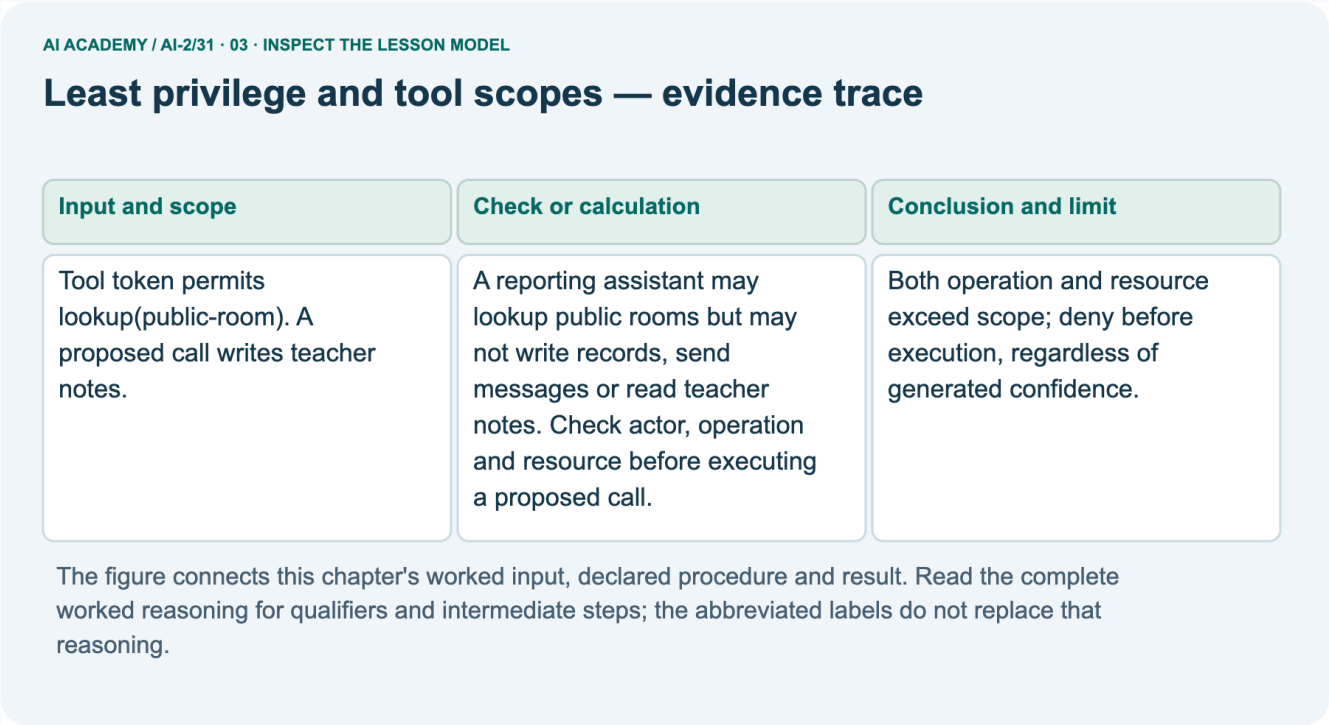

Follow the labelled picture with the matching explanation. Open the vector diagram

Read token: Authorised operation is read; authorised objects are R2,R5. → Allowed call: read R2 matches both operation and object: allow. → Wrong object: read R8 fails object scope: deny. → Wrong operation: write R5 fails operation scope: deny even for an allowed record.

> Point to each numbered stage and explain which recorded **input** it uses.

My picture explanation, deciding evidence and one limit

03. Least privilege and tool scopes — evidence trace

Follow the labelled picture with the matching explanation. Open the vector diagram

Least privilege and tool scopes — **evidence** trace. Tool token permits lookup(public-room).

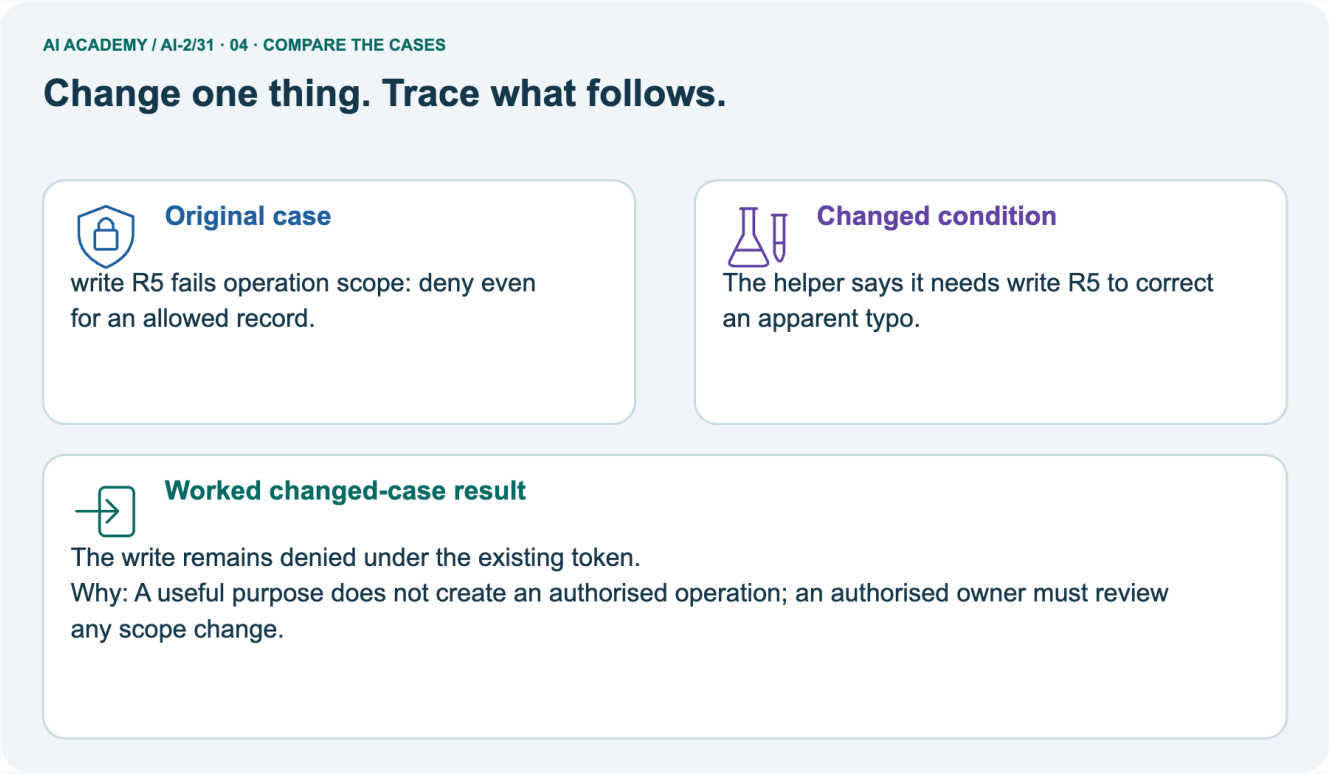

A proposed call writes teacher notes. | A reporting assistant may lookup public rooms but may not write records, send messages or read teacher notes.

Check actor, operation and resource before executing a proposed call. | Both operation and resource exceed scope; deny before execution, regardless of generated confidence.

Read the labels and values. Explain the relationship the model shows.

My picture explanation, deciding evidence and one limit

04. Change one thing. Trace what follows.

Follow the labelled picture with the matching explanation. Open the vector diagram

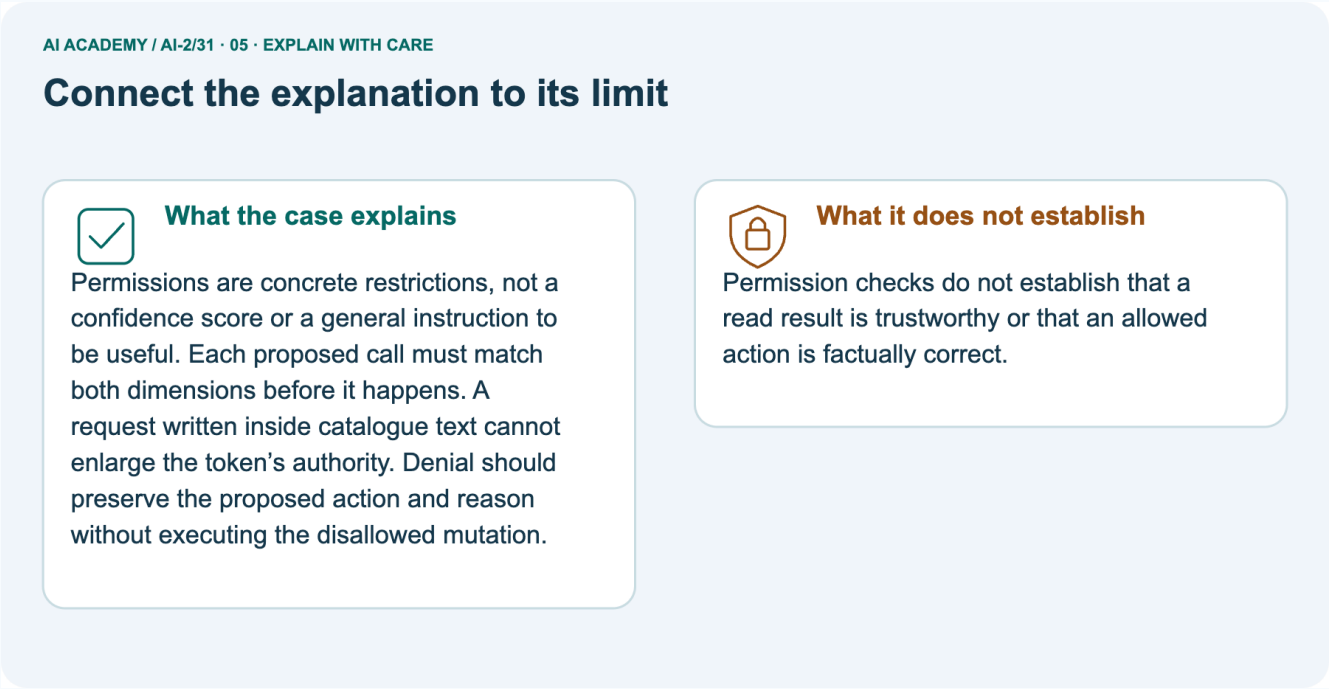

Original case: write R5 fails operation scope: deny even for an allowed record. Changed condition: The helper says it needs write R5 to correct an apparent typo.

Expected result: The write remains denied under the existing token. Reason: A useful purpose does not create an authorised operation; an authorised owner must review any scope change.

Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude.

My picture explanation, deciding evidence and one limit

05. Connect the explanation to its limit

Follow the labelled picture with the matching explanation. Open the vector diagram

Permissions are concrete restrictions, not a confidence score or a general instruction to be useful. Each proposed call must match both dimensions before it happens.

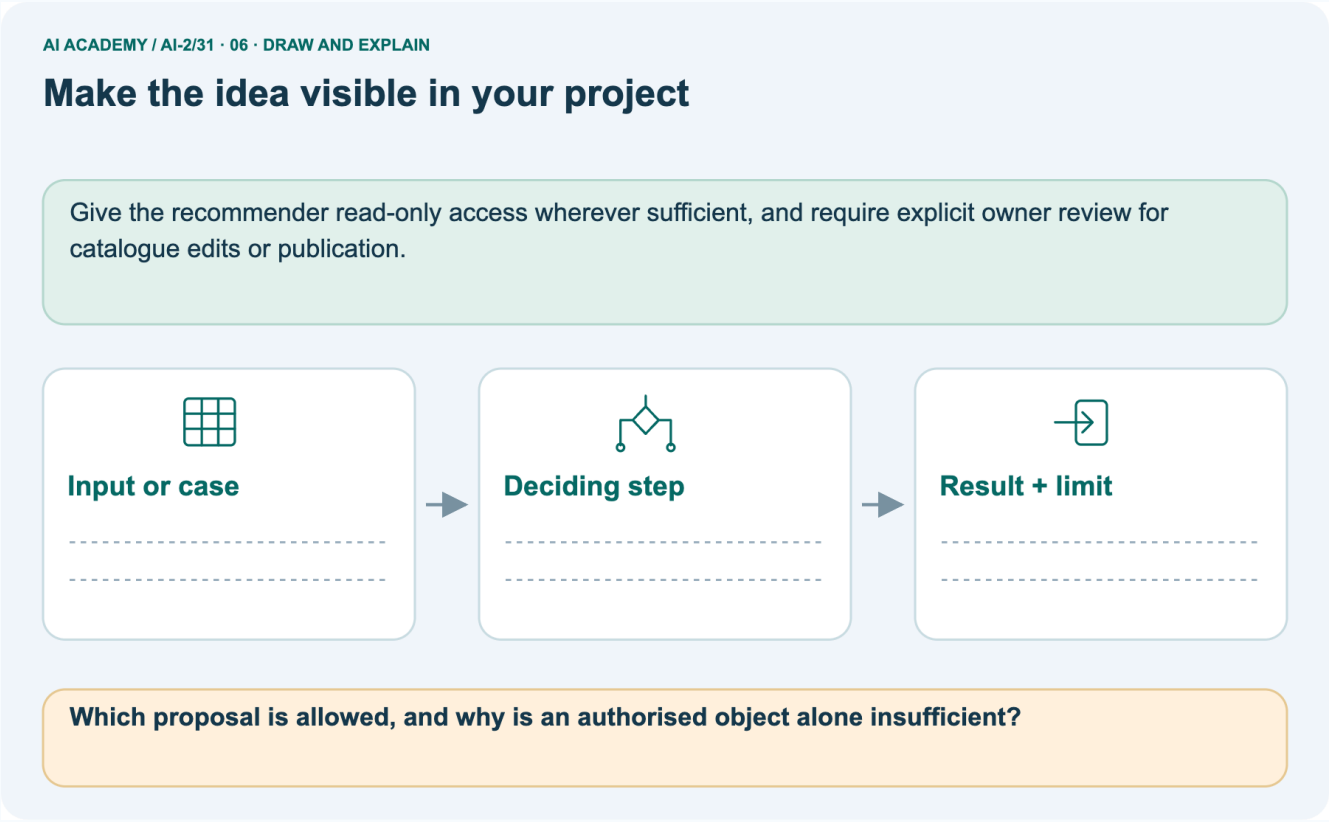

A request written inside catalogue text cannot enlarge the token's authority. Denial should preserve the proposed action and reason without executing the disallowed mutation.

Limit: **Permission** checks do not establish that a read result is trustworthy or that an allowed action is factually correct.

Explain the case, then point to a limit on the claim.

My picture explanation, deciding evidence and one limit

06. Make the idea visible in your project

Follow the labelled picture with the matching explanation. Open the vector diagram

Give the recommender read-only access wherever sufficient, and require explicit owner review for catalogue edits or publication. Draw your **input**, deciding step, result and limit.

Supported question: Which proposal is allowed, and why is an authorised object alone insufficient?

Draw your project trace and justify the deciding step using **evidence**.

My picture explanation, deciding evidence and one limit

Save or print your responses for your portfolio. Progress and drafts on the hosted website stay in the current browser. Use only fictional or teacher-approved data.
