Copyright and Provenance

Learn to understand, design, build, test and explain AI systems responsibly.

Project: Verified Study Buddy

WORKBOOK · 1 OF 21

Recall and choose your starting point

> Record your starting explanation for Copyright and Provenance before opening notes. Show any later correction separately.

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Privacy by Design

Without opening the old lesson, explain one key idea from Privacy by Design. Give an example and a mistake that the idea helps you avoid.

> **My remembered idea, example and correction**

Evaluation Sets

Without opening the old lesson, explain one key idea from Evaluation Sets. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Block to Python Bridge

Without opening the old lesson, explain one key idea from Block to Python Bridge. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

WORKBOOK · 2 OF 21

Practise with fading help

> Complete the supported Copyright and Provenance trace and record the first step you can explain without help.

Use W2: Trace the worked case for **Copyright** and permitted sources. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs	Procedure I chose	Middle steps	Result and check

The step I completed without help, and the hint I needed

WORKBOOK · 3 OF 21

Individual reasoning check

> Check the proposed Copyright and Provenance explanation against the supplied facts before discussing it.

Use the worked case for **Copyright** and permitted sources. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported.

Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

WORKBOOK · 4 OF 21

Independent transfer case

> Write one first attempt at the reserved independent case before feedback. Repeated copies of that case refer to the same recorded attempt.

Independent case: Apply a new case independently

Text C permits internal reading only; D permits public quotation up to 30 words with **attribution**. Proposed public handout reproduces 40 words. Apply the fictional terms.

> **My independent explanation, trace and limits**

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

WORKBOOK · 5 OF 21

Your learning target

> Connect the Copyright and Provenance target to a trace and a justified conclusion.

A project uses an image found through search. Its author is known but its **licence** is missing. Is naming the author enough to establish reuse permission? Describe a **provenance** record and next action.

WORKBOOK · 6 OF 21

Solve the given case

> Solve the supplied Copyright and Provenance case and show the deciding evidence.

A slide reuses an online photograph and textbook paragraph.

What **provenance** and reuse checks are needed?

Show your trace, calculation or **evidence**

Write or draw your reasoning and evidence.

WORKBOOK · 7 OF 21

Check a changed case

Apply the procedure to the changed case and record why the conclusion follows.

You find an attractive illustration online with no **license** information. What should you record and check before reusing it in a public project?

My independent answer and reason

Write or draw your reasoning and evidence.

WORKBOOK · 8 OF 21

Design a revealing test

> Specify a changed input, expected result and observation separately.

Create a changed **input**, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record	My evidence
Changed input or condition	
Expected answer or fallback	
Observed result	
Why the result occurred	

WORKBOOK · 9 OF 21

Project checkpoint

> Justify what Copyright and Provenance adds to Verified Study Buddy and keep the evidence.

Attach citations and **provenance** metadata to every Study Buddy learning asset.

The project change and **evidence** I will keep

Write or draw your reasoning and evidence.

WORKBOOK · 10 OF 21

Self check

> Judge explanation, evidence, transfer and limits separately; attach the work behind your judgement.

- I can explain the mechanism.
- I can show evidence.
- I can handle a changed case.
- I can name a limit.

Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

WORKBOOK · 11 OF 21

Transfer practice from the original programme

> Use this earlier case as transfer practice. A case already discussed with feedback is not fresh assessment evidence.

A project uses an image found through search. Its author is known but its **licence** is missing. Is naming the author enough to establish reuse permission? Describe a **provenance** record and next action.

My independently reasoned answer

Record support used: none, hint or teacher explanation.

WORKBOOK · 12 OF 21

W1 Explain the mechanism

> Explain the mechanism. Apply the supplied Copyright and Provenance facts and keep your reasoning.

Where to find the supplied example

Reference for this exercise: open this week's student lesson, "Copyright and Provenance", at "See how it works" and "Follow a worked example". Use the original worked values or code named in the question; the later pictorial case is a separate example. Keep this reference beside your workbook while practising.

Explain the weekly **mechanism** in your own words. Use the worked scenario to name its **input**, decision rule and **output**.

My reasoning and evidence

WORKBOOK · 13 OF 21

W2 Trace the worked case

> Trace the worked case. Apply the supplied Copyright and Provenance facts and keep your reasoning.

Image A has L; image B has M. The project is a publicly downloadable adapted poster. Show the intermediate steps and give the conclusion with its scope.

My reasoning and evidence

WORKBOOK · 14 OF 21

W3 Audit the limit

> Audit the limit. Apply the supplied Copyright and Provenance facts and keep your reasoning.

A report omits this qualification: Real legal outcomes depend on jurisdiction and facts; supplied **licence** terms define this classroom exercise, not universal **copyright** law.

Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

My reasoning and evidence

WORKBOOK · 15 OF 21

W4 Apply a new case independently

Attempt before feedback. If this repeats the selected independent case, reuse that first attempt; otherwise keep a separate record. Apply a new case independently. Apply the supplied Copyright and Provenance facts and keep your reasoning.

Text C permits internal reading only; D permits public quotation up to 30 words with **attribution**. Proposed public handout reproduces 40 words. Apply the fictional terms.

My reasoning and evidence

WORKBOOK · 16 OF 21

W5 Design a revealing follow-up

Design a revealing follow-up. Apply the supplied Copyright and Provenance facts and keep your reasoning.

Where to find the supplied example

Reference for this exercise: open this week's student lesson, "Copyright and Provenance", at "See how it works" and "Follow a worked example". Use the original worked values or code named in the question; the later pictorial case is a separate example. Keep this reference beside your workbook while practising.

For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison.

Do not reuse W4 as a new final test after receiving feedback.

My reasoning and evidence

WORKBOOK · 17 OF 21

Feedback, return check and learning record

> Record the first repaired step and a different case to revisit after a delay.

Evidence	My record
Worked alone / hint / model	
First step I repaired and why	
New case checked later; date and result	
What I can now explain without notes	

Evidence	My record
One remaining question	

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

WORKBOOK · 18 OF 21

Pictorial case practice: Copyright and Provenance

> Read fictional reuse terms before decorating a public study guide. Explain the labelled step before checking the changed condition.

Read fictional reuse terms before decorating a public study guide.

Image Fern allows public redistribution with **attribution** but no alteration. Image Moss allows alteration and public redistribution with **attribution**. The plan crops an image.

All **input**s and outcomes in this worked example are invented classroom data; no real model run is claimed.

AI ACADEMY / AI-3/29

Copyright and Provenance

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Read terms

Fern excludes alteration; Moss permits it.

2. Match proposed use

Cropping is an alteration in these declared toy terms.

3. Choose eligible asset

Use Moss with its required attribution; do not crop Fern for this public guide.

CHANGE ONE THING

Use Fern unchanged and include the required attribution.

Explain the changed result using the matching lesson.

Follow the labelled picture with the matching explanation. Open the vector diagram

Does acknowledging Fern make a cropped version permitted? Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.

My picture-based explanation and changed-case prediction

Record the help used

Support used: alone / hint / worked example. This record is practice **evidence**.

Project connection: For your Verified Study Buddy, save the **input**, procedure, observed result and limitation of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

Project portfolio milestone

> Keep this week's input, deciding step, result and limit together in the Verified Study Buddy record.

Project: Verified Study Buddy

Current milestone: Prepare the demonstration. Gather reproducible instructions, **evidence**, access checks and remaining limitations.

For your Verified Study Buddy, save the **input**, procedure, observed result and limitation of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

Evidence to keep	My record
This week's input and deciding step	
Prediction and actual result (or labelled paper trace)	
One change since the previous checkpoint and why	

Evidence to keep	My record
One error or limit and the next test	

> **Explain what this week adds to your project. Reuse last week's record rather than starting again.**

WORKBOOK · 20 OF 21

Supported practice and learning evidence

> Try the supported questions before comparing with hints and feedback. Record what you repaired and the evidence you retained.

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

Read fictional reuse terms before decorating a public study guide.

Practice 1: explain the deciding evidence

Which labelled step matches this detail? Use Moss with its required **attribution**; do not crop Fern for this public guide.

1. Choose eligible asset

2. Read terms

3. Match proposed use

My selected conclusion, deciding fact and explanation

Hint · try first

Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

Feedback · compare after trying

After your attempt, compare with the supported explanation: Choose eligible asset Use Moss with its required **attribution**; do not crop Fern for this public guide. Read the picture in order.

Use Moss with its required **attribution**; do not crop Fern for this public guide. The arrows show which recorded **input** or intermediate result each decision uses.

Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows.

Practice 2: explain the deciding evidence

Changed case · predict first

Changed-case practice: Use Fern unchanged and include the required **attribution**. Which conclusion is supported by the supplied facts?

1. That use satisfies the stated fictional permission conditions.

2. This one example guarantees correct results for every future **input**.

3. We can decide the result without examining the changed **input** or the procedure.

My selected conclusion, deciding fact and explanation

Hint · try first

Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

Feedback · compare after trying

After your attempt, compare with the supported explanation: That use satisfies the stated fictional permission conditions. Its public redistribution is permitted when there is no alteration and **attribution** is included.

Repair a missing building block

Review Privacy by Design (ai-3/28). Goal: Explain the **mechanism** and terminology of data retention and deletion. Short practice: Which IDs and locations must appear in the deletion **evidence**?

Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.. Return to this week and explain what you changed.

Review Evaluation Sets (ai-3/26). Goal: Explain the **mechanism** and terminology of system evaluation sets. Short practice: Did the added cases demonstrate better answering?

Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.. Return to this week and explain what you changed.

Review Block to Python Bridge (ai-3/23). Goal: Translate a short paper calculation into a Python script. Short practice: Trace the changed list and identify where the result differs.

Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.. Return to this week and explain what you changed.

Keep your completed work

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run **evidence**. Open the HTML copy to read or print it.

Drafts stay in this browser when storage is available; clear drafts on a shared device.

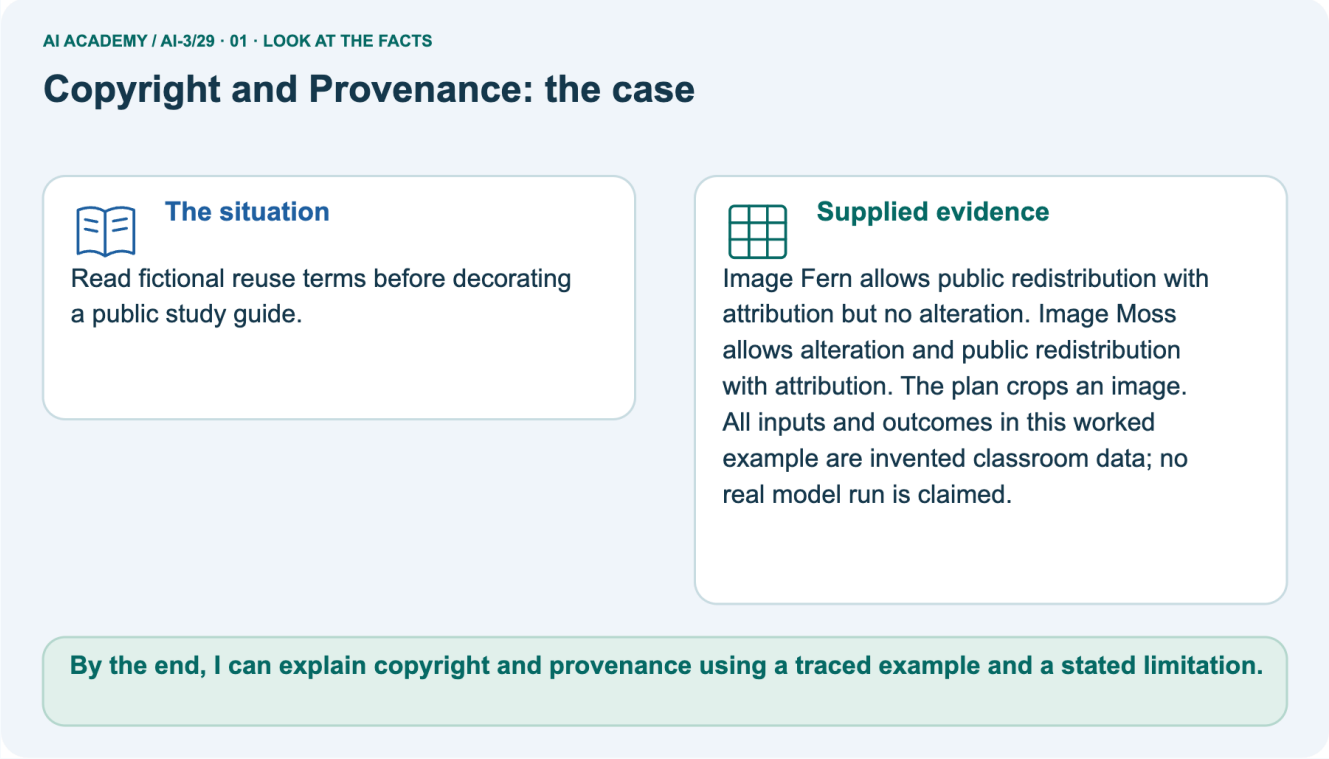

What I repaired, the evidence I kept and the next test

WORKBOOK · 21 OF 21

Visual concept journey

> Explain each Copyright and Provenance picture from its labels, then record a relevant limit.

01. Copyright and Provenance: the case

Follow the labelled picture with the matching explanation. Open the vector diagram

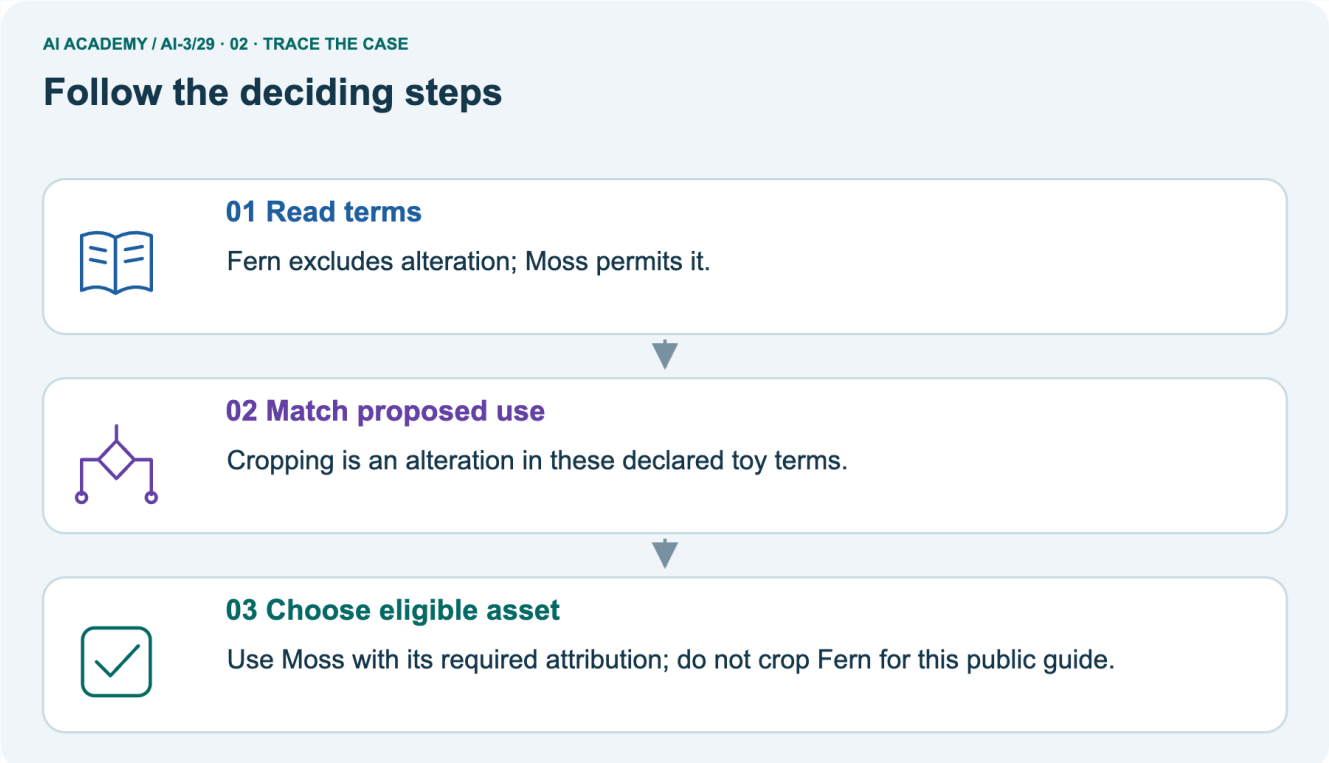

Read fictional reuse terms before decorating a public study guide. Supplied facts: Image Fern allows public redistribution with **attribution** but no alteration.

Image Moss allows alteration and public redistribution with **attribution**. The plan crops an image. All **input**s and outcomes in this worked example are invented classroom data; no real model run is claimed.

> Point to the given fact that matters most. Explain why it matters.

My picture explanation, deciding evidence and one limit

02. Follow the deciding steps

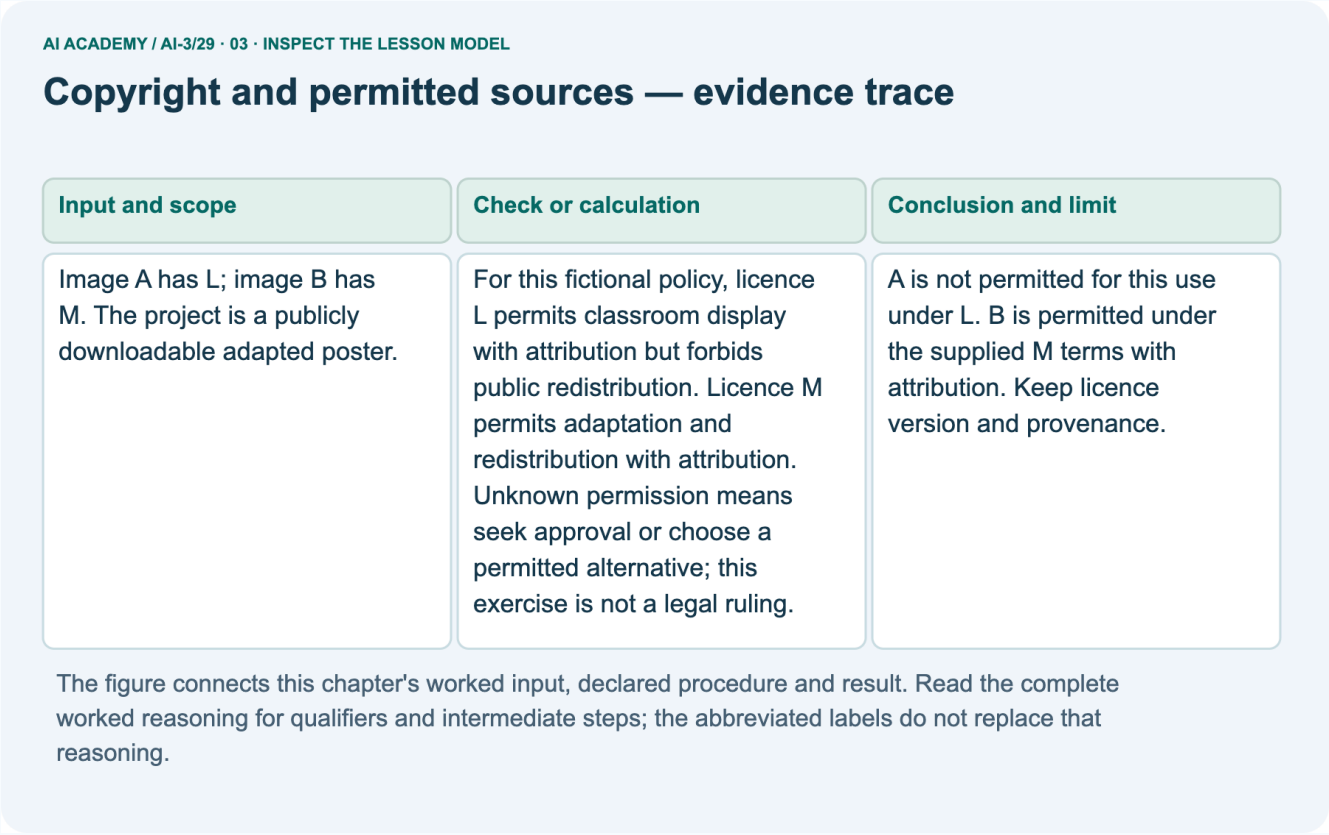

Follow the labelled picture with the matching explanation. Open the vector diagram

Read terms: Fern excludes alteration; Moss permits it. → Match proposed use: Cropping is an alteration in these declared toy terms. → Choose eligible asset: Use Moss with its required **attribution**; do not crop Fern for this public guide.

> Point to each numbered stage and explain which recorded **input** it uses.

My picture explanation, deciding evidence and one limit

03. Copyright and permitted sources — evidence trace

Follow the labelled picture with the matching explanation. Open the vector diagram

Copyright and permitted sources — **evidence** trace. Image A has L; image B has M.

The project is a publicly downloadable adapted poster. | For this fictional policy, **licence** L permits classroom display with **attribution** but forbids public redistribution.

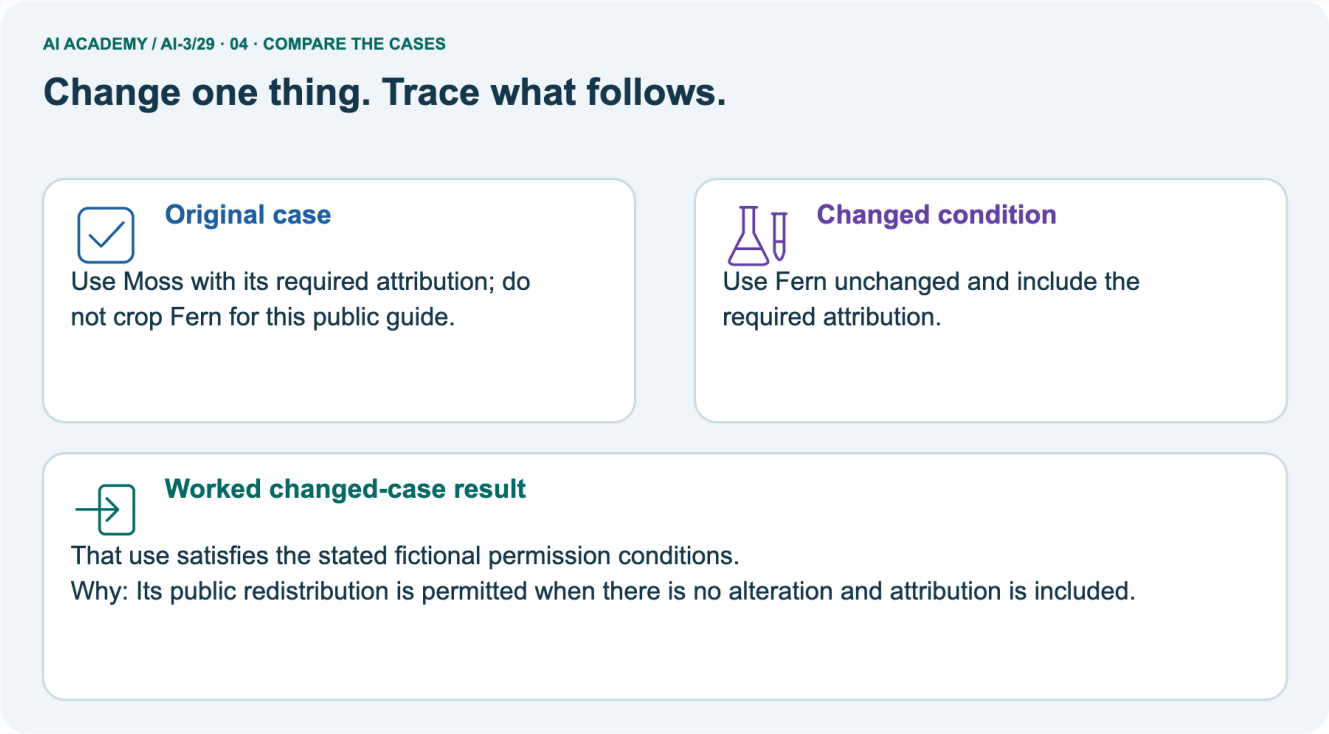

Licence M permits adaptation and redistribution with **attribution**. Unknown permission means seek approval or choose a permitted alternative; this exercise is not a legal ruling. | A is not permitted for this use under L.

B is permitted under the supplied M terms with **attribution**. Keep **licence** version and **provenance**.

> Read the labels and values. Explain the relationship the model shows.

My picture explanation, deciding evidence and one limit

04. Change one thing. Trace what follows.

Follow the labelled picture with the matching explanation. Open the vector diagram

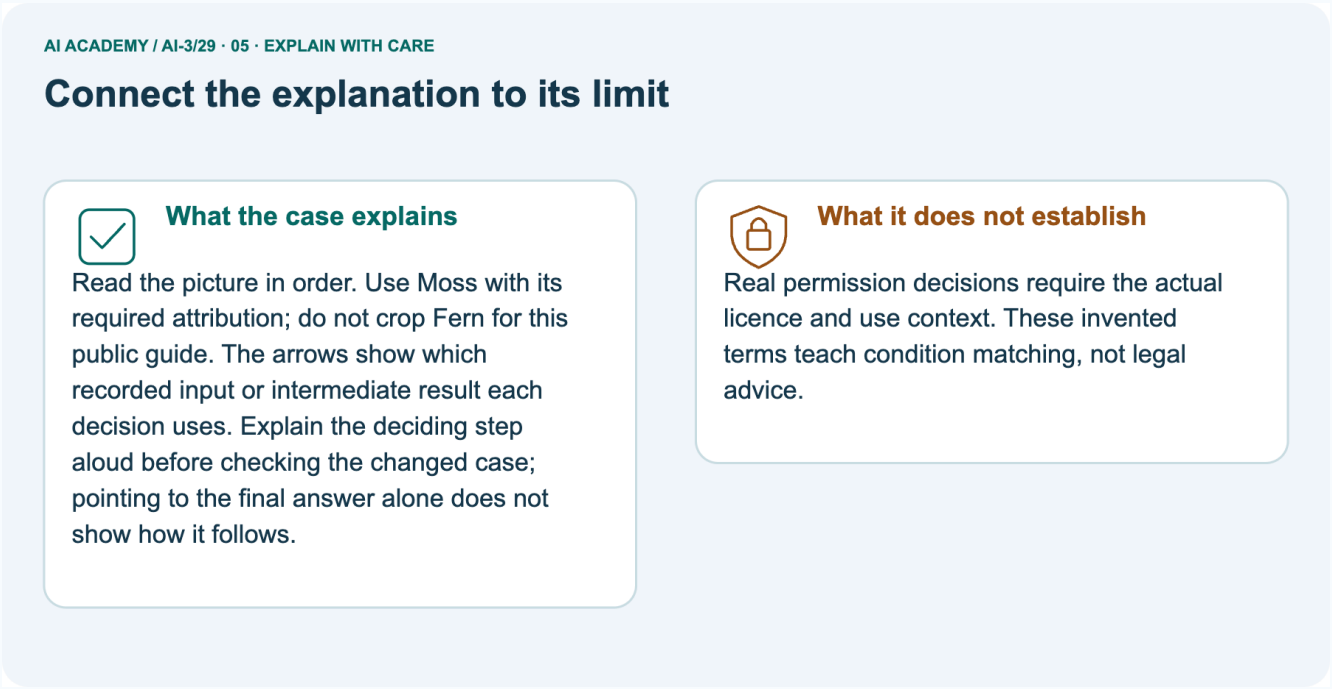

Original case: Use Moss with its required **attribution**; do not crop Fern for this public guide.
Changed condition: Use Fern unchanged and include the required **attribution**.

Expected result: That use satisfies the stated fictional permission conditions. Reason: Its public redistribution is permitted when there is no alteration and **attribution** is included.

> Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude.

My picture explanation, deciding evidence and one limit

05. Connect the explanation to its limit

Follow the labelled picture with the matching explanation. Open the vector diagram

Read the picture in order. Use Moss with its required **attribution**; do not crop Fern for this public guide. The arrows show which recorded **input** or intermediate result each decision uses.

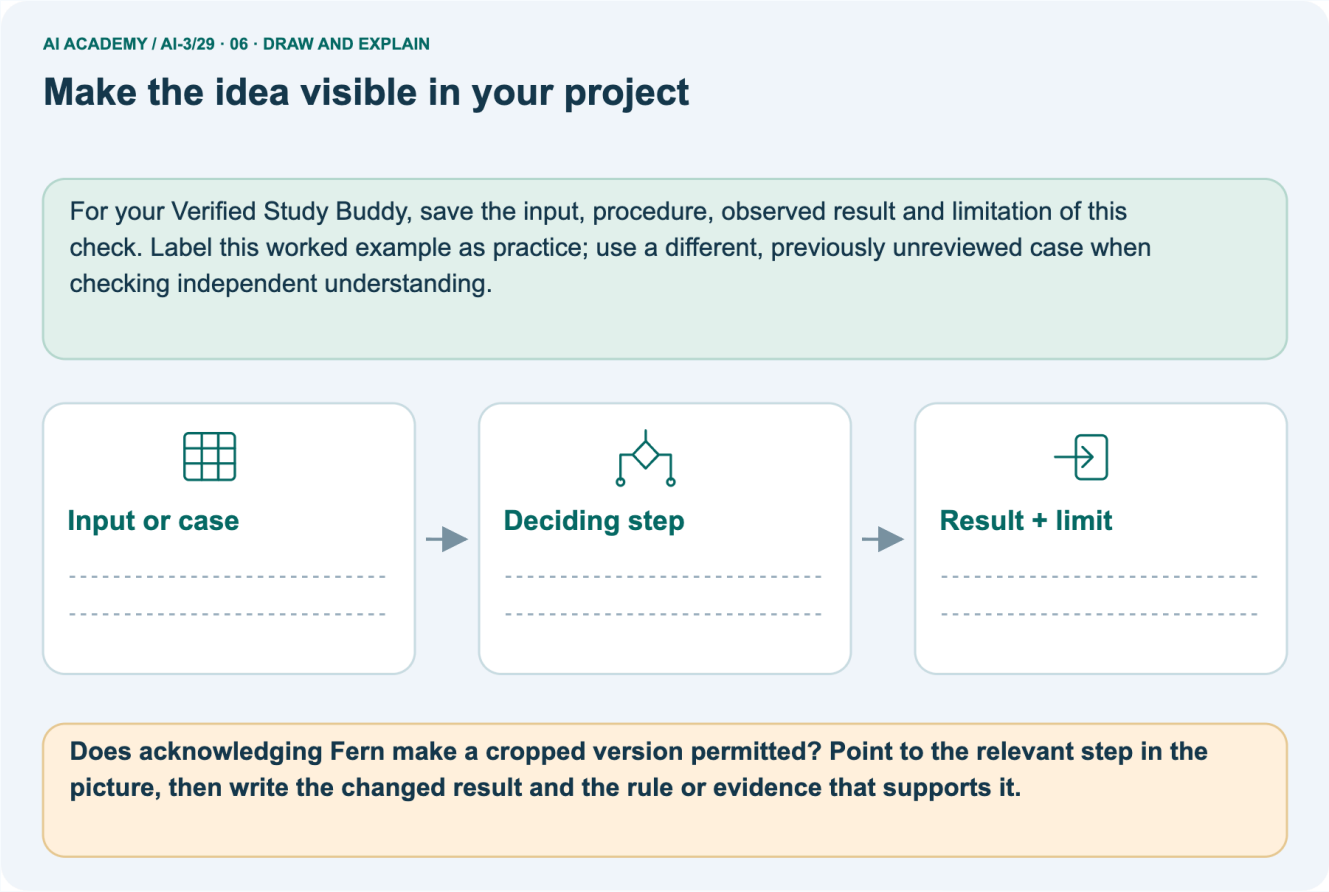

Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows. Limit: Real permission decisions require the actual **licence** and use context.

These invented terms teach condition matching, not legal advice.

> Explain the case, then point to a limit on the claim.

My picture explanation, deciding evidence and one limit

06. Make the idea visible in your project

Follow the labelled picture with the matching explanation. Open the vector diagram

For your Verified Study Buddy, save the **input**, procedure, observed result and limitation of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding. Draw your **input**, deciding step, result and limit.

Supported question: Does acknowledging Fern make a cropped version permitted? Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.

> Draw your project trace and justify the deciding step using **evidence**.

My picture explanation, deciding evidence and one limit

Save or print your responses for your portfolio. Progress and drafts on the hosted website stay in the current browser. Use only fictional or teacher-approved data.
