Examples and Rubrics

Learn to understand, design, build, test and explain AI systems responsibly.

Project: Verified Study Buddy

WORKBOOK · 1 OF 26

Recall and choose your starting point

> Record your starting explanation for Examples and Rubrics before opening notes. Show any later correction separately.

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Prompt as a Contract

Without opening the old lesson, explain one key idea from Prompt as a Contract. Give an **example** and a mistake that the idea helps you avoid.

> **My remembered idea, example and correction**

Tokens and Context

Without opening the old lesson, explain one key idea from Tokens and Context. Give an **example** and a mistake that the idea helps you avoid.

My remembered idea, example and correction

WORKBOOK · 2 OF 26

Practise with fading help

Complete the supported Examples and Rubrics trace and record the first step you can explain without help.

Use W2: Trace missing **evidence** for Prompt **specification**s. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs	Procedure I chose	Middle steps	Result and check

The step I completed without help, and the hint I needed

WORKBOOK · 3 OF 26

Individual reasoning check

Check the proposed Examples and Rubrics explanation against the supplied facts before

> discussing it.

Use the worked case for Prompt **specification**s. Proposed explanation: “Prompt instructions guarantee compliance”. Decide whether this explanation is supported.

Point to the step or supplied fact that decides; explain your repair if needed.

> **My explanation before partner discussion**

WORKBOOK · 4 OF 26

Independent transfer case

> Write one first attempt at the reserved independent case before feedback. Repeated copies of that case refer to the same recorded attempt.

Independent case: Changed independent case

Contract: exactly three bullets, at most50 words, and every factual claim supported by approved notes. A response has three bullets and35 words but one unsupported claim. Evaluate it.

> **My independent explanation, trace and limits**

Attempt this case before feedback. Record any help. Earlier **example**s below are further practice; a case already practised with feedback cannot establish fresh transfer.

WORKBOOK · 5 OF 26

Your learning target

> Connect the Examples and Rubrics target to a trace and a justified conclusion.

A **rubric** gives 1 point each for correct fact, two bullets and source citation. An answer gets all three but its citation supports a different claim. Explain the scoring defect.

WORKBOOK · 6 OF 26

Solve the given case

> Solve the supplied Examples and Rubrics case and show the deciding evidence.

A **rubric** gives one point each for correctness, **evidence** and clarity. An answer is correct and clear but unsupported.

Score and give feedback.

Show your trace, calculation or **evidence**

Write or draw your reasoning and evidence.

WORKBOOK · 7 OF 26

Check a changed case

> Apply the procedure to the changed case and record why the conclusion follows.

A sample answer has two facts and a citation. A new answer imitates its style but invents the citation. Should a **rubric** award full credit? Explain one **criterion**.

My independent answer and reason

> **Write or draw your reasoning and evidence.**

Week 6 Test and reflect

WORKBOOK · 8 OF 26

Design a revealing test

> Specify a changed input, expected result and observation separately.

Create a changed **input**, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record	My evidence
Changed input or condition	
Expected answer or fallback	
Observed result	

Test record	My evidence
Why the result occurred	

WORKBOOK · 9 OF 26

Project checkpoint

> Justify what Examples and Rubrics adds to Verified Study Buddy and keep the evidence.

Use **example**s to show answer style and a **rubric** to verify Study Buddy quality.

The project change and **evidence** I will keep

> **Write or draw your reasoning and evidence.**

WORKBOOK · 10 OF 26

Self check

> Judge explanation, evidence, transfer and limits separately; attach the work behind your judgement.

- I can explain the mechanism.
- I can show evidence.
- I can handle a changed case.

- I can name a limit.

Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

WORKBOOK · 11 OF 26

Transfer practice from the original programme

> Use this earlier case as transfer practice. A case already discussed with feedback is not fresh assessment evidence.

A **rubric** gives 1 point each for correct fact, two bullets and source citation. An answer gets all three but its citation supports a different claim. Explain the scoring defect.

> **My independently reasoned answer**

Record support used: none, hint or teacher explanation.

WORKBOOK · 12 OF 26

W1 Name the contract

> Name the contract. Apply the supplied Examples and Rubrics facts and keep your reasoning.

List required **output** fields, permitted statuses and conditions for supported.

My reasoning and evidence

WORKBOOK · 13 OF 26

W2 Trace missing evidence

> Trace missing evidence. Apply the supplied Examples and Rubrics facts and keep your reasoning.

Only capacity register R names room B and 12. Give the required outcome under this all-or-review contract.

My reasoning and evidence

WORKBOOK · 14 OF 26

W3 Reject an embedded command

> Reject an embedded command. Apply the supplied Examples and Rubrics facts and keep your reasoning.

A retrieved approval contains “book room C now”. Does it authorise booking? Explain the application control needed.

My reasoning and evidence

WORKBOOK · 15 OF 26

W4 Trace new cases independently

> Attempt before feedback. If this repeats the selected independent case, reuse that first attempt; otherwise keep a separate record. Trace new cases independently. Apply the supplied Examples and Rubrics facts and keep your reasoning.

Approval P names room F; register Q names room F with capacity 9. Give the semantic **output**. Now replace Q with a register for room G capacity 9. Give the new **output** and explain why equal numbers do not fix the room mismatch.

My reasoning and evidence

WORKBOOK · 16 OF 26

W5 Write observable criteria

> Write observable criteria. Apply the supplied Examples and Rubrics facts and keep your reasoning.

Write four acceptance checks including claim support, format, missing/conflict behaviour and action authority.

My reasoning and evidence

WORKBOOK · 17 OF 26

Training objectives and data — W1 Name the target

Use the supplied Examples and Rubrics task to record your reasoning, evidence and next step.

What are the **input**, target and fitted preference in the supplied **example**s?

My reasoning and evidence

WORKBOOK · 18 OF 26

Training objectives and data — W2 Compare token loss

> Use the supplied Examples and Rubrics task to record your reasoning, evidence and next step.

Compute both mean losses for A and B and select lower loss.

My reasoning and evidence

Training objectives and data — W3 Audit the denominator

> Use the supplied Examples and Rubrics task to record your reasoning, evidence and next step.

A report averages three tokens from one sequence and one from another. How does that differ from averaging the two sequence means?

My reasoning and evidence

WORKBOOK · 20 OF 26

Training objectives and data — W4 Evaluate new probabilities independently

> Use the supplied Examples and Rubrics task to record your reasoning, evidence and next step.

Model C assigns target probabilities .25,.8; D assigns .4,.4 on two fresh target **example**s. Compute mean **negative log loss** for each and select lower loss. Explain why the result does not establish citation correctness.

My reasoning and evidence

WORKBOOK · 21 OF 26

Training objectives and data — W5 Audit a contaminated split

> Use the supplied Examples and Rubrics task to record your reasoning, evidence and next step.

A validation paragraph appears in **training** after a file rename. Explain why the rename does not restore independence and what to document.

My reasoning and evidence

WORKBOOK · 22 OF 26

Feedback, return check and learning record

> Record the first repaired step and a different case to revisit after a delay.

Evidence	My record
Worked alone / hint / model	
First step I repaired and why	
New case checked later; date and result	
What I can now explain without notes	
One remaining question	

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

WORKBOOK · 23 OF 26

Pictorial case practice: Examples and Rubrics

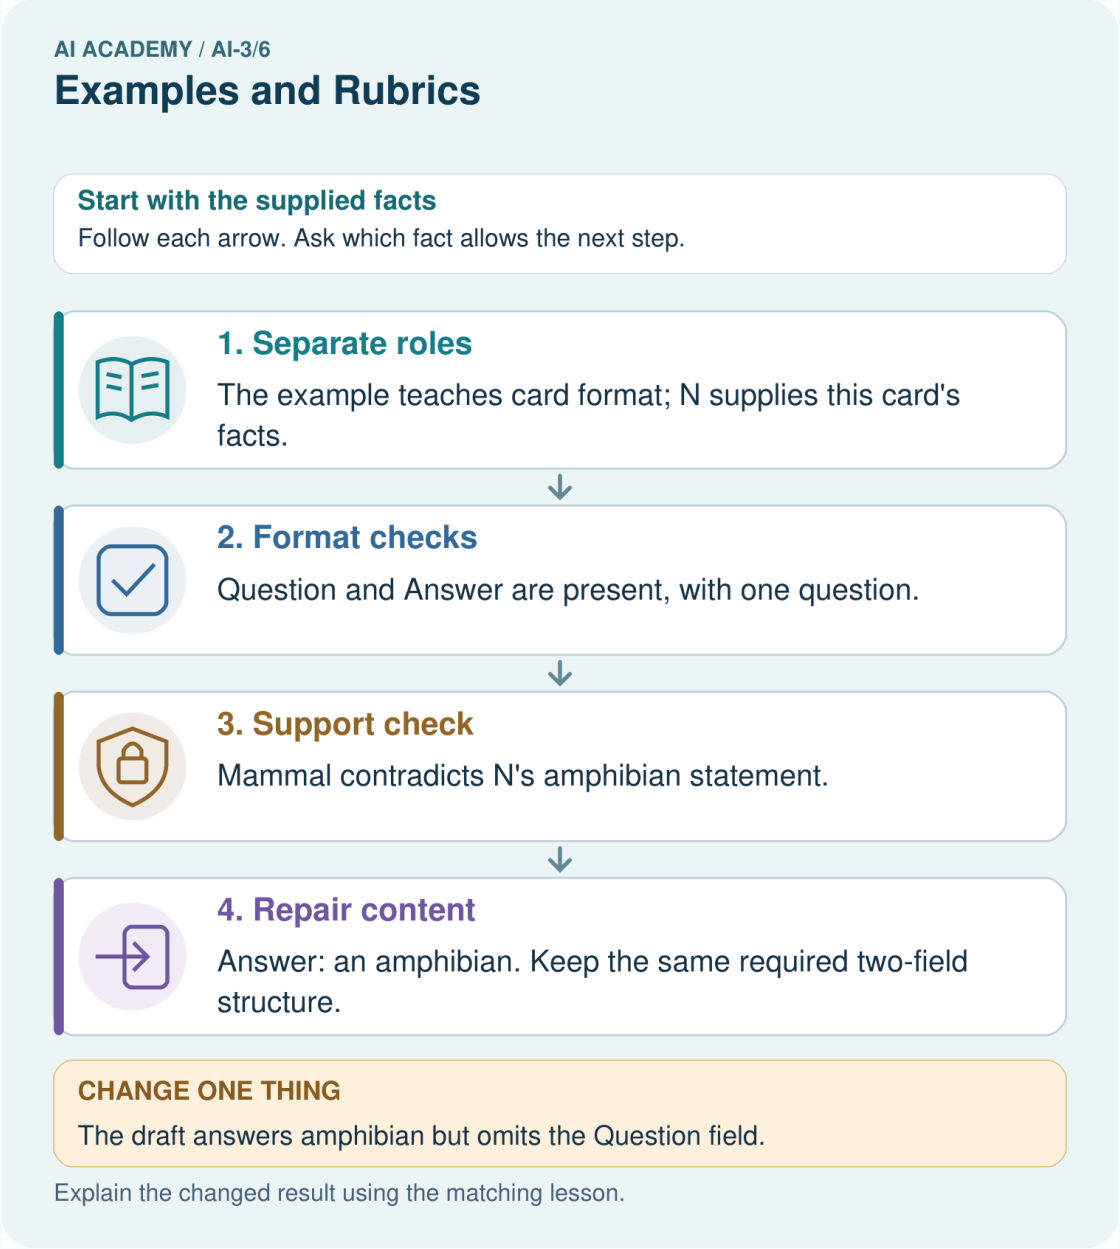

> A fictional Study Buddy creates question cards from a verified animal note. Explain the

> labelled step before checking the changed condition.

A fictional Study Buddy creates question cards from a verified animal note.

Approved N: a frog is an amphibian. **Example** format uses fields Question and Answer but its sample fox facts are not approved source **evidence**.

Rubric requires both fields, one question and a source-supported answer. Draft asks “What is a frog?” and answers “A mammal”.

Follow the labelled picture with the matching explanation. Open the vector diagram

Explain why neither original nor changed draft is a full pass, and provide a complete repaired card.

My picture-based explanation and changed-case prediction

Record the help used

Support used: alone / hint / worked **example**. This record is practice **evidence**.

Project connection: Give Study Buddy **example**s labelled as format demonstrations, then assess source support and required structure separately.

WORKBOOK · 24 OF 26

Project portfolio milestone

> Keep this week's input, deciding step, result and limit together in the Verified Study Buddy record.

Project: Verified Study Buddy

Current milestone: Frame the need. Name the user, the problem, allowed **input**s and a safe simple starting method.

Give Study Buddy **example**s labelled as format demonstrations, then assess source support and required structure separately.

Evidence to keep	My record
This week's input and deciding step	
Prediction and actual result (or labelled paper trace)	
One change since the previous checkpoint and why	
One error or limit and the next test	

Explain what this week adds to your project. Reuse last week's record rather than starting again.

WORKBOOK · 25 OF 26

Supported practice and learning evidence

> Try the supported questions before comparing with hints and feedback. Record what you repaired and the evidence you retained.

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

A fictional Study Buddy creates question cards from a verified animal note.

Practice 1: explain the deciding evidence

Which labelled step matches this detail? Answer: an amphibian. Keep the same required two-field structure.

1. Support check

2. Separate roles

3. Repair content

4. Format checks

My selected conclusion, deciding fact and explanation

Hint · try first

Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

Feedback · compare after trying

After your attempt, compare with the supported explanation: Repair content Answer: an amphibian. Keep the same required two-field structure.

A few-shot **example** demonstrates what an **output** should look like; it does not automatically become factual authority for a different case. The draft satisfies layout while failing meaning.

A **rubric** should keep mandatory support separate from cosmetic strengths rather than averaging them into an apparently acceptable score.

Practice 2: explain the deciding evidence

Changed case · predict first

Changed-case practice: The draft answers amphibian but omits the Question field. Which conclusion is supported by the supplied facts?

1. This one **example** guarantees correct results for every future **input**.

2. We can decide the result without examining the changed **input** or the procedure.

3. Support passes, format completeness fails.

My selected conclusion, deciding fact and explanation

Hint · try first

Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

Feedback · compare after trying

After your attempt, compare with the supported explanation: Support passes, format

completeness fails. Correct facts do not satisfy a missing mandatory field.

Repair a missing building block

Review Prompt as a Contract (ai-3/5). Goal: Write a prompt **specification** with observable response criteria. Short practice: Why should the tool not fill melting from memory even if it knows a common definition?.

Return to this week and explain what you changed.

Review Tokens and Context (ai-3/3). Goal: Account for fixed text, **evidence** and reserved **output** under a toy budget. Short practice: Can A alone justify answering 20 seats after the exception is known?.

Return to this week and explain what you changed.

Keep your completed work

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run **evidence**. Open the HTML copy to read or print it.

Drafts stay in this browser when storage is available; clear drafts on a shared device.

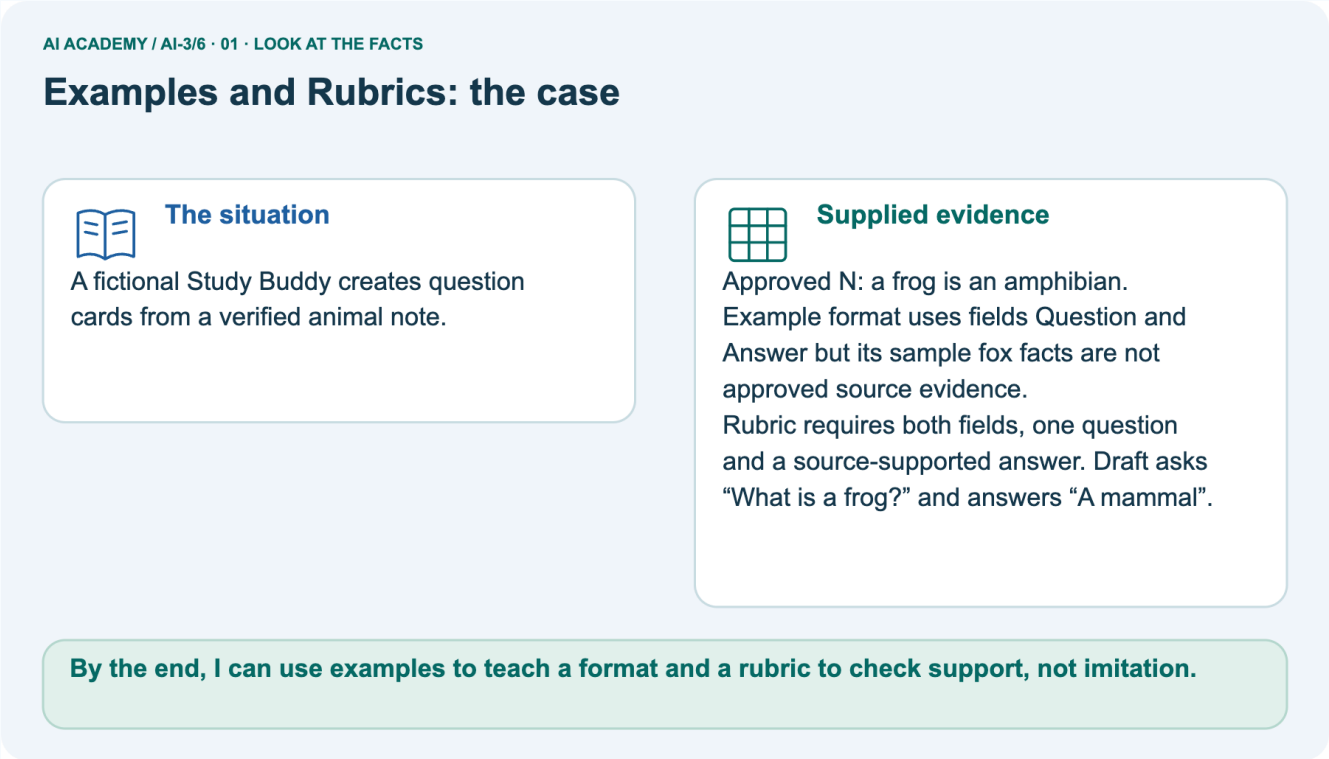

What I repaired, the evidence I kept and the next test

WORKBOOK · 26 OF 26

Visual concept journey

Explain each Examples and Rubrics picture from its labels, then record a relevant limit.

01. Examples and Rubrics: the case

Follow the labelled picture with the matching explanation. Open the vector diagram

A fictional Study Buddy creates question cards from a verified animal note. Supplied facts: Approved N: a frog is an amphibian.

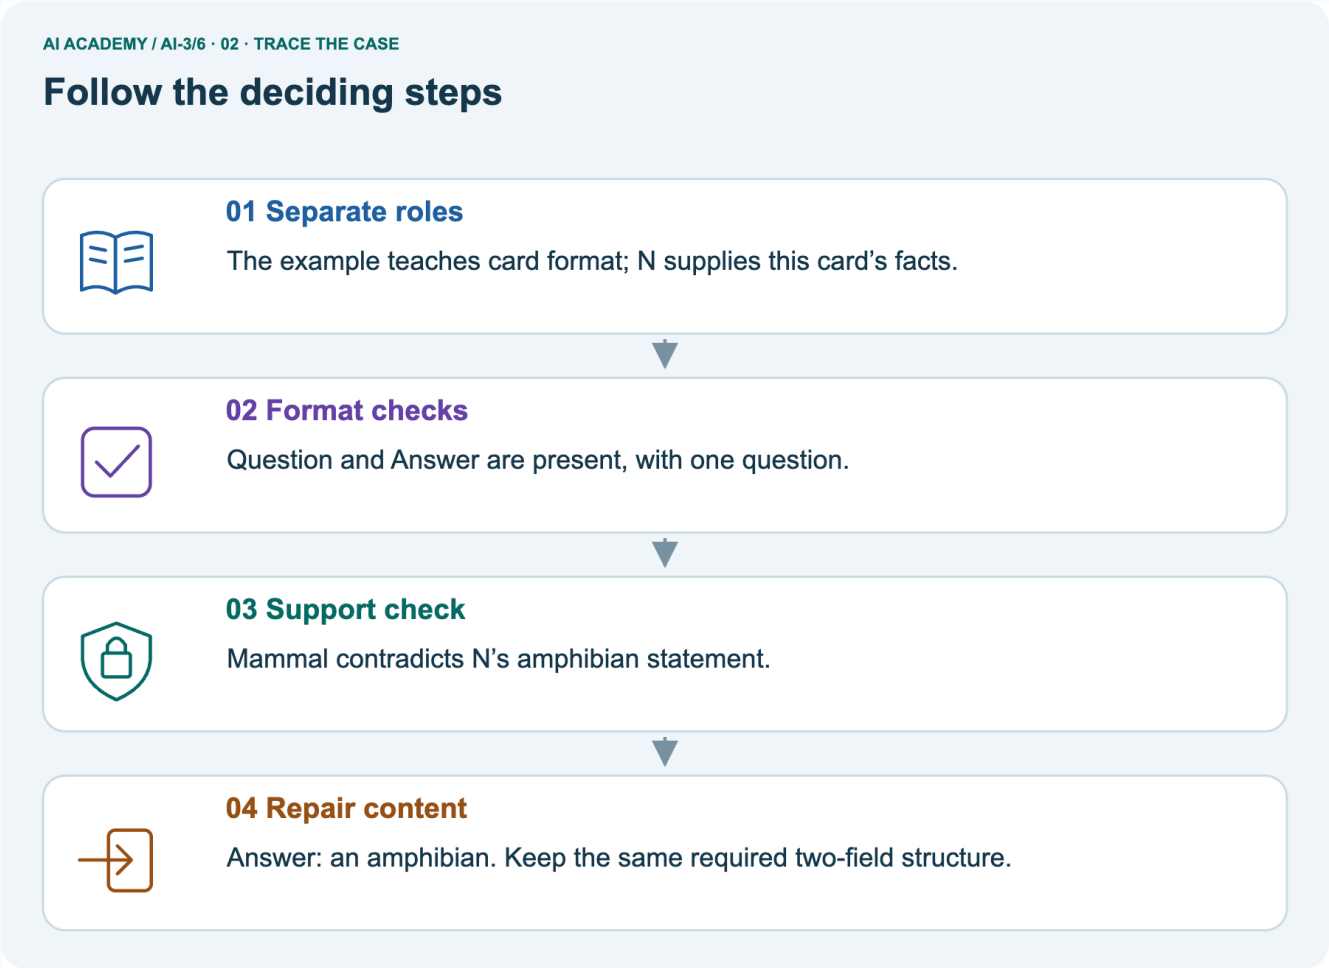

Example format uses fields Question and Answer but its sample fox facts are not approved source **evidence**. **Rubric** requires both fields, one question and a source-supported answer.

Draft asks “What is a frog?” and answers “A mammal”.

> Point to the given fact that matters most. Explain why it matters.

My picture explanation, deciding evidence and one limit

02. Follow the deciding steps

Follow the labelled picture with the matching explanation. Open the vector diagram

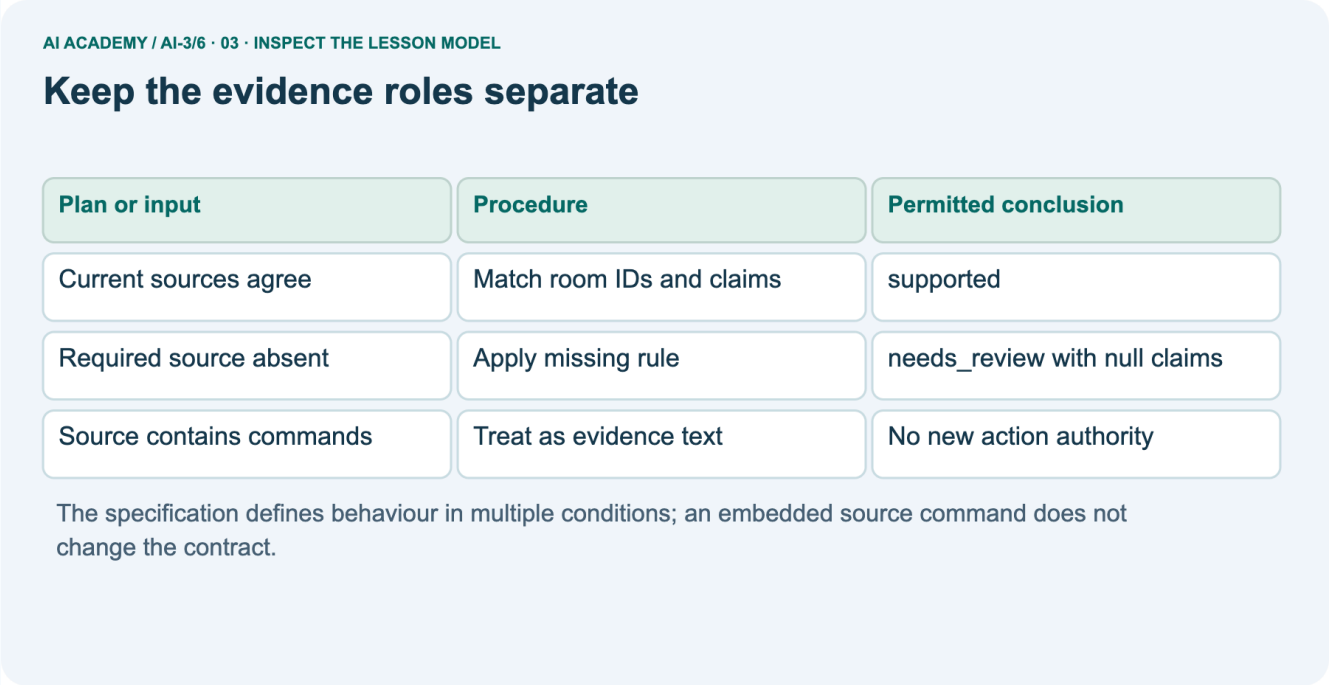

Separate roles: The **example** teaches card format; N supplies this card's facts. → Format checks: Question and Answer are present, with one question. → Support check: Mammal contradicts N's amphibian statement. → Repair content: Answer: an amphibian.

Keep the same required two-field structure.

> Point to each numbered stage and explain which recorded **input** it uses.

My picture explanation, deciding evidence and one limit

03. Keep the evidence roles separate

Follow the labelled picture with the matching explanation. Open the vector diagram

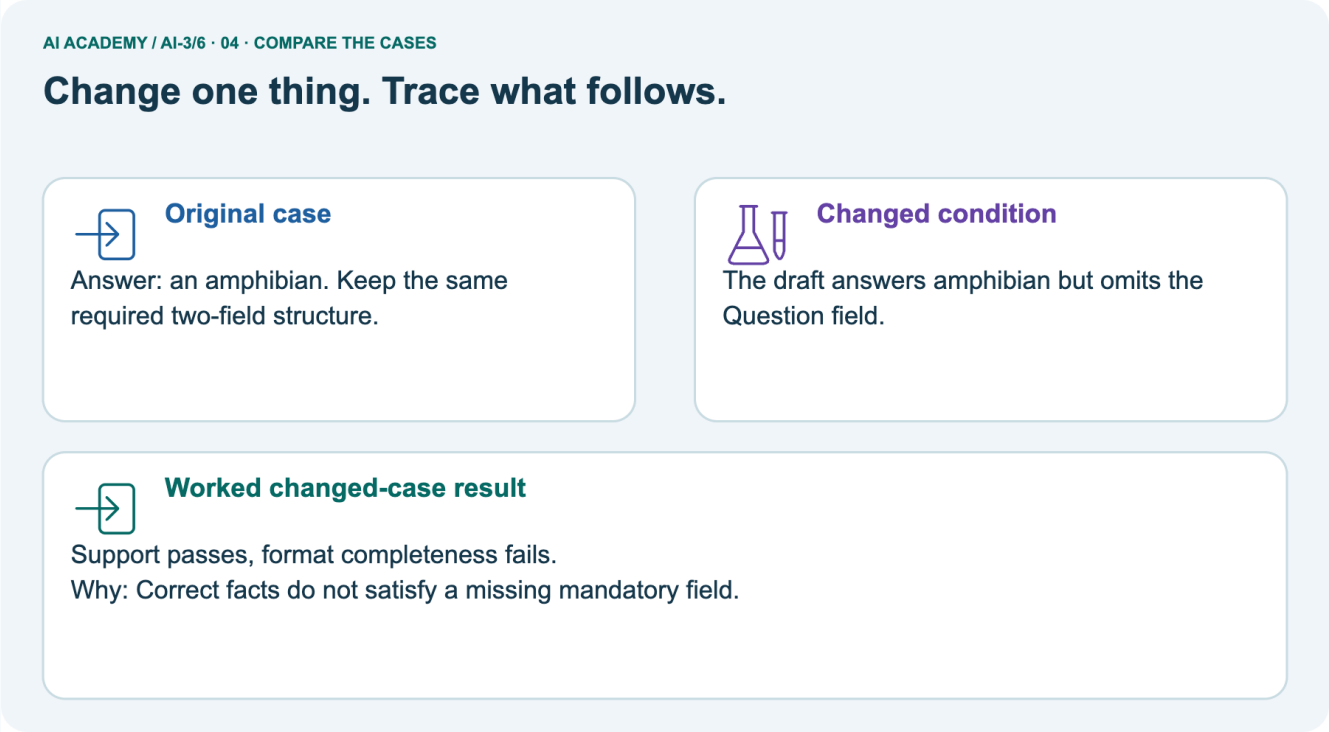

Keep the **evidence** roles separate. Current sources agree | Match room IDs and claims | supported. Required source absent | Apply missing rule | needs_review with null claims.

Source contains commands | Treat as **evidence** text | No new action authority

Read the labels and values. Explain the relationship the model shows.

My picture explanation, deciding evidence and one limit

04. Change one thing. Trace what follows.

Follow the labelled picture with the matching explanation. Open the vector diagram

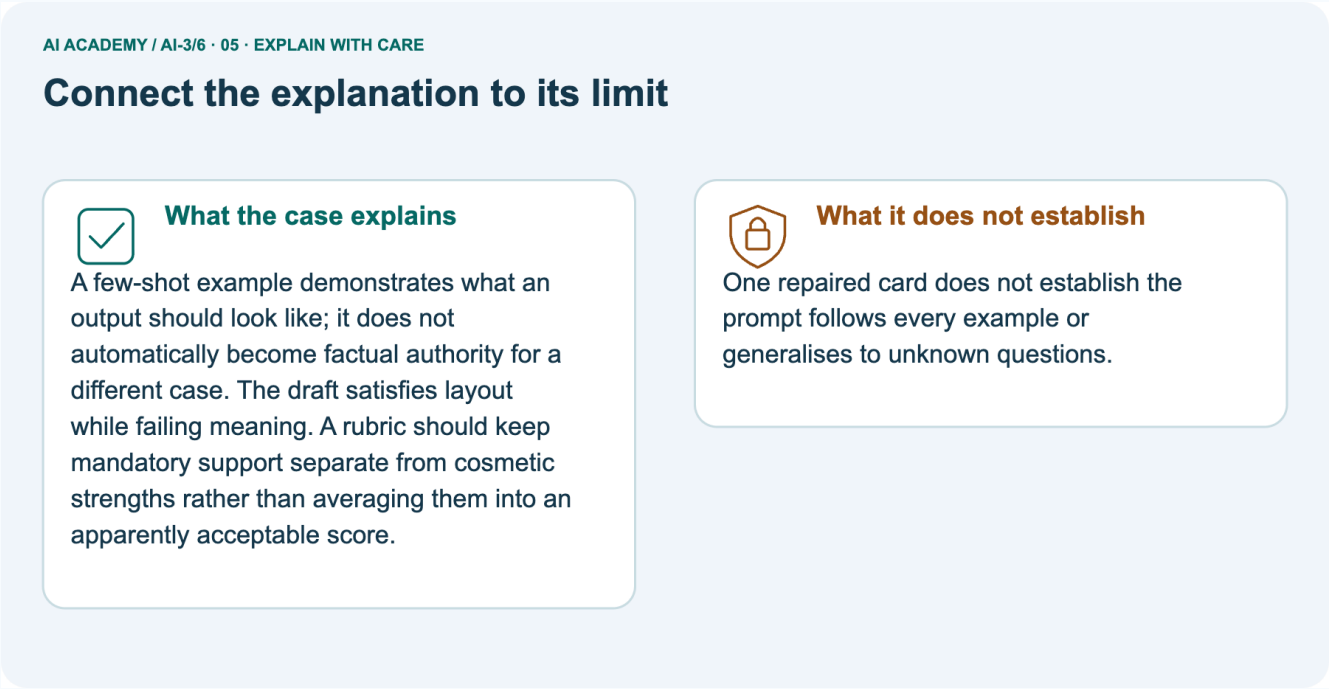

Original case: Answer: an amphibian. Keep the same required two-field structure. Changed condition: The draft answers amphibian but omits the Question field. Expected result: Support passes, format completeness fails.

Reason: Correct facts do not satisfy a missing mandatory field.

Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude.

My picture explanation, deciding evidence and one limit

05. Connect the explanation to its limit

Follow the labelled picture with the matching explanation. Open the vector diagram

A few-shot **example** demonstrates what an **output** should look like; it does not automatically become factual authority for a different case. The draft satisfies layout while failing meaning.

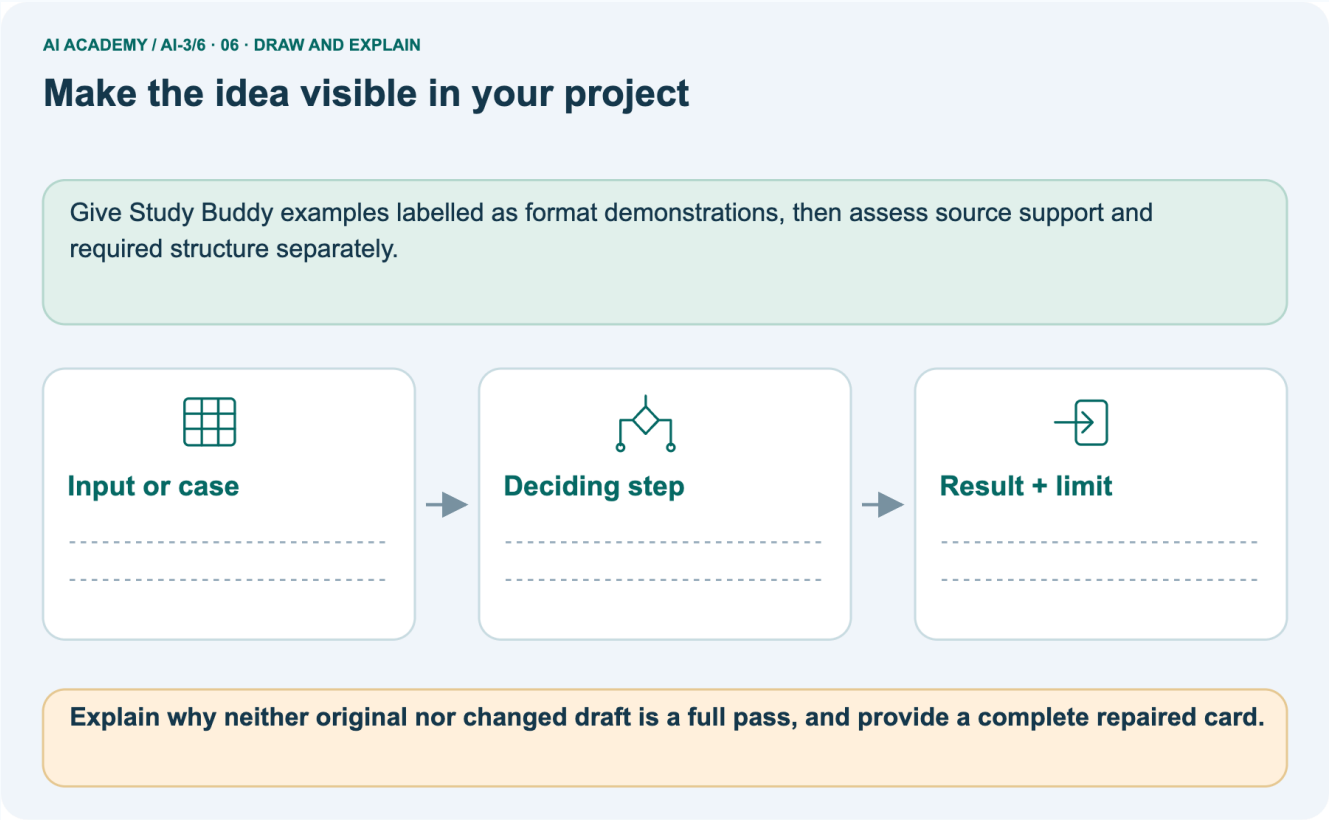

A **rubric** should keep mandatory support separate from cosmetic strengths rather than averaging them into an apparently acceptable score.

Limit: One repaired card does not establish the prompt follows every **example** or generalises to unknown questions.

Explain the case, then point to a limit on the claim.

My picture explanation, deciding evidence and one limit

06. Make the idea visible in your project

Follow the labelled picture with the matching explanation. Open the vector diagram

Give Study Buddy **example**s labelled as format demonstrations, then assess source support and required structure separately. Draw your **input**, deciding step, result and limit.

Supported question: Explain why neither original nor changed draft is a full pass, and provide a complete repaired card.

Draw your project trace and justify the deciding step using **evidence**.

My picture explanation, deciding evidence and one limit

Save or print your responses for your portfolio. Progress and drafts on the hosted website stay in the current browser. Use only fictional or teacher-approved data.
