Creator Defense

Learn to understand, design, build, test and explain AI systems responsibly.

Project: Verified Study Buddy

WORKBOOK · 1 OF 21

Recall and choose your starting point

> Record your starting explanation for Creator Defense before opening notes. Show any later correction separately.

Try the recall before opening notes. Then use a different colour or a labelled second line to correct your explanation.

Capstone Evaluate and Improve

Without opening the old lesson, explain one key idea from Capstone Evaluate and Improve. Give an example and a mistake that the idea helps you avoid.

> **My remembered idea, example and correction**

Capstone Design

Without opening the old lesson, explain one key idea from Capstone Design. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

Bias and Representation

Without opening the old lesson, explain one key idea from Bias and Representation. Give an example and a mistake that the idea helps you avoid.

My remembered idea, example and correction

WORKBOOK · 2 OF 21

Practise with fading help

Complete the supported Creator Defense trace and record the first step you can explain without help.

Use W2: Trace the worked case for Generative systems **defense**. Record the answer once; the lesson and workbook refer to the same attempt.

Given inputs	Procedure I chose	Middle steps	Result and check

The step I completed without help, and the hint I needed

WORKBOOK · 3 OF 21

Individual reasoning check

> Check the proposed Creator Defense explanation against the supplied facts before discussing it.

Use the worked case for Generative systems **defense**. Proposed explanation: “The worked result establishes every future case”. Decide whether this explanation is supported.

Point to the step or supplied fact that decides; explain your repair if needed.

My explanation before partner discussion

WORKBOOK · 4 OF 21

Independent transfer case

> Write one first attempt at the reserved independent case before feedback. Repeated copies of that case refer to the same recorded attempt.

Independent case: Apply a new case independently

A **defense** has retrieval 8/10, support 6/10, fallback 3/4 and no measured latency. State the three rates and reject one unsupported claim.

> **My independent explanation, trace and limits**

Attempt this case before feedback. Record any help. Earlier examples below are further practice; a case already practised with feedback cannot establish fresh transfer.

WORKBOOK · 5 OF 21

Your learning target

> Connect the Creator Defense target to a trace and a justified conclusion.

Your assistant passes 9/12 final questions, including all six direct facts but only 3/6 ambiguous or absent-**evidence** cases. Report results and argue for a focused next step.

WORKBOOK · 6 OF 21

Solve the given case

> Solve the supplied Creator Defense case and show the deciding evidence.

Ten successful demos lead to a never hallucinates claim.

Write a defensible conclusion.

Show your trace, calculation or **evidence**

> **Write or draw your reasoning and evidence.**

WORKBOOK · 7 OF 21

Check a changed case

> Apply the procedure to the changed case and record why the conclusion follows.

An audience asks whether your assistant is always correct. Give an **evidence**-based **defense** using results and a limit.

My independent answer and reason

> **Write or draw your reasoning and evidence.**

Week 36 Test and reflect

WORKBOOK · 8 OF 21

Design a revealing test

> Specify a changed input, expected result and observation separately.

Create a changed **input**, boundary case or missing-information case. Write the expected answer or safe response before testing.

Test record	My evidence
Changed input or condition	
Expected answer or fallback	
Observed result	
Why the result occurred	

Project checkpoint

> Justify what Creator Defense adds to Verified Study Buddy and keep the evidence.

Final product card documents purpose, system map, sources, evals, limits, risks, and human oversight.

The project change and **evidence** I will keep

> **Write or draw your reasoning and evidence.**

WORKBOOK · 10 OF 21

Self check

> Judge explanation, evidence, transfer and limits separately; attach the work behind your judgement.

- I can explain the mechanism.
- I can show evidence.
- I can handle a changed case.
- I can name a limit.

Mark each as not yet, with help or independently, and attach supporting work.

Teacher review _____ Next step _____

WORKBOOK · 11 OF 21

Transfer practice from the original programme

> Use this earlier case as transfer practice. A case already discussed with feedback is not fresh assessment evidence.

Your assistant passes 9/12 final questions, including all six direct facts but only 3/6 ambiguous or absent-**evidence** cases. Report results and argue for a focused next step.

My independently reasoned answer

Record support used: none, hint or teacher explanation.

WORKBOOK · 12 OF 21

W1 Explain the mechanism

> Explain the mechanism. Apply the supplied Creator Defense facts and keep your reasoning.

> **Where to find the supplied example**
>
> Reference for this exercise: open this week's student lesson, "Creator Defense", at "See how it works" and "Follow a worked example". Use the original worked values or code named in the question; the later pictorial case is a separate example. Keep this reference beside your workbook while practising.

Explain the weekly **mechanism** in your own words. Use the worked scenario to name its **input**, decision rule and **output**.

> **My reasoning and evidence**

WORKBOOK · 13 OF 21

W2 Trace the worked case

> Trace the worked case. Apply the supplied Creator Defense facts and keep your reasoning.

System reports 9/10 retrieved relevant records, 7/10 supported answers and zero actions in a read-only run. Presenter claims 90% fully correct and faster than baseline.

Show the intermediate steps and give the conclusion with its scope.

My reasoning and evidence

WORKBOOK · 14 OF 21

W3 Audit the limit

> Audit the limit. Apply the supplied Creator Defense facts and keep your reasoning.

A report omits this qualification: A **defense** should preserve negative **evidence** and uncertainty rather than treating polished presentation as proof.

Explain how omitting it could change a reader's interpretation, and write an accurate replacement.

My reasoning and evidence

WORKBOOK · 15 OF 21

W4 Apply a new case independently

> Attempt before feedback. If this repeats the selected independent case, reuse that first attempt; otherwise keep a separate record. Apply a new case independently. Apply the supplied Creator Defense facts and keep your reasoning.

A **defense** has retrieval 8/10, support 6/10, fallback 3/4 and no measured latency. State the three rates and reject one unsupported claim.

> **My reasoning and evidence**

W5 Design a revealing follow-up

> Design a revealing follow-up. Apply the supplied Creator Defense facts and keep your reasoning.

> **Where to find the supplied example**
>
> Reference for this exercise: open this week's student lesson, "Creator Defense", at "See how it works" and "Follow a worked example". Use the original worked values or code named in the question; the later pictorial case is a separate example. Keep this reference beside your workbook while practising.

For the worked scenario, propose one additional case that could reveal a failure, describe its expected outcome before running it, and explain what would need to remain fixed for a fair comparison.

Do not reuse W4 as a new final test after receiving feedback.

My reasoning and evidence

WORKBOOK · 17 OF 21

Feedback, return check and learning record

> Record the first repaired step and a different case to revisit after a delay.

Evidence	My record
Worked alone / hint / model	
First step I repaired and why	
New case checked later; date and result	
What I can now explain without notes	
One remaining question	

Revisit this idea with your teacher after a delay. Familiarity is different from explaining and using it on a changed case.

WORKBOOK · 18 OF 21

Pictorial case practice: Creator Defense

> Defend a study-buddy project using separate claims and matching evidence. Explain the labelled step before checking the changed condition.

Defend a study-buddy project using separate claims and matching **evidence**.

Set A: 15 answerable questions, with 12 relevant retrievals and 9 supported answers. Separate set B: 5 missing-source questions, with 4 appropriate fallbacks. No speed measurements exist.

All **input**s and outcomes in this worked example are invented classroom data; no real model run is claimed.

AI ACADEMY / AI-3/36

Creator Defense

Start with the supplied facts

Follow each arrow. Ask which fact allows the next step.

1. Retrieval claim

Relevant retrieval rate is 12/15=80%.

2. Answer claim

Supported-answer rate is 9/15=60%; retrieval success is not answer success.

3. Fallback claim

Appropriate fallback is 4/5=80%. Make no measured speed claim.

CHANGE ONE THING

Only the retrieval rate is put on the presentation poster.

Explain the changed result using the matching lesson.

Follow the labelled picture with the matching explanation. Open the vector diagram

Which numbers would you display to make the **defense** honest? Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.

My picture-based explanation and changed-case prediction

Record the help used

Support used: alone / hint / worked example. This record is practice **evidence**.

Project connection: For your Verified Study Buddy, save the **input**, procedure, observed result and **limitation** of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

Project portfolio milestone

> Keep this week's input, deciding step, result and limit together in the Verified Study Buddy record.

Project: Verified Study Buddy

Current milestone: Present and defend. Demonstrate the system, explain one failure and justify the next improvement with **evidence**.

For your Verified Study Buddy, save the **input**, procedure, observed result and **limitation** of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding.

Evidence to keep	My record
This week's input and deciding step	
Prediction and actual result (or labelled paper trace)	
One change since the previous checkpoint and why	

Evidence to keep	My record
One error or limit and the next test	

> **Explain what this week adds to your project. Reuse last week's record rather than starting again.**

WORKBOOK · 20 OF 21

Supported practice and learning evidence

> Try the supported questions before comparing with hints and feedback. Record what you repaired and the evidence you retained.

Use this supported practice once, in the browser or on paper. Keep the reserved independent assessment for a separate first attempt before teacher feedback.

Defend a study-buddy project using separate claims and matching **evidence**.

Practice 1: explain the deciding evidence

Which labelled step matches this detail? Appropriate fallback is 4/5=**80%**. Make no measured speed claim.

1. Fallback claim

2. Answer claim

3. Retrieval claim

My selected conclusion, deciding fact and explanation

Hint · try first

Hint if needed: Read the steps in the pictorial case. Match the supplied detail to the stage that performs or records it.

Feedback · compare after trying

After your attempt, compare with the supported explanation: Fallback claim Appropriate fallback is 4/5=**80%**. Make no measured speed claim. Read the picture in order. Appropriate fallback is 4/5=**80%**.

Make no measured speed claim. The arrows show which recorded **input** or intermediate result each decision uses.

Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows.

Practice 2: explain the deciding evidence

Changed case · predict first

Changed-case practice: Only the retrieval rate is put on the presentation poster. Which conclusion is supported by the supplied facts?

1. This one example guarantees correct results for every future **input**.

2. The poster omits the lower supported-answer rate and cannot imply **80%** fully correct answers.

3. We can decide the result without examining the changed **input** or the procedure.

My selected conclusion, deciding fact and explanation

Hint · try first

Hint if needed: Use the changed condition and the deciding step in the pictorial trace. The answer must say what follows from those facts.

Feedback · compare after trying

After your attempt, compare with the supported explanation: The poster omits the lower supported-answer rate and cannot imply **80%** fully correct answers.

Retrieving useful **evidence** is an intermediate step, not proof that the final answer uses it correctly.

Repair a missing building block

Review Capstone Evaluate and Improve (ai-3/35). Goal: Explain the **mechanism** and terminology of capstone evaluation and revision. Short practice: May the team call the repaired validation cases an untouched final test?

Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.. Return to this week and explain what you changed.

Review Capstone Design (ai-3/33). Goal: Explain the **mechanism** and terminology of capstone requirements and corpus. Short practice: What should the project plan record before the new flower test?

Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.. Return to this week and explain what you changed.

Review Bias and Representation (ai-3/30). Goal: Explain the **mechanism** and terminology of representation and bias evaluation. Short practice: Explain why comparing six correct answers in each group would mislead.

Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.. Return to this week and explain what you changed.

Keep your completed work

Use Download completed work in the hosted lesson to export your answers, reflections, practice feedback and code-run **evidence**. Open the HTML copy to read or print it.

Drafts stay in this browser when storage is available; clear drafts on a shared device.

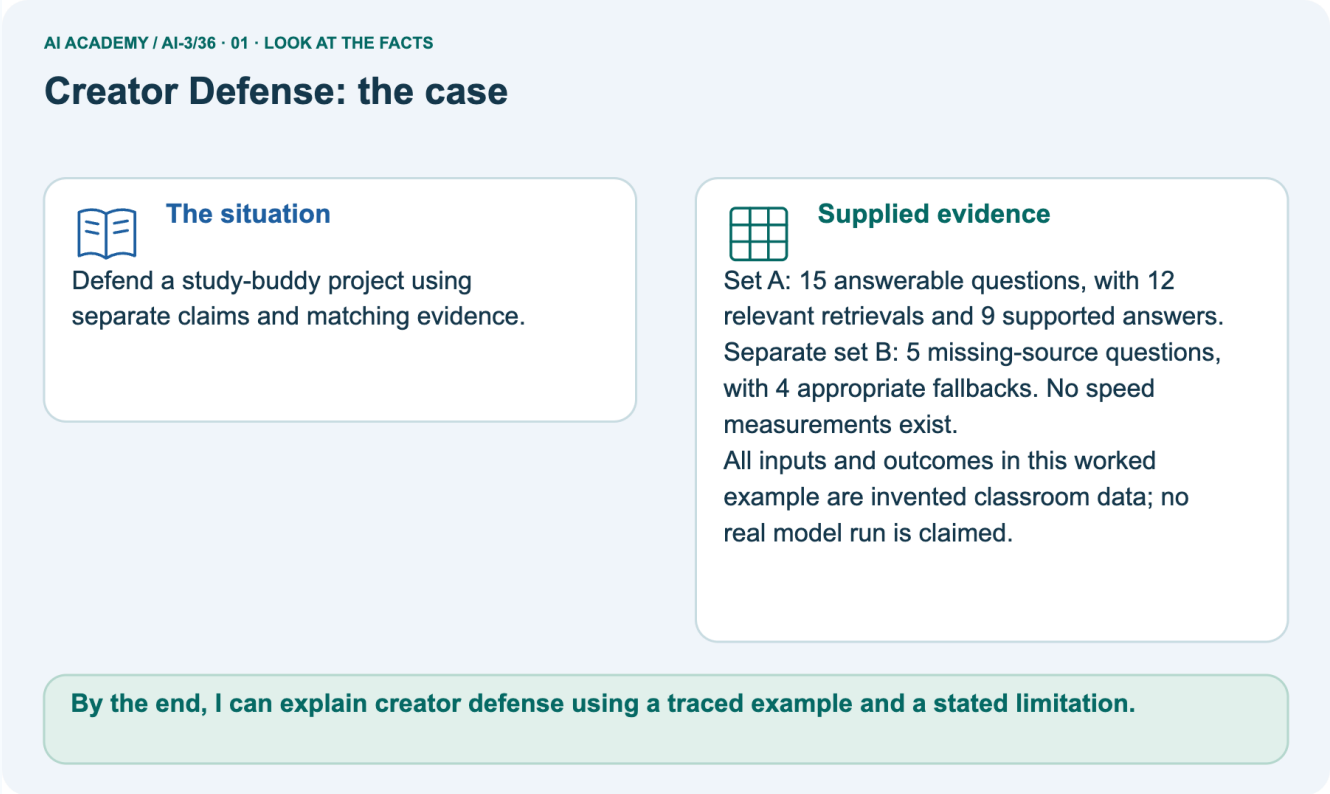

What I repaired, the evidence I kept and the next test

WORKBOOK · 21 OF 21

Visual concept journey

> Explain each Creator Defense picture from its labels, then record a relevant limit.

01. Creator Defense: the case

Follow the labelled picture with the matching explanation. Open the vector diagram

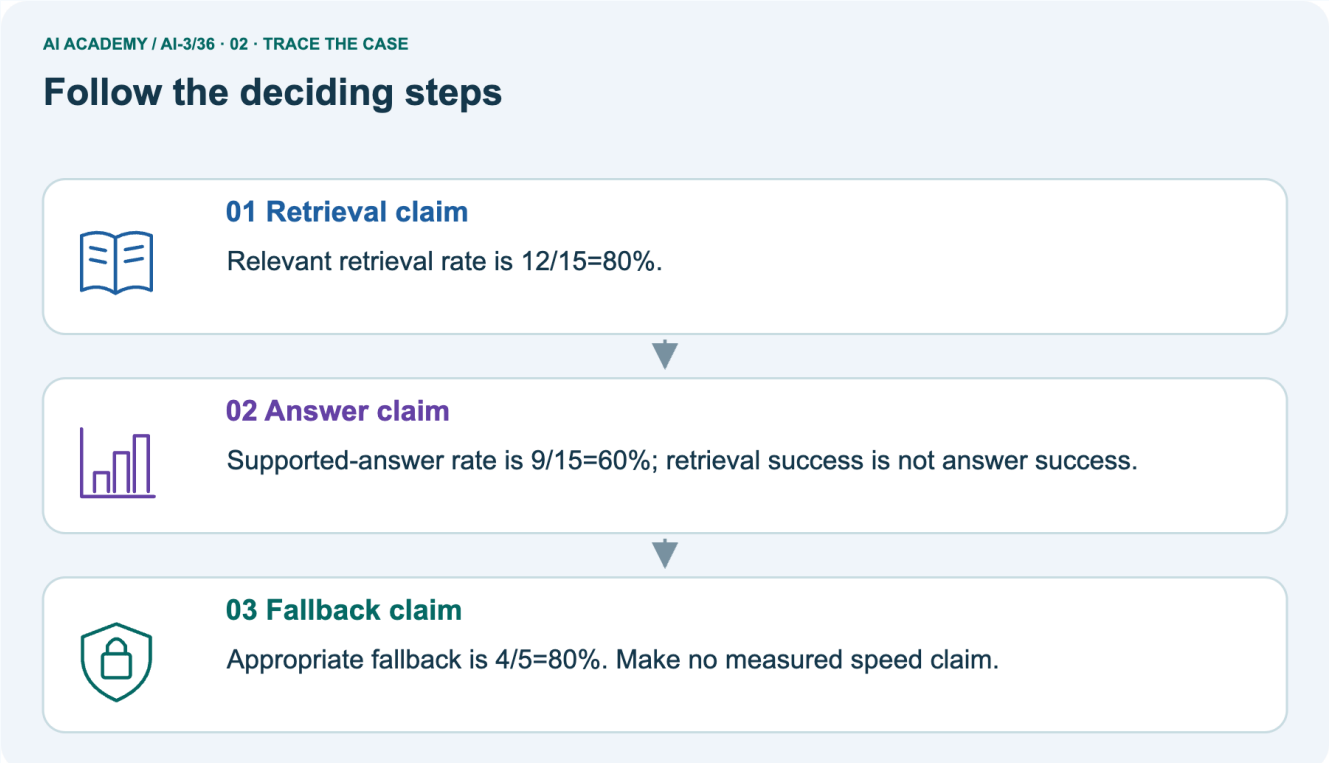

Defend a study-buddy project using separate claims and matching **evidence**. Supplied facts: Set A: 15 answerable questions, with 12 relevant retrievals and 9 supported answers.

Separate set B: 5 missing-source questions, with 4 appropriate fallbacks. No speed measurements exist. All **input**s and outcomes in this worked example are invented classroom data; no real model run is claimed.

> Point to the given fact that matters most. Explain why it matters.

My picture explanation, deciding evidence and one limit

02. Follow the deciding steps

Follow the labelled picture with the matching explanation. Open the vector diagram

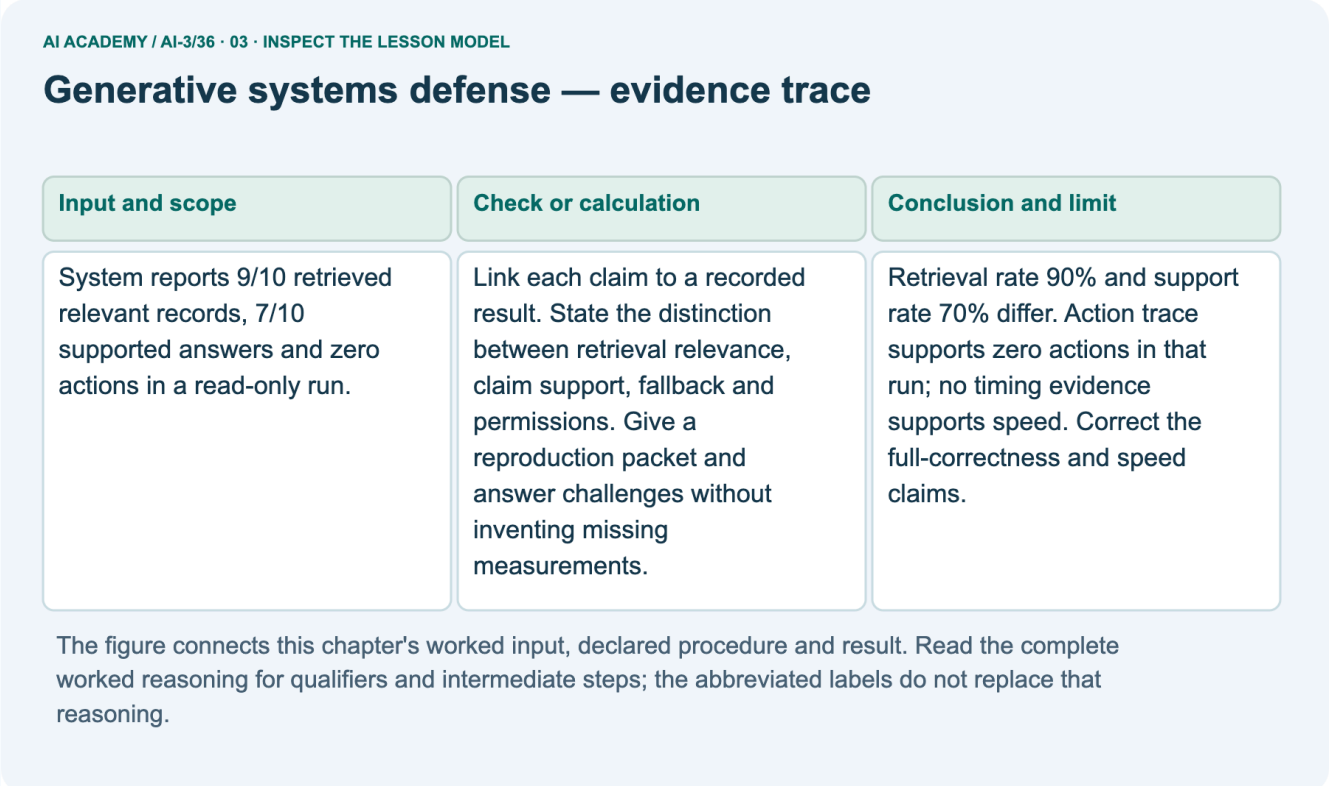

Retrieval claim: Relevant retrieval rate is 12/15=**80%**. → Answer claim: Supported-answer rate is 9/15=**60%**; retrieval success is not answer success. → Fallback claim: Appropriate fallback is 4/5=**80%**.

Make no measured speed claim.

> Point to each numbered stage and explain which recorded **input** it uses.

My picture explanation, deciding evidence and one limit

03. Generative systems defense — evidence trace

Follow the labelled picture with the matching explanation. Open the vector diagram

Generative systems **defense** — **evidence** trace. System reports 9/10 retrieved relevant records, 7/10 supported answers and zero actions in a read-only run. | Link each claim to a recorded result.

State the distinction between retrieval relevance, claim support, fallback and permissions.

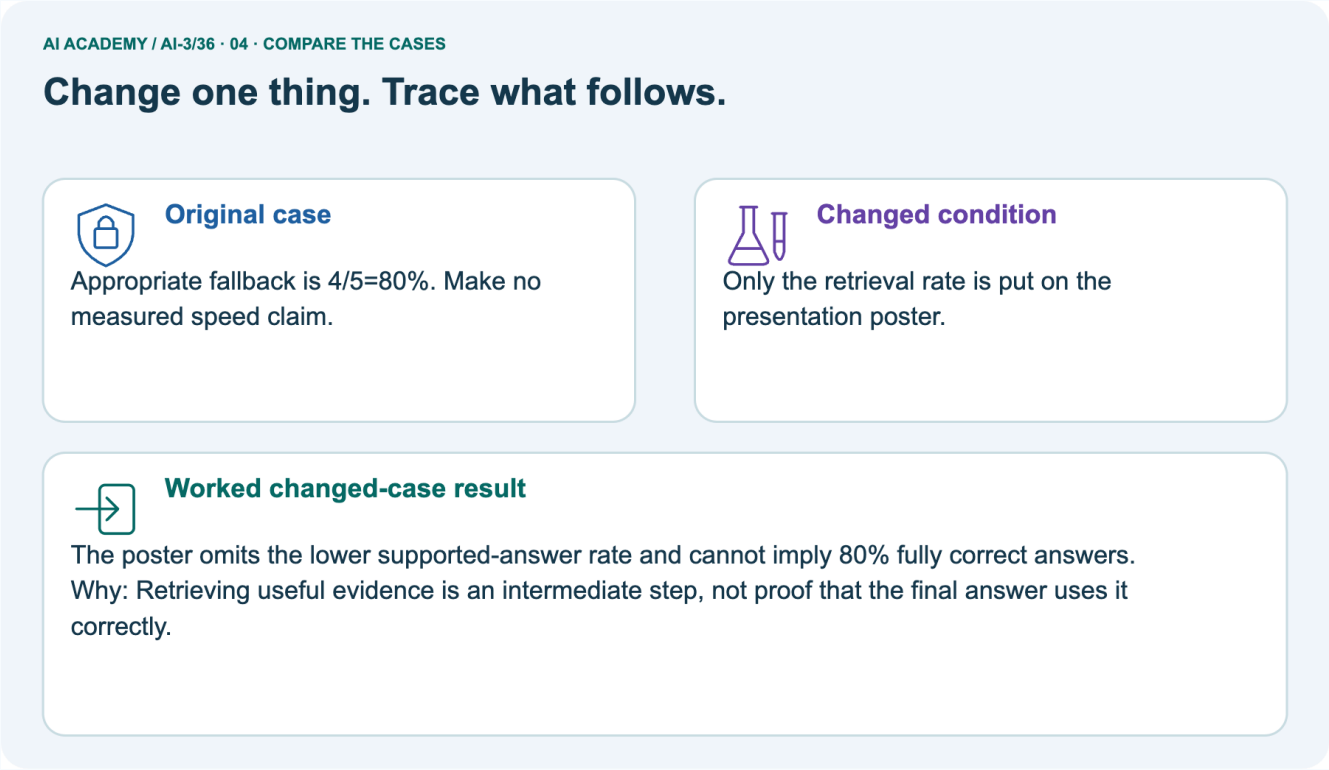

Give a **reproduction packet** and answer challenges without inventing missing measurements. | Retrieval rate 90% and support rate **70%** differ. Action trace supports zero actions in that run; no timing **evidence** supports speed.

Correct the full-correctness and speed claims.

> Read the labels and values. Explain the relationship the model shows.

My picture explanation, deciding evidence and one limit

04. Change one thing. Trace what follows.

Follow the labelled picture with the matching explanation. Open the vector diagram

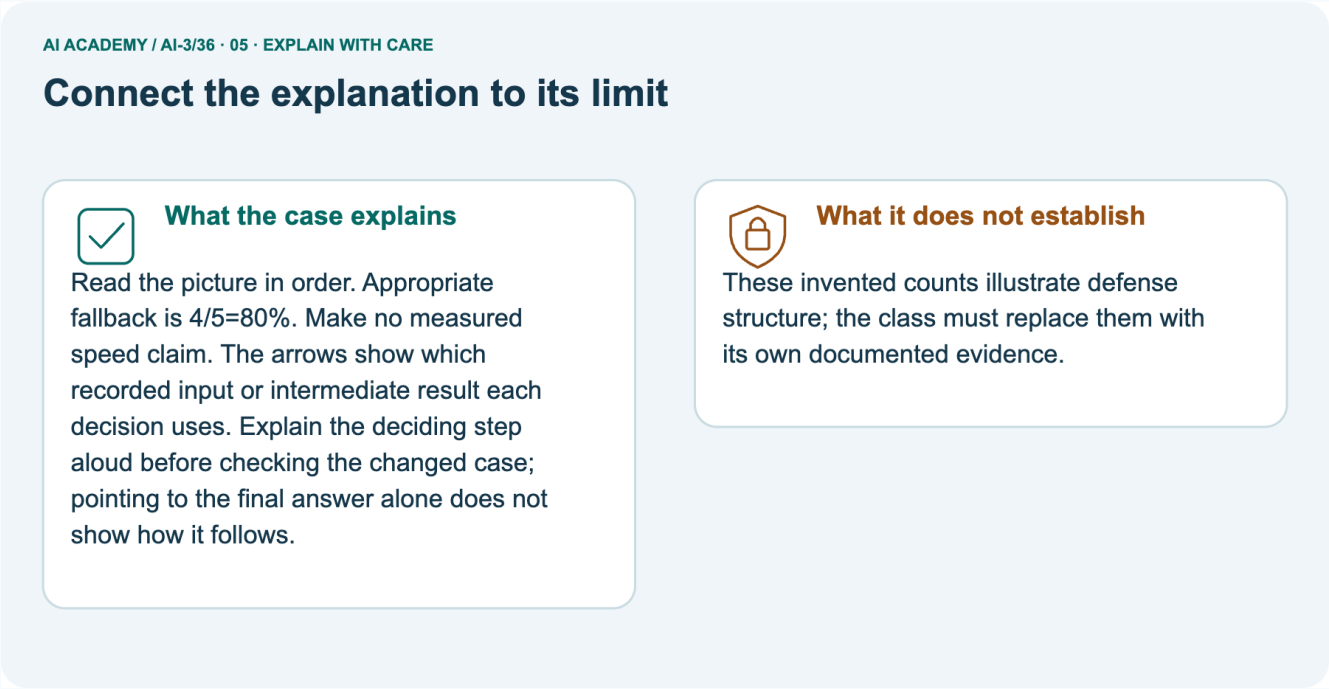

Original case: Appropriate fallback is 4/5=**80%**. Make no measured speed claim. Changed condition: Only the retrieval rate is put on the presentation poster.

Expected result: The poster omits the lower supported-answer rate and cannot imply **80%** fully correct answers. Reason: Retrieving useful **evidence** is an intermediate step, not proof that the final answer uses it correctly.

> Predict before checking the worked changed-case result. Name what changed and what the supplied facts allow you to conclude.

My picture explanation, deciding evidence and one limit

05. Connect the explanation to its limit

Follow the labelled picture with the matching explanation. Open the vector diagram

Read the picture in order. Appropriate fallback is 4/5=**80%**. Make no measured speed claim. The arrows show which recorded **input** or intermediate result each decision uses.

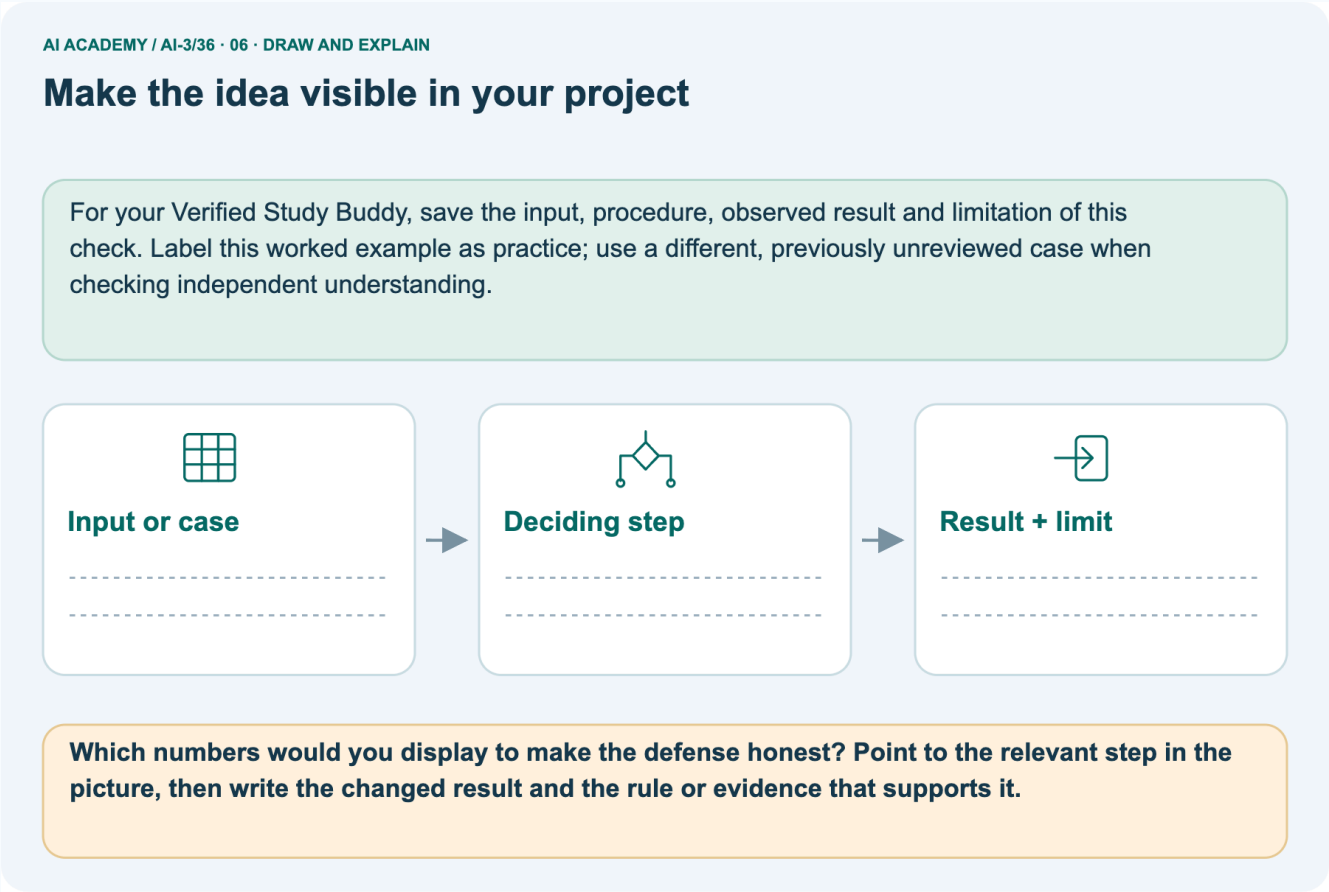

Explain the deciding step aloud before checking the changed case; pointing to the final answer alone does not show how it follows.

Limit: These invented counts illustrate **defense** structure; the class must replace them with its own documented **evidence**.

Explain the case, then point to a limit on the claim.

My picture explanation, deciding evidence and one limit

06. Make the idea visible in your project

Follow the labelled picture with the matching explanation. Open the vector diagram

For your Verified Study Buddy, save the **input**, procedure, observed result and **limitation** of this check.

Label this worked example as practice; use a different, previously unreviewed case when checking independent understanding. Draw your **input**, deciding step, result and limit.

Supported question: Which numbers would you display to make the **defense** honest? Point to the relevant step in the picture, then write the changed result and the rule or **evidence** that supports it.

Draw your project trace and justify the deciding step using **evidence**.

My picture explanation, deciding evidence and one limit

Save or print your responses for your portfolio. Progress and drafts on the hosted website stay in the current browser. Use only fictional or teacher-approved data.
